Executive Committee—T. A. Nichols, Burlington; D. A. Stauffer, Iowa City; W. B. Baumgardner, Dubuque; G. S. Johnston, Tama; F. W. Ritter, Hedrick; Thomas Gadd, Des Moines; F. P. Bollinger, Afton; Charles Swaine, Council Bluffs; W. H. Millard, Cherokee.

President S. R. Miles, Mason City, and Secretary H. C. Vincent, of Ft. Dodge, were renominated for national delegates.

TREASURER'S REPORT.

Report of the treasurer of the association showed receipts from May 1st, 1903, to February 8th, 1904, to be $701.19, and disbursements $306 08, leaving a balance in the treasury of $305.11. This report was referred to the Auditing Committee, who vouched for its correctness, but advocate the opening of a new set of books and the adoption of a voucher system which would make it possible for bills to be paid promptly, avoiding delays which had occurred under the present system.

OFFICERS FOR 1904.

Notwithstanding the fact that President Miles earnestly repeated his request that he be not re-elected, the Nominating Committee, of which J. F. Doty was chairman, forced his re-election, which was greeted with the most vigorous applause that had characterized any action during the whole three days' session. The new officers of the association are as follows:

PRESIDENT, S. R. Miles, Mason City.

VICE-PRESIDENT, H. S. Vincent, Ft. Dodge.

SECRETARY-TREASURER, A. R. Sale, Mason City.

BOARD OF DIRECTORS: T. A. Nichols, Burlington; D. A. Stouffer, Sioux City; W. B. Baumgartner, Dubuque; U. S. Johnston, Tama; F. W. Ritter, Hedrick; Thomas Gadd, Des Moines; F. P. Bolinger, Afton; Charles Swain, Council Bluffs; W. H. Millard, Cherokee.

EXECUTIVE COMMITTEE: S. R. Miles, Mason City; C. P. Gadd, Des Moines; W. B. Baumgartner, Dubuque.

DELEGATES TO NATIONAL CONVENTION AT INDIANAPOLIS: S. R. Miles, Mason City; H. S. Vincent, Ft. Dodge.

DATE OF NEXT MEETING.

The president announced that an effort had been made at the last meeting of the National association to induce the Iowa association to waive its fixed date of meeting so as to permit arrangement of dates by all associations, so that there would be no conflict of dates, but that he then stated and was still firm in the belief that it was wise for the Iowa association to retain its fixed date of meeting, namely, the second Wednesday in February of each year. This action of the president was unanimously adopted. Des Moines will be the next place of meeting, but it will be left to the Executive Committee to name what hotel shall be selected as headquarters.

The convention adjourned at 12:30 P. M.

The board of directors Hardware association and insurance met at the Kirkwood Hotel at 2:30 P. M.

Editor—I am sorry to hear, parson, that you are displeased with the church announcements in our last issue.

Parson—Displeased! Read this, sir. "Next Sunday evening the Rev. Mr. Parsons will speak upon the devil. The address should be well worth hearing, as Mr. Parsons is always full of his subject!"—*New York Sun.*

INDIANA RETAIL HARDWARE DEALERS' ASSOCIATION.

The fifth annual convention of the Indiana Retail Hardware Dealers' Association was held at Indianapolis, at the Dennison Hotel, on Tuesday, Wednesday and Thursday, February 16th, 17th and 18th.

TUESDAY AFTERNOON SESSION.

The meeting was called to order at 2 P. M. by the president, Edward M. Bush, Evansville, who occupied the chair. He welcomed the delegates in the following remarks:

PRESIDENT BUSH'S WELCOME.

Hardware merchants, members of manufacturing and jobbing concerns, traveling men, and last, never least, those representatives from other States of our trade papers, who have so loyally supported our cause, and in many ways extended courtesies to this association: To you all, in behalf of the Indiana Retail Hardware Dealers' Association, I extend a most sincere and cordial greeting.

The traveling representatives do I desire to thank for their efforts to increase our membership, by urging those not members to become so, and for assistance to our association rendered in many other ways. I ask these gentlemen to report to the officers the arrival of any whom they know to be new to our assembly, that we may give all such a hearty welcome. One favor I beg, gentlemen, that you wax not so eloquent in talking your wares to our membership as to delay them in prompt attendance at the openings of these sessions. If you will assist us in promptness by closing your rooms five minutes before our opening hours, we agree to close promptly and thus afford you ample time between sessions to get in your work.

To the members, both to those who have been with us before and to the recruits, whom I most heartily welcome to our ranks, let me say we have arranged an interesting programme in addresses and discussions, not one of which can you afford to miss. Above all, I urge promptness at all session hours. Let not those in attendance be disturbed and annoyed by late arrivals. I shall practice what I preach. Your president must earn his salary. Our session this afternoon is an open one and all present are invited to remain. Again, gentlemen, I greet you.

The president also congratulated the members of the association upon the large increase in membership since the last convention and particularly on the fact that the enthusiasm manifested by the members present gave promise of the most successful meeting in the history of the association.

At the conclusion of his remarks he was surprised by the presentation at the hands of ex-President Lewis, of New Albany, of a handsome ebony gavel, finely mounted in silver. The presentation was made with a very neat little speech by ex-President Lewis and replied to with equal aptness by the president.

Ex-President Lewis was next on the programme with an excellent address christened

OBSERVATIONS

from which we give a few extracts.

* * * * * * * * * * *

This life is a mystery. Science, history and philosophy, alike, in their respective spheres, have struggled to solve the puzzle, and all have failed, or, at least, have had only partial success. It is, therefore, without humiliation that I confess my inability to understand why so many Hardwaremen, whose vital commercial interests are bound up in the success of this movement, are indifferent, careless and withhold that personal magnetism, which, if freely contributed by every member, would quickly develop an organized influence that would move the powers that be; would, in fact, become one of the powers that be. I think modesty is the key.

* * * * * * * * * * *

THE ISSUES OF THE HOUR

are pressing on every man; the spirit of Brutus would scorn the craven who bears not arms in his own defence. Argument is divided into three parts—discussion, contention and fight. Discussion is argument at 60 degrees F. Contention is argument at blood heat. Fight is argument white hot. Our State and National Associations must be trained in argument. We carry no chips on our shoulders, and we desire all negotiations sung in the discussion register, but we must occasionally have "the last word," and have these last words heard and heeded.

WHAT ARE THE OBJECTS OF OUR ORGANIZATION?

The objects of our organization are to obtain from the manufacturer and jobber that recognition, consideration and protection which is our due, and by free and friendly conference learn the best business methods.

Are these objects more firmly established to-day than when we were first organized? They are.

Can these objects be more firmly established in the future than they are to-day? They can.

What influence has been the most effective in this movement? State and National Hardware Associations.

Are these associations growing? Yes, rapidly.

What is the influence of those Hardwaremen who are not members? Highly injurious to themselves.

Is there any sufficient reason why all Hardwaremen should not become members? There is not.

Will these associations flourish for a year or two and then vanish in thin air? As long as this old world, increasing, expanding, developing, demands Hardware there will be found in commanding importance the Hardware association.

But in all seriousness permit me to state one more question.

HOW CAN OUR STATE AND NATIONAL ORGANIZATIONS BECOME MORE EFFICIENT?

This question is never closed. It will never down. It is the first one to rise and beckon the attention of an administration as it takes up the reins. It rides on the box with the driver through all the days of administrative toil, and at the close of one is ready, lusty and strong to assault the incoming executive of another. But let it come. It has been met and will continue to be successfully met. To one who remembers the beginning of this association, when some five years

E. M. BUSH, PRESIDENT.

ago in the city of Evansville, at the call of a few Hardware dealers in Southern Indiana, a score or more earnest men met and brought into being that which has become this magnificent organization. It certainly seems that some one has been answering this question—if increase in membership indicates efficiency. But numbers alone do not represent the climax of efficiency. If every member here will have inscribed on his next purchase of stationery: "Members of State and National Hardware Associations;" if every member will display conspicuously in his store a sign bearing this same inscription, "Members of State and National Hardware Associations;" if every member will read carefully each circular letter sent out by the officers of either State or National Association, and act at once on their recommendations whatever they may be, it will soon be clear that our organization is a power. To me it is clear now that an impression had been made.

* * * * * * * * * * *

LET US CLOSE RANKS.

Let us move forward, without noise of fife or drum, without pomp and pageantry, but noiselessly as the springtime comes, and as surely, too. Let us stand for non-interference with consumers. Let us stand for our constitution Let us stand for justice, the corner stone of American diplomacy and American supremacy.

He was followed by A. F. Sheldon, of Chicago, who is proprietor of the School of Scientific Salesmanship, and his speech gave an outline of the characteristics upon which his school methods were made successful. We print a few excerpts.

Salesmanship is more than the mere disposition of goods. It is, in its broad sense, the sale of goods for profit. More specifically expressed, salesmanship, in the abstract, is that power, born of the combination of positive qualities, mental, moral, spiritual and physical, which enables him who posseses it to successfully persuade a large proportion of those whom he solicits to purchase at a profit that which he has to sell. Four factors enter into every sales transaction: The salesman, the customer, the article to be sold and the sale itself; and a combination of basic laws, truths and principles enters necessarily into these four factors.

Digitized by Google

3. To properly define and establish our relations to jobbers.

4. To develop a defense against mail order catalogue houses, who pay no taxes in our respective communities and handle inferior goods.

5. A National Association, and proper representation in same.

Do you not agree that some progress has been made in each of these directions? Greater in some than others. In none of them as much as we want, but Rome was not built in a day.

Let us study these for a moment. Has this association convinced its membership that our interests are mutual? Has it at all lessened destructive and senseless competition? The very fact of this large assembly is sufficient reply. Could men like these before me mingle together, exchange ideas, engage in discussion, review the evils from which we learn we all suffer alike and can only overcome by concerted action—could you do this and not find that in union there is strength?

* * * * * * * * * * *

FRIENDLY RIVALRY IN BUSINESS BRINGS ITS REWARD,

makes you a more alert, a keener business man, increases your stock, enlarges your building and builds up your bank account. Determine to sell to your own community all its Hardware. You have better facilities for learning the value and quality of goods than has the chance consumer. You probably know him, may live near him. If properly approached and handled, he is more apt to buy of you at the same figures, or even a little more, than to send away, and often you can not only make a little profit yourself but save money for him. Illustrating this fact, let me give you a personal experience happening since our last meeting. Hearing that certain fixtures were needed for a new building in my city, I familiarized myself with the goods, butted in, got a hearing, succeeded in landing the contract for $850, upon which was a neat profit. Was then told by the purchaser that in 48 hours more he would probably have closed the contract with Eastern parties for the same kind of fixtures for $1,400, not knowing they could be bought through home parties. Need I tell you the E. M. Bush Hardware Company holds that firm as a customer, and before this same building was completed furnished about $600 worth of other Hardware? It pays to get out and hunt up business.

* * * * * * * * * * *

I detect no fear in this association that the evils cannot be overcome. But with prosperous times and a good business comes a willingness to wait for the fruits of our campaign of education. Promulgated through addresses in our association meetings, State and National, published through our trade papers, through the correspondence of your secretaries, personal remonstrances to traveling salesmen and heads of firms, and we expect much from the advice and support we are beginning to receive through the officers of the National Jobbers' Association.

* * * * * * * * * * *

If any member of this association has in the past, or shall in the future, suffer injustice at the hands of jobber or manufacturer, it is his duty to report it to our secretary. Let me remind you that the complaint must be one which you shall be in a position to prove, a strong case, lest the association be unjustly brought into a fight which, when sifted, is found to be only a personal grievance; and so bring us into disrepute where we most need the force and strength of fullest respect. It places your officer who lodges this complaint with the transgressor in a very embarrassing position if he finds himself without the support of a just cause.

* * * * * * * * * * *

AS THE VAST INFLUENCE OF THIS ASSOCIATION

business comes up before me more and more, it is beyond comprehension why so many dealers in the State sit supinely by, letting a comparative few do the brunt of the work of saving their business from utter destruction. Can they not see? I sometimes think we must adopt the methods of certain good ministers we know, who, conducting revival meetings, talk at first only of love, grace, penitence, etc. When all possible have been reached through these persuasive means they go after the rest with pictures of brimstone, hell fire and damnation. Have we reached the hell fire stage of our work for new members?

If unable to attend these conventions, will not our fellow dealers help the good work with their membership and dues? This campaign of education costs something. What a power would every State organization be if 90 per cent. of the retailers were enrolled as members.

When the next panic and depression of business comes we will realize the greatest benefits from large and compact membership. Does any one within the sound of my voice believe that we would be suffering to-day from the evils we have had we been able to throw united ranks against them? We have had years of plenty; let us prepare, by larger membership, closer organization and greater efficiency in our work, for the years of famine, which may not be far off.

* * * * * * * * * * *

Secretary M. L. Corey, Argos, then read the

SECRETARY'S REPORT.

WEDNESDAY AFTERNOON SESSION.

The Wednesday afternoon session was called to order at 2.10 P. M., and in response to a question, President E. M. Bush said that the residences of Hardware dealers would not be insured.

Sharon E. Jones, Richmond, in speaking on the subject, said that he thought if a member applied for $6,000 insurance the Indiana Association should write him the policy and then reinsure part of the risk in another company.

M. L. Corey, Argos, said: "This matter can be easily arranged. I have recently received a letter from the Ohio Hardware Dealers' Mutual Fire Insurance Company, in which they state that when we are organized they will throw us considerable insurance."

Secretary Corey then read a detailed statement of the condition of this Ohio Hardware Dealers' Mutual Fire Insurance Association, in which he stated that their total assets were $49,483 and their losses were $414, but in spite of this disparity they had only paid a 20 per cent. dividend last year.

M. L. Corey, Argos, then read his report as treasurer of the association, which showed receipts for the last year of $1,449.71 and expenses of $1,093.98, leaving a balance on hand of $335.73.

Following the reading of the above, we present herewith a few extracts from an interesting paper by J. A. Shapker, Mt. Vernon, on

EVOLUTION OF TRADE.

Some of you perhaps can recall the day when trade was sought by taking wagon trains to the West, carrying their goods with them, and bringing back gold or other merchandise in exchange. Soon the railroads and steamboats took the place of this slow traffic, and the commercial traveler was introduced, followed quickly by every wholesale merchant and manufacturer, who sent their salesman "on the road" in quest of trade. For many years the retail merchant was the legitimate channel through whom all commodities reached the consumer. Rapidly the evolution of trade has been sought; enterprises have started, who herald their goods through the metropolitan dailies and magazines, until, with the beginning of the twentieth century, we find ourselves face to face with the mail order houses going into the homes of our customers and selling all kinds of merchandise for cash only.

THE PROGRESSIVE RETAIL MERCHANT

has kept pace with this evolution and has learnt to "go after trade." It is well that he should emulate the example of the larger and successful houses, who advertise systematically, who have equipped their offices with modern "follow up" systems and modern appliances, such as typewriters, adding machines, addressing machines, dupligraphs, etc. If single firms find it necessary to use these in great numbers, they are more necessary to the retail merchants, many of whom, by reason of forced economy, must personally manage all the details of his business.

SOLICITING TRADE.

I was invited to outline the method employed by our firm in soliciting trade. We are visited by at least a dozen Hardware salesmen, six or eight of whom call every two or three weeks. I have been told by one of them that he calls on 120 merchants. Now doesn't it strike you that if the jobbing house he represents find it expedient to send their salesmen to these merchants so often it would be profitable to the retail merchant to get into closer and more frequent touch with his trade? Following the example thus set forth, we undertook to reach 1200 families every three weeks with a personal letter.

MAILING LIST.

To obtain a perfect mailing list we sent out a young man to follow the rural delivery wagons, who recorded the names on the mail boxes, and if he passed a house having no box he made it his duty to get the name of the occupant. Thus we were equipped with the list, while others waited until the Post Office Department posted the names for public benefit.

* * * * * * * * * * *

CASH TRADE.

I will not attempt to outline any particular plan toward this end, but believe the time ripe for earnest consideration by the retail merchant to put himself in position to meet the competition of the mail order houses and department stores, that have a distinct adantage by selling strictly for cash, which enables them to buy for cash, giving a profit which many a dealer cannot always avail himself of. Ask your friend who is engaged in doing a cash business how he feels every night when he turns the key in the door? You will certainly admit his lot is an enviable one. It is undoubtedly the secret of success in this age of volumes at small profits. Verily, it is a twentieth century method. For several years it has been the custom of our firm to give register checks with each cash purchase, entitling the holder to a rebate of 2 per cent. in cash or trade. We do not wait to be asked for the checks, but insist on the purchaser receiving them, and would even follow him to the door, thereby reminding him that his cash trade is appreciated. Yet our cash trade is far from what it should be. This situation prevails in most of the smaller towns, and the sooner the loose credit system is abolished the better it will be for merchant and purchaser. Why do we permit it when our jobber, from whom we buy thousands of dollars' worth of goods, insists upon the payment of his account when due? Why do we encourage this loose credit system, when we are refused credit by the cash stores? It is lack of nerve; fear of hurting the other fellow's feelings, or losing his trade. If a customer owes you and shows no inclination to pay, by all means cut him off. If you continue to credit him you will lose out, three times in five. But, suppose he pays you in the end, is the profit worth the trouble and worry? You would not think of loaning him $1 each month for a year, yet you let him have $25 to $50 worth of merchandise and then go to your treasury for the cash to replenish your stock.

EVILS OF CREDIT.

The credit business sums up the following evils:
Requires a double cash capital.
Inability to discount your purchases.

Digitized by Google

THE SALESMAN.

In speaking of the salesman, I put emphasis on the man, for it largely follows that if you take the man right the sale will take care of itself. You gentlemen before me know that it is not always easy to get the right kind of man, but I am here to tell you that if you cannot get the man you can make him. The two foundation stones of success in a salesman are

CHARACTER AND HEALTH.

By character I do not mean negative goody-goodness, but rather that magnetic force, that real manhood, born of the combination of positive qualities, mental, moral, spiritual and physical, the natural product of which is the ability to persuade. By health we mean more than the ability to eat three square meals a day, or mean the harmonious condition of the triune man, body, mind and soul, which enables the physical organization to perform its functions properly, and which promotes the development of positive qualities to a marked degree. The development of these qualities rests on the bed rock of education; not necessarily a college education—a good thing, get it if you can—but in a larger way upon education in the school of hard knocks. Education is a drawing out of man's latent faculties and qualities; it is knowledge mingled with experience; it makes the man who not only looks, but sees; who not only hears, but understands.

The true salesman makes a logical, complete analysis of every article to be sold, picks out the salient features and arranges them so that they will appeal to the mind of the customer. When you have taught your clerks to do this you have done much to make salesmen out of them. The day of the success of human wind mills or walking talking machines has passed. It's the solid man who sells the goods—the logician. Every time the successful salesman opens his mouth to talk he really says something.

THE SALE ITSELF.

The mental law of sale necessarily goes through four processes: First, attention; second, interest; third, desire; fourth, resolve to acquire. This law is explained as follows: Attention properly sustained changes into interest; interest properly intensified becomes desire; desire made strong enough is changed to the resolve to buy.

ADVERTISING.

Advertising is the fire under the boiler of business, and if you wish to make the business you must make the advertising hot. The man who advertises a little and says it doesn't pay, is like a man who built a little fire of kindling wood under a great tank of water, and when it didn't heat declared that fire wouldn't heat water.

Mr. Sheldon received through the President the thanks of the association for his able address.

Raymond Van Camp, President of the Van Camp Hardware & Iron Company, on behalf of Indianapolis manufacturers and jobbers, invited the members of the association to attend a banquet to be held on Wednesday evening at the Hotel English.

A number of travelling salesmen and other manufacturers' representatives were invited to address the convention, which opportunity was taken advantage of by H. W. Beagle, of Rochtester Stamping Company, N. Y.; Frank Wells, of E. C. Atkins & Company, Indianapolis; Charles B. Howland, local manager for J. E. Porter Company, and a number of others. The president, previous to adjournment, appointed the following committees.

COMMITTEES.

The following committees were announced by the president:

Resolutions and Communications.—J. L. Fulton, Portland; N. R. Stoner, Rochester; M. Reigenbaugh, Huntington.

Auditing.—J. D. Deprez, Shelbyville; A. W. Smith, New Ross; W. E. Campbell, Hartford City.

Grievance.—George F. Weinland, Hope; W. E. Ballard, Muncie; J. Shanklin, Jr., Frankfort.

Insurance.—A. N. Shidler, South Bend; H. T. Trueblood, Washington; T. J. Lindley, Jeffersonville.

Sergeant-at-Arms.—A. H. Burkett, of Gosport.

The session then adjourned, to meet at 10 o'clock on Wednesday morning.

WEDNESDAY MORNING SESSION.

The President then delivered his annual address which was an exhaustive, well written document of high grade reasoning, and was received with every indication of approval.

PRESIDENT'S ANNUAL ADDRESS.

The address was in part as follows:

Before going further into the business which lies before us, let me pay my respects to my predecessor in this office, who last year stood before you in this place, our past eminent commander, W. P. Lewis, of New Albany, a most worthy one, following whom I have, indeed, found a most difficult talk. But if I have been able to bear in such as to meet, in any way, your approval, the honors and labors which he laid down one year ago, then, truly, shall I feel that this has been a year of growth and profit to me.

This same year has, I take it, brought a profitable business to us all, for the demand for, and consumption of goods have been up to the average of such years in the past. Since late fall, however, has come a halting in both output and consumption of the furnace and mill products. Into what this may develop in the next few months none can tell. The Louisiana Purchase Exposition and Presidential year may affect retail business to some extent.

A. N. SHIDLER, FIRST VICE-PRESIDENT.

M. L. COREY, SECRETARY-TREASURER.

* * * * * * * * * * *

LET US PURSUE A WISE POLICY,

be somewhat conservative in the quantity of our purchases, not, of course, to the point of empty shelves or broken stock—that is always bad business. Watch stock closely, buy often, but cautiously.

I am neither a prophet nor the son of a prophet, but I expect no radical reduction in merchandise. Should it come, trimmed sails are safe, and small but frequent buying a very good motto. And while buying is before us, let me ask how many of you insist that goods regularly sold by list and discount shall be so figured upon your invoices? Those doing otherwise make a grievous error, as far as profits are concerned.

WAS THERE NEED FOR OUR BIRTH?

Have we a right to permanent being? If so, what additional plan should be made to assure a progressive and beneficial existence? With so many earnest faces before me these first questions seem puerile, when I recall that less than five years ago, in June of 1899, this association was formed at Princeton with 19 charter members and christened the Southern Indiana Hardware Dealers' Association. In nine months this lusty infant had tripled its size, having 57 members, when in February of 1900, in my own home city, at the solicitation of many men from the northern part of the State, it was discovered to be fitted for a wider existence and rechristened the Indiana Retail Hardware Dealers' Association. Under the title of "Appeals for Membership" our objects and needs of organization were set forth by a committee at large, the ten clauses of which I present to you condensed into five, briefly, as follows:

1. To make clear the fact that, as dealers, our interests are mutual, not antagonistic: to lessen destructive and senseless opposition, which is not competition.

2. Through association work to discuss questions which vitally affect our welfare.

Digitized by Google

Lost accounts.

Adds greatly to your office expense.

Breeds dishonesty, wastefulness.

When your customer owes you, he avoids your store.

If you dun him in 30 days he's mad and asks: "Are you afraid you're not going to get the money?"

If you wait six months, he's mad and says: "Why didn't you present this account sooner?"

If you sue him, he becomes your enemy.

What's the remedy? There's only one, sell for cash, or upon such terms whereby you are sure to get your money at a specified time.

Commence at once by restricting your credits. And encourage cash trade at your store by paying cash yourselves for groceries, meats, dry goods, doctors, lawyers, etc.

WEDNESDAY EVENING.

Wednesday evening was devoted to a banquet at the Hotel English. The floral decorations were exquisite.

The following Indianapolis firms subscribed to this banquet: E. C. Atkins & Co., Inc.; H. T. Conde Implement Co., Union Selling Co., Tanner & Co., A. Burdsal & Co., Central Supply Co., Crucible Steel Co. of America, Van Camp Hardware & Iron Co., Duckwall-Harmon Rubber & Supply Co., Fairbanks-Morse & Co., Holliday & Wyon Co., Home Stove Co., Indianapolis Stove Co., Knight & Jillson Co., Indianapolis Saddlery Co., Layman-Carey Co., Daniel Stewart Co., Tucker & Dorsey Manufacturing Co., Taylor Belting Co., E. H. Tripp, Parry Manufacturing Co., Union Transfer & Storage Co., Vonnegut Hardware Co., Capital Paper Co., Udell Woodenware Co., Standard Paper Co., American Buncher Co., Indianapolis Tent & Awning Co., Gates-Osborn Carriage Co., Atlas Paper Co., Hollweg & Reese, Chas. E. Pearson & Co., Winter & Hill, American Wire & Steel Co.

THURSDAY MORNING SESSION.

The Thursday morning session was called to order at 9.30 A. M. and Louis C. Bartholomew, of Michigan City, read the following paper on

ADDING SPECIALTIES AND SIDE LINES

from which we give the following:

Alertness is essential to success. To prosper you must have your eyes open and keep abreast of the times. Keep out of the ruts; they are easy to fall into, but not so easy to get out of. Do things in a different way from your competitor. No retailer lives up to his own possibilities who does not keep on the watch all the time for new lines to add. This habit of theirs forms the best part of your capital. They are equally ready to buy other lines if you will let them. Do not be afraid to try new ways and new goods. Be as good a merchant as you can and success will come to you. Study your trade. Endeavor to anticipate its wants. Study your stock. Endeavor to keep it clean and free from stickers. The modern successful merchant uses his every effort to keep in touch with what is going on in his lines. He is a subscriber to two or three of the trade papers. He reads them carefully. He examines with care the good advertising that comes within his reach, selects from it the best ideas and methods, and adapts them to his own use, taking care to instill into them as much of his own originality and personality as possible. He leaves no avenue unexplored where the extension of his trade is possible.

He adds side lines and specialties as often as he can. Capital and space are his only limits. The importance of this question of adding specialties and side lines is not disputed and only half appreciated. The reason why a man with a small stock of variety goods can hold his own against concerns that have dollars where he has dimes is simple. Every penny of his capital is in

QUICK TURNING GOODS.

The variety store handles nothing but quick sellers. It omits the heavy staples, which take a lot of money to handle, require a lot of room and on which profit is small.

* * * * * * * * * * *

SPACE IS WASTED.

Possibly some of the last season's goods still hang around. Why not store them upstairs or downstairs, or in some cheap warehouse? Put away your unseasonable goods. Bring them out next season as new, fresh goods.

Why not get along with a smaller quantity of goods on the shelves and carry some of the surplus lots in your storage room? The greatest of all sources of wasted space is overbuying, overstocks, too many goods of one kind on hand. This is also a great source of wasted capital. Every time you buy two dozen of an article when one would have kept your stock filled you waste your capital, for the money that pays for that second dozen might have bought an article you do not now sell and thus have increased your sales.

* * * * * * * * * * *

FISHING TACKLE, HAMMOCKS, GUNS, BICYCLES, BASE BALL GOODS

are generally handled in Sporting Goods stores or department stores. They belong to the Hardware store. Start a Sporting Goods' department yourself. Taking a fishing trip or a hunting trip during your vacation; learn the merits and demerits of the lines you carry by actual experience. Then you can sell a line of Sporting Goods intelligently, and there is profit in Sporting Goods.

* * * * * * * * * * *

A new line added should be judiciously and intelligently advertised. In the newspaper, by well displayed ads. and newsy locals; in the store, by being prominently displayed, and exhibited by proprietor and clerk. And the clerk will not know how to do so, effectively, unless he thoroughly understands the article he is trying to sell. Do not be afraid to explain to your clerk the good points and features of your goods. Do not be half hearted in your explanation. Know your line. Enthuse it a little. Get your clerk enthused.

This was followed by an address on the

NECESSITY AND ADVANTAGES OF LOCAL ORGANIZATION.

By A. N. Shidler, of South Bend, from which we take the following:

The necessity of local organization of any particular line of mercantile business becomes apparent when we point out a few of the advantages to be derived. I say any particular line of business, because every merchant is most interested in becoming informed about the article which he is handling daily and learning how to cope with the knotty problems which constantly confront him. To organize might not be as difficult a problem as to keep up interest in the organization.

* * * * * * * * * * *

While it is not advisable for any local organization to fix prices,

PRICES.

I believe that the Hardwareman, as a rule, is above the average business man in intelligence, otherwise he could not run a Hardware store successfully, and when for any reason prices on a certain article are too low, is ready and willing to place the asking price where the profit will produce a legitimate income on the investment.

With the great number of articles, which only a few years ago were to be found in the Hardware store alone and sold at a good profit, that are now being distributed by the 5 and 10 cent stores or the department store at just about cost for the purpose of leading the public to believe the Hardware merchant to be a robber, it behooves every Hardwareman in this house who is not a member of a local organization to go home and call your Hardware friends together to discuss the best ways and means of doing business at a profit, for without profit you are bound to fail.

COMPETITION.

The time is long past when you should think your competitor is your enemy. He is not, and if he is, make him your friend; meet him socially, at church, or at your political meetings. You can use him, for when you run short on Eight Penny Nails borrow a keg or two, and when yours come in return them at once, and you will find him soon doing the same. Don't ask him to loan you anything which is of a different kind or quality than you can return. Better buy it of him; he will sell it at a profit of 10 per cent. You can sell it at a profit of from 25 to 40 per cent., make some money, and your customer will feel you have done him a great kindness. No legislation can possibly bring the direct results that may be accomplished in local co-operation. Such an organization I believe should take in not only merchants of every line of mercantile trade, but the manufacturer, the lawyers and the doctors; even the ministers might be interested. Let it be if you please, a commercial organization, the duty of which should be to take up all subjects of commercial interest, such as securing the location of factories, interurban roads, arranging for public demonstrations on national holidays, entertaining commercial conventions, regulating the hours of closing business houses, securing such ordinances as will be for the best interests of the town and not for the benefit of a few individuals.

* * * * * * * * * * *

C. A. Ellis, of Carlisle, then read a paper on Hardware Business in a Country Town.

T. J. Lindley, of Jeffersonville, read an interesting paper on

THE INFLUENCE OF LOCAL NEWSPAPERS AND WHY THEY SHOULD BE CULTIVATED

from which we present the following:

The local newspaper is sometimes not regarded with the importance which belongs to it. Some people are apt to regard with undue importance the utterances of metropolitan papers. Of course, in matters national and general politics we naturally expect more authoritative and abler articles from metropolitan papers, for the reason that they have great wealth and can command the highest class of talent. It is also a fact that the editors of great papers are brought more in connection with men who consider, discuss and decide matters of great importance. But this fact should not lead us into the error of belittling the local press.

There is no one who finds out the importance and influence of the local press better than the man who, up to a certain date in his life, always decried the local newspapers, and, suddenly, when a friend or some pet theory is attacked, commenced a vigorous kick, and at once recognized the importance and influence of the local press by his loud protests and utterances against it.

A person living in a small city near a larger city, where the local and metropolitan journals come in competition, soon learns to recognize

THE IMPORTANCE OF THE LOCAL PRESS,

and why it should be cultivated Let the citizen of the small town undertake to break into the metropolitan paper, let him address the communication to the editor of a large paper and one which he has hitherto thought so important and valuable, and see in what a cold, matter of fact way his communication will be regarded. Let him watch the boiling down process, the smallness to which his communication has been reduced and the obscure position in which it is placed, or the insignificance of his utterances in the great mass of matter published, and among the display ads., as well as of many pages in which it is obscured, and then he will understand if there is some value in the local newspaper.

If a citizen of your town walks into a local newspaper office he feels

Digitized by Google

at home. He feels that he is among friends; he feels like a patriot upon his own native soil, fighting for the defense of his country, for he is conscious of being in the right, being where he is entitled to be. He is not embarrassed as when he approaches a potentate, mighty cold and indifferent to his appeals; he feels that he has a sympathetic ear, and that he is talking to one of identical interests, one with whom he has had business transactions and constant intercourse, and a knowledge that they have

MUTUAL INTERESTS

at once places him at ease, and he approaches him and makes the appeal clearly, fully and deliberately without embarrassment.

It is the local press which serves you in every emergency. There you go in trouble; it is there you go in prosperity. If you want to boom any manufacturing enterprise, any railroad project for the development of your town, for your lodge to increase its influence, or if the lodge desires to add to its membership, or to erect a new hall, or in any way advance its interests, the local press is immediately appealed to for help. So it is with our churches; if it is a picnic or a festival, a new carpet or an organ, the local press is found to be useful in furthering every good object. If a raid is to be made on sin by the ambassadors of Christ, the columns of the local paper are used freely and gratuitously in advertising the revival or protracted meeting. The candidates and politicians find also the importance of the local press.

As a rule retail and wholesale Hardware dealers are men of character, good morals and integrity, always interested in any enterprise that will advance the interests of their city.

WHEN A DEALER BUYS ADVERTISING

he wants the best article he can get; he wants to advertise in a paper that is ably edited, has a large circulation and covers all the territory possible for him to draw trade from. Newspapers can do much to attract people to your city and store. The more people brought to a city the more prosperous are all the merchants.

So, clearly, there are many reasons why the local press should be cultivated. Yet in spite of all these facts the people most interested in the local paper are sometimes the last to give it their support, and are frequently known to take several metropolitan papers and shut out their local paper altogether. If there is anything in the argument about the advantages of home trade, surely it makes a strong appeal in behalf of the local press, because the money for the labor is always expended where the paper is printed, and if paid out with one hand for subscription, advertising or job printing, it comes into the other hand and thus remains with you. If by any means you should freeze out your local paper and leave yourself at the mercy of the foreign paper, you would find out more fully than words or arguments could explain why the local paper should be cultivated.

J. L. Fulton, of Portland, chairman of Committee on Resolutions, then made his report in which the usual thanks were extended for the various addresses and other assistance given to the convention. Report was adopted unanimously.

The committee on nominations then made the following report:

President—Edward M. Bush, Evansville.

First Vice-President—A. N. Shidler, South Bend.

Second Vice-President—T. J. Lindley, Jeffersonville.

Secretary and Treasurer—M. L. Corey, Argos.

Delegates to National Convention—E. M. Bush, Evansville; A. N. Shidler, South Bend; T. J. Lindley, Jeffersonville; J. L. Fulton, Portland; H. T. Trueblood, Washington.

Alternate Delegates to National Convention—C. B. Frame, North Manchester; T. N. Layne, Cloverdale; J. G. Duprez, Shelbyville; Chas. E. Hall, Indianapolis; A. Stratman, Huntingburg.

THURSDAY AFTERNOON SESSION.

The Thursday afternoon session was called to order at 2.30 P. M. by President E. M. Bush, Evansville, and the question of district meetings throughout the State was taken up.

President Bush said that he thought these meetings would be a good thing, for if a man once attended a meeting the association had him cinched.

Z. T. Miller, Bloomington, Ill., ex-president of the National Retail Hardware Dealers' Association and representative of the Brand Stove Co., Milwaukee, Wis., then delivered an address entitled "A Survey." This address was largely of a confidential character. After brilliantly and exhaustively leading up to the causes underlying present day commercial conditions, these were critically analyzed and their possible trend was pointed out.

President E. M. Bush, Evansville, then announced the appointment of the following members of the Executive Committee: W. P. Lewis, New Albany; H. L. Fulton, Portland; Chas. E. Hall, Indianapolis.

Secretary M. L. Corey, Argos, took the floor and said: "It is pretty safe to say that we will have the parcels post defeated. We have a man on the ground who reports to me once a week, so they will not be able to steal any march on us. Chairman Overstreet, of the Post Committee says that no snap report will be allowed, as he will hear us before anything is done. We are fortunate in having an Indiana member at the head of this committee." Secretary Corey then went exhaustively into various phases of the parcels post and also went over the meeting held with the manufacturers and jobbers in Philadelphia last May. He paid an eloquent tribute to the work done in behalf of the retailers by President R. A. Kirk and T. James Fernley, of the National Hardware Association, at this conference in May, and also at Atlantic City in November.

The selection of the time, place and hotel of the next meeting was left to the secretary and Executive Committee.

Secretary M. L. Corey said: "This is the best convention we have ever had. We should have a hundred more next year."

The convention then adjourned at 4.30 P. M.

TRADE NOTES.

Potsdam, N. Y.—Howard Gilbert has closed out his entire stock of Hardware.

Scottdale, Pa.—On account of the death of D. S. Morrow several weeks ago, the Hardware firm known as Loucks, Morrow & Company has been dissolved and will now do business under the name of The Loucks Hardware Company. The new company will no doubt keep the store at as high a standard as it has been in the past.

Cape Ann, Mass.—An extensive change of business will occur shortly when D. Chester, Roger H., and Horace J. Tarr will assume the large stove, plumbing and steam fitting business of the estate of the late L. E. Smith, in this city and Rockport. For many years D. Chester Tarr has been in charge of the repairing and manufacturing end of the big plant in this city. Roger H. Tarr for many years has been sole manager of the Rockport branch of the business. Horace J. Tarr has attained a high reputation as foreman and director of the contract department, relating particularly to the installation of large plumbing and heating plants and has been more directly connected with the real work of the concern. The new partnership will continue under the name of the L. E. Smith Company and will continue to occupy all the present quarters. One change only will be made, and that is the discontinuance of the present Hardware store on the corner of Main and Water Streets. The Hardware department will be removed to a large addition 40 by 60 feet in size, which will be added to the rear of the present stove salesroom and repair department, and work on which will be begun at once.

Ironton, Ohio.—At the annual meeting of the directors of the Kelly Nail & Iron Company, the following officers were re-elected: President, Oscar Richey; vice-president, I. A. Kelly; secretary and treasurer, T. J. Hayes. The directors of the company are as follows: Oscar Richey, W. A. Murdock, Mrs. Nannie H. Kelly, of Ironton, I. A. Kelly, of Ashland, and Herbert E. Bradley, D. S. Gray and W. W. Franklin, of Columbus.

Rome, N. Y.—At the annual meeting of the Forsberg Spring & Gear Company, H. K. Pell was elected president and A. L. Pell secretary and treasurer. H. K. Pell, A. L. Pell and W. B. Pell were elected directors.

Scranton, Pa.—At a meeting of the stockholders of the Scranton Stove Works the following directors were elected: J. A. Lansing, A. C. Fuller, C. L. Jeffrey, B. E. Watson and J. W. Howarth. Mr. Lansing was re-elected president. Mr. Fuller was again chosen as vice-president and treasurer and Mr. Watson was elected secretary.

Taylor, Texas.—A. Eichel, a Hardware merchant of this city, has sold his Hardware business at Hutto to C. B. Stephens.

Tabor, Ia.—The Hardware and furniture store of W. M. Orr & Co. has been transferred to a new firm to be known as O. S. Bloedel & Company. Mr. Bloedel has for two years been the junior member of the old firm. Associated with him in the new management is Mr. J. C. Wachob from Blanchard, Ia.

Indianapolis, Ind.—Plans for an immense new business structure for the Van Camp Hardware & Iron Company, are being prepared and work will begin with the opening of the spring season. It is to be located at the southwest corner of Missouri and Maryland Streets, and devoted to the storage and jobbing end of the company's great business.

Lebanon, Pa.—Eli Atwood, formerly President and Manager of the Lebanon Chain Works, has purchased the Lebanon Chain Works from the Standard Chain Company and the new concern will be known as the Atwood Chain Works until the Standard Chain Company has abandoned the name of the Lebanon Chain Works, a matter of several weeks, when papers will be filed to secure the old name.

York, Pa.—J. F. and H. O. Neuhaus, Hardware merchants, have bought out A. B. Heathcote, a Glen Rock saddler, and have opened a harness shop in a room adjoining their Hardware store.

SUPERVISION OF TRAVELLING SALESMEN.

By Lyle Merton.

Written for HARDWARE.

The necessity of some kind of supervision of the travelling salesmen is apparent to any employer who has need to employ one or more. The larger number of salesmen he employs the more apparent is the need.

That some one person should be responsible that each man is promptly notified of changes of prices and other details in relation to his work is recognized in every well organized establishment. In fact, it is a

DEPARTMENT BY ITSELF

and should be so considered if the very best results are to be obtained.

In these days of wolfish competition the travelling staff must not be a number of men who may have their own ideas and plans of canvassing and manner of dealing with customers unknown or unsanctioned by their employers; but they must be an organized band of workers, fully trained and disciplined for their several and respective duties, receiving orders, and fulfilling directions of their chief, who must be a master mind, who has skill and judgment and tact to dictate, and authority to execute his ideas.

THE MAN

who best understands the difficulties of the travellers' position usually has had experience himself upon the road.

It is almost an essential requisite for the position. He may not have been a success on the road, but a man of ability, tact and judgment, and therefore too good a man for the house to lose. Such a man often makes the very best man to superintend the travelling staff. The fact of his failure does not necessarily bar him from this work, as some of the very best men holding executive positions could not sell goods if their life depended on it. But at the same time they could successfully direct others.

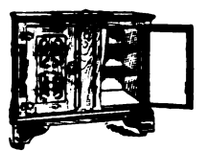
THE MATTERS OF SUPERVISION

are chiefly prices, giving the names of new customers, posting upon the stock, advising about the financial condition of customers, and pushing trade.

Of course every man is thoroughly posted in prices before setting out. He carefully goes over his price book, comparing it with the office book, and making necessary changes and corrections. The man who has charge of the pricing puts all changes as they occur in a memorandum book. The name of the article is merely put down in a column and then a column is left blank for each salesman; who when in the house checks opposite each article as he makes the change in his book. If he should be on the road the changes are sent him by mail and then the items are checked when the letter is sent. Thus a tab is kept on all changes and the notification sent the travelling men. Sometimes a new customer appears on the horizon and the traveller must be notified at once. Or when his customers are getting behind in their payments, these are matters which need the attention of the traveller. He may be required to interview the delinquent and get a statement of his affairs. Instructions in these matters must often be given quickly and at short notice.

The man who has the oversight of these details must know each day just where he can communicate with every man under him, either by telegram, telephone or letter. Matters of importance are continually coming up where the necessity of quick information and decision mean the gain of hundreds of dollars.

THE MAPPING OUT THE ROUTE



is therefore an important part of this person's duty. He thus knows day by day in what town every man is. The traveller each day mails to his house a report which sets out in detail each day's work, giving the name of each customer called on and whether sold or not, and if not the probable reason. Should a customer be from home, the house can send him a letter explaining the fact that the traveller was unable to see him and suggesting that he mail his order in, which would receive the same attention in prices as if given to the agent.

This is not entirely satisfactory, and oftentimes no reply is forthcoming; but it cannot fail of this one object of showing the customer that his account is valued and an effort put forth to retain his patronage.

The man who has charge of the travelling staff must know a good deal about each customer. This information is gained by an acquaintance of the orders shipped him, by conversation with the traveller regarding each man sold, and also by a trip over the ground, oftentimes merely a hand-shake being the only salutation exchanged. But such acquaintance tends to cement the business connection between buyer and seller and explains many difficulties which could not otherwise be explained.

THE "JEWETT" REFRIGERATORS.

The John C. Jewett Mfg. Co., Buffalo, N. Y., are of the oldest manufacturers of reliable refrigerators in the country, having an experience covering half a century; in fact they were the first to give individuality to that line of business by incorporating in their construction every possible improvement the skilled inventors in their employ were able to bring into existence, so that to-day no more perfect articles for household use, embodying so much of inventive excellence, appeal to the modern housekeeper as the refrigerator. Among those of improved construction put upon the market by the J. C. Jewett Mfg. Co. may be mentioned the "Labrador"

"LABRADOR."

which is like two small refrigerators in one, having removable ice chamber in the center, creating a double circulation so that one side may be reserved for cream or butter. They also manufacture the "Jewett" glass lined refrigerator, lined throughout with opal glass and provided with tin wire

"MOHAWK."

shelves. This refrigerator is claimed to be the most sanitary refrigerator on the market as it certainly is one of the handsomest. While manufacturing high grade refrigerators as those we refer to, the Jewett Mfg. Co. also make a lower priced glass lined refrigerator named the "Crystal" and they also make the usual grades of a cheaper kind, lined with

zinc, among which the "Jewett" and "Mohawk" grades are of recognized merit. The continued success of the company in marketing these products of popular appreciation have made it necessary for the last three years to increase the facilities for manufacturing each year. We advise our readers to send for their latest catalogue which will be forwarded on request.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED FEB. 1, 1904.

356,797. FISH TRAP, J. P. Smith, Exeter, N. H.
356,804. CARPET STRETCHER, A. Stockdale, Walcott, Iowa.
356,820. SAW HANDLE, C. W. Boynton, Brooklyn, N. Y.
356,881. SAD IRON, G. J. and J. P. Murdock, New York, N. Y.
356,895. TEA KETTLE, H. Sangster, Buffalo, N. Y.
356,913. MOP WRINGER. L. Bernett, Litchfield, N. Y.
356,925. COMBINATION TOOL, T. E. Chamberlain, Arkansas City, Kans.
356,936. POCKET CORKSCREW, L. B. Haff, Englewood, N.J.
356,966. COMBINED CARVING FORK AND STEEL, B. Rush, Flint, Mich.

PATENTS ISSUED FEB. 2, 1904.

750,802. DOOR CHECK AND CLOSER, W. J. Bryon, Jr., New York, N. Y.
750,849. SCREW DRIVER, J. P. A. Hanlon, Somerville, Mass.
751,093. SASH CORD HOLDER, W. Munro, New Britain, Conn.
751,202. BOLT CLIPPER, H. K. Porter, Chelsea, Mass.

PATENTS EXPIRED FEB. 8, 1904.

357,188. HINGE FOR STEP LADDER, A. Edmondson, John B. Moorehouse, and T. A. Proctor, Skipton-in-Craven, County of York, England.
357,206. FISHING ROD CASE, G. Kamp, Utica, N. Y.
357,245. RATCHET TOOL HANDLE, J. Swan, Seymour, Conn.
357,267. WINDOW SCREEN, J. A. Bryan, Prescott, Ark.
357,298. DEVICE FOR OPENING STOVE DOORS, C. H. Wood and E. M. Brown, Bangor, Me.
357,312. PICTURE CORD AND HOOK HANGER, G. B. Fowler, Brooklyn, N. Y.
357,353. POCKET KNIFE, J. Wiesner, Manchester, N. H.
357,429. TOOL HANDLE FOR INTERCHANGEABLE TOOLS, E. Walker, Erie, Pa.

PATENTS ISSUED FEB. 9, 1904.

751,849. CASTER, J. Etheridge, Hamilton, Ohio.
751,565. COFFEE OR TEA POT, G. E. Savage, J. W. Chapman, Meriden, Conn.
751,601. EGG BEATER, G. J. Angerbower, Forrestville, Conn.
751,809. SASH FASTENER, R. S. Reid, Timara, New Zealand.
751,821. WRENCH, Patrick Toohey, Darragh, Pa.

PATENTS EXPIRED FEB. 15, 1904.

357,580. DOOR HANGER, W. B. Cogger and H. A. Hamlin, Minneapolis, Minn.
357,620. SASH CHAIN, G. T. Moore, New York, N. Y.
357,693. POTATO MASHER, T. F. Timby, Brooklyn, N. Y.
357,706. STEP LADDER, W. F. Gordon, Bay City, Mich.
357,718. HAIR CLIPPING MACHINE, L. S. Lee, Philadelphia, Pa.
357,900. AUTOMATIC HOSE REEL, D. T. Boyle, Chicago, Ill.

PATENTS ISSUED FEB. 16, 1904.

752,050. MITER CUTTING MACHINE, Ralph Dunne, Dunedin, New Zealand.
752,051. CURLING IRON, Warren C. Dyer, St. Louis, Mo.
752,062. SASH FASTENER, James E. Gibbs, Bridgewater, Va.
752,113. COFFEE OR TEA POT, George E. Savage and George W. Hope, Meriden, Conn.
752,136. WRENCH, Milton Wenger, New Holland, Pa.
752,143. SHOE POLISHER, George B. Coleman, Memphis, Tenn.
752,171. DOOR STOP, Oswald Lockett, Michael J. Kenny, John P. Stimebach and Theodore H. Udell, Chicago, Ill.
752,235. SASH WEIGHT, John T. Leonard, New York, N.Y.

GEORGE R. ELLIS.

George R. Ellis, secretary-treasurer of the Enterprise Foundry & Fence Company, Indianapolis, Ind., formerly Ellis & Helfenberger, died at his home in that city February 12. He was born in Ohio in 1844 and served through the Civil War, taking part in its greatest battles, under General Thomas. In 1889 he formed a partnership with Wm. Helfenberger in the foundry and fence business. The business has been a prosperous and constantly growing one. Mr. Ellis leaves a widow and two daughters.

SECRETS KEPT BY POOR MEN.

Some men poor in this world's goods hold secrets that are worth fortunes, but refuse to divulge them, though tempted by the prospect of money enough to enable them to pass the remainder of their lives in ease and luxury. In England there is a small cottage among the marshes on the Thames which hides a secret that Russia offered $200,000 for less than 10 years ago. It is the spot that is the key to the situation of the submarine mines guarding the world's metropolis. It is situated among dozens of similar structures and five men who go to and from their daily work like ordinary beings alone know which it is and how the electric switchboard it contains can be so manipulated as to sink a powerful fleet in 10 minutes.

At a certain seaport on the east coast of England there lives a grocer who could let his premises to a European power at a rental of thousands a year if he chose. Adjoining his cellars are the passages communicating with the mines which control the entrance to the harbor, and even he is not permitted to gratify his curiosity, for several sets of doors fitted with secret locks defy the intrusion of any unauthorized individual.

Whenever a secret treaty is arranged between this country and foreign powers it is duly "set up" and printed by government printers long before the public has any idea that negotiations are in progress. These printers are paid no exorbitant wages for their silence, though any one of them could sell the head of the treaty to a foreign nation for a small fortune.

In an American battleship there are said to be over 500 secrets, any one of which would command a fabulous price if put up for sale. In building the ship a small army of workmen are engaged, to whom the majority of these secrets are perfectly lucid. But, in spite of the fact that their wages average about $20 a week, it is an unheard of occurrence for a piece of secret information to leave a drydock.

The postmaster of a small village in Ohio owns a secret which many unscrupulous folk would pay much to know. His name is Gustav Francks, and being an experienced chemist he hit upon a method of removing ink-stains from used postage stamps a short time ago, and to his credit be it said that he laid the discovery before the government. He was offered $50,000 for his silence, a bribe which he stoutly refused on the grounds that his honesty was above price.—Daily paper.

REVIEW OF THE MARKETS.

WIRE NAILS. The continuous orders which have been given for Wire Nails are based upon the belief that the market is strengthening in such shape that higher prices will prevail before long. The mills already have order books too well filled for prompt shipments, while freight conditions are of a congested character as at present. In view of this possibility every effort is being made for urgent deliveries. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.90
Retailers, carload lots	1.95
Retailers, less than carload lots	2.05

New York. The stormy conditions that have prevailed recently have not increased the local demand, which is far from brisk. The market, however, is firm and steady at the following quotations:

Single carloads	$2.05
Small lots from store	2.15

CUT NAILS. The low price comparatively that is the present base on Cut Nails, has been the means of placing a number of good sized requisitions on the order books of the mills, with the prospect this season of there being a wider distribution than usual of this staple. On either Steel or Wire Nails, with no discrimination as to locality, quotations are as follows:

Carload lots	$1.70 base
Less than carload lots	1.75

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The local demand is a limited one, much on account of weather conditions, more attention being given to immediate wants. Quotations are as follows:

Carloads on dock	$1.84½
Less than carloads on dock	1.92½
Small lots from store	2.00

BARB WIRE. Mill order books are full of orders for specified deliveries, and every effort is being made to fulfill all requirements, keeping shipments as regular as required. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE. There seems to be no apprehension of any lower prices this season, and the feeling is well grounded, when the orders already booked at the mills is taken into account. Mills are working every machine every hour possible, in order to keep abreast of the demand. Quotations are as follows, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90
Less than carloads	2.00

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

CORDAGE. Trade is a satisfactory one, and moderately good with most manufacturers; prices are fairly well maintained. Second grade Manila ½ to 1 cent per pound lower. The usual rebate of ¼-cent per pound being given to carload buyers:

Pure Manila, 7-16 inch and larger	11½@12
⅜ inch	12 @12½
¼ inch and 5-16	12½@13
Pure Sisal, 7-16 inch and larger	9¼@ 9½
No. 2 Sisal, 7-16 inch and larger	8¼@ 8½
⅜ inch	8¾@ 9
¼ inch and 5-16 inch	9¼@ 9½
Lath Yarn, Medium and Coarse	8½@ 8¾
Jute Rope, No. 1	6½
No. 2	6

TACKS. The Rockford Tack & Nail Co., Rockford, Ill., quote the following discounts on their complete line. These are announced for the retail trade, freight being allowed on all shipments of 300 pounds or more:

Upholsters Tacks, bulk	90-45-10%
Upholsters Tacks, packed in papers	90-45-10%
American Cut Tacks, bulk	00-40-10-10%
American Cut Tacks, papers	90-25%
Swedes Cut Tacks, bulk	90-30-10-10%
Swedes Cut Tacks, papers, ½ wgt. or full wgt.	90-30-10-10%
Carpet Tacks, blued or bright, bulk	90-45-10%
Carpet Tacks, tinned, bulk	90-45-10%
Carpet Tacks, ¼ wgt. or ½ wgt	90-20-10-10%
Carpet Tacks, Rainbow Brand, 500 count, blued, per gross	$3.50
Carpet Tacks, Red Label " " " "	3.25
Bill Posters Tacks, blued	90-45-10-5%
Bill Posters Tacks, tinned	90-45-10-5%
Gimp Tacks, blued	90-45-10-5%
Gimp Tacks, tinned	90-45-10-5%
Hungarian Nails, papers	80-30-10%
Lace Tacks, blued, bulk or papers	90-40-10%
Looking Glass Tacks	70-10-10%
Trimmers Tacks, S. S.	90-30-10-10%
Trunk & Clout Nails, bulk or papers	80-10-5%
Trunk & Clout Nails, tinned, bulk or papers	80-10-5%

The above prices are for Straight Weights, an extra 5% is given for Star Weights and an extra 10-5% on Standard Weights.

Freight allowed on orders of 300 pounds or more per shipment.

CARPET SWEEPERS. The present prices of the National Carpet Sweeper Co., Marion, Indiana, are as follows:

Marion Roller Bearing regular finished, full nickel	$24.00
National Queen Roller Bearing fancy veneers, full nickel	27.00
Monarch Roller Bearing Nickled	22.00
Monarch Roller Bearing, Japanned	20.00

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels...43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The weather is having its effect on trade, which is hardly a cause for wonder, when according to weather reports there have only been seven days since Thanksgiving when the thermometer has gone above the freezing mark at any time within the 24 hours. Under such conditions outdoor work is out of the question, and there can be but little active demand until open air labor is resumed. There is quite a large amount booked of future business, and there seems to be justification for the belief that Spring will bring a large increase in the amount of business. Prices are remarkably free from changes, and we have about as many advances to report as declines. Perhaps the most important advance in the last few days has been that of building Hardware, which has been marked up 10 per cent., and we learn that further advances in some heavy staples are expected in the near future. The Axe Trust has announced its prices, and it still remains to be seen how the new plan of selling axes by weight will be

Digitized by Google

received by the trade. This is altogether a new departure and while apparently a reasonable one, still it is a question whether a consumer ever bought a heavier axe simply for the sake of getting more for his money. On the contrary, it is quite likely that most axes have been purchased simply as they happen to suit the buyer than any regard whatever as to weight. New prices on hatchets have also been announced and as is natural in the case of new Trusts, prices have been somewhat advanced. BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

The continued depression in iron and steel is disappointing. It is difficult to see how so great a change could come in so short a time. Labor troubles in commercial centers, where steel and iron are so largely used, have material influence in causing it. Nearly half the population are engaged in agriculture with double the capital used in manufacture, and with a prodigal income estimated at five billions annually, have been little effected by the Wall Street strain, and yet the steel and iron business seems paralyzed. Nobody yet feels that this condition can long continue. Purchases for future shipment indicate the feeling of confidence in a good Spring trade, but if the depression in iron and steel is not relieved it may undermine this hope. Politics will likely effect business. "With one party on the hind car putting on the breaks, and the other shoveling coal into the engine," there may be some danger of a smash-up, but the man in charge is not inquiring what the fellows in the hind car want. They have been burroughing in dung hills to find material for a platform, but have failed to find an odor other than that they make. The strenuousness of President Roosevelt, so offensive to them, has resulted in such splendid achievements that it dismays them. He is so saturated with love of country with convictions and splendid courage, that does not wait for public opinion, but helps to make it, that shows he can be both right and President. "Is it right?" is a determining factor in his policy. His ideals are permeated with ethics rather than expediency. Every citizen is honored in honoring him, and the world is more wholesome when such a man is honored.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

An "old fashioned winter" has held the country in its icy grip with only an occasional day, or part of a day, intervals up to the present writing. This has had a very bad effect on trade, and there has been quite general stagnation in the retail merchant trade recently. When the weather moderates, which should be very soon, we look for a rush of Spring business as the retailers are not overstocked and the farming community are in good condition for buying all they need. Manufacturers are getting started gradually and the coke industry has a good part of its ovens burning. The coal companies are trying to get a 15 per cent. reduction in wages, which advanced 66 2-3 per cent. in the past six years, but have not as yet come to an agreement with their employees. It will be a serious matter to this community if an agreement is not reached before April 1st, as there are many thousands of employees who will be thrown out of employment at that date unless it is. The old proverb "It's an ill wind that blows nobody good" is exemplified in the Baltimore fire. It is expected that two of Pittsburg's industries will get large orders from the rebuilding, viz: Structural Steel and Clay Fire Proofing Material. These modern building materials withstood the fire well and will no doubt be largely used in rebuilding the city.

LOGAN-GREGG HARDWARE CO.

THE SAGINAW TRADE.

We have been having cold weather ever since November, and sleighing all the time. For a few weeks we have had zero weather, and everything is frozen up good and stiff in this part of the State. Railroads have been blockaded by unusual snow storms, and some branches of the roads in this section have been abandoned for as much as a week at a time. Freight has been very irregular, and long delayed. This has caused all business to be very quiet, except the coal business. MORLEY BROTHERS.

THE BIRMINGHAM TRADE.

We are pleased to report that the trade is good and prospects are encouraging. The most remarkable thing in our section is the price of cotton, which, contrary to the former years, the farmer has reaped the benefit instead of the Stock Exchange dealer, and hence it has stimulated trade. This has had the effect of enhancing farm lands, and keeping the people on the farms contented, and further to send many from the cities back to the country. The low price of iron has had the effect of making people examine cost sheets more carefully and also look to the expense of production, which is highly proper. There is considerable work in progress building railroad lines in the State, which helps to swell the volume of trade. The architects report fair prospects for work in their line, and altogether, our section of the country is contented and at work.

MOORE & HANDLEY HARDWARE CO.

THE DAVENPORT TRADE.

The severe cold weather continues and the result is not beneficial to trade. There has been too much speculation in stocks and in get-rich-quick schemes, and there has been too much money diverted from its natural channels, causing losses among people of small or moderate means. This is having its effect on commerce, and the end is not yet. We are compelled to report two or three small failures among our customers, one of which occurred in this conservative, financially strong city of Davenport. Values are practically unchanged and collections might be better.

SICKELS, PRESTON & NUTTING CO.

THE SAN FRANCISCO TRADE.

In this correspondence two weeks ago the fact was recorded that Southern California people of faith in prayer were rallying in their houses of worship and imploring the Supreme Being for rain. In the meantime goodly downpours have generously soaked that dry section of the State, and likewise every other portion, including the entire Pacific Coast territory.

Hardwaremen, in commenting upon trade conditions, present and prospective, and who in such line of thought never omit reference to the weather as a prime factor, are at variance on the question as to material good that will result. Treasurer Joseph Sloss, of the Pacific Hardware and Steel Company, is of the opinion that these late rains, which came about five weeks after the farmers were ready for them, "will prove not materially helpful to the drouth-stricken sections of the country, yet limitedly helpful. The farmer planted in due season, a wider acreage than usual, naturally expecting old reliable nature would do her part in due season, and this good and hopeful feeling of a few months ago was reflected by like hopeful Hardware dealers who in turn pleased the ubiquitous traveling men and his employers with generous orders; and there you have it in a nutshell. Now don't write me down as a 'knocker,' for we're receiving no countermands and are not looking for any, but believing that good harvests and good times will be the unfolding of the year, will only add that man's views of nature are very limited." Mr. Sloss should also be included with Mr. Rulofson, of Baker & Hamilton, Mr. Sites, of the Palace Hardware Company, and Mr. Philpott, of Philpott & Plummer, as commentators on the forthcoming three days' annual meeting of the California State Retail Hardware Association, beginning March 2d. Each one severally spoke of this meeting as one foretokening such unusual consequence to every dealer in the State that already upward of three hundred and fifty have sent the management assurances of attendance.

The latest opening in the trade is the Ferry Hardware and Paint Co., at 12 Market Street, with full lines of Hardware, cutlery and sporting goods, a specialty being Builders' Hardware and mechanics' tools. The personnel of the firm is representative of ripe, practical experience. The senior member is A. Rittigstein, of successful Hardware store proprietorship on both sides of the bay, and the junior member, W. H. H. Schenck, is from a twelve years' connection with Dunham, Carrigan & Hayden Co.

OHIO HARDWARE ASSOCIATION PROGRAMME.

The Ohio Hardware Association are holding their annual convention as we are going to press, at the Hollenden Hotel, Cleveland. The proceedings will be in accordance with the following programme:

TUESDAY SESSIONS.

9.30 O'Clock—Meeting of Executive Committee.
2 O'Clock—Convention called to order by the President.
Opening Prayer, Rev. Casper Wister Hiatt, D.D.
Address of Welcome, Hon. Tom L. Johnson, Mayor of City of Cleveland.
Response, Vice-President J. F. Baker.
Roll Call of Members.
Reading of Minutes.
President's Annual Address, W. P. Bogardus.
Appointment of Committees:
Resolutions,
Nominations,
Question Box,
Laws Relative to the Hardware Trade,
In Memorial,
To Our Better Acquaintance.
Report of Committee on Arrangements.
Paper—"Trade Relations Between the Retailer and Manufacturer," J. S. Brainard.
Discussion.
Adjournment.
8 O'Clock—Theatre Party given by Cleveland Manufacturers and Jobbers.

WEDNESDAY SESSIONS.

9.30 O'Clock—Address—"The National Association," Pres. W. P. Bogardus.
Report of Financial Secretary, W. C. Jones.
Report of Corresponding Secretary, D. R. Burr.
Address—"The Parcels Post," C. A. Hutsinpillar, Ironton.
Discussion.
Question Box.
Recess.
2 O'Clock—Report of Grievance Committee.
Report of Insurance Company, Geo. M. Gray.
Report of Delegates to National Convention, F. A. Bare, Mansfield.
Address—"The Advantages of System in a Retail Hardware Store," C. S. Johnson, Barberton.
Discussion.
Question Box.
Adjournment.

WEDNESDAY EVENING.

Banquet.
Chamber of Commerce Building.
Toastmaster, W. P. Bogardus.

THURSDAY SESSIONS.

9.30 O'Clock—Report of Committee on Laws Relative to Hardware Trade.
Report of Memorial Committee.
Report of Committee on Nominations.
Paper—"Does It Pay?" John F. Baker, Dayton.
Discussion.
Question Box.
Recess.
2 O'Clock—Report of Committee on Resolutions.
Paper—"Advertising a Retail Hardware Store," J. C. Fuhr, Williamsburg.
Unfinished Business.
Election of Officers.
Selection of Next Place of Meeting.
Adjournment.

MINNESOTA RETAIL HARDWARE DEALERS' CONVENTION.

An extremely interesting programme has been prepared for the meeting of the Minnesota Retail Hardware Dealers' Association, which will be held at St. Paul Feb. 24th, 25th and 26th next:

WEDNESDAY AFTERNOON SESSION—2 P. M.

Address of Welcome—Mayor Smith.
Response—C. D. Decker.
Remarks—President Tomlinson.
Announcement of Committees.
Committee on Nominations.
Address, "Organization"—Fred. M. Mason.
Election of Officers.
Secretary's Report.
Treasurer's Report.
"Salesmanship," by A. F. Sheldon, Chicago.
Paper, "Impressions"—E. H. Loyhed.
Voluntary Remarks by Members.
Adjournment.

THURSDAY MORNING SESSION—9 A. M.

Retail Hardware Insurance Company, Meeting of Policy Holders.
Address—President C. F. Ladner.
Secretary's Report.
Treasurer's Report.
Address, "Insurance"—Hon. E. H. Dearth.
Election of Directors.
Intermission, 20 Minutes—Payment of Dues.
Address, "Work of the 'National'"—Secretary M. L. Corey.
New Business.

THURSDAY AFTERNOON SESSION—2 P. M.

Open Meeting.
Address, "Hardware"—Rev. E. C. Clemans.
Report of Committees.
Address, "Present Business Conditions"—R. A. Kirk.
Discussion by Members—"Is There Profit in the Shop?"
Opening of Question Box.
Adjournment.

THURSDAY EVENING SESSION—8 P. M.

"Social" at Commercial Club rooms, by courtesy of St. Paul Commercial Club. All are invited.

FRIDAY MORNING SESSION—9 A. M.

Open Meeting.
Enrollment of New Members.
Question Box.
Remarks by Jobbers and Manufacturers.
Traveling Men Have the Floor.
Next Meeting.
12 M.—Adjournment.

ORNAMENTAL HARDWARE OF TO-DAY.

The builders' Hardware manufactured in this country fifty years ago was looked upon and treated as a mere mechanical device. Little, if any, effort was made to develop the ornamental side of it. The better class of ornamented goods then used came from England. The faint attempts of American manufacturers at making ornamental Hardware were confined to the production of a few patterns in low relief, chiefly in so-called Eastlake and Japanese designs. Nobody, not even the well-to-do, called for really artistic Hardware that was in conformity with the style of architecture of the buildings, perhaps for the reason that there was no style at all to the average red brick front or "dry goods box" style of houses built in those days. Exceptions to this were, perhaps, the few residences of the Stewarts, the Vanderbilts and other prominent families in New York and the larger cities

STANLEY RULE & LEVEL CO.

NEW BRITAIN, CONN., U. S. A.

Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

of the country, where competent architects and unlimited means secured a thorough and artistic execution of even the minor details in a building, and the ornamental part of Hardware also received proper consideration.

It was not much before 1870 that American manufacturers felt the necessity of producing artistic Hardware in different schools of design. H. H. Richardson and his many imitators were just then introducing and popularizing a modified form of Romanesque architecture which found expression in some of the most notable churches, libraries, public buildings and business houses erected during that period, and a consequent demand for Romanesque Hardware was the result which manufacturers were quick to meet.

The next decade brought the Queen Anne and colonial styles into public favor for private residences and cottages, the former to be discarded soon—the latter to stay and flourish. For the more luxurious city houses, theatres, hotels and other prominent structures, Renaissance and Neo-classic architecture came into favor, and the demand for Hardware in these schools of design, as well as in Flemish, Elizabethan, Rococo, Empire and Adams, which became favorites during the latter '80's and through the '90's, had to be met as it arose, until the leading manufacturers of Hardware were in a position to furnish goods in more than a dozen different schools of design. All the leading American architects had by this time fully realized the importance of Hardware as an ornamental feature in a building, and in most cases gave it personal attention, either by making special designs or selecting themselves the proper styles from stock. The education of the American public in art matters, too, has made such rapid progress that the average home builder is now-a-days filled with a desire to have his house, his every room and corner tastefully decorated and embellished, and is quick to realize that doors trimmed with attractive and artistic Hardware enhance the appearance of a single room as well as of the entire house.

And why should not Hardware generally receive as much and more consideration than chandeliers or electric fixtures or railings, and be made a thing of beauty as well as usefulness, since everyone in the house looks at it and handles it many times a day? Indeed, many a building of quite indifferent appearance can be made attractive, or at least interesting, by trimming it with good, new Hardware. This is particularly the case in most of our larger Eastern cities, where the dismal rows of once fashionable brick and brown stone houses with high stoops and cast iron railings have absolutely nothing to attract the eye of the passer-by, or distinguish one house from the other. There, a set of artistic new door trimmings will give the house a distinction which will at once separate it from its languid and dreary looking neighbors. Here, indeed, is a good field for the wide-awake dealer in Builders' Hardware to get the owners of such buildings interested in the subject, and to convince them that the outlay for new and up-to-date Hardware on his property is one of the best investments he can possibly make, and it is to be hoped that ere long those primitive looking styles of Hardware which filled the bill in the days when any old thing would go, will disappear from sight and be replaced, even in the humbler homes, by Hardware that is what it should be, a thing of usefulness and beauty.—*The Corbin*, published by P. & F. Corbin, New Britain, Conn.

Cause of the Mirth.

"Bridget," said Mrs. Hyflyte, "your lady friend mustn't stay so late hereafter. Her uproarious laughter woke me up at 1 o'clock this morning."

"Yis, mum; I was tellin' her about how you tried to make cake wan day."—*Indianapolis Sun.*

MOVING TRICK PICTURES.

Trick photographs are almost as old as the art of photography itself, and pictures of animals with the heads of well-known persons, or of the same man seated around a table in different attitudes, are mysteries only to those who do not know how they are made. The purveyors of moving pictures, which, though capable of such extensive use in instruction, seem lately to have degenerated into a rather mediocre form of amusement, have not been slow to realize the possibilities that are offered in this direction. Some instance of these, with explanations, are thus given:

One of the latest mystery pictures is "The Human Incubator." A man is represented standing before a table on which there are six eggs and a plate. He takes up one egg, breaks it about a foot above the plate, and, as the contents strike the latter, a little chick picks itself up and runs over the table.

This he dies with each egg in succession. When the six chicks are running about he holds the last broken shell above the plate, a chicken runs back and apparently jumps into one of the shells, which is placed on the table again whole.

This is one of the simplest of all the pictures. In reality

Carbon St., Bridgeport, Conn.

Successor to Hotchkiss Sons. Established 1850

Digitized by Google

the man stands before the camera and breaks an egg into the plate. He then reaches out for a little chicken, which is handed to him, and puts it on the table. Naturally, it immediately runs on the table. The same thing is done with each of the six eggs, until the same number of chickens have actually been put on the plate.

When the film is developed 10 to 15 feet of it represents the man reaching out and putting the chicken on the plate. This part is cut out of the main strip, and the section of the film representing the contents of the egg striking the plate is attached to that showing the chicken picking itself up from the center of the plate, where it had been placed in the interval. The apparent impossibility of the tiny fowl returning to the egg is accomplished merely by reversing the course of the film—that is, making the picture operate backward.

Two similar pictures are "The Tramp's Miraculous Escape" and "The Photographer's Mishap." In the first one, two tramps meet on a railroad track and exchange embraces. One produces a bottle and goes on, leaving it with his colleague on the road.

The tramp who receives the bottle sits down on a railroad tie, takes several good "pulls" at it and finally goes to sleep. Suddenly a fast express makes its appearance, and being unable to stop in such a short distance, strikes the unfortunate man and scatters "fragments of him" in every direction. The train is stopped, and train hands return to gather up the remains. After carrying them for a short distance on a stretcher the tramp jumps up alive and makes a dive for his bottle, which has been left behind.

An invariable groan of horror comes from in front of the canvas when the train strikes the body, for it seems impossible that it is not a reproduction of an actual catastrophe. A man is really photographed on the tracks until the locomotive gets near. Then the camera is stopped, and the man steps out of harm's way. Another picture is taken with a dummy in the same position, and this time the locomotive is permitted to mangle it. The camera is again stopped, the real man substituted for the remains of the dummy, and the third picture represents the marvelous resurrection. When the three films are adjusted so they run continuously, the affair is extremely realistic.

One of the most humorous of the mysterious pictures is "The Mysterious Doctor." A cripple enters the doctor's office, hobbling along on his hands, both legs having been taken off just below the hips. The doctor places the man on the table, and taking two legs from a closet places them in the proper position on the patient.

The latter finds to his delight that the new legs adhere firmly and he jumps from the table and dances around the room. The doctor then places a sheet around him, and, with the idea of bettering his countenance, takes a huge saw and saws the man's head off. He takes another head from a nearby table and puts it on the patient.

The man who enters the doctor's office is really a cripple without legs. After the wonderful surgeon brings out the two legs, and apparently affixes them to this unfortunate patient's body, the lens is closed, while a man with two sound legs is substituted. Of course, only the substitution of a dummy is required before the doctor saws off the head, and then a restitution to show the live man with the new head.

The Colonel.

"How did he get his title of Colonel? Did he ever live in Kentucky, or was he on some Governor's staff once?"

"No, he once had a half interest in a race horse."—*Chicago Record-Herald.*

COLORADO RETAIL HARDWARE DEALERS' ASSOCIATION.

The Colorado Hardware Dealers' Association held its second annual convention at the Windsor Hotel, Denver, on Monday and Tuesday, 15th and 16th inst. The registration records show that the membership is now about one-half of all the dealers in the State.

MONDAY MORNING SESSION.

The convention was called to order at 10 A. M. The first order of business was the announcement by the chair of the various convention committees and appointment of sergeant-at-arms. This was a short session and, after other preparations had been made for the sessions to follow, adjournment was taken at 10.30 A. M., when the members were entertained by the local Hardware dealers and jobbers by a trolley ride to points of interest about the city.

MONDAY AFTERNOON SESSION.

At the afternoon session, which was called to order at 2 o'clock, F. A. Ellis, of Denver, delivered a speech of welcome to the association. An appropriate response on behalf of the members was made by President A. L. Branson, of Trinidad. The president's address was the next in order, and was accepted and ordered placed on file. On account of the absence of members of the Committee on Resolutions, two vacancies had to be filled.

After the appointment of an Auditing Committee the secretary-treasurer's report was received and, on motion, accepted. Some discussion followed in regard to the matter of increasing the dues. Informal remarks following by George Tritch, of the Geo. Tritch Hardware Company, Denver. An address on the subject of "The Ideal Relations Between Manufacturer, Jobber and Retailer" was made by J. M. Killen, of Pueblo.

PARCELS POST.

The Parcels Post bill was the next subject which came up for attention, and an effort was made to find out how the members stood and what effort they had made in bringing this matter before their respective Congressmen and Senators.

General discussion was invited along the line of the relations existing between the jobbers, catalogue houses and retailers. The question of honorary membership was brought up, but action deferred. It was suggested that a special invitation be tendered to the jobbers to come before the open session on Tuesday, provided this feeling was the sentiment of the members present at the executive session. The session adjourned at 5 o'clock.

SMOKER.

In the evening, through the courtesy of the local jobbers and dealers, an entertainment in the form of a smoker was provided at the East Turner Hall.

TUESDAY MORNING SESSION.

The convention opened in executive session at 10 A. M., the first order of business being the presentation of the report of the chairman of the Grievance Committee.

Before action was taken on the report a committee was appointed to confer with the Lumber Dealers' Association and request of that body, in convention at the Albany Hotel, the appointment of a similar conference committee to discuss the Parcels Post measure.

General discussion of the Grievance Committee's report followed, and it was finally recommended, on motion, duly seconded, that the report be accepted and placed on file, and a vote of thanks was extended to the committee for its services.

The Auditing Committee presented a report, with some recommendations, and after consideration the report was duly accepted.

The Committee on Drafting New Constitution and By-Laws was next called upon, and, after reading the revised sections, they were passed upon separately and then finally accepted as a whole. The Nominating Committee was instructed to report at the afternoon session.

CONFERENCE WITH LUMBER DEALERS.

A favorable report was received from the Lumber Dealers' Association, advising the appointment of a committee of three to meet the Hardware dealers, the conference to be held at the Albany Hotel. The morning session adjourned at 1 o'clock.

TUESDAY AFTERNOON SESSION.

The association assembled at 2.25 o'clock in open session, for the special purpose of conferring with the jobbers and their representatives on the matters which were discussed at the executive session in the morning. Views were freely expressed on both sides, and it was thought that the way was cleared for the satisfactory adjustment of some of the grievances.

The Committee on Resolutions tendered their report, which was accepted.

The Committee on Nominations recommended the re-election of the present staff of officers, which met with unanimous approval. After some responses by the re-elected officials, followed by a general discussion, the convention finally adjourned at 4.30.

The Executive Committee met immediately after adjournment for the purpose of electing a secretary-treasurer, and F. C. Moys, of Boulder, was again selected.

MANUFACTURE OF PAPER AND PAPER PULP.

Improved methods in machinery and the great change in the character of materials used have had an important bearing upon the printing art. In the earliest mills established in this country, the raw fiber, after being prepared in the beating machine, was formed into a sheet in the mold or wire sleeve which was dipped from the pulp vat by hand, the water drained off and the pulp left in a wet sheet in the mold. The sheets so made were turned out upon a felt press and then dried by exposing to the air in single sheets. Such mills were small and the output was limited. Strictly hand-made paper to-day is a rarity, although it exists. By the aid of the Fourdrinier machine the transformation of the fluid to stock or finished paper is made an automatic operation. The pulp is screened from the vat over an apron to a moving endless wire cloth made of closely woven fine brass wire, and supported by a series of small metal rolls set close together, yet without touching each other. In this way an even surface of the wire cloth is maintained and by preserving an unvarying flow of the pulp and a constant forward motion of the wire cloth, the thickness of the layer of pulp deposited was kept uniform. By lateral motion of the supporting rolls the fibers are caused to interlace in various directions and give greater transverse strength to the texture. As the pulp is carried along on the wire cloth, much of the water drains through, leaving the fiber on the meshes.

This first drying is usually hastened by var-cloth on endless the moist web is carried between rolls and are covered with woolen felt and then taken from the wire cloth on endless the moist eb is carried between rolls and then to dryers. These are large metal cylinders heated by steam. The paper has now acquired considerable strength. The water has been evaporated and the heated cylinders complete the drying process. The paper is then given a smooth surface by the calendar rolls, which are smooth-faced heavy metal rollers. Finally the finished paper is reeled off in rolls and cut into sheets of the desired size. A large paper mill will make 250 tons of finished paper a day. The most modern machinery turns out a continuous web of finished paper at the rate of 500 feet a minute. The raw material of wood pulp is spruce, poplar and in smaller quantities various other woods are employed. Wood pulp has to a great extent superseded the use of rags, and entirely so in the manufacture of newspaper. The blocks of wood are pressed hydraulically against the edge of a rapidly revolving grindstone, and by attrition, reduced to a mushy consistency.

There is also a chemical process of making wood pulp which is largely used. The merchantable shape of the fiber differs somewhat. Ground wood pulp is ordinarily sold in folded sheets only partially dry, and is, therefore, under common conditions, only suitable for use near the locality of its manufacture, its weight being so increased by the water as to preclude the profitable transportation of such a low-priced product. There are 763 paper-making plants in the United States and the total capital is $167,507,713, giving employment to 64.186 persons . The total cost of the materials used was $70,530,236 in 1900. The total value of the products was $127,326,162, and the total power required for running the plants was 764,847 horse-power—From the *Scientific American's* Special Number on "Modern Aids to Printing."

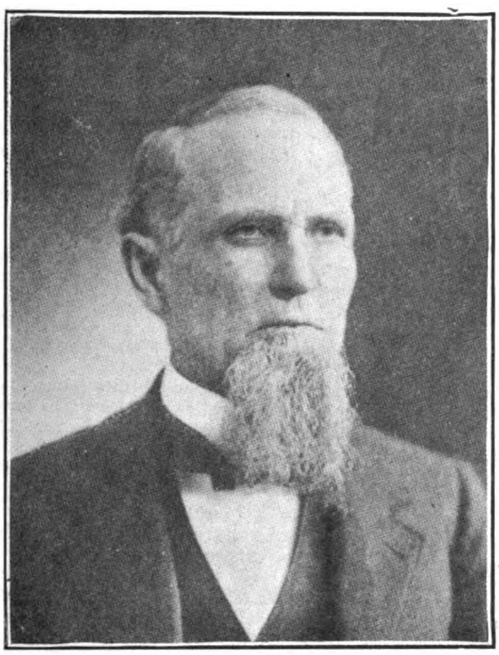
PENNSYLVANIA RETAIL HARDWARE DEALERS' ASSOCIATION.

The third annual convention of the Pennsylvania Retail Hardware Dealers' Association was held at Williamsport on the 16th and 17th inst.



TUESDAY MORNING SESSION.

President Moore called the convention to order at the sound of the gavel at 10 A. M. A very encouraging number of delegates was already in attendance. The Mayor of Williamsport, John F. Ladlein, who was introduced to the chairman and the delegates by James N. Kline, welcomed the members to the city. The address of welcome was responded to by President Moore who also called upon R. R. Williams of the *Iron Age*, who was present to speak in behalf of the members. The association then went into

EXECUTIVE SESSION,

at the expiration of which, roll call followed, and the enrollment of new members and payment of dues. The President, in a few informal remarks, spoke regarding the business prosperity of the association during the year, details of which were left to be furnished by the officers and committees.

Secretary Digby then made his report in which the routine work of his office was dwelt upon, and which was coupled with the fact that 65 members had been secured since the previous annual meeting,

GEORGE L. MOORE, EX-PRESIDENT.

J. H. BOWERS, EX-TREASURER.

and he hoped to report before the close of the convention the fact that they had 150 members. The solicitor employed by the Executive Committee had been abundantly successful, securing in three months time 54 applications for membership, 40 of which were already members. Several important recommendations were suggested by the secretary especially in regard to the by-laws of the association, in accordance with which the chair appointed a committee consisting of James N. Kline, C. H. Miller and J. E. Digby to revise the constitution and by-laws.

THE NATIONAL ASSOCIATION.

An interesting statement was made by C. H. Miller, who was a delegate from the Pennsylvania Association to the last meeting of the National Association. Mr. Miller referred to the hearty welcome extended to Pennsylvania as a newcomer in the national fold, and the business-like character of the gathering, their close application to work and the interest and importance of their conferences and of the action taken. He reported that the business of the national organization was progressing in a way that was most gratifying. He emphasized the fact that it is through this National Association that reforms can be effected, and the consequent importance of its being sustained heartily in all its plans. Several instances were mentioned by Mr. Miller of the usefulness of the National Association work, especially in taking steps which have resulted in preventing catalogue houses from printing demoralizing prices on certain standard goods. Reference was also made most happily to the ability and the character of the various presidents of the National Association, which, at the present time, is ably represented by W. P. Bogardus.

A report was made by G. C. Kline, on behalf of the Entertainment Committee, in which he narrated the work of the committee in preparing for the convention. This report made evident that the committee has performed its duties with fidelity and judgment, and the thanks of the meeting were given to the committee, and, especially, its efficient chairman.

TUESDAY AFTERNOON SESSION.

After the opening of the afternoon session, President Moore appointed the following committees:

COMMITTEES.

At the afternoon session, President Moore appointed the following committees:

Press—R. R. Wiilams, G. C. Kline and J. N. Selheimer.
Auditing.—Mr. Lindley, W. P. Diffenderfer and J. C. Olewine.
Nominations.—C. H. Miller, John W. Seaman and Chas. Reisinger.
Place of Meeting—A. B. Neyhart, H. B. Young and J. H. Bowers.

ADDRESS OF W. P. BOGARDUS.

The afternoon session was made unusually interesting by the presence of the president of the National Retail Hardware Dealers' Association, W. P. Bogardus, who delivered a well written address which was listened to attentively on the subject of the

PARCELS POST BILL.

The special feature of the afternoon session was the address by W P Bogardus, president of the National Retail Hardware Dealers' Association. He spoke of the Parcels Post Bill as follows:

I am glad to bring to you the greeting of the National Retail Hardware Dealers' Association. Especially glad, because on the other branch of the river that runs by your city I spent my boyhood. I am glad to come to your State: to look at the hills as they reach up and at the mountains that tower toward heaven, whose sides need but to be tickled with Pick and Shovel to yield their hidden wealth. A State whose valleys are famous in story and song: whose rivers are things of beauty as they roll unceasingly down to the sea, and whose people, staid and steady, are ever found on the right side of the important issues of the day.

ONE OF THE GREAT QUESTIONS OF THE DAY

for us to consider is the right of Congress to pass laws that will benefit one class of citizens at the expense of another—the right of the Government to enter into competition with private enterprise. The functions of a Government like ours are very different from those of a kingdom or monarchy. Here the people own the Government. There, to a very large extent, the Government owns the people. Here individuality is very much in evidence in the management of affairs and business. There the individual is submerged and the Government is in evidence. The functions of our Government have never been considered to be in conflict with the people, nor in competition with them. Legislative, executive and judicial they have ever remained.

There is one exception to these conditions, and that is, the Post Office Department, where it assumes to carry and distribute the mail of the people. To this exception the people consented when the plan was inaugurated, and they have never seen any reason to change it. That it is perfect no one will claim, but that there is progress toward a more perfect systematizing of the work no one who knows will attempt to deny. It is a fact beyond dispute that the mails are handled in this country quicker than in any other nation. Our Post Office Department has been so careful and successful in the distribution of the mails that there is an inclination on the part of some of our fellow citizens to add more work to the department, and have the Government undertake the

Digitized by Google

DISTRIBUTION OF MERCHANDISE THROUGH THE MAILS.

To a certain extent the Government has yielded to this demand, and parcels of 4 pounds and under go through the mails. Emboldened by the success of their first efforts, the postal reformers thought the times ripe for a further move, and so two years ago a bill was introduced into Congress providing that packages up to a limit of 200 pounds be carried, but the move was so radical that the bill never got beyond the committee to whom it was referred.

Learning caution by their failure, the reformers come to the present Congress with a bill that provides that third and fourth class matter be consolidated and under the name of merchandise, and the rates to be for packages to 3 ounces, 1 cent; from 3 to 6 ounces, 2 cents; from 6 to 9 ounces, 3 cents; from 9 to 12 ounces, 4 cents, and from 12 ounces to 1 pound, 5 cents; and for each additional pound, 2 cents up to a limit of 11 pounds, for which the rate was 25 cents.

In addition to this, it is further proposed that on all unregistered parcels without declared value, if lost or damaged by fault of the Government, the Government shall be liable up to $10 without extra charge to the sender. If the sender registers his package and declares a value for an additional 5 cents, the Government will insure the parcel and pay full value for any loss or damage that may occur through the fault of the postal service.

One of the arguments urged in favor of this measure is that people will have an opportunity to select from a larger stock than is kept by the local merchant. If I am in Williamsport and send to Philadelphia for some article from a mail order house who does the selecting? Have I any choice in the matter but to take what they send me?

W. P. BOGARDUS,

PRESIDENT NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION.

The Third Assistant Postmaster-General, in his report for the year ending June, 1902—and that is the latest report that I can get—says that second-class matter goes through the mails at 1 cent per pound. That for every dollar the publisher pays for postage the Government has to add three more to pay the cost of transportation. Now, if it costs 4 cents per pound to carry second-class matter, how can the Government carry 11 pounds for 25 cents when the actual cost is 44 cents?

WHO WILL PAY THE DIFFERENCE?

Will the public? Why should they be asked to do it? There was carried for the year ending June, 1902, 488,246,903 pounds of second-class matter, or 68.61 per cent. of the total weight of mail matter from which postage was derived. This amount yielded $4,541,523.59, or 3.98 per cent. of the whole postage revenue. The letters and postal cards for the same period amounted to 101,103,928 pounds, or 13.56 per cent. of the total weight of all matter from which postage was derived. This amount yielded $90,950,751.72, or 79.91 per cent. of the whole postage revenue. So you see that people who write letters and postal cards pay over three-fourths of the expense of the postal service. Ninety-five per cent. of all the mail the farmers send are either letters or postal cards. With these facts before us how can any one, with any degree of fairness, ask the Government to put any further burdens on the postal service, especially when the work must be done at a loss to the public? It is a well-known fact that the service is taxed to the limit to care for the present volume of business.

ENGLISH PARCELS POST.

It is claimed, as a reason for adopting post parcels in this country, that it is growing in popularity in England. There is no express service in England, and no other way to send packages except by freight. Why is England held up to us as an example to pattern after when the average distance a letter travels in that country is but 40 miles, while the average distance a letter travels in the United States is 442 miles? If the charge on a package in England is 1 cent per pound for 40 miles of transportation, should it not be more in this country, where the distance traveled will average ten times greater?

INTERESTING IF TRUE.

The postal reformers are very fond of stating that a person in England can send a 11-pound package to the United States for 25 cents, and for an additional 25 cents can have it forwarded to any part of the United States, and then go on to say, "When the British Government can secure better mail facilities in the United States for the English people than Uncle Sam can secure in the country for our own people, it is time somebody be heard from." Now, the above would be interesting if it were true. But the facts are, as stated in a letter from the Second Assistant Postmaster-General to the Postmaster-General, dated January 6, 1904, that the cost of a package of from 7 to 11 pounds to bring it to New York is 72 cents, and the express companies, instead of receiving 25 cents to carry the package to California, receive a certain sum which is equivalent to a uniform charge of 72 cents for each and every parcel, regardless of its weight or distance carried. As contracts are made with railroads on a basis of mileage, and as a large proportion of parcels go but a short distance, the rate fully compensates the express companies for their services.

In this same letter the Second Asistant Postmaster-General makes the following statement: "A careful comparison of postal routes, fees and charges in the British postal service with those of the United States justifies the claim that, considering the wide extent of our territory, our people have the cheapest service."

We are cited to Germany as another country to pattern after. The Government owns all the transportation facilities there. Do we want to imitate them?

THIS MEASURE IS PURE CLASS LEGISLATION.

It is conceded on all sides that the passage of the bill will give a wonderful impetus to the mail order and catalogue houses. They are our competitors. The Chicago catalogue houses will not sell in the City of Chicago; neither will they solicit trade in any other large city. A gentleman living in a large Ohio city received the following letter in answer to request for one of their catalogues: "It is against our regulations to send printed matter to the large cities. We cater only to the rural districts, believing that the city field is beyond our command." Is it a good thing for the Government to enact laws

THAT BEAR DOWN ON THE COUNTRY MERCHANT AND BUILD UP THE CITY MERCHANT?

What is the postal service for—is its main purpose to serve one class of merchants at the expense of all the people?

It is asserted by the friends of the bill that "the Government is the only agency that can subject our private transportation companies to effectual competition and protect the public from extortionate express rates."

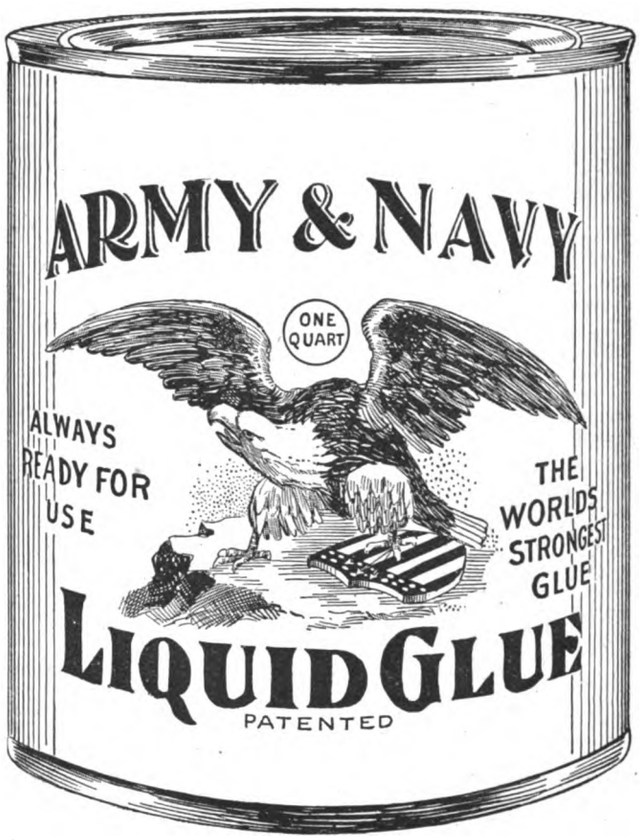
Have they not performed a great work for this country? No other country in the world gives its citizens as good facilities for the transportation of merchandise as are found in this country. The express service, as a private enterprise, requires the users of the service to pay the cost. As a Government enterprise the user would only pay a part, and the balance would be raised by general taxes.

How it is possible to utilize the postal service to carry merchandise at 2 cents per pound when it costs 4 cents? Are we justified in placing further burdens on the Post Office Department?

The reformers are very anxious to have business methods adopted in the postal service. The *World's Work* for December, speaking of the money order business, refers to the superintendent of the money order department as conducting his division as a man would conduct his business, and tells how he visited mail order houses and tried to learn how the money order system might be made to serve them. He had blank money orders printed, with the name of the mail order house printed across the face, so that the mail order houses might send out such orders with their advertising literature. And the *World's Work* goes on to say that he built up the money order office by following the practice of business. Why should an employee of the Government go out and solicit business for any department of the Government? Why should money orders be printed for any class? Under what rule of equity would the Government work while it was driving private capital out of business?

IF THE GOVERNMENT SHOULD ABSORB THE EXPRESS COMPANIES AND THE RAILROADS,

what is to hinder the taking over of the telegraph, telephone and electric railroad systems? If the Government carries merchandise, what is the objection to manufacturing it? If the Government owns the railroads, why not the coal mines? Do you say that it is absurd to talk in this manner? It is the logical teaching of the Postal Reform League. It is simply socialism. Why is our nation the greatest commercial nation in the world? Because the Government has helped and not hindered in the development of the natural wealth of the country private enterprise has been given a free hand, and the result is a network of railroads, telegraph and telephone lines and electric railroads, binding all sections of our common country together.



Why turn all these over to the Government, so that a multitude of Government employees will be at the beck and call of the politicians. Why enlarge the opportunities for

FRAUD AND PECULATION ON THE PART OF GOVERNMENT EMPLOYEES?

Will the class of men be better when the Government owns the railroad and express companies, so that scandals like those of the present will be but memories? Nay, verily. The men who run this country in the future will be the sons of their fathers. The theory on which the postal reform, so called, is based seems to be that the Government shall furnish extremely low rates of transportation, and such shortage as may arise shall be made up by general taxes.

I cannot close this paper better than to quote from an article in the *Atlantic Monthly*, written by President Eliot of Harvard University. "If the Government enters a field which individuals, or voluntary associations of individuals, could fill, it diminishes by so much the range or reach of the great school of self governing freemen—namely, the school of creative and constructive industry under liberty and responsibility."

INSURANCE.

In regard to the working of the Insurance Company which was organized a year and a half ago, W. B. Simpson made a detailed statement of an exceedingly interesting character in which particulars were given regarding the amount of insurance in force, and the features of the company in regard to protecting the interests of those insured. Questions were propounded and answered promptly by Mr. Simpson, strengthening in the minds of those present the value of this section of organization work.

The Question Box followed covering the usual enquiries regarding methods of doing business, which excited a general discussion that was participated in by a number of those present.

REVISION OF CONSTITUTION AND BY-LAWS.

The committee on revision of the constitution and by-laws made their report, and their recommendations were adopted. The result of the changes thus effected will be to increase, it is believed, the efficiency of the association as a working body. One of the principal changes was making the secretary-treasurer to be appointed by the Executive Committee instead of being elected by the sessions of the convention.

WEDNESDAY MORNING SESSION.

At the Wednesday morning session resolutions were adopted strongly condemning the Parcels Post Bill. The matter of insurance was also considered at length. Addresses were made by W. P. Bogardus, James N. Kline and R. R. Williams, discussing the work of organization. A very enthusiastic spirit prevailed.

The following resolutions were adopted by a rising vote:

Resolved, That this association puts on record its hearty approval of the manner in which the interests of the retail trade were represented by W. P. Bogardus and M. L. Corey at the meeting of the National Hardware Association at Atlantic City last November.

Resolved, That this association, recognizing the advantages which result from the conferences of jobbers and manufacturers, expresses its conviction that the interest not only of the retail trade but of the trade at large would be promoted if the National Retail Hardware Dealers' Association should be represented regularly at such gatherings with a view to giving information and using its influence in matters in which the retail trade is concerned.

As looking ultimately to a more direct connection between the Hardware Dealers' Association and the Fire Insurance Association, the following resolution was adopted:

Resolved, That the question as to the desirability of some modification of the relationship of this association to the Hardware Dealers' Mutual Fire Insurance Association of Pennsylvania so that the growth of the Pennsylvania Retail Hardware Dealers' Association shall thereby be more directly and efficiently promoted, be respectfully referred to the Executive Committee to report at the next meeting of the association.

James N. Kline then delivered an interesting address on the subject of State organization and its influence for good, in the course of which he said:

* * * * * * * * * * *

Now a word as to co-operative fire insurance. We are all buying and must expect to continue to buy old line insurance from our friends and neighbors who are the local agents; but are the methods of these companies the best for us? Is their logic always sound? It is a well known fact that among all old line stock companies no adequate and efficient system exists for checking moral risks.

Almost all insurance people, from the president of the largest companies down to the humblest broker or local agent, will tell you that

THEY FEAR THE MORAL RISK

by far the most. It is also equally well known that the vast majority of fire losses (aside from casualties in the large cities, such as the Chicago or Boston fire, or the but recent Baltimore holocaust), are consequent upon moral laxities of some kind or other, chief among which may be classed gross negligence and carelessness, and, to avoid a harsher term, we will say other preventable conditions; for with the great majority of applicants for insurance it is impossible with the prevailing methods of the old line companies to properly gauge the qualities of the applicant. The question is, Cannot much loss be avoided by fire insurance companies in their carefully seeking to lower the danger signals that form the greater part of the causes of many of their fire losses and to increase the facilities for extinguishing the same? Now, we believe the most efficient measure for improving fire conditions is to enlist personal selfishness on the part of fire prevention. Insurance men have said that many people seem to buy fire insurance because it allows them to become more careless; such conditions should not exist. Fire insurance should not be bought or sold from any such standpoint, and, further, many insurers are beginning to realize that they

ARE CLASSED WITH THE UNDESIRABLE ELEMENTS

who come in by the same way and buy insurance of the same companies, paying the same price as the careful buyers of insurance, with their years of good record to their credit. They who have never had a fire loss must necessarily pay the indemnity given these classes, who do have fires frequently, whether accidentally or otherwise. Therefore, is it not possible to form among such a body of men that go to make up the Retail Hardware Dealers' Association of the United States a closely welded mutually protective company of men rigidly defined in regard to business, moral and physical hazard, so as to not be burdened by losses arising from elements more dangerous than themselves, whether the dangers are incident to the business conducted, or as to the character of the person engaged in it, and by having these risks so guarded that only a carefully graded body of men, who can qualify as to a proper record in the past and a rigid compliance with the rules of safety required, can become policyholders in a company of preferred risks, selected practically by themselves, and these risks so distributed throughout the States, and the towns, cities and villages of a State, that it would be practically impossible to have large losses at one time or at one place?

Mr. Kline's admirable address was followed by George V. Thompson, of Mt. Jewett, who read a well written address on

ADVERTISING THAT PAYS

which we design using as a special article in a future issue.

RESOLUTIONS OF THANKS.

In addition to the resolution adopted early in the convention thanking the Entertainment Committee for the manner in which their work was performed, the following resolutions were adopted at the closing session:

Resolved, That the thanks of this association be tendered to W. P. Bogardus, president of the National Retail Hardware Dealers' Association, for his presence and counsel at this meeting, thus contributing greatly to the usefulness and success of the gathering.

Resolved, That this association gratefully acknowledges the services rendered by R. R. Williams, whose presence and advice as well as his active interest in the association work are highly appreciated by this convention.

Resolved, That we extend to the retiring officers our sincere thanks for the earnest and efficient manner in which they have served the association.

PLACE OF NEXT MEETING.

The Committee on Place of Next Meeting, consisting of A. B. Neyhart, H. B. Young and J. H. Bowers, recommended that the meeting of the association next year be held at Harrisburg. This recommendation was unanimously approved by the convention.

ELECTION OF OFFICERS.

At the closing session of the convention the Committee on Nominations recommended the election of the following officers for the ensuing year:

President—Joseph M. Selheimer.

Vice-President—George V. Thompson.

Executive Committee—For one year, George W. Hackett and J. E. Digby; for two years, James N. Kline and George L. Moore.

James N. Kline and the secretary-treasurer, to be chosen by the Executive Committee, were elected as delegates to the meeting of the National Retail Hardware Dealers' Association in March.

That the attractions of Williamsport as a convention city might be impressed upon the strangers within her gates, a beautiful souvenir programme, containing the order of exercises and pictures of some of the attractive buildings in Williamsport and points of interest within the confines of the municipality—in short, a magnificent work of art—was presented to each of the delegates to take home and preserve as a memento of his sojourn in the Queen City of the West Branch.

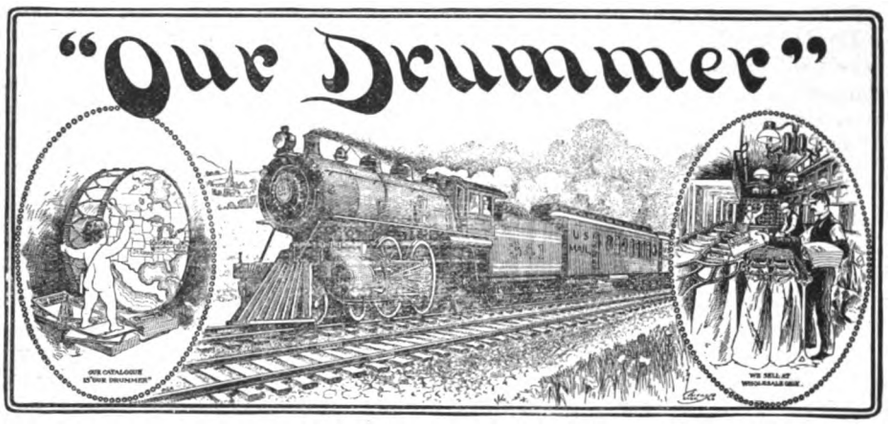
THE BANQUET.

On Wednesday evening, at the Park Hotel, an elegant banquet was given to the members of the association and the representatives of the jobbers and manufacturers who were present. James N. Kline, of Williamsport, whose presence contributed greatly to the success of the convention, officiated in a felicitous manner as toastmaster. This selection was a most enjoyable one, and Mr. Kline's remarks introducing the different speakers was much enjoyed by the guests. The addresses in response to the toasts were for the most part in a light vein and were entirely free from anything tending to make them wearisome or otherwise than thoroughly enjoyable. The toast list was as follows:

Our National Association, by W. P. Bogardus; Our State Association, by George L. Moore; The Manufacturer and the Distributer, by W. J. Ryan; The Trade Journal, by R. R. Williams; The Traveling Salesman, by Jas. H. Reed.

A very interesting address was also made by Rev. J. R. Baker, of Newberry. Music was furnished by Stopper and Fisk's Orchestra, and vocal selections were given by George R. Koons. Harry S. Meyer entertained the company with some selections admirably rendered.

✤



WILLIAM JOHNSON, Hedenberg Works, Newark, N. J., has recently issued his Price List No. 25 and illustrated catalogue of carpenters', cabinet-makers', masons', plumbers' and other mechanics' tools. This business was established in 1830 by the father of the present proprietor. Two of the lines that were leaders years ago have been dropped, machinery having largely done away with the use of markings, mortise cutting and slitting gauges, especially of the finer grades. Competition having reduced the price on Plumbs and Levels, they no longer desired to manufacture them. The goods described in the catalogue are made under the personal supervision of William Johnson and of his three sons who have been thoroughly trained in the practical mechanical operations. Their long experience is a guarantee of carefulness in the manufacture of mechanics' tools and gives them a knowledge of the best methods for producing such tools. A copy of the book referred to is well worth sending for.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Alton, Ill.—Herman Luer will erect a large building on East Second Street, in the near future. The building will be occupied by J. J. Francis, formerly of the Simmons Hardware Co., of St. Louis. Mr. Francis will install a Hardware store in the building.

Bowling Green, Ky.—A new Hardware store under the name of the Barnett Hardware Co. has been opened at 114 Main Street. The firm will carry besides a stock of Hardware a line of house furnishings. J. L. Barnett, who will have direct management of the business, has had years of experience in the Hardware business.

Columbia, Tenn.—Will Ellett and Geo. H. Shelton, of this city, will shortly establish a general Hardware, buggy and implement store in Fayetteville. The firm name will be the Ellett-Shelton Hardware Co. Mr. Ellett for several years has been connected with Satterfield & Dodson, where he gained large experience in the buggy and harness business.

Eau Claire, Wis.—H. F. Schlegelmilch Hardware Company has been incorporated; capital stock, $50,000; incorporators: Herman F. Schlegelmilch, K. C. Schlegelmilch, John Leadholm, Andrew Oberg, Charles Dean and A. H. Shoemaker.

Fort Scott, Kan.—Spofford & Spencer have installed an up-to-date stock of Hardware in the Noonan Building, and are now ready for business.

Fullerton, Pa.—Howard F. Kuhns has opened a new Hardware store.

Grand Rapids, Mich.—The firm of Brown & Sehler, dealers in implements and saddlery Hardware at West Bridge and Front Streets, has reorganized and incorporated under the name of the Brown-Sehler Company. The concern is capitalized at $300,000. The change was made that several persons now connected with the firm might become stockholders. Of the capital stock, nearly $200,000 has been paid in.

Hutto, Texas.—The following business changes have taken place: The Hardware firm of Oatts, Stephens & Company, has been dissolved, T. E. Oatts of the above firm buying C. R. Stephens' interest, and C. R. Stephens bought the Hardware firm of A. Eikel. They will both continue in the Hardware business at their respective places.

Kansas City, Mo.—Simms Hardware Company has been incorporated; capital, $12,000, all paid. Incorporators: Edward B. Simms, George W. Simms, Theo. Welling and George Boies.

Lima, Ohio.—The Gilmore Hardware Company has been incorporated. Capital stock $5,000. Incorporators: Lemuel S. Gilmore, Charles W. Mooney, Franklin M. Bowers, David L. Ramsey and Catharine W. Gilmore.

Lincoln, Neb.—F. M. Thompson has purchased the Hardware business and stock, formerly owned by him but sold to Ong & Edgar, two years ago, and will continue the business at the old stand.

Luverne, Minn.—C. W. Pinkerton has sold his Hardware and implement business to C. W. Grant, of Harris, Iowa.

Marion, Ohio.—W. V. Court has purchased a half interest in the Hardware firm of C. J. Cummings.

Mason City, Iowa.—Currie Hardware Company has been incorporated; capital stock, $25,000; incorporators: C. Currie, Frank R. Currie, J. A. Van Ness and Albert Granholm.

McConnelsburg, Pa.—George B. Mellott has purchased the Hardware store of R. Sharpe Patterson. Mr. Mellott takes possession of the store on April 1st.

Minneapolis, Minn.—J. C. Maxson has purchased the Hale interest in the Maxson & Hale Hardware Company, which will hereafter be known as the Maxson Hardware Company.

Mt. Sterling, Ky.—C. C. Chenault has decided to put up a building to be occupied by Chenault & O'Rear with a Hardware stock. It will be three stories high and will cost not less than $10,000.

Nashville, Tenn.—The Clayton Hardware Company has increased its capital stock from $10,000 to $20,000.

Newcastle, Ind.—N. P. Joyce has purchased the stock of the defunct Hardware firm, Stout & Personett, at assignee's sale for $3,000. The liabilities of the firm, which recently went into bankruptcy, are about $6,500.

Newport, R. I.—The Peckham Co. has been incorporated to deal in Hardware and building materials. Capital stock, $10,000. Incorporators: Job A. Peckham, Frank L. Peckham and J. Henry Cremin, all of Newport.

Newton, La.—The Myer-Neville Hardware Company, of Meridian, has purchased a lot here, and will establish a branch wholesale Hardware house—the building to be put up at once.

Norwalk, Ohio.—The Hardware firm of F. A. Powers & Company has sold its business to the Norwalk Hardware Company, with Henry C. Breckenridge as manager.

Omaha, Neb.—The P. C. DeVol Hardware Company has been incorporated. The incorporators are: Paul C. DeVol, William Roy DeVol, Mary E. DeVol, Hattie L. Judson (formerly Hattie DeVol), and Katherine M. DeVol. The capital stock is placed at $50,000, fully paid up. The company will carry on the business of P. C. DeVol & Son.

Rockdale, Texas.—Henne & Meyer Co. has been incorporated; capital stock, $50,000. Purpose, merchandising, particularly Hardware. Incorporators: Louis Henne, H. G. Henne, of New Braunfels; E. B. Phillips, of Rockdale.

Savannah, Ga.—Shoffner & Dannaher, of Nashville, have leased a building on Third Avenue, and have opened a Hardware store.

South Paris, Me.—A new Hardware store will be opened at once by Frank A. Pingree. He will occupy half of the Booker store and the basement. Mr. Pingree was for many years with J. P. Richardson and has had many years experience in the business elsewhere.

Syracuse, N. Y.—Clancy Hardware Company has been incorporated to deal in Hardware; capital, $50,000. Incorporators: Jas. E. Clancy, John T. Clancy, N. W. Clancy.

Tampa, Fla.—The Robles Hardware Company has been incorporated with a capital of $25,000, to deal in Hardware and all kinds of merchandise. John I. Robles, Jose M. Ray and C. G. Neglons are the incorporators.

Toledo, Ohio.—M. M. Beal has sold his interest in the Hardware and implement business to J. C. Walters.

Utica, N. Y.—J. Irving Hallagan of 64 Albany Street, dealer in stoves and household articles, is closing out his stock, and Feb. 15 will remove to Canastota, where he will engage in the plumbing, Hardware and tinware business. The firm name will be Hallagan, Mason & Company.

Vernon, Texas.—Jackson Brothers Company has been incorporated. Capital stock, $20,000. Purpose, doing a general Hardware and agricultural implement business. Incorporators: Frank Jackson, H. B. Jackson and W. W. Jackson.

Westfield, Mass.—J. H. Bryan Co. has been incorporated (Hardware). Capital stock $25,000. Incorporators: James H. Bryan, F. F. Shephard and S. C. Pomeroy.

Wichita, Kan.—G. R. Follett has closed out his interest in the Hardware store of the G. R. Follett Hardware Company, at 123 East Douglas Avenue to Gus Warnhoff and J. N. McClees, for $20,000. Both members of the firm have been connected with the store a long time. The business will be continued at the same place with the firm name changed to Warnhoff & McClees.

Woodburn, Ore.—Oltnow & Co. has been incorporated to engage in a general Hardware business. Capital stock, $10,000. Incorporators: Henry J. Altnow, W. J. Makelin and John E. Tracy.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Augusta, N. Y.—F. E. Conley Stove Company has been incorporated; capital, $100,000. Directors: F. E. Conley, G. A. Hunter, D. O. Conley, Utica.

Belleville, Ill.—Monk Implement Company has been incorporated; capital, $10.000; manufacturing machinery; incorporators, E. C. Rediger, Arthur Daab and George Niess.

Bloomington, Ill.—The Janney-Darnell Manufacturing Company has been incorporated; capital, $350,000; manufacture farm machinery; incorporators, Calvin Manning and G. Campbell Janney of Bloomington, and S. E. Prather of this city.

Columbus, O.—The Hygienic Heater Company has been incorporated by Geo. F. Hill, Philip S. Brindle, Willis F. Hauser, Edward Arthur Sullivan and Milo B. Lee. The capital stock is $10,000. The company will manufacture gas heaters, gas and gasoline ovens and sheet metal specialties.

Des Moines, Iowa.—The Kirk Manufacturing Company have located in Des Moines, and have offices in the Manhattan building. The company manufacture the Kirk Weeder.

Detroit, Mich.—The Simonetta File Company has been organized with a capitalization of $25,000. Manager Simonetta said that he hoped to have the factory in operation in a modest way in about a month. Officers and directors, other than Mr. Simonetta, are: Secretary-treasurer, E. C. Whitney; vice-president, C. F. Berry; H. J. Boerth and D. C. Curtiss.

Elgin, Ill.—The Elgin Suction Washer Company has been incorporated, the capital stock being $40,000 and the incorporators C. A. Wetzel, J. W. Hamm and A. F. Buckner, all of Elgin. The company will manufacture a patent washing machine in the Towner Building on River Street. When the business warrants it a new factory will be erected.

Heron Lake, Minn.—Western Implement Company has been incorporated; capital stock, $100,000; incorporators, John W. Benson and Bernhart B. Sontag, of Heron Lake; Richard F. Lamb, Slayton; John Dobereimer, Fulda; Albert M. Renner, Heron Lake; Fred. C. Ahrens, Okabena.

Macon, Mo.—The McCall Manufacturing Company has been incorporated. It will make rakes, stackers, lawn swings and specialties in wood. Capital stock, $10,500, all paid. The incorporators are: Gouve Morris, Kansas City; H. L. Vasse, Huntsville, Mo.; J. G. Sandison, L. J. Hill, Macon. The building is nearly completed and the company expects to be in operation within a month.

Madison, Minn.—J. F. Jacobson Implement Company has been incorporated. Capital stock, $15,000; incorporators, Jacob F. Jacobson, Obert R. Nelson and Peter G. Jacobson, all of Madison.

Oshkosh, Wis.—Oshkosh Tool Manufacturing Company has been incorporated. Capital stock, $250,000; incorporators, Elmer Leach, C. A. Libbey, Leander Choate, S. W. Hollister and Charles Schreiber.

Oshkosh, Wis. — The Adjustable Wrench & Specialty Manufacturing Company has been organized with headquarters at 140 Main Street. P. M. Knippenberg of the company is located here and interested with him is F. W. Hahn of Shennington, Wis. The company makes a complete line of monkey, pipe and combination wrenches that have the sliding, instantly adjustable jaws.

Sacramento, Cal.—The Miller-Chapin-Enwright Company has been incorporated. Capital stock, $250,000. The company will conduct a wholesale and manufacturing business, dealing in stoves, ranges, plumbing supplies, metals, pumps and iron pipe. The new firm is composed of three young business men of Sacramento—Thomas L. Enwright, for many years the manager of the firm of Holbrook, Merrill & Stetson, which recently retired from business in this city; Dwight Miller, Asistant Cashier of the National Bank of D. O. Mills & Company, and W. W. Chapin, proprietor of the Sacramento Pipe Works. The new firm expects to be ready for business by the 1st of April.

South Bend, Ind.—The Oliver Chilled Plow Works has been incorporated in Illinois. Capital stock, $500,000. Capital stock in Illinois, $2,400.

Springfield, O.—The Bowlus Automatic Scale Company has been incorporated with a capital stock of $50,000, and will soon be ready to begin the manufacture of the new scales invented by H. C. Bowlus. H. C. Bowlus, Lance Vinney, J. F. Businger, L. B. Corry and C. W. Welsh were elected directors of the company. Mayor C. J. Bowlus and George C. Bowlus are among the stockholders.

St. Louis, Mo.—The Consumers' Supply Company has been incorporated to manufacture household utensils. Capital stock, $10,000, all paid. Incorporators, Ira G. Shryock, Walter E. Parker; and P. R. Dunnavant.

Warsaw, N. Y.—The Webster-Case Hardware Company has been incorporated. Objects, manufacture Hardware, etc.; capital, $18,000; incorporators: Wm. E. Webster, Wm. E. Case, Mary F. Webster, all of Warsaw.

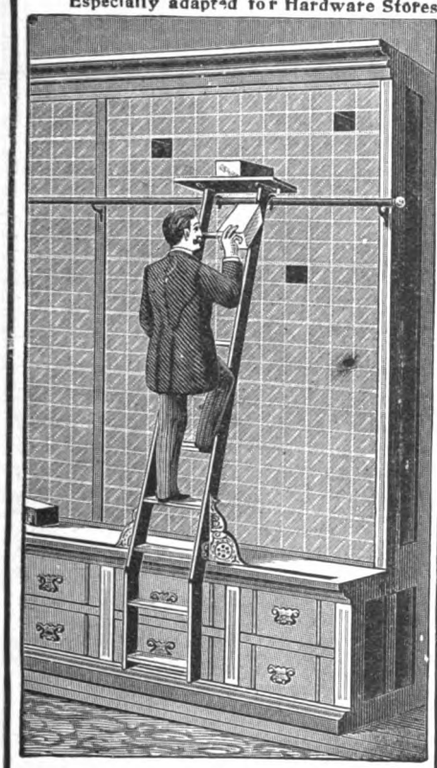
Changes.

Baltimore, Md.—The Maryland Shovel & Manufacturing Company has been dissolved. The company was incorporated August 28, 1901, with a proposed capital stock of $25,000.

Council Bluffs, Iowa.—The Novelty Manufacturing Company, of which Wm. I. Walker is manager, will increase its capital stock from $25,000 to $100,000, and have commenced the manufacture of the Brown patent lock-woven wire fence, an ornamental and field fence of the most approved kind. Two fence weaving machines have been installed and others will follow as fast as they can be manufactured, until the necessary number of machines is secured. These machines are a new invention, and are manufactured at Nebraska City, where a factory for making fence had been established. It is this plant that the Novelty Manufacturing Company has purchased, including all the orders that had been secured by the travelers of the former company up to the time the sale was made.

East St. Louis, Ill.—Queen City Range Company, capital increased from $20,000 to $50,000; name changed to Queen City Range & Stove Company.

Evansville, Ind.—The White Oak Handle Company has increased its capital stock, $30,000. John W. Osborn is president of the company and Alfred W. Emery, secretary.



Grand Rapids, Mich.—The Grand Rapids Saddlery Hardware Company has been organized in this city with a capital stock of $20,000. The concern was formerly the Hastings Check Hook Company of Hastings, composed of Fred L. Heath, C. H. Thomas, H. H. Snyder and G. W. Begole. It will occupy a portion of the Raniville Block, at Campau and Lyon Streets. The Hastings men retain their interests in the company, although nearly all of the new officers are of Grand Rapids. The company will commence at once manufacturing saddlery Hardware and a patent check hook, the invention of G. W. Begole. The officers of the company are: President, John Sehler; vice-president, George N. Davis; secretary, A. B. Richmond; treasurer, J. W. Begole. These, with C. H. Thomas, constitute the board of directors.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Buffalo, N. Y.—W. P. Baker has opened a finely appointed garage, and is now representing the Stevens-Duryea automobile, Mueller coils and Sta-Rite plugs, in this territory.

Davenport, Iowa.—Buck Auto, Carriage & Implement Company has been incorporated; capital, $50.000; incorporators: John W. Buck, Paul R. Albrecht, Walter Priester and Frank Jung Johann.

Indianapolis, Ind.—The Gibson-Short Cycle & Automobile Company has been incorporated with $10,000 capital. This is the business formerly conducted by Cecil E. Gibson. The incorporators are Cecil Gibson, E. E. Short, W. H. Brown and E. M. Gibson. The business will be considerably increased.

New Haven, Conn.—The Buell Cycle & Automobile Company has been incorporated with $2,000 capital, to deal in bicycles, automobiles and other motor vehicles, motor boats, sporting goods, musical instruments and rubber goods. The incorporators are: George A. Pickert, D. H. Buell and Edwin S. Pickert, all of New Haven.

Newport, R. I.—The Whitney Safety Fire Arms Company has been incorporated by Norman Whitney, Henry B. Whitney, John D. Johnson, Allan Woodruff, Michael H. Sullivan, Thomas P. Griffin and Rufus E. Darrah. The concern will engage in the business of manufacturing, selling and dealing in firearms, ammunition, general sporting goods, bicycles, automobiles and machinery and the buying and selling of real estate and stocks. The capital stock is $100,000.

Peoria, Ill.—The Peoria Automobile Company will open a fine garage on Hamilton Boulevard, about March 1. C. L. Turner is superintendent of the company.

Selma, Cal.—Timothy Reynolds has opened a new bicycle store in the Hampton Block.

Toledo, Ohio.—The Toledo Cue Chalker Manufacturing Company has been incorporated; capital $10,000. Incorporators, Fred W. Guese, William E. Guese, George A. Fox, Bernard B. Henley and Sarah A. Fox.

Washington, D. C.—The Blake Rifle Company has been incorporated by John Henry Blake, B. Frank Cash and Wm. Wolfley. Capital stock, $100,000.

Changes.

Buffalo, N. Y.—The Duquesne Motor Car Company have removed to Jamestown, N. Y., where they have purchased the plant of the Straight Manufacturing Company, which is well equipped and has a producing capacity of 500 cars per year. The capital stock of the Duquesne Company has been increased from $50,000 to $300,000.

Buffalo, N. Y.—The plant of the Day Manufacturing Company, which was purchased several weeks ago by A. L. Garford for the Federal Manufacturing Company, and other creditors, notably the Snell Cycle Fittings Company, has been sold under agreement that it shall not be again used for cycle manufacture, and that it shall be dismantled within a stipulated period. The machinery has been distributed chiefly between the Snell and the Federal concerns.

Cincinnati, Ohio.—The Peters Cartridge Company, has increased its capital stock from $1,000,000 to $1,500,000.

Cleveland, Ohio.—The F. B. Stearns Company has opened a retail branch with the Ohio Motor Car Company, also of this city. The latter company is well known and has first-class facilities for taking care of repairs as well as making sales, which it will have charge of in that district.

Granite City, Mo.—A new building in which to temper lead for the manufacture of shot has been added to the present plans of the United States Lead Company's plant now in the course of erection.

New York, N. Y.—The T. M. Hartley Company have relinquished all connection with the cycle trade. This, of course, means they have discontinued their jobbing department.

Perth Amboy, N. J.—Rumor says that the Dupont Powder Company has purchased the plant of the International Smokeless Powder Company at Parlin, which is well equipped for the manufacture of smokeless powder and gun cotton.

Racine, Wis.—The bicycle and sporting goods business conducted heretofore by George Crane has been sold to the Electrical Construction Company. Mr. Crane will engage in another business in Chicago.

Springfield, Mass.—Final arrangements for the transfer of the Ames buildings to the Spaulding Sporting Goods Company, have been made and the Spaulding Company is now the sole owner of the building. A number of changes will be made and it is rumored that the new owners are to move their Trenton, N. J., branch to this city, and that about 1100 hands will be employed.

Sterling, Ill.—Roy Baer has purchased the bicycle business of H. J. Flock, and will do a general line of repairing in addition to handling several makes of bicycles. Flock will hereafter confine himself to the Hardware business.

Waverly, Iowa.—S. Page, Jr., who for fifteen years has been a dealer in bicycles, Hardware and sporting goods, will hereafter devote his attention to the bicycle and sporting goods exclusively. He will close out his stock of Hardware and remove to large quarters, where he will maintain a shop for the repair of bicycles and firearms.

Miscellaneous.

Cincinnati, Ohio.—More than $10,000,000 worth of sporting goods were sold in the United States last year.

Cleveland, Ohio.—W. H. Coles, of the McIntosh Hardware Corporation, has been elected a member of the executive committee of the National Cycle Trade Association in place of E. J. Willis, of New York, who resigned several weeks ago.

Minneapolis, Minn.—At the annual meeting of the Minneapolis Cycle Trade Association the following officers were elected: President, J. N. Johnson; vice-president, E. H. Hammer; treasurer, Frederick Roach; secretary, O. Fenstermacher; board of directors, S. A. Parker, William Edwards, S. Stevenson, G. R. Johnson and L. P. Rice.

New York, N. Y.—At their recent annual meeting, the Stuyvesant Wheelmen elected the following officers for the ensuing year: President, George Muller; vice-president, W. Nagle; recording secretary, H. Borchers; financial secretary and treasurer, Carl Lochman; captain, George Weirich; first lieutenant, Max Lochman; second lieutenant, Jack Westrich; first color bearer, William Nagle; second color bearer, John Borchers; surgeon, F. Berlenbach.

New York, N. Y.—The Monroe Wheelmen, at their annual meeting, elected the following officers for the ensuing year: R. J. Nagle, president; Ernest Ziegler, vice-president; D. Selig, treasurer; A. De Lemos, secretary, and Oscar Frankel, captain.

Rochester, N. Y.—A meeting of the recently incorporated Auto-Bike Messenger and Delivery Company, was held recently for the purpose of effecting an organization. An election of officers was held, with the following result: Charles E. Percy, president and general manager; Joseph R. Webster, vice-president; G. Townley Fries, secretary; Frederick A. DeVoll, treasurer. The officers act as directors for the first year.

The sonorousness of cycle tubing has been taken advantage of by a French inventor named Lewitz. He dispenses with the ordinary bell or horn, and by means of a small metal hammer at the end of a spiral spring fixed to one of the front forks provides a continuous and automatic "alarm" which can be instanly connected or disconnected by a movement of the rider's toe.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

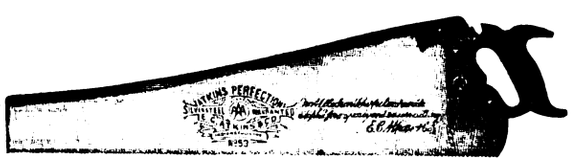
Cable Address, CARLEIO.

Telephone 1445 Franklin.



Made in Four Widths: ½ ⅝ ¾ AND 1-INCH

CARY MANUFACTURING CO.
19 and 21 Roosevelt St., New York.

BUILD UP YOUR SAW TRADE.

You can easily do it if you handle **Atkins High Grade Silver Steel Hand Saws.** Their superiority and fine cutting qualities have firmly established an enviable reputation among carpenters and users of hand and small saws. First class mechanics prefer them for fine work above all others.

ATKINS ALWAYS AHEAD!

Atkins High Grade Silver Steel Hand Saws excel in Material, Temper, Workmanship, Design and Finish. Nothing overlooked in manufacture that adds quality to the saw.

E. C. ATKINS & CO., Inc.,

Branch Houses:

Memphis, Tenn. Atlanta, Ga.
Minneapolis, Minn.
Portland, Ore.
Seattle, Wash.
Toronto, Ont., 30 Front St., East.

Factories and Home Offices,
INDIANAPOLIS,
Ind.

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

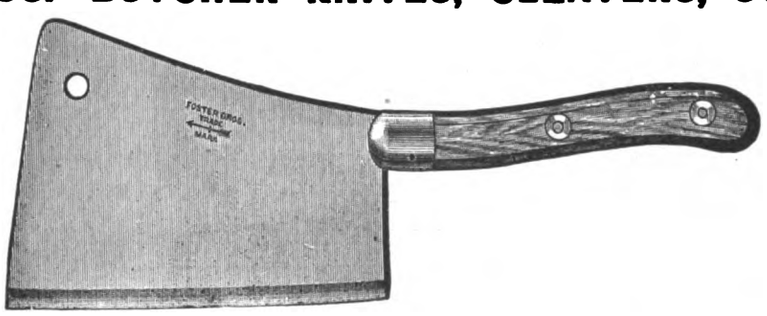
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

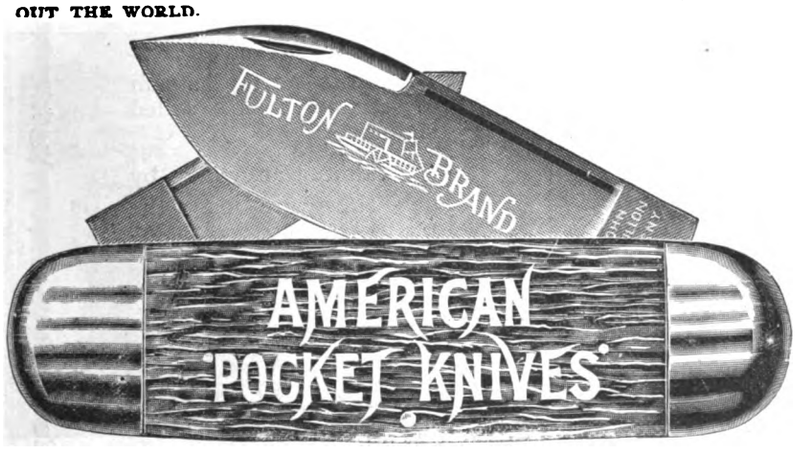


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

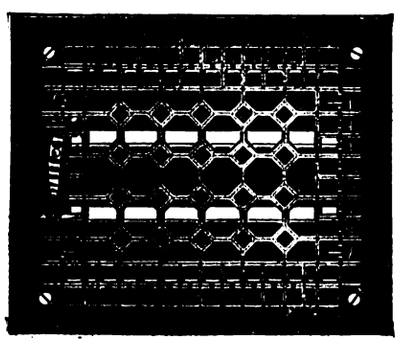
The **SOLID COMFORT**
ALL STEEL SWINGS AND STANDS.
MAY BE USED ON PORCH AND LAWN.

Two Swings in One. Adjustable to any angle. For Reading or Sleeping. Swing may be Changed from Porch to Lawn in Half a Minute. Can be left out the year round. Write for circular. **SISTERSVILLE NOV. CO., Sistersville, W. Va.**

WHY IS THE



O. K. THE BEST ROTARY WASHING MACHINE?

—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing **the friction** and thus making machine so **light running** and almost **noiseless.**
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without **rubbing** them to pieces.
4.—This washer is made by **experienced mechanics**, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

Manufactured by H. F. BRAMMER MFG. CO.,

A SINGLE TRIAL ORDER OF

"NICE"

Filler or Varnish

WILL CONVINCE YOU THAT EVERY STATEMENT WE MAKE FOR THEM IS BASED ON SOLID FACTS . . . .

Liquid Filler supremacy at home and abroad is conceded to these brands. Live dealers everywhere sell them. Calculating consumers everywhere use them.

.. NICE ..
VARNISHES AND FINISHES

enjoy an enviable reputation and deservedly so. Made from the best obtainable Gums and other Raw Materials, by the most approved methods and properly aged, they are unsurpassed for uniformity and durability. Their distinguishing features are perfect flowing and wearing properties combined with high, brilliant gloss.

We will ship to the trade in any part of the world any or all of the following sample cases at prices quoted, F. O. B. Cars or Dock, Philadelphia or New York:

12-1 gallon cans	"NICE" Liquid FILLER	$12.00
12-1 " "	"Y. S." " "	9.30
6-1 " "	Each (12 gallons in all)	10.65

Each of the above cases contain 3 cubic feet and weigh 140 pounds gross.

12-1 gallon cans	"Superior" Inside Varnish	$16.20
12-1 " "	"T" " "	10.20
6-1 " "	Each (12 gallons in all)	13.20

Each of the above cases contain 2¼ cubic feet and weigh 120 pounds gross.

Booklet "Natural Wood Finishing" mailed on request.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

The William Schollhorn Company, of New Haven, Conn., have recently rearranged their offices at their factory, making them more commodious, by separating them more completely from the general departments and foundry proper. F. T. Schollhorn, the secretary-treasurer, is now provided with a handsome private office. There has been provided a handsome show room in which samples are attractively exhibited of the entire production of specialties, including Bernard patent pliers, the Paragon, Elm City, Vulcan and Lodi brands of pliers, belt and ticket punches, cutting nippers, Excelsior dividers and Elm City bolt clippers. The plant now occupies the entire five floors of the building, each 125x50 feet.

The Rollis Hardware Company is the name of a new concern organized January 1st with headquarters at 107 Chambers Street, New York. They are manufacturers of a line of mechanics' tools and specialties general in their character, which is the line of trade to which they intend confining themselves, increasing the assortment as opportunity offers. E. B. Rollis, a capitalist, is president, his interest, however, being only a financial one. The practical head of the business is E. H. Lewis, who is the secretary and treasurer, who for eleven years represented M. W. Robinson Company, six of which he was on the road; consequently, he is well known to the Hardware trade in general.

The Corbin Cabinet Lock Company, New Britain, Conn., and 15 Murray Street, New York, are distributing among the buyers and heads of the different houses with whom they regularly do business, a handy copy of an Atlas bearing their trade mark, which will be found extremely useful, calculated, as it is, only for desk use. We certainly feel as though a day would hardly pass without having the necessity for making use of its contents.

The stockholders of the American Screw Co. held their 44th annual meeting at Providence, R. I., and listened to very satisfactory reports submitted by the president and board of directors. The following were named as directors for the ensuing year: Charles B. Humphrey, Charles Alexander, George L. Shepley, George H. Robinson, Marsden J. Perry, Arthur H. Watson and Samuel M. Nicholson. At a subsequent meeting of the board, the following officers were elected: Samuel M. Nicholson, president; Marsden J. Perry, vice-president; George W. Thurston, treasurer; William A. Cranston, secretary; Benjamin Thurston, general superintendent; and James A. Nealey, agent.

The Tower & Lyon Co., 95 Chambers Street, New York, manufacturers of mechanics' fine tools and Hardware specialties, has increased its capital from $65,000 to $100,000. T. D. Halliwell, who has succeeded Warren Tower as secretary, takes the entire increase of $35,000, and also becomes a director of the company, the balance of the official force remaining as before. The company is preparing to get out many new goods in Hardware specialties at the factory, Bloomfield, N. J.

J. N. Limeburner, formerly at 117 Chambers Street, New York, and representing as selling agent the New York Lock Company, Shelby Spring Hinge Co., Ashtabula Mfg. Co., Jackson Shovel & Tool Co., Chicago Rifle Manufacturing Co. and Schofield & Co., has removed his offices to 84 and 86 Chambers Street, having larger quarters where samples may be seen of the various lines of goods manufactured by these prominent concerns.

The *Cordage Trade Journal* says: "Twenty-four manufacturers carried over 1,541,600 pounds, or 770 tons and 1,600 pounds, of binder twine from last season. Twenty-one of these manufacturers carried over from the previous season 151,000 pounds, or 75 tons and 1,000 pounds."

The annual meeting of the American Hardware Corporation, held at New Britain, Conn., on the 23d inst., resulted in the election of these officers: President, Philip Corbin; first vice-president, Charles M. Jarvis; second vice-president, Howard S. Hart; treasurer, A. J. Sloper; assistant treasurer, Charles H. Parsons; secretary, C. E. Wetmore; assistant secretary, Charles B. Parsons; purchasing agent, Albert N. Abbe; directors, Philip Corbin, Andrew Corbin, Charles M. Jarvis, A. J. Sloper, Charles H. Parsons, Charles Glover, Howard S. Hart, Sylvester C. Dunham, Frank L. Wilcox, and John H. Whittemore, of Naugatuck, Mr. Whittemore being added to the board.

United States Consul Benjamin R. Ridgely, of Nantes, France, reports that an important international industrial and agricultural exposition is to be held in that city, from May 5 to September 22, 1904. It will be on a large scale, and opportunity will be given for the display of all sorts of foreign products, more especially those of a mechanical and agricultural character. The Consul believes that this will be an excellent opportunity for American manufacturers of Hardware, farm implements, wind mills and other goods of the kind to exhibit their products, which can be shipped direct to Nantes in bond and will be entered free of duty.

The date of the annual convention of the National Retail Hardware Dealers' Association has been changed to March 22, 23 and 24. The meeting will be held at Indianapolis, Ind., with headquarters at the Claypool Hotel.

An adjourned annual meeting of the New England Hardware Dealers' Association was held at the committee room of the Boston Merchants' Association, 77 Summer Street, on Wednesday, March 9th, 1904, at 3 o'clock P. M. This meeting was called as the adjourned annual meeting. Nominating Committee: W. D. Parlin, Natick; S. D. Balkam, Jamaica Plain; Geo. F. Mulhall, Boston. The business of the greatest importance before the meeting was the election of officers and action on report of Committee for Re-organization. Committee for Re-organization: D. Fletcher Barber, Henry M. Sanders, F. Alexander Chandler.

HARDWARE CLUB OF NEW YORK.

The twelfth annual meeting of the Hardware Club of New York, will be held at the rooms of the corporation, in the Postal Telegraph Building, 253 Broadway, in the City of New York, on Saturday, the Nineteenth day of March, 1904, at 12.30 P. M., for the election of five Governors to serve for three years, and for the election of one Governor to serve for one year, and for the transaction of any and all business that may come before the meeting.

Polls will be open from 12.30 P. M. to 1.30 P. M.

THE PATTERNMAKER.

We have before us "Vol. I, No. 1," of The Patternmaker, a new monthly publication of the Iron & Steel Press Co., Cleveland, Ohio, and from a perusal of its 80 pages there is every indication of a prosperous career before it. It is under the editorship of Henry M. Lane, whose familiarity with the line of special work to which the publication is devoted is unquestioned. From a careful scanning of its advertising patronage it must be confessed there is an ample field for the furtherance of its aims and the accomplishment of its purpose. Its artistic appearance is excellent, printed as it is on fine paper and appropriately illustrated. The advertising pages are arranged with care and present a degree of attention to harmonious display worthy of imitation. It is a welcome addition to the family of trade journals.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The severe winter through which we may be said to have passed has affected some sections of the country with conditions not conducive to a lively trade during January and February, but they are making up for lost time now that meteorological conditions give evidence of Spring, and the demand for Hardware is as encouraging in its requirements and also enquiries regarding future transactions of importance as one could wish.

Rush orders for immediate consumption show only too plainly the scant supply of Hardware left in many stocks throughout the trade resulting from the slackening demands of the winter months, which for general supplies was certainly light enough; and the necessity now existing for the replenishing of a regular stock, to place the retail trade of the country in shape to meet the requisitions of the crop producers and of the skilled artisans who generally are fairly well employed with few strikes to interfere.

There has been less difficulty during the two months past of obtaining supplies from the manufacturers for immediate requirements, owing to some large orders for Spring stock being held up hoping for some concessions in the way of prices. As the season advance this facility will not be so evident, and the pessimistic possibilities, so freely prophesied by some observers may fail to materialize. Some factories, manufacturing lines of tools in steady demand at home and abroad, have been behind orders for months, and stocks in dealers hands are greatly depleted.

Labor conditions in many of the larger cities, especially New York, are still suffering from the enforced idleness of so many months during 1903; the loss of the usual revenue from steady employment will have it effect on the purchasing power of the laborer for some months to come. But though the idle conditions that hindered the completion of so many enterprises will suspend the erection of so many buildings that had been contemplated, there are a number of enterprises to be promoted and brought to a successful termination that will furnish employment for months to come for the rank and file of labor still left in the city.

Crop preparations are being made on a large scale that cannot result otherwise than to the Nation's advantage. With our cereals and our cotton at the highest prices in years, hope and encouragement for future prosperity make improvements contemplated on every hand; the increase in the supply trade and the agricultural machinery business will possibly reach record figures, every preparation being made by the dealers to be prepared for an active demand for Spring requirements.

Changes in prices have been less noticeable than the disposition to "stand pat" and avoid advances that might check a disposition to stock up largely when trade conditions favor such movements in the immediate future. Manufacturers are complaining, not without cause, of the meagre profits which are characteristic of their production at the present time. Large movements in the pig iron and sheet steel market would seem to indicate that radical changes need not be looked for, speculative anticipations no longer control the markets as they have so often done to the detriment of all concerned; but steady conservative views regarding the future of Hardware manufacturers are now the vogue, while buying progresses based more on the ability of the producer to furnish the stock on time when wanted, than to stand out for an extra one per cent. before placing orders for indispensable lines wanted for Spring trade.

Unless all signs fail the Spring business will be fully up to the sanguine expectations of the dealers. Already requisitions in some lines outside of Builders' Hardware—which had a demand assisted by an additional possible profit, are quite heavy with future promise that will worry the makers to supply when wanted; and the holding up, in many cases, of stock orders usually given before January 1st, will make a shortage in several special lines which the hesitating jobber is doing his best to expedite at the present moment.

RECORD EXPORTS OF MANUFACTURES.

Exports of manufactures in January and in the seven months ending with January show a larger total than ever before in the same portions of the year. For the month of January they amounted to $38,213,352, while the highest January record on any former occasion was that of 1900, when they were $35,586,940. For the seven months ending with January they amount to $250,214,936, and the highest record for that seven months' period in any preceding year was that ending with January, 1901, when the total was $239,564,064. Thus the total for January is 2½ million dollars in excess of any preceding January, and for the seven months ending with January is about 11 millions more than in any preceding seven months, ending with January. These figures are shown by an analysis of the January exports just prepared by the Department of Commerce and Labor through its Bureau of Statistics.

This increase of 20 million dollars in exports of manufactures in the seven months ending with January as compared with the corresponding seven months of last year is distributed among most of the leading classes of manufactures exported. By far the largest increase occurs in manufactured

Digitized by Google

copper, of which the exports in the seven months ending with January, 1904, are reported at $31,552,677, against $22,514,843 for the corresponding months last year, and $19,038,328 for the corresponding period of the year preceding. Refined mineral oil is next in the list of manufactured articles showing an increase in export values, being for the seven months ending with January, 1904, $42,029,461, against $35,324,067 in the corresponding months of last year, and $40,664,900 in the corresponding period of the preceding year.

Iron and steel stand next in the list of manufactured articles showing an increase in exports. The total value of iron and steel exported in the seven months ending with January, 1904, is $59,125,780, against $55,997,942 in the corresponding months ending with January, 1903, and $57,310,128 in the corresponding months of the preceding year. For January alone the exports of iron and steel are $8,171,738, against $7,437,298 in January, 1903, making the increase for the single month $734,440 and for the seven months about 3 millions. Agricultural implements also show an increase in exports, amounting to a little over 2 million dollars for the seven months ending with January, 1904, as compared with the corresponding months of last year and about 4 million dollars increase as compared with the seven months ending with January, 1902.

The table which follows shows the value of domestic manufactures exported from the United States in the month of January and the seven months ending with January, from 1894 to 1904:

Year.	Exports of manufactures. Month of January.	Seven months ending with January.
1894	$14,313,285	$111,005,088
1895	14,101,738	104,606,341
1896	18,732,547	126,802,682
1897	20,621,179	153,884,494
1898	22,998,808	159,541,049
1899	25,806,870	182,336,503
1900	35,586,940	234,301,141
1901	32,604,035	239,564,064
1902	34,412,992	226,146,546
1903	31,759,489	230,235,264
1904	38,213,352	250,214,936

DEATH OF JOHN S. KING.

John S. King, treasurer of the David Williams Company, of New York, died in his home at 1063 Bergen Street, Brooklyn, on Friday night, March 4th. He was born in Middletown, N. Y., October 1st, 1841, and learned the printing trade. He enlisted at the beginning of the Civil War in the Eighteenth New York Volunteers and served through the war. He came to this city in 1868 and became business manager of the *Iron Age* and the other publications issued by David Williams. He was a member of the Hardware Club, the Brooklyn Union League Club, the Brooklyn Masonic Veterans, the Aurora Grata Club, of Brooklyn, the Loyal Legion, the Sons of the American Revolution, the Society of the Army of the Potomac, Hyatt Lodge, No. 205, F. & A. M., and several Masonic Bodies.

DEATH OF FRANK B. SEMPLE.

Frank B. Semple, vice president of Janney, Semple, Hill & Company, wholesale Hardware dealers, Minneapolis, Minn., died February 17 at Camden, S. C., from nervous prostration. Although Mr. Semple has been in ill health since May, his death was unexpected in Minneapolis and the telegraphic news was a great shock to his business associates.

About fifty-four years ago Frank Semple was born in Ohio. While very young he worked as a clerk for the Perrin & Goff Manufacturing Company, of Cincinnati, with whom he learned the Hardware business in detail. He became a traveling representative for the company with headquarters at Jeffersonville, Ind. Twenty years ago this month he went to Minneapolis and bought an interest in the wholesale and retail Hardware business of Janney, Brooks & Co., on Bridge Square. Upon the death of Mr. Brooks and the previous retirement of George H. Eastman the firm became Janney, Semple & Co. The retail business was sold in 1888 to W. K. Morison & Company and the firm moved to Second Street and First Avenue. In 1898 the title became Janney, Semple, Hill & Co.

Mr. Semple was a leading business man of Minneapolis. In addition to his Hardware interests he was a member of the directorate of the National Bank of Commerce, the Minneapolis Plow Works and the North American Telegraph Company. He was farsighted and persistent in the working out of business plans which he deemed wise. Socially Mr. Semple was regarded highly, also. He was a member of the Minneapolis, Commercial Minikahda, Lafayette and Minnetonka Clubs, and was an attendant at Westminster Church.

NEW ENGLAND IRON AND HARDWARE ASSOCIATION.

The annual banquet of the New England Iron & Hardware Association was held at the Hotel Vendome, Boston, on Thursday evening, February 25. The after dinner oratory was of a character to hold the attention of the entire company until the close, shortly before 11 o'clock. The arrangements for the dinner were in the hands of the following committee: John T. Boyd, Albert C. Ashton, George B. Dexter, Edward P. Sanderson. These gentlemen performed their duties well, providing most bountifully and satisfactorily for both body and mind. There was a lavish use of cut flowers on the tables, and each guest was provided with an American Beauty rose for his buttonhole. Daggett's Orchestra furnished music during the reception and throughout the dinner. A very pleasant feature was the singing of Albert C. Ashton of the Ashton Valve Company, the entire company joining with him in the choruses of popular songs.

The invited guests were Hon. Walter I. Smith, of Iowa; Hon. Thomas W. Hardwick, of Georgia; Hon. Willard Howland, S. A. Bigelow, president of the National Hardware Association; John Mason Little, president of the Boston Associated Board of Trade; Rev. Edward Cummings and Walter C. English.

With the passing of cigars and coffee, President Harry W. Waite delivered an address of welcome and introduced Chas. Clark Adams as toastmaster. Mr. Adams, after telling a few humorous stories, gave an interesting address, and was followed by Samuel A. Bigelow. Hon. Walter I. Smith, Congressman from the State of Iowa, was the next speaker, his subject being "The Unity of the Commercial Interests of the Sections." He spoke of the great development of the Northwest, and touched lightly upon the tariff question. Hon. Willard Howland of Chelsea, Mass., spoke briefly on "The Growth of American Commerce," deploring the fact that such a large percentage of the commerce of the country was carried in foreign built and owned ships. Congressman Thomas W. Hardwick of Georgia made the longest address of the evening, giving a carefully prepared speech on "The Negro Race Problem in the South." The closing address was made by Rev. Edward Cummings, who briefly and gracefully answered Congressman Hardwick. This address brought one of the most successful meetings of the association to a close.

THE HARDWARE DEALER.

A new semi-monthly Hardware paper, under the name of the *Hardware Dealer*, appealed to the intelligent constituency of the trade this month from St. Paul, Minn. It is published by W. L. Agnew and edited by Henry L. Knappen, both of which gentlemen occupy the same positions in connection with the St. Paul *Trade;* and the advertising manager of which paper, F. O. Thomson will act in the same capacity on the *Hardware Dealer*. We extend the new arrival a hearty welcome.

THE SKYLINE OF NEW YORK.

The first edition of that excellent engraving published by P. & F. Corbin, New Britain, Conn., and New York, a few months ago, was exhausted much more quickly than was anticipated; the warm welcome extended to its artistic merit has made it desirable to print a second edition, which has been done; and any of our readers who failed to receive one when first published, will upon request, have a copy forwarded with the compliments of the company.

BUTLER BROTHERS' NEW SPRING CATALOGUE.

Butler Brothers, New York and Chicago, have recently issued their Spring catalogue for 1904, which certainly is the most ambitious and thorough-going specimen of catalogue construction that has emanated from that progressive establishment. Selling at wholesale only and appealing to the trade of the retailers, large and small, throughout the United States, this catalogue, which is extensively advertised as being "Butler Brothers' ONLY SALESMAN," it deserves to be perused by every dealer handling any of the immense assortment of goods, a large part of which is in the Hardware and house furnishing lines, comprised in the 350 pages of closely printed matter, well illustrated which forms its bulky and interesting contents. A perusal of these pages and comparison with other sources of supply would furnish a dealer with important data, as all prices are net, no discounts being necessarily important, the operation of a simple comparison with stock already marked with cost prices would be sufficient. Butler Brothers claim to be perfectly well satisfied to abide by this severe test which is well worth subjecting their catalogue to. The contents of this expanded list of articles under the various branches of the Hardware business will of itself prove a liberal education in the way of suggesting additional lines, or salable specialties that may be carried in stock by the modern Hardwareman who desires to keep up-to-date, and have in stock all the goods his customer could be induced to purchase. The catalogue is filled with suggestive items of advice and description that furnish excellent reading for the would-be purchaser, and lessen the labor of an hour's interview with the contents of such an extraordinary compendium of trade information.

LEATHER FROM THE OCEAN.

A great deal of good leather comes out of the sea—not the kind of leather that comes from the backs of walrus, seal and otter; everybody knows about that. There is a queerer leather; it comes from the bodies of fish.

An extremely fine quality of green leather made in Turkey is manufactured from the skin of an ugly fish called the angel fish. This is a kind of shark—a shark with thick, wing-like fins that have earned for him the name of angel, though he doesn't look a bit like an angel, but rather the opposite.

The sword grips of the officers of the German army are made from shark leather, too. They are beautiful in pattern, being marked with dark diamond-shaped figures. This skin comes from a North Sea shark, known as the diamond shark.

German leather manufacturers have tried to produce a leather from animal hides that shall supplant this skin, but in vain. Unlike animal leather, fish leather is absolutely impervious to water and never gets "soggy" from dampness. Therefore it is ideal for sword grips, as, no matter how much the hand may perspire, the grip remains hard and dry.

The sturgeon, despite his lumpy armor, furnishes a valuable and attractive leather. When the bony plates are taken off, their pattern remains on the skin just as the pattern of alligator scales remains on alligator leather. The Pacific coast sturgeon and the sturgeon of the Great Lakes produce a tough leather that is used to make laces for joining leather belting for machinery, and the laces often outwear the belting.

The strange garfish, an American fresh-water fish with long toothed jaws like a crocodile, has a skin that can be polished smooth until it has a finish like ivory. It makes beautiful jewel caskets and picture frames.

The skin of the garfish used to be converted into armor by some tribes of American savages. The hide is so tough and hard that it makes a breast plate that can turn a knife or a spear. Some of the finer specimens that have been found are hard enough to turn even a blow from a tomahawk.

The savages who wore this fish-armor also used to wear a fish-helmet. It was made from the skin of the prickly porcupine fish, and besides protecting the wearer's head, it was used as a weapon of offence. The warriors butted their enemies with it, and as it had hundreds of iron-like spikes the operation was eminently painful to the object of attack.

In Gloucester, the "king town" of fish, the humble cod has been utilized with success for making leather for shoes and gloves. In Egypt men walk on sandals made from the skins of Red Sea fish. In Russia certain peasant costumes are beautifully trimmed with the skins of a fine food fish, the turbot. Bookbinders in Europe are binding books with eel skin.

The eel skin serves another and less pleasant purpose. It is braided into whips. The writer was the unhappy member of a European private school where one of these eel skin whips was a prominent instrument of discipline, and he has never really cared for eels since then.

Along the big salmon rivers of Siberia the natives often wear brilliant leather garments dyed red and yellow. They are made from salmon skins.

In Alaska beautiful waterproof bags are made from all sorts of fish skins.

The queerest use is that to which the intestines of the sea lions are put. They are slit and stitched together to form hooded coats, which are superior to India rubber as waterproof garments.

Walrus intestines are made into sails for boats by the Eskimos of Northwestern America.

Even the frog does not escape. Several factories in France and a few in America make card cases and other small leather articles out of this squawky citizen.—*Canadian Harness and Carriage Journal.*

GLIDDEN VARNISH CO.'S SPECIAL ASSORTMENT.

The Glidden Varnish Co., No. 44 Williamson Building, Cleveland, Ohio, advise us that they are offering to new dealers a special assortment of Jap-a-lac consisting of 12 quarts, 24 pints, 48 half pints and 48 quarter pints, assorted colors, with a full and complete line of advertising matter which enables the dealer to make a very attractive window display. The assortment will cost the dealer $26.46 less cash discount. They invite inquiries from the trade regarding this assortment and will be pleased to give any information desired regarding it, upon receipt of inquiry mentioning this publication.

SARGENT & CO.'S MINSTREL SHOW.

Nearly four hundred people enjoyed the performance given by the Gem Minstrels in Crosby Hall, Brooklyn, N. Y., on the evening of February 26th, with Mr. Clarence Roberts as interlocutor, and Messrs. Corey, Mahoney, Massey, Tait, Hammer and Fritz as end men. The Gem Minstrels consist of part of the office force of the New York house of Sargent & Co., 151 Leonard Street. The show was voted a great success far exceeding the most sanguine expectations of the participants, and the boys showed real talent. Those taking part are all employed by Sargent, and several of them sang solos which were immensely enjoyed. One in particular aroused enthusiasm, that sung by Herman Fritz entitled "Any Rags." Mr. Fritz was hardly on his feet before the audience shouted and stamped and made other noises such as ringing cow bells (which, of course, were not borrowed from the stock of Sargent & Co.) Other solos also receiving enthusiastic applause were: "I'm Just Barely Living, That's All," by Mr. Corey; "Pretty Little Dinah Jones," by Mr. Massey; "Asleep in the Deep," by Mr. Wilkening; "Goodbye Eliza Jane," by Mr. Tait; and others. The entertainment was followed by a dance which was thoroughly enjoyed by all, and broke up in the wee, small hours of the morning.

WHY A LOCOMOTIVE IS CALLED SHE.

Some one has solved a problem and offers the following explanation why a locomotive is called "she":

"It wears a jacket, an apron, has hose, and drags a train behind it. It has a lap, needs guides, rides wheels and will not turn for pedestrians; sometimes foams and refuses to work. It attracts the men sometimes, is contrary, and always takes a man to manage it."—*Detroit Evening News.*

SHE TOOK IT VERY HARD.

"No." said the beautiful widow, "I couldn't sleep for weeks after my husband died."

"How pitiful," put in her sympathetic friend.

"You see, I had mislaid his insurance policy, and for a while I was really afraid I'd never be able to find it."

RECENT TRADE PUBLICATIONS.

HOLROYD & COMPANY, Waterford, N. Y., established since 1847, have just issued their 1904 catalogue exploiting their stocks and dies, round adjustable die plates, taps, dies and threading tools. It is a high grade book of 48 pages, well printed on heavy coated paper, and arranged in an extremely systematic manner. Illustrations, descriptions and lists are given on all articles. The above firm are manufacturers of the Dalton combination axle cutter, a tool designed for cutting back the nut shoulder on carriage and wagon axles that have become worn, to allow the nut to be brought sufficiently close to the wheel to prevent the wabbling of the latter. This machine consists of a screw-plate, with right and left hand dies cutting as follows: 1¼ inch and less, 9 threads; 1 inch and less, 10 threads; ¾ inch and less, 12 threads. One pair each right and left hand cutters for cutting back the nut shoulder of axle; also one pair of cutters and two collars for cutting down axle from the top, and one hack saw for cutting off end of axle when necessary. This axle cutter complete retails at $15.25. Holroyd & Co. will be pleased to send copy of catalogue upon request.

THE NOERA MANUFACTURING COMPANY, Waterbury, Conn., are distributing their catalogue No. 10 of Noera Oilers and Lamps and Hardware specialties in bronze, copper plated and nickel plated finishes, and fine brass oilers and engineers' sets. The coming year is the 23rd in the history of the company and during all this time they have maintained their place in the front rank among manufacturers. Mr. Noera, the manager, claims to be the originator of this class of oilers, etc., and his long experience has enabled the company to manufacture goods of the finest quality. They have added to their former line, bicycle sundries such as wrenches, bicycle oilers, pumps, etc. A separate catalogue of these the company will be glad to furnish to patrons upon application, and they will also be pleased to give estimates on special work in brass, steel, copper, tin and zinc. A product of the above company is their Improved Oiler, which, when the handle is grasped by the hand, presents the broadened end of a lever within convenient reach of the thumb. By controlling the pressure of the thumb upon the lever, the flow of the oil from the spout can be easily regulated to meet the requirements of the parts being oiled. These oilers are made in steel and brass and in one style, practically indestructible, and are especially adapted to the use of locomotive engineers. We recommend our readers to send for this catalogue as one sure to be of value to them at all times.

THE BRYAN MANUFACTURING COMPANY, Bryan, Ohio, have recently distributed to their trade their illustrated catalogue No. 37 embracing their Champion wheelbarrows. They claim their line to be the most complete line of wheelbarrows made. The manufacturers call the attention of the trade to the construction of the Champion wheelbarrow, which, they state, embraces many important features not found in any other barrows on the market. Their patented staple axle bolt for attaching wheels to handle, they claim, has no equal as it braces and strengthens the frame and prevents the handles from spreading or splitting. Their patented malleable shoe for combining legs and braces, they claim, makes the strongest and most durable wood frame barrow on the market. Their patented folding steel frame garden and railroad barrows occupy the least possible space for storing and shipping. The frames, handles and bolts of each barrow are in one complete package, so that an order for any number can be easily and quickly filled. Their all-steel tubular barrows are constructed on the truss principle, and they claim, have no equal for durability. The best quality of material and workmanship are employed. In their catalogue they give a complete description of each barrow, and they state they will be pleased to furnish any further information upon inquiry.

THE BERGER MANUFACTURING CO., Canton, Ohio, have published a unique booklet, the pages of which are twice as large as the cover, but fold so as to make a very neat and compact booklet. The Berger Manufacturing Co. are manufacturers of steel office furniture, which they claim is superceding wood in the most up-to-date offices. They are pioneers in the construction of appliances substituting steel for wood, and claim to have the largest sheet-metal works in the world, and are in position to fashion any design in steel. Steel card index cases are made a specialty of by the Berger Company. They claim for them that they economize space, are extremely light in weight and are very strong; unaffected by climatic changes, and afford an absolute protection to card systems. The booklet is well gotten up with an artistic cover and is first-class in all respects. The manufacturers will be glad to mail one of them to those applying.

THE ERIE SPECIALTY CO., Erie, Pa., are placing in the hands of their patrons their 1904 catalogue containing 80 pages, having several illustrations on each page, and each one accompanied by description and list-price. The product of the Erie Company consists of Hardware, soda fountain and advertising specialties. Owing to the constant additions to their goods they have adopted the policy of issuing a catalogue at the beginning of each year. These they mail regularly to their trade and to others on application, and for this reason they request that in referring to their catalogue customers will make sure it is the latest edition. They announce it is their intention to strictly adhere to their former policy of producing the very best goods that skilled workmen and modern machinery can produce, guaranteeing perfect satisfaction with all goods furnished.

THE CARBORUNDUM COMPANY, Niagara Falls, N. Y., have issued one of the most artistic pamphlets covering their line of product that we have had brought to our attention. Every page of illustrations is from the finest half-tone engravings superbly finished, showing as they do, all the processes of manufacture as well as illustrations of productions that are at the present time, too numerous to enumerate and convey a proper idea of. A complete history of the manufacture and development of Carborundum at Niagara Falls is given as a prelude to the more technical contents consisting, as it does, of a lecture delivered before the Franklin Institute by Francis A. J. Fitzgerald. This is a very interesting part of the pamphlet in question. Illustrations are given of characteristics of grinding wheels showing their various styles as well, including Carborundum cylinder cup wheels, and also shapes for roll grinding, a number of special shapes for these goods being shown in large variety. Wheels for wood-working tools and shapes of wheel edges are also largely illustrated. Altogether it is the most complete and useful compendium of Carborundum products that any Hardware library could possibly have, and should be asked for.

THE PENINSULAR STOVE COMPANY, Detroit, Chicago and Buffalo, are distributing among the trade a large and very attractive circular containing eleven extremely handsome illustrations of their steel oven ranges and cook stoves. Under the head of cook stoves they illustrate the Diamond steel base; has four holes and will burn either coal or wood; is fitted with the duplex or flat shaking grate; and is made with three size ovens 17, 10 and 21 inch, also 7, 8 and 9 tops. The other illustrations are as fully described, and each one gives the impression of being the right thing, if put in the right place.

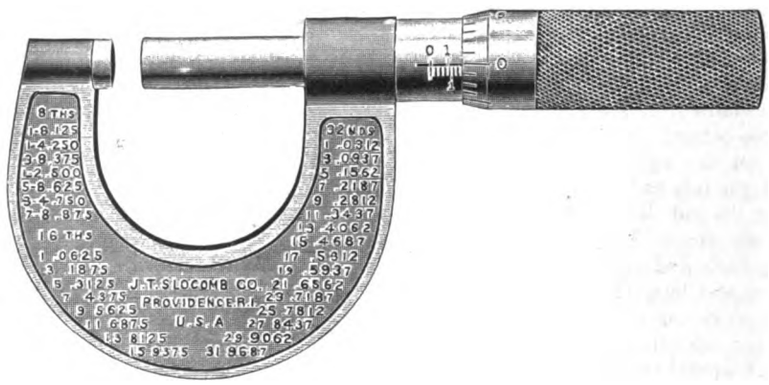
KEEPING TAB ON ORDERS.

By Lyle Merton.

As a large percentage of the orders filled by any jobbing house is taken by the travellers on the road, there must be some system by which these orders are kept track of during the different stages which lie between their receipt in the office and their final completion when the invoice is mailed to the buyer. If an order could be completed the day of its arrival there would be little trouble to formulate a plan. But often an order is not filled completely until several months, after it is taken. The reason is obvious. It may be taken for future delivery; some of the goods may not be in stock and have to be back ordered; the mode of shipment may be by boat or route which will cause delay in shipping the goods; owing to pressure of business each order may have to be taken in turn; there are usually many delays which prevent the prompt filling of many orders, even in houses which make a boast of prompt shipments.

The different stages of the completion of every order should be known, or should be readily accessible should the information be desired, at any time. Also every order should be easily located during this process of completion. It very often happens that there are changes or additions to be made and for this reason if for no other it should be a matter of but a few moments to find where each order is. To accomplish these results every order sent in by a traveler should bear a number. These numbers are put on by him when he mails the order and serves as a means of knowing if any order has gone astray. Each salesman places a different letter before each number which serves as a means of distinguishing each man's orders; as each man is known by a different letter as A1, B1, C1, or D1.

As orders are received they are first examined by the credit man who marks them O. K., if credit is satisfactory. The orders are then indexed in a book specially ruled for the purpose as follows:

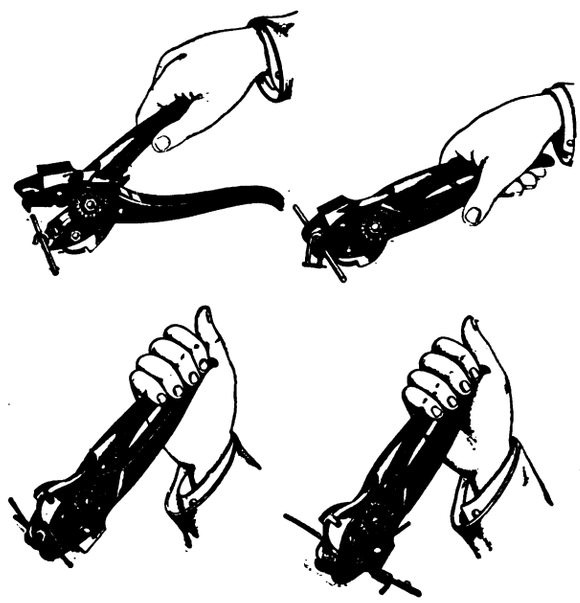


Name.	No.	Date recd.	How to Ship.	When to Ship.	Given to	Remarks.
B. Jones	D 56	Jan'y 1, '04	C. E. Ry.	Apl. 1	G. D.	Paints & Oils
E. E. Davis	B 10	Feb'y 10, '04	Stmr.	At once		Gen'l Goods
J. Dawson	A 3	Jan'y 5, '04	C. E. Ry.	May 1		Cord'ge & Glass

After being indexed the orders are then separated, those for immediate shipment being given to the clerks to be got out and packed and shipped. Those for later shipment are filed in a two drawer cabinet where they can be found at a moment's notice.

By this system of indexing every order as received is kept track of until it is completed. It has been found to work well in practice and saves a lot of time when it is necessary to refer to an order which has been received but not yet completed; as by this index every order can be located at any stage.

SLOCUMB PRESSED STEEL MICROMETER.



J. T. Slocumb Company, Providence, R. I., are the manufacturers of the new micrometer illustrated herewith; it represents a micrometer with a polished frame and full table of decimal equivalents; the table of sixty-fourths being on one side, and eighths, sixteenths and thirty-seconds on the other. These figures are raised instead of being sunk, this being accomplished in a hydraulic press, a pressure of about 300 tons being used, which compresses the steel and stiffens the frame. The raised figures and ribs about the edges are referred to as making a better finger hold than when the frame is flat and the figures are sunk. The figures are alluded to as being very distinct, and, on the whole, as presenting a very neat appearance. All other features of the tool are the same as the manufacturer's regular micrometer. The tool illustrated is at present made in one size only, measuring from 0 to 1 inch. It is being put on the market by J. T. Slocumb Company, Providence, R. I.

SLOCUMB PRESSED STEEL MICROMETER.

"ELM CITY" STAPLE PULLING PLIER.

The William Schollhorn Company, New Haven, Conn., are placing upon the market through the Hardware trade the New Model Elm City Staple Pulling Plier, of which we present an illustration, showing in a graphic manner the several stages of the operation of staple pulling, gripping the staple, pulling staple; gripping the wire before splicing and splicing the wire. Combining as it does so many tools in one, greatly increases the utility of a tool of this character. It is a convenient, durable and powerful tool, and is calculated to do rapid, accurate and high grade work, being able to cut No. 7 wire. It is furnished with bright steel interchangeable cutters and has black finished handles.

NEW GOODS AND SPECIALTIES.

PHILLIPS WARDROBE CLEAT AND HOOK.

The A. J. Phillips Co., Fenton, Mich., have recently put upon the market very neat and useful articles in the form of Wardrobe "Cleats" and Hooks, which we illustrate in the course of this article. The cleat or bar is of beechwood, oiled natural color; the finish is smooth and the oil finish, it is

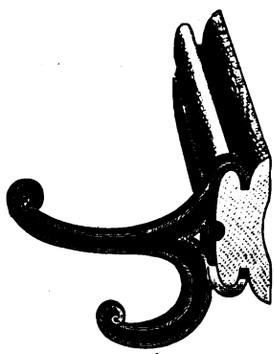

FIG. 1.

claimed, will not mar. Nail holes are bored an inch apart so that the round head nails for fastening the cleats on the wall may be driven anywhere. At one end of the cleat the lower tongue is cut away enough to admit the sliding hooks. Fig. 1 is the ordinary double hook for general use. Fig. 2 is

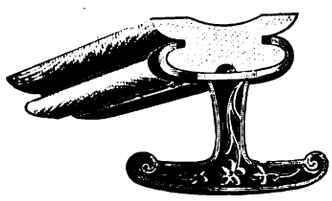

FIG. 2.

for overhead use and the hook bar may be fastened either to the ceiling or to underside of shelves. Fig. 3 is six inches long and on it may be used several of the useful garment

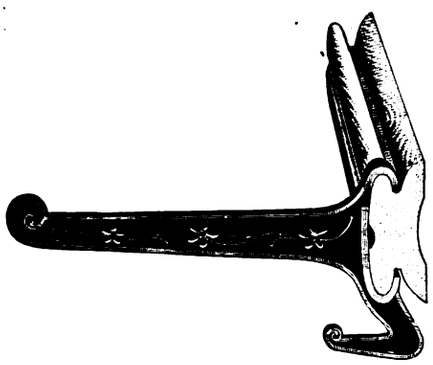

FIG. 3.

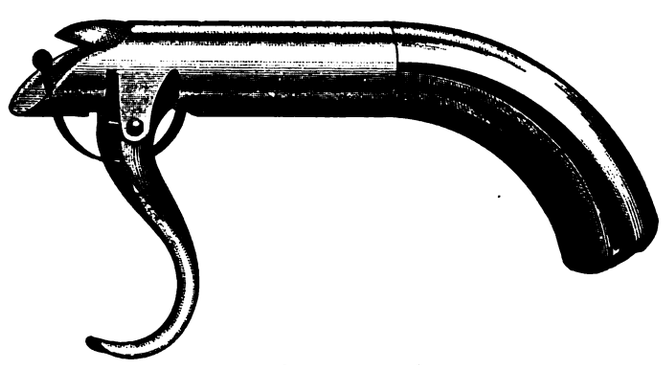
hangers that are now on the market. Any desired number of hooks, which are Berlin bronzed, may be distributed on the cleat. Round head nails 2½ inches long are furnished, one for every foot of cleat, making quite a finished job. The outfit is fine enough for the most elegant residence, yet very inexpensive, and may be put up by the most inexperienced.

UDELL'S MEDICINE CABINET.

The Udell Works, Indianapolis, Ind., are placing upon the market a number of extremely handy cabinets that are being added largely by the Hardware trade throughout the States to their regular assortment of novelties. We illustrate herewith their Medicine Cabinet No. 1341/2, which has been favored with an extended sale. It is twenty inches high, fourteen inches wide with a depth of seven inches, and is made in quarter sawed golden oak finely polished, and also made in white enamel, each style having a French bevel mirror 8x12. The interior arrangement of these cabinets are of an exceed-



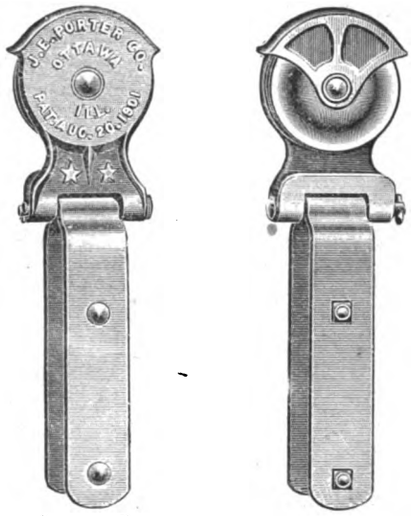
UDELL'S MEDICINE CABINET.

ingly handy character, having receptacles for various medicines both liquid and powders. They also manufacture similar goods in the way of music cabinets, commodes and ladies' desks.

PATTERSON'S PINEAPPLE EYE CLIP.

Patterson & Company, 183 Front Street, Rochester, N. Y., are the makers of the Pineapple Eye Clip shown herewith which is an indespensable article for the extraction of the eyes from the pineapple when in the course of preparation for culinary purposes. There are said to be 50 to 75 of these

PATTERSON'S PINEAPPLE EYE CLIP.

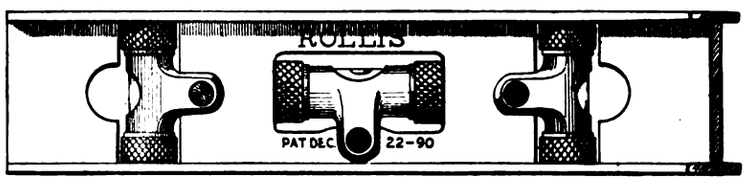


eyes in every pineapple. It is made entirely of steel, handsomely nickel plated, and is operated by holding it in the hand like a pistol, pushing it under the eye about half an inch, pulling the trigger and the eye is extracted. It is intended to be sold at 25 cents retail, and is sent out by manufacturers with a handsome colored easel card for show case advertising, packed with each dozen.

THE "PORTER" HINGED BARN DOOR HANGER.

The J. E. Porter Co., Ottawa, Ill., are offering to the trade a new Barn Door Hanger which we illustrate herewith. A practical feature of this hanger is the manner in which it is ribbed which permits of a maximum amount of strength being obtained. The flange of the wheel in combination with the lower track guide is designed to prevent any possibility

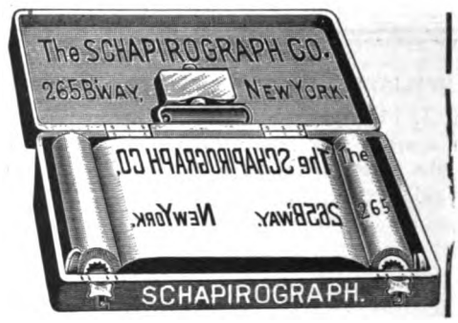
Digitized by Google



of the roller jumping the track or being thrown off for any reason whatever. The flange that forms the "Can't-get-off" feature extends the full length of the hanger. The hanger and door strap are connected by a loose malleable pin, which produces the hinged effect, and is found to be a great advantage in hanging doors, as the track and hangers can be placed in position, the door straps attached to the doors, and the connection made by slipping the pin through the lower part of the hanger and the loop of the door strap. Doors can also be removed with equal ease without disturbing the door straps. The track is made of 1¼x3-16 hard Bessemer steel, with brackets or supports riveted through the track every 16 inches. The track is extremely rigid, strong and durable. The hangers run on roller bearings and are packed one pair in a box and in cases containing one-half and one dozen pairs. The manufacturers will forward to dealers upon application a recently designed folder, printed in colors, which describes the hanger and track above referred to.

THE "PORTER" HINGED BARN DOOR HANGER.

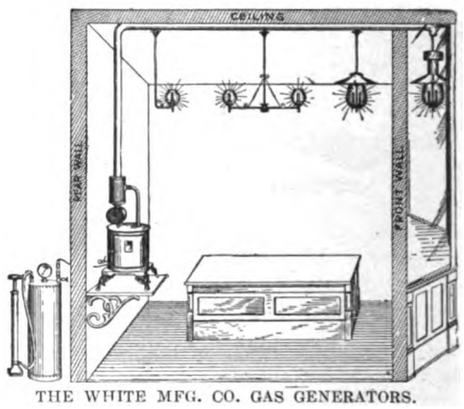
ROLLIS ADJUSTABLE SHEET STEEL LEVEL.



The Rollis Hardware Company, 105-107 Chambers Street, New York, are the manufacturers of the Rollis Patent Adjustable Sheet Steel Level, of which we present an illustration. This level is a radical departure from many heretofore placed upon the market, and is claimed to have advantages over all its rivals both in point of construction and in material. It is quickly and accurately adjusted, neatly and very substantially designed and is highly polished and nickel plated. The liability of breakage as found in cast iron levels is entirely overcome, and yet the level is lighter in weight than many competing levels manufactured from metal. The tube is made from highly polished gun-metal, and is easily adjusted without the use of any tool. The knurled screw caps on each end of the spirit tubes bear against the opening in the frame where the tubes are held, with a simple movement of the caps back and forth with the thumb and finger, a perfect adjustment is obtained. Two sizes only are at present on the r .ket, but it is in contemplation to bring out other sizes as the trade demands.

ROLLIS ADJUSTABLE SHEET STEEL LEVEL.

THE SHAPIROGRAPH.



The Shapirograph Company, 265 Broadway, New York, are manufacturers of one of the latest and up-to-date devices for multi-copying anything written with pen or typewriter that one could require. It is calculated to produce 150 copies from any pen writing, or 50 copies from a typewritten copy, without the necessity for using either ink or stencil. There are no preparations required, the method of its operation being extremely simple. It is claimed to be a remarkably durable appliance, as each apparatus contains 5½ yards roll printing surface which may be used all day long continually and over and over again for taking duplicates. In the Shapirograph coated paper is stretched and ready to use by turning the two cog wheels noted in the illustration. The original should be written with the ink supplied for the purpose on a hard smooth ledger or linen paper. For typewriting use, it is recommended that a strong purple copying ribbon be used as it is excellent for the purpose of duplicating correspondence. Reproductions are made on any kind of paper, the smoother the better.

THE SCHAPIGRAPH.

THE WHITE MFG. CO. GAS GENERATORS.

The White Manufacturing Company, 192 and 194 Michigan Street, Chicago, are calling especial attention to their Gas Generator manufactured by them, which is illustrated in the cut shown in this article. These gas generators are so simple in their construction, and so easy to operate, that any one, however inexperienced, can install and run them successfully. They are so compact they only occupy a small space of 12 inches square, and may be placed on a shelf or table anywhere in the room. All the working parts are made of cast brass, and are interchangeable.

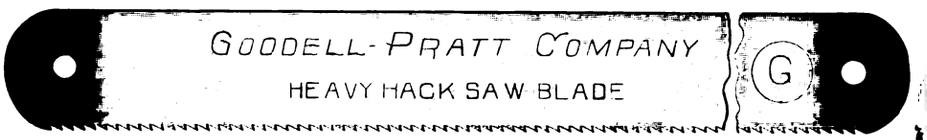
THE WHITE MFG. CO. GAS GENERATORS.

The generator is mounted on an iron base and enclosed in a metal hood to protect it from draughts of wind. It is built on very substantial lines, and is most effective in its light-giving power. The generator is kept heated from a sub-flame, which is supplied by gas from expansion chamber, which automatically feeds the sub-burner, that keeps up constant generation.

The gasoline is conveyed to the generator through a ⅛ hollow brass wire from a tank, which may be placed either in or outside of the building, any distance away. This is one of the most important features of this device, as there is no volume of gasoline near the heating or operating point.

Every machine, it is claimed, is fully tested by actual burning before sending out. It is offered as a complete, in-

Digitized by Google

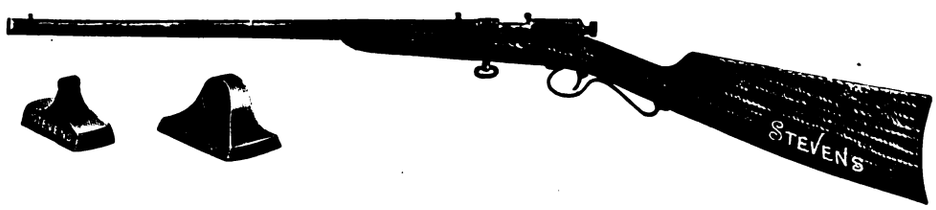


dividual gas plant, ever ready, reliable, and easily operated. The gas is produced by the gasoline passing through the heated generator, into the air mixing chamber where it becomes thoroughly carburated with air, thus forming a hydro-carbon gas of great illuminating power. It then passes through the supply pipes to each lamp, which you light like any ordinary gas jet, no further generating being necessary.

The cost of operating is governed by the cost of gasoline at the point of installation, which, on an average, is 50 per cent. to 75 per cent. cheaper than gas, electricity, or acetylene, for lighting purposes. There seems to be no excuse for either the city or country merchant to have a poorly lighted store, at the prices and perfection of the art that gasoline devices have now attained.

The White Mfg. Co. offer to ship to any responsible party one of the Air Light Gas Plants, to be paid in monthly installments. They are fully guaranteed in every particular.

GOODELL'S HEAVY HACK SAW BLADES.



The Goodell-Pratt Company, Greenfield, Mass., are bringing out a new article in the line of heavy hack saw blades in addition to those in the ordinary widths and gauges with which their name has been long associated. The new blades

are intended for use in power machines. They are ¾-inch wide and .035-inch thick (or No. 21 gauge), and have 14 teeth to the inch. The catalogue number will be No. 300, and the blades, the manufacturers state, will be found of their usual high quality.

STEVENS LITTLE KRAG SINGLE SHOT RIFLE.

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are manufacturers of Stevens Little Krag single shot rifles shown in the accompanying cut. This is one of the simplest and strongest rifles of its class manufactured, and has special features not found in any other boys' rifle. It has new style peep sights, 20-inch round barrel, is chambered to take the 22-long rifle cartridge, hence will also handle the 22-long rim fire, 22-short rim fire and C. B. caps, weighs 3¼ pounds, and comes packed one in a box in take-down form.

STEVENS LITTLE KRAG SINGLE SHOT RIFLE.

THE IMPROVED NATURAL STONE GERM-PROOF FILTER.

The Improved Natural Stone Germ-Proof Filter is a specialty manufactured by the Fulper Pottery Company, of Flemington, N. J., and we give herewith an illustration of this sanitary article which is a gravity filter made in six sizes. The company was established in 1805, and since then have been

FULPER GERM PROOF FILTER.

making a specialty of sanitary stone ware of every description. The filter which we illustrate is guaranteed to be perfect when shipped and absolutely germ proof. It is a combination filter and cooler. By using the ice chamber the water is kept ice cold, but does not allow the water to come in contact with the ice, which is a very commendable feature. The filtering medium is a natural stone on which all foreign substances are caught and retained until removed by a filter brush which is furnished with the filter for that especial purpose. The company have issued a number of catalogues embracing their entire extensive line, and they would be glad to send any or all of these dealers upon application for the same.

TRADE NOTES

Little Rock, Ark.—The Gowdy & Ellis Hardware Company of 501 Main Street, will open a store at 122 East Madison Avenue.

Memphis, Tenn.—The capital of the Warren & Davidson Company was increased from $100,000 to $200,000.

Milwaukee, Wis.—The Philip Gross Hardware Company has purchased the stock of machinists' tools and supplies, as well as the accounts and good will of the Rice Machinery Company, 165-7 West Water Street, and is making arrangements to carry on the business of the concern. The stock will be moved at once to the Grand Avenue store of the Hardware concern, and the rear portion of the present building there, which is now one story in height, will be increased to four to accommodate the additional business.

Nevada, Iowa.—A business deal has just been closed whereby C. E. Markland becomes the owner of the Hardware stock formerly owned by Klove & Klove. Mr. Markland has already taken possession.

Newburyport, Mass. — Lawrence L. Peavey, for the past 19 years in the employ of S. H. Thurlow, Hardware dealer, has become a partner of Mr. Thurlow. The firm name will be S. H. Thurlow & Company.

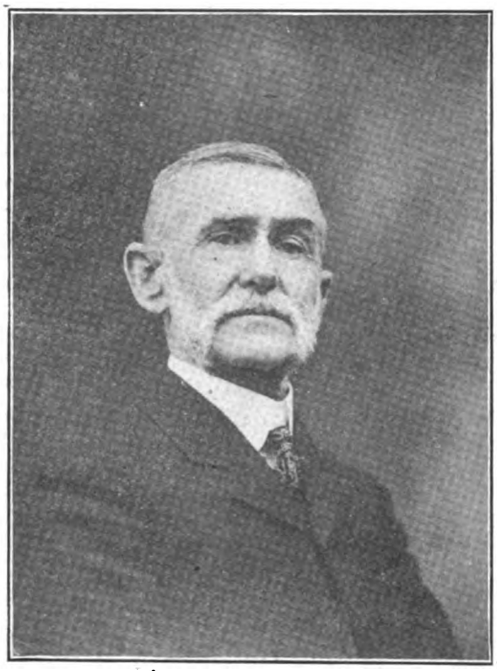
Newtown, Ind.—Sam Beaver has sold his interest in his Hardware store to his brother, Frank.

New York, N. Y.—The Tiger Wheelmen have elected the following officers for 1904: President, H. A. Gliesman; vice president, C. Tulp; treasurer, C. P. Soulle; financial secretary, J. Morrison; captain, C. Harding, and first lieutenant, P. J. O'Grady.

Oskaloosa, Iowa.—The Hamilton-Messenger Company, No. 113 High Avenue, west, has sold out its business to the Dack Hardware Company.

York City, Pa. — After thirty-five years of business life at George and Philadelphia Streets, the firm of John F. Thomas & Sons, it is said, will close out their Hardware and grocery business between this time and July first.

Zanesville, Ohio.—Nicholson & Secrest have sold their Hardware store to Carlisle & Grimes, of Cambridge, who will take possession at once.



Wynne, Ark.—The Kennedy & Morelock Stove Company has increased its capital stock from $50,000 to $100,000.

CONNECTICUT STATE ASS'N OF RETAIL HARDWARE DEALERS.

The Connecticut State Association of Retail Hardware Dealers brought its first year of existence to an end at its first annual meeting held at New Haven, Conn., Wednesday, March 2. The inability of President Bogardus or Secretary M. L. Corey of the National Association to be present at the convention, caused great disappointment, although the members found much to discuss of interest to themselves and to the Hardware trade of the State.

The convention was held at Heublein's Restaurant, the rooms of the United Service Club in the same building also being thrown open to the use of the members. There were more than 50 merchants, representing a majority of the leading retail Hardware concerns of Connecticut, present.

W. A. Church, President.

A. H. Abbe, Ex-President.

The meeting was called to order at 11 A. M. by President A. H. Abbe, of New Britain, who welcomed the members, as follows:

PRESIDENT'S ANNUAL ADDRESS.

Upon this our first anniversary it gives me great pleasure to welcome you here and to congratulate you upon the success of our association, and I think you will agree with me that the association is a success, for out of a total of eighty-six Hardware merchants in the State of Connecticut, we have enrolled forty-five, actually more than fifty per cent., and this I certainly think is up to the average of any other State Association. Those of you who attended the organization at New Britain a year ago will remember the enthusiasm shown there, and also at the Summer meeting.

During the past year little has been done by this association except to bring all Hardware dealers together and become acquainted with each other. This in itself is to me a great pleasure, and no doubt is to all of you. There is always something to learn as well as many good friendships to cultivate in this getting together and mixing with our class, and we will all be better merchants and better men through having this association to bind us together, for where can you find a Hardwareman who is not a good fellow and worthy of your friendship? I argue that there was a time when but few of us could find a good fellow doing Hardware business in our own town except ourselves. We were friendly if they were only doing business far away from us; but this has all been changed within the last few years, and largely by influence of association work. The Business Men's Association, of course, has had a lot to do with this, so that it seems to me it will pay us well to nurse this association and keep it alive, and as it goes on we will learn how to use it, and it will no doubt be a lasting benefit to us all.

There are forty-one firms who have not yet come in with us. We want them in, and I hope that you will, all of you, use your best efforts to influence any dealer in the State to join with us. Have the travelling men who call upon you help us out in this. Ask them to say a good word for us wherever they go.

As you all know, there is a National Association of Retail Hardware Dealers made up of Local State Associations. The Secretary of the National Association is M. L. Corey, of Argus, Ind. I am not informed as to what other duties Mr. Corey has to perform, or if he is in the retail business or not, but if he has any other work aside from the National Association, I do not know when he can devote any time to it, for he certainly is putting in earnest work for this National Association, and it seems to me it must require ten hours every day. He certainly is doing a grand work for the trade.

W. P. Bogardus, the President of the National Retail Hardware Dealers' Association, seems also to devote a great deal of time to the work of that association, and to these two gentlemen is due the success of the National Association. I will not attempt to tell you of their work, as Mr. Corey, who is here to-day will cover this, and has more knowledge of it than I have. He will, no doubt talk to you of Trade Insurance, Parcels Post Law, etc.

The association is under obligations to the *Iron Age* for printing the report of our first meeting at New Britain, together with the by-laws we adopted at that meeting, and furnishing us with copies of the same in pamphlet form.

In conclusion I wish to thank the members for your cordial support in organizing this association, and to speak for my successor the same support and co-operation that you have given me.

After the transaction of formal business, including the acceptance of routine reports, a Committee on Nominations was appointed by the chair, on motion of F. W. Jaynes, of Green-

Digitized by Google

wich, consisting of Mr. Jaynes, F. M. Lyon, of New London; F. C. Leighton, of New Haven; A. H. Bishel, of Middletown, and A. R. Jones, of Danbury. In making the report for the committee Mr. Jaynes, as chairman, stated that the committee wished Mr. Abbe to serve another year, which he had declined to do because of pressure of private business, and, as he afterward stated to the meeting, because he considered that the honor was a great one, and he proposed to see it shared by his fellow Hardwaremen throughout the State. These officers, as reported, were unanimously elected:

OFFICERS ELECTED FOR 1904.

President—W. A. Church, Derby.
First Vice-President—Charles A. Agard, Torrington.
Second Vice-President—George J. Bassett, New Haven.
Secretary—Charles L. Way, Hartford.
Treasurer—Lewis B. Crosby, New London.
Directors, for three years—A. H. Abbe, New Britain; J. J. Noxom, Middletown; Herbert T. Clark, Willimantic; T. L. Jones, Greenwich.

The directors whose terms hold over are: For two years: F. M. Lyon, New London; J. R. Hill, Danbury; George E. Baldwin, Bridgeport; F. T. Terry, Ansonia. For one year: D. B. Wilson, Waterbury; C. H. Preston, Norwich; Eli C. Birdsey, Meriden; Henry Lockwood, Stamford.

CHAS. G. AGARD, FIRST VICE-PRESIDENT.

President Church was escorted to the chair and in accepting the office thanked the members for the honor which they had conferred upon him and which had come quite unexpectedly.

Secretary Way made a report on the question of

MUTUAL FIRE INSURANCE FOR RETAIL HARDWARE DEALERS,

and read communications relating to the methods of the Pennsylvania and Minnesota companies. A considerable discussion of the question followed, the purpose being to discover whether such a mutual company would be feasible in Connecticut. A letter from Eli C. Birdsey, of Meriden, told that he had taken a policy in one of these mutual companies with a view to ascertaining how its cost compares with that of the old line companies' policies.

R. R. Williams, Hardware editor of *The Iron Age*, was called upon to address the convention in regard to the insurance features of the associations in other States. He explained briefly the manner in which the insurance companies were organized, referring to the marked success which had attended them. He emphasized the importance of making the insurance department of association work contribute directly to the growth of the associations, as membership is made a condition of obtaining the insurance. Others who took part in the discussion were Ex-President Abbe, F. W. Jaynes, Charles A. Agard, F. W. Hallock and M. E. Weldon.

As a result of the discussion a committee was appointed by the president, consisting of Eli C. Birdsey, of Meriden; Charles A. Agard, of Torrington, and A. H. Abbe, of New Britain, to investigate the subject and make a report to the association.

INDORSED THE GARDINER BILL.

A communication was read by the secretary from the New York Board of Trade and Transportation, inviting the association to take action in influencing their Representatives in Congress in behalf of the Gardiner bill, providing for an investigation with a view to benefiting American deep sea shipbuilding and ship owning. A committee was appointed, consisting of B. C. Lightbourn, of New Haven; F. M. Lyon, of New London, and M. E. Weldon, of Bristol, to draft suitable resolutions, which were later adopted, urging upon "our Senators and members of Congress such action as will increase the tonnage of deep sea service."

THE MOST IMPORTANT BUSINESS OF THE MEETING

was the consideration of the custom of certain Hardware manufacturers in entering into direct competition with the retailers. The matter was brought up in connection with Nails and Screws, but soon shifted to the question of Builders' Hardware, the allegation being made that large manufacturers of these lines were entering into the territory of the Hardware merchant and bidding against him, generally successfully.

GEO. J. BASSETT, SECOND VICE-PRESIDENT.

R. R. Williams, who was called upon for his views in regard to the matter, referred to the difficulties of the trade in connection with the sale of Builders' Hardware, which he characterized as a most troublesome problem, which though it had been many times considered by the manufacturers and merchants was still practically unsolved. He commended the association for taking hold of this subject, and said that their effort to correct the existing condition of things would be met with approval by the entire trade in all parts of the country, inasmuch as merchants generally have long experienced troubles similar to those in Connecticut, though perhaps not in all cases so acute. He assured the association that their deliverance on the subject would undoubtedly be given the most careful attention by the manufacturers, who recognized the justice of the retailers' complaint, and would be glad to find a way to put the sale of Builders' Hardware on a more satisfactory basis.

There followed a general discussion, in which many of the members joined. The result was the appointment of a committee of three, consisting of Herbert T. Clark, of Williman-

Digitized by Google

tic; F. T. Terry, of Ansonia, and George J. Bassett, of New Haven, to draft suitable resolutions and present them to the president for his approval, and by him forwarded to the secretary, who shall present the resolutions to manufacturers of Builders' Hardware, and shall also forward them to the trade journals and to the National Association.

THE PARCELS POST.

Mr. Abbe brought up the question of the parcels post, concerning which a letter had been received from Secretary Corey, of the National Association, asking that the association take action against it. After some discussion a unanimous vote was taken, condemning the measure, with the understanding that a copy of the vote be sent to all Connecticut Representatives in Congress.

NATIONAL DELEGATES.

It was voted that the president and secretary of the association be sent as delegates to the annual meeting of the National Association, at Indianapolis, Ind., each being given the power to name his alternate in case he is unable to atte- himself. Provision was made by which the association pay the expenses of the delegates.

An excellent dinner followed the proceedings, after which there was informal speaking, President Church making an admirable toastmaster. He made an address of welcome and congratulation, after which he called on several gentlemen to speak, including R. R. Williams, A. H. Abbe, George J. Bassett, George L. Sargent, of Sargent & Co., F. T. Terry and F. W. Jaynes.

KENTUCKY RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION.

The third annual meeting of the Kentucky Retail Hardware and Stove Dealers' Association was held at Louisville, March 1, the headquarters being at Liederkranz Hall.

TUESDAY AFTERNOON SESSION.

The meeting was called to order at 2 P. M. Among those present who were guests of the association were W. P. Bogardus, president of the National Association; W. P. Lewis, ex-president of the National and Indiana State Associations, and W. P. Oldham, formerly president of the Kentucky Association, and now retired from business.

The first business on Tuesday afternoon was the appointment of Jos. Knapp as sergeant-at-arms. U. S. Shacklett, formerly first vice-president, who succeeded W. P. Oldham as president when the latter retired from business last March, delivered the annual presidential address.

Committees were then appointed on Nominations, Constitution and By-Laws, and Resolutions, after which the convention adjourned until Wednesday morning.

WEDNESDAY MORNING SESSION.

The association reconvened at 10 A. M. Wednesday. Paul Wagner, of Louisville, read his report as secretary.

SECRETARY'S REPORT.

an excellent address, quite of an executive character, and which concluded as follows:

* * * * * * * * * *

All in all, the work this year has been more encouraging and more beneficial than any previous one, and with the membership now enrolled, and the addition of several more enthusiasts, we see no reason why the Kentucky Retail Hardware and Stove Dealers' Association should not in the near future stand in the front ranks of association work.

Let us make a friend of our competitor, and when we have gained his confidence it will be an easy matter to induce him to join our ranks. The larger our numbers the more good can be accomplished and the easier the task.

In conclusion, I would thank all the members who have assisted me in my duties of secretary for their kind indulgence and their friendly consideration toward me, and especially for the confidence exhibited on all occasions. If my health allowed it, it would, indeed, be a pleasure to me to act as your secretary as long as your indulgence with my poor efforts would permit me.

J. C. Frederick, of Owensboro, followed with a well digested paper on

FELLOWSHIP IN BUSINESS

which was listened to attentively.

H. C. Lewis, of Greenville, then read a paper,

THE BENEFITS OF LOCAL ORGANIZATION,

which gave evidence of much thoughtful consideration of the subject.

An admirable address entitled

RANDOM SHOTS

was presented by Joseph W. Knapp, of Louisville, which proved of interest to the delegates.

MUTUAL INSURANCE.

W. P. Lewis, of the Indiana Association, made an interesting address on mutual insurance, in which he touched on the national company, organized some months since, and the other companies now in successful operation under the auspices of several of the State Hardware associations.

U. S. SHACKLETT, Ex-President.

THURSDAY AFTERNOON SESSION.

OFFICERS FOR 1904.

At the afternoon, the closing session, reports of the different committees were read and approved. The following officers were elected for the ensuing year:

President—J. C. Frederick, Owensboro.
First Vice-President—J. C. Mahan, Lawrenceburg.
Second Vice-President—Jos. Knapp, Louisville.
Secretary—John R. Sower, Frankfort.
Treasurer—J. Steitler, Owensboro.

An interesting report was made by Mr. Sower in regard to the proceedings of the last annual convention of the National Association, which Mr. Sower and Mr. Frederick attended as delegates from the Kentucky Association.

LOUISVILLE AGAIN CHOSEN FOR ANNUAL MEETING.

Louisville was again chosen as the place of the next annual meeting.

Mr. Shacklett and Mr. Sower were appointed as delegates to the National convention, to be held at Indianapolis March 22, 23 and 24.

The meeting then adjourned *sine die*.

TUESDAY EVENING

was given up to the enjoyment of a Smoker and Dutch supper, provided by the retail dealers of Louisville for the entertainment of the delegates. About 100 persons were present, and the occasion was a very successful one and thoroughly enjoyed.

His Harvest.

"Young Briefly had only been admitted to the bar a week when he made a fortune. He was caught in a railroad wreck in which forty people were injured."

"And he was one of those who got damages?"

"He was all of them. He got all the victims to retain him."—*Philadelphia Public Ledger.*

ILLINOIS RETAIL HARDWARE DEALERS' ASSN.

The sixth annual convention of the Illinois Retail Hardware Dealers' Association convened in the Music Hall at East St. Louis on Tuesday morning, February 23d, for a three days' session.

TUESDAY MORNING SESSION.

The convention was called to order promptly at 10 o'clock with nearly 200 members present.

President C. H. Williams in the chair, introduced Silas Cook, mayor of East St. Louis, who bid the delegates welcome to the city in the following language, in part:

MAYOR COOK'S ADDRESS OF WELCOME.

Mr. Chairman and Members of the Illinois Retail Hardware Dealers' Association, I assure you that it affords me very great pleasure to extend to your organization a most hearty welcome while you are in our city. We are proud to know that this organization selected our city for the place of your meeting. East St. Louis is always ready and always glad and always willing to have a gathering of business men of the State of Illinois to meet with us. When I look over this audience into your faces it reminds me that I am talking to business men—men that are representative men from the various cities and places from whence you come. You have met here to deliberate and discuss and consider matters pertaining to your business, and I am sure that this gathering will be of much good to the Hardware dealers. The social feature of it is very pleasant, I am sure. While I have been in the hall here this morning I saw Mr. Jones meeting Mr. Smith, and saying: "I met you at Galesburg and I meet you here;" and you see at once that you have formed an acquaintance with each other in these annual meetings and renewing your acquaintanceship, with men that are in the same line of business. You discuss your business methods and practices that you have in business, and the object and purpose is to get the ideas of different ones, how you conduct your business; and there is no question, but after discussing those matters that every one gets some new idea and something that is of advantage to him in the future.

* * * * * * * * * * *

We have a business town here and we have as many manufactories as most any city in the country and they are still coming. We have more railroads than any other city in the State of Illinois, and better facilities for getting into and out of it, unless it should be Chicago—in the State of Illinois.

Now, friends, I don't want to talk long, but I want to say to you that we welcome you. We are glad you are here.

Now then I want to say to you as the chief executive of our city that I am proud to say that there could not be a convention of more representative and intelligent men gathered anywhere than the retail Hardware men, and I have no hesitancy in saying to you that I will now turn over the keys of our city to you, knowing that I am putting them in trustworthy hands. Whenever you trust your business with business men I say to you you have no need for fear nor uneasiness.

Now, friends, I want to say again that I thank you and extend to you a hearty welcome and the keys are turned over to you, and I say to you to use them to your best advantage. (Applause).

This address was responded to in a most genial manner by President Williams, who thanked the mayor for his hospitable welcome, assuring him there was no spot in Illinois that had a warmer place in the hearts of the assembled delegates than East St. Louis.

The convention then adjourned until 2 o'clock.

C. H. Williams, President.

TUESDAY AFTERNOON SESSION.

The convention was called to order promptly at 2 o'clock by the President, who appointed the following committees:

Committee on Location of Next Meeting—J. A. Hunter, Peoria; Fred Kurtz, Chicago; Geo. Olendorf, Centralia.

Committee on Finance and Auditing—Leo. Krueger, Chicago; Dave Reflior, Ottawa; M. Fahay, Decatur.

Committee on Question Box—O. B. Kurth, Centralia; C. T. Woodward, Carlinville; T. C. Conner, Evanston; John Homan, Nashville; T. J. Mathews, Mt. Vernon.

Committee on Resolutions—Geo. Meyers, Peoria; I. K. Neely, La Salle; Fred Siegrist, Highland: O. A. Stebbens, Chicago; L. H. Clark. Rockford.

Committee on Nominations—H. G. Cormick, Centralia; Dennis McLaughlin, Chicago; Chas. Johnson, Peoria.

Wm. T. Gormley, Vice-President.

Committee on Press—G. R. Lott, Chicago; H. H. Roberts, Chicago; S. P. Johnston, Chicago.

President Williams then delivered his annual address.

He spoke in part as follows:

PRESIDENT'S ANNUAL ADDRESS.

Gentlemen: It seems but a little while since we were assembled together in our fifth annual convention, yet as we realize that a year has elapsed since then, we are impressed with the fact that life, and especially the business life of any one individual, is short and to make the most of it is our duty. A college class graduating recently had for a motto, "Green but Growing," and it is a good one for progressive mankind in any vocation, to bear fruit without going to seed. And as we begin the work of our sixth annual convention it seems appropriate that we consider for a moment what we are here for. Not to indulge in idle theories or speculative philosophy, but to add to our mental equipment for business for life. To keep "Green but Growing," that is in a state of mind that permits of growth and expansion—of taking up a new idea and discarding an old.

As I look over this representative body of men I feel that each one carries within him some valuable experience—some technical trade knowledge that, imparted to us, will be valuable information, and nothing but the well known retiring disposition and modesty of Illinois Hardwaremen generally will interfere with each one of us, carrying home a good load of new ideas.

Business men have little time to call on one another—in their places of business, especially when they are scattered over this great commonwealth of Illinois—so once a year in convention assembled, from the papers and discussions and side talks is about the only opportunity we have of getting the benefits of personal contact with one another.

The past year has been a successful one for our association. Everybody has been busy with his own affairs and very few complaints have been filed with your officers. This fact of itself indicates a rather healthy condition of trade.

The strength of retail mercantile associations is rapidly increasing and with the growth of power we should use discretion and conservation and, that our growth may be continuous, be a little slow rather than aggressive, for the people who meet with the fewest disappointments in life are those who are always looking for trouble.

Digitized by Google

The work of our national association has been handled in an able and dignified manner and its officers are entitled to our heartiest endorsement.

We have seen within a very few years the rural free delivery system develop from nothing into a giant institution, a great convenience to its beneficiaries (for it is not self-sustaining), but nobody has yet noticed the benefits from it accruing to local merchants.

But every improvement that mankind puts into use, as well as every labor-saving device, upsets the equilibrium of somebody's business, and to be able to meet the crises brought about by these changes is the object of trade associations.

IS THE JOBBER TO BLAME?

Well, that depends. Jobbing competition is intense and it is but good business sense to take on all profitable business that one can get, unless thereby it causes a loss of other more desirable business. The mail order business has grown so rapidly that jobbers and manufacturers alike are not yet crystallized in their attitude toward it, but are open to adopt whatever policy will pay them best. Gentlemen, it is up to the some hundreds of Hardwaremen in this and other organized States who are now first-class passengers traveling dead-head, that is, who have not joined their association, to say by their acts whether they want us to have strength enough to accomplish our ends. Whenever we can show 70 per cent. of the dealers in the States composing our vast association, members, we will have little difficulty in getting prompt attention to all reasonable requests.

L. D. Nish, Secretary.

Geo. A. Engelhardt, Treasurer.

There is a feeling that in association work we need some plan whereby the work can be kept up more continuously during the year. In part this is being done, as the secretary of our mail association is at it all the time. No doubt we will in time devise plans to make the State association more continuous than heretofore.

We as Hardwaremen and citizens do not want to appear in the eyes of consumers as breeders of extortionate prices, nor to manufacturers as hold-up men or blackmailers, but on each we desire to impress that there is a mammoth enterprise (not incorporated) handling Hardware, who are maintaining neat and elegant sample rooms from the Atlantic to the Pacific, from the Canada line to the Gulf of Mexico, who carry stocks amounting to many millions of dollars, who extend credit to many deserving people (and some others), whose delivery wagons carry goods to every hamlet and nearly every farm house in America, who stand for quality and carry out the guarantees of manufacturers liberally, whose advice and suggestions to all the consumers are more valuable than all the book-encased bargains in the book that often rests above the Bible in the family parlor whose combined purchasing and distributing power far exceeds that of all other agencies—namely, the organized Hardware dealers of the country.

They can furnish the best representation for all legitimate lines of goods and every effort put forth by manufacturers and jobbers to increase their prosperity will bear fruit in the elimination of fakes and maintaining of a high standard of legitimate trade.

Secretary L. D. Nish made a detailed report, which concluded as follows:

The bulk of the time of the secretary after leaving the annual meeting last year was taken up in obtaining a fairly good mailing list, and I trust with that we may be able to reach all of the Hardware dealers in the State.

The membership as reported last year was 244. There have been received since, not counting those that have been received to-day, but up to yesterday were 53, making a total of 297, there resigned nine and there were dropped for arrearages seven. That leaves a total net membership of 281. There have been received to-day 15 new members, and you will see the total being 68 for the year, that there is a larger percentage than has been received in any other year. Last year's report was 33; so to the secretary at least it has been quite gratifying to note the increased membership. The number enrolled, and upon which was based the published report last year, was 275, and figuring on the same basis this year, we should announce as our published membership of 328, which is the enrollment.

The financial report as far as the secretary is concerned, the total receipts have been $631.00, which has been turned over to the treasurer. The total number of orders that have been issued amounting to $707.29. The treasurer will give the financial end of it. Gentlemen, I thank you.

Treasurer George A. Englehardt, Chicago, made his annual report as follows:

Balance received from former treasurer	$79.40
From secretary	631.00
Total receipts	$710.49
Paid vouchers	707.29
Balance on hand	$3.20

H. G. Cormick, of Centralia, then addressed the convention, presenting the report of the Executive Committee. He reported especially the recommendation of the committee that the members support the efforts of the National Retail Hardware Dealers' Association in building up the National Hardware Dealers' Mutual Fire Insurance Company, of Huntingdon, Pa. He said they had already subscribed about $500,000 worth of insurance. He urged the members to take out insurance with them, and said that the insurance company would be a means of building up the membership of the State associations as well as the National.

He was followed by Geo. K. Swan, of Mattoon, who read a paper on

SOME HARDWARE TROUBLES

from which we extract the following:

* * * * * * * * * *

Mr. President, if you will allow me the time I will speak a little while on catalogue house competition. This is one of the subjects that has baffled the best business talent in the country, and to find a remedy that would overcome it we as dealers have given it a great deal of thought and study, and yet we have not found a remedy that would reach all of the conditions, but we have been able through our association to induce some of the manufacturers not to sell these catalogue houses their staple lines of goods, and we are aware that the catalogue house always quotes a low price on their staple lines of goods, so we, as dealers, have been trying to induce our trade to buy their goods of the home merchants instead of sending off to the catalogue houses for them. We have accomplished this by teaching them that we can sell them a better class of goods at about the same prices as the catalogue house can sell them seconds or light weight goods.

We should not feel harsh towards these people because they are trading with a catalogue house, nor should we laugh at them because they are trading with us, but we should show them by fair dealing and right prices, that we can and will for cash any of the prices quoted by the catalogue houses, providing that the goods are of the same quality, and standard makes of goods, and it is my judgment that we, as dealers, can do a great deal to bring this lost trade back again to where it belongs, but to do this we must use practical methods and good judgment when these customers enter our stores. There has been a great deal of good accomplished through our efficient officers of our State association. They have been successful in getting manufacturers not to sell the catalogue houses certain kinds of goods, therefore our officers have enabled us to make a living profit on these lines of goods, that at one time was nearly a dead loss for us to handle, and so I could name many other good things that has been accomplished through our officers since our State association has been organized, and I want to say to you gentlemen, that we ought to be proud of the fact that we have been able to secure such men as we have had at the head of this association the past five years, men who have given their time and money, that we might be benefited in our business. I believe that I express the sentiment of this convention when I say that we thank them for their kindness.

Digitized by Google

I have a great deal of faith in the advertising my clerks do, as to the amount of business my store does, and I am willing to give them credit that they make sales when perhaps I would fail. I contend that the success of a store depends much on the kind of help you keep, as one poor salesman in a store will drive away more trade than all the rest of the force can build up, so you see poor help is dear at any price. The kind of treatment a customer receives in your store is the best advertisement you can get, either for or against it, and so there might be a great deal more said in regard to these trade troubles but my alloted time is up, and I must close as there are others to follow me.

C. Mauer, of East St. Louis, who is one of the oldest Hardware dealers of the city, gave a reminiscent address on the Hardware trade of the city, dwelling upon the many changes, and how largely it has broadened its scope in the way of stocks which he argued would soon settle the rivalry of department stores by handling as many lines of suitable stock, and adopting some of their methods to lessen competition.

He was followed by L. H. Clark, of Rockford, who read a paper on the subject of

H. G. CORMICK.

SYSTEM

dwelling upon the manifold advantages of being systematic in all the different departments of the greatly expanding methods of doing business. Before adjournment for the day a committee consisting of John F. Bannon and John F. Steinmeyer, of the Missouri Retail Stove and Hardware Association, addressed the meeting, urging a joint meeting of their association with the Illinois association on the following day.

The convention then adjourned until Wednesday morning.

John Bannon and A. Steinmeyer, a special committee appointed by the Missouri Retail Stove and Hardware Dealers' Association to confer with the Illinois Association, arrived at this juncture, and Mr. Bannon spoke as follows:

"It is with pleasure that I come over to fraternally greet you. We met your men in arranging for a joint session. We do not desire to take up much of your time. A glance over this audience shows that as far as numbers go, your State is well represented. When we see Hardware interests with only a river between them, there should no feeling exist save that of fraternity. Our convention has been discussing problems of trade, and ways of controlling antagonistic interests. The Hardware business is not to be counted among the smallest of the financial interests of any State or any community. Many inroads have been made into our business. Some of these are legitimate; some are illegitimate. In fact, the best manner of taking care of our interests has brought us together. A Hardwareman must be a man of some intelligence. They come to these conventions with a purpose—namely, to prevent further inroads of illegitimate competition. No doubt, the same conditions prevail in Illinois as in Missouri. You suffer from the catalogue houses and the department stores the same as we do. The best way to protect ourselves is by unity, as one man can do but little. A dozen can do much more, and a hundred can do a great deal. In Missouri we have felt the results of organization and I am glad to say they have been decidedly beneficial. We have taken in many new members the past year. A number who held off to find out whether the association would be successful or not have come in. You have a very good representation here. A very serious problem, individually and collectively, is that of the best methods of conducting our business without antagonizing our competitors. We have threshed the subject over very thoroughly—one man has given his opinion of it, and then another has followed suit. The time is coming when the influence of retail Hardware associations will be felt. We have been climbing up the hill and have nearly reached the top. We can now declare what we want and get it. Nothing can make so strong a front against the manufacturers as unity. Illinois and Missouri are very near a unit. The manufacturers, jobbers and larger dealers watch these conventions and have emissaries who inform them concerning existing conditions. When they know what these conditions are they will not wait to be driven into line. We are here to fraternize. We must keep in touch with the association on this side of the river. Illinois and Missouri are two great States and I hope in time other States will come together. We cannot be antagonistic, as kindness is better than meanness. We want the manufacturers and jobbers as honorary, not onery, members of our associations. We do not want them to ask, 'What are you going to do for us?' but 'What can we do for you?' 'What are we doing detrimental to your interest?' They will come to us and say, 'We want to be in line.' It is our purpose here to extend our gratitude for your heartfelt kindness and interest: and we want to be counted as one of you. 'We are from Missouri and we will show you.' I hope we are all spared to form one grand union of interests here next year. We might have our celebration on excursion boats in the middle of the Mississippi River."

The convention expressed their appreciation of the presence of the Missouri committee by a rising vote.

The convention then at 5 P. M. adjourned.

F. F. PORTER.

TUESDAY EVENING

was devoted to a smoker prepared by the local Entertainment Committee which took place in Music Hall. The entertainment was voted a great success, the delegates and their friends found ample enjoyment in the festivities usual at a function of this character.

WEDNESDAY MORNING SESSION.

Convention called to order at 12.30, President Williams in the chair.

F. F. Porter, of Chicago, read a paper on

SYSTEM IN SHOP AND STORE

which subject he treated in a very painstaking manner and proved exceedingly interesting in its exposition of details worthy of contemplation.

H. G. Cormick read a paper on

CO-OPERATIVE BUYING

which was of a thoroughly practical character, indicating a great familiarity with the engrossing subject. He was followed by M. L. Corey, of Argus, Ind., secretary of the National Retail Hardware Dealers' Association, who presented the arguments for which he is a hard worker on the great importance of the National Association and the benefits to be derived from belonging to it.

President Chas. H. Williams, Streator, said: "Our reception to our visiting friends has been quite informal, but I will assure you that nothing since the first organization of the Illinois Retail Hardware Association has given me more pleasure than to have the membership of the Missouri Retail Stove and Hardware Dealers with us to-day."

Three cheers and a rousing tiger was then given by the Illinois Association as a welcome to their visiting friends from across the river.

R. R. Williams, of the *Iron Age*, New York, then addressed the convention. We extract the following from his admirable address:

Mr. President and Gentlemen: It is a very great pleasure for me personally to be with you to-day. I have been with these Hardware gatherings in spirit and by very worthy representatives during all these years. This is the first time that I have been permitted to meet with the associations of Illinois and Missouri. I am looking now into the faces of men whom I have long known by name and reputation, with whose signatures in one way or another our office is happily very familiar, and I am very glad to be able to greet you as fellow-workers in the good cause which brings you together to-day. Personally it is a delightful thing for me to meet with a company of Hardware merchants. I know their caliber; I know their ability; I know something of the difficulties with which they have to battle, and something also of the wisdom and resolution with which they take hold of the problems that they have to solve.

Digitized by Google

My relationship with the trade at large is necessarily at long reach in the main, but, Mr. President, one of the sincere pleasures of an editor is coming in contact with, shaking hands with an conversing with those who are good enough from week to week to read something, not all, of that which appears on the printed page. We editors sometimes are talking to people at a great distance, and it is very pleasant to meet these persons face to face and have them talk back a little. The usual arrangement is one sided, and while it does give the editor the advantage that he is able to say almost anything he likes and do most anything he pleases, after all he loses a great deal. The older I grow, gentlemen, the more I realize the pleasure and the inspiration that we are in personal contact. The more I know the Hardware trade the more sincerely do I honor the men who are engaged in it. I know how well worth knowing they are, and I know something of their intelligence, of their breadth of view, their kindliness of heart, the tender ties that make them work so laboriously for the dear ones at home and the earnest purposes that enter into their lives. Such men are worth knowing.

* * * * * * * * * * *

One of the things that Hardware merchants have to contend with is that it is necessary for them to be more wide awake in their business, to take broader views of their opportunities, to learn something perhaps from the things that plague them and so grow more successful to carry on what is one of the most dignified and honorable of vocations. This educational work of the associations is almost as important as its defensive work, and yet its defensive work is, it seems to me, after all its primal work. Defensive work that there may be the promotion of fraternity and good understanding, and that there may be peace and good fellowship between the manufacturers and the jobbers and the retailers. I am a friend of retail Hardware organizations, because I want to see everything smooth and prosperous throughout the trade at large, and because I want to see the retail Hardware merchants who some times have to work along hard lines, rewarded with that measure of prosperity which will gladden their hearts—fraternity, a delightful thing. We are enjoying it here to-day, and I say to you give to your National association all the help that it is possible for you to give. Strengthen that right arm of retail organization so that it shall become irresistable. Be utterly loyal to that association. Give great heed to its suggestions and in some way give it all the money it needs.

WEDNESDAY AFTERNOON SESSION.

Called to order at 2.15. M. L. Corey and Z. T. Miller were elected unanimously as honorary members of the association.

C. M. Hurst, Decatur, read a paper on the subject of

FREIGHT RATES,

going into details exhaustively.

Grant W. Porter, of Chicago, then read the following address on

LOCAL ORGANIZATION

which concluded as follows.

* * * * * * * * * * *

We joined the association first and did not want to see such a man as that enter, but somehow he came in and we were powerless to prevent him from coming. We meet him, talk with him over an hour on our way home, and lo! his commissioners had changed his cheese, knife was gone and he appeared and talked like any other sensible man.

We gradually find out that his opinion of us had changed. We had both taken off our goggles. We paid visits back and forth occasionally and enjoyed each other's society.

A MUTUAL FRIENDSHIP HAD SPRUNG UP

and business was a pleasure. If when our competitor seems too aggressive instead of getting mad, go over and have a quiet and friendly talk with him or meet him at the organization. Chances are he will come half way.

Don't let us blame our neighbor for what we ourselves do; don't get mad because your competitor does possibly a little more business than you do. Better your own conditions, let him alone and you will find it a paying investment.

The sooner we consider ourselves a fraternity, instead of an antagonistic individuality, the sooner will we receive the benefits of our wasting energy. A habitual fault-finder with his neighbor becomes a crank, and a crank is not much of a drawing card to any business, except possibly to the water business when attached to an old chain pump.

Our customers soon tire of harping, and without conversing with us go to our competitor to find out if our statements are true. Ten to one we are the loser. We would not be slow to notice such a disposition in our clerk nor would we be slow to remedy it.

So if we but stop and think, we can see when to trim off the barnacles and benefit ourselves and our business.

OUR ASSOCIATION IS THE BEST MEDIUM

for this, and our affiliation ought to be open-hearted, frank. Do not be suspicious and refuse to avail yourself of doing your share of the benefits because you are afraid your neighbor will know your business.

No association can benefit a member who will not avail himself of his opportunities.

No association can eliminate jealousy and establish a feeling of fraternity unless the members themselves are imbued with a desire for more friendly relations.

An association is what we make it and furnishes an opportunity for each and all of us to lay our destinies at the feet of fraternity and worship at the shrine of earnest endeavors.

Z. T. Miller, Bloomington, ex-president of the National Retail Hardware Dealers' Association, delivered an extended extemporaneous address on faulty methods of retailing stoves, which he followed by a paper entitled "A Survey." This paper was largely of a confidential character. The writer led up to the causes underlying present-day commercial conditions. These were critically analyzed and their trend was pointed out.

On motion of J. L. Smith, Chicago, W. H. Bennett was elected an honorary member of the association.

Chairman Olendorf, Centralia, of the Committee on the Location of the Next Meeting Place, delivered a report favoring Peoria.

The report was unanimously adopted by the association, and a member of the Peoria contingent promised the dealers that they would have a royal good time at that city.

The Committee on Finance and Auditing reported through M. Fahay, Decatur, that they had examined the books of the secretary-treasurer and found them correct.

The Nominating Committee reported as follows, through Chairman H. G. Cormick, Centralia:

As you are doubtless aware, President Chas. H. Williams, of Streator, and Vice-President Wm. Gormley, of Chicago, hold over for another year. We submit the following nominations for other offices:

Secretary—L. D. Nish, Elgin.

Treasurer—Geo. Engelhardt, Chicago.

Members Executive Committee to serve two years—Chas. Johnson, Peoria; F. McKenney, Rockford.

To serve one year: L. D. Ray, Belvidere.

Legislative Committee—William Hauss, East St. Louis; J. L. Smith, Chicago; Geo. Harms, Peoria; H. C. Peppler, Chicago; Geo. Churchill, Galesburg.

Investigating Committee—G. R. Lott, Chicago; T. J. Mathews, Mt. Vernon; H. Kross, Peoria; C. Robinson, Springfield; C. Mauer, East St. Louis.

Special Freight Committee—C. M. Hurst, Decatur; F. Giessing, East St. Louis; W. T. Gormley, Chicago; O. B. Kurth, Centralia; Geo. Gay, Jacksonville.

The Committee on Resolutions presented their report as follows:

We, your Committee on Resolutions, beg to offer the following

RESOLUTIONS.

ARE OPPOSED TO PARCELS POST.

Resolved, That we, the members of the Illinois Retail Hardware Dealers' Association, in convention assembled, are unalterably opposed to the bill before Congress known as the parcels post bill.

We further recommend that each member of this association who has not already done so, write a personal letter to their Congressmen and Senators asking for their opposition towards this bill.

THANKS THE PRESS.

Resolved, That the thanks of this association be hereby tendered to the trade press and city press for their courtesies and services; to the local association of East St. Louis and their efficient committee for the magnificent entertainment during our stay.

THANKS TO BOGARDUS AND COREY.

Resolved, That in appreciation of the invaluable services of President Bogardus and Secretary Corey, of the National Association, our secretary be instructed to express to them our hearty co-operation and support.

THANKS TO THOSE ON PROGRAMME.

Resolved, That our thanks be hereby tendered to the National Secretary, M. L. Corey; to R. R. Williams, and to Z. T. Miller and C. M. Hurst, and to those others who have taken an active part in our programme.

RETAILERS SHOULD BE REPRESENTED AT MEETINGS OF JOBBERS.

Resolved, That it is the sense of this convention that the National Retail Hardware Dealers' Association should be represented at each convention of manufacturers and jobbers, and that we thoroughly appreciate the courtesies already extended by these bodies.

SHOULD STUDY COMPARATIVE FREIGHT RATES.

Resolved, That it would be beneficial and advisable for the individual members of this association if they should devote some time and thought to the careful study of comparative freight rates throughout the State.

SHOULD SUBSCRIBE FOR TRADE PAPERS.

Resolved, That it would be to the decided advantage of the members of this organization for each individual to subscribe to at least one of our trade publications, and to spend some time in the study of its pages.

The following delegates to the national convention to be held in Indianapolis in March were then elected: F. F. Porter, Chicago; D. McLaughlin, Chicago; L. D. Nish, Elgin; Geo. Meyer, Peoria.

After some remarks by several of the delegates on Trading Stamps a motion was passed that the next session shall consist of three days instead of two; when the convention at 5 P. M. adjourned.

THE CANADA CORUNDUM CO.

The Canada Corundum Co., Toronto, Canada, announce that their new mill is already completed and that from now on they will be able to supply the wants of all their customers. Since the time when the Craig Mine Corundum was first put upon the market, which was about three years ago, the demand for this product has steadily increased, and last Spring they began the erection of their new plant. It is claimed to be the largest abrasive mill ever erected in any country, its capacity being from five to eight thousand tons per year of finished product. As this product is absolutely uniform, orders can be duplicated indefinitely. The company state they are now open to make contracts to furnish manufacturers with from one to three year's supply of pure Craig Mine Corundum.

Digitized by Google

OHIO HARDWARE ASSOCIATION.

The Tenth Annual Convention of the Ohio Hardware Association was held in Cleveland during the three days commencing with Tuesday, February 23d.

The Executive Committee met at the headquarters, which were at the Hollenden Hotel, during the morning of Tuesday to arrange the routine matters necessary for the despatch of business, prepare the committees, and such other preliminary work necessary for the peace and harmony of the assembled delegates.

TUESDAY AFTERNOON SESSION.

The convention was called to order at 2.30, President W. P. Bogardus of Mount Vernon in the chair. Rev. Casper Wister Hiatt was introduced who invoked the divine blessing upon the convention proceedings.

JOHN F. BAKER, PRESIDENT.

The address of welcome which followed was delivered by his Honor the Mayor Tom L. Johnson in a happy and felicitous manner, extending a cordial welcome to the members and making them feel heartily at home. Vice President J. F. Baker in a brief but acceptable speech responded to the civic welcome and expressed the thanks of the association for the courtesies extended.

After the roll call of members, showing about 200 delegates present, and reading of the minutes of the previous convention by corresponding Secretary D. R. Burr, of Piqua, President Bogardus proceeded to deliver his annual address.

PRESIDENT'S ANNUAL ADDRESS.

For the tenth time we are gathered in convention. A decade has passed since the thirteen gathered at the Neil House, in Columbus, in the hope of accomplishing something looking to the betterment of conditions surrounding the Hardware trade. They have been ten years of progress. During this time there have been organized eighteen State associations, besides some twenty-two more associations more or less local in their character. The eighteen State associations have all been affiliated into a National Retail Hardware Dealers' Association. It was hoped that by such an organization a greater influence could be built up, and that results could be brought about better than by State associations.

AS WE LOOK BACK OVER THE DECADE OF OUR EXISTENCE

and try to sum up the results, there cannot but be a feeling of satisfaction at our progress.

During the first years of our existence a large amount of the time of your secretary and Grievance Committee was occupied with complaints of retailer against jobber, some just and soon settled, and some otherwise and very hard to get any satisfaction out of. But during the last two years the complaints have been few and far between, and all have been arranged in a satisfactory manner. The relation of the jobber to the retailer has greatly improved. There is a better understanding between jobber and retailer and complaints are much more easily adjusted.

path that at first seemed threatening. Some of the great corporations that looked so menacingly on the horizon as they came into view a few years ago do not inspire us with the same dread they once did. Their sides are shrunken, and the water that has been dripping from their sides for the last year or two has washed the glamour from the eyes of the common stockholder, and he has his experience. Prices have not fluctuated as in former years, and the steadiness of the markets has been a good thing for all of us. Speculative buying has not been as profitable as in former years, and the results of such business have been far from satisfactory. One of the great dangers that confront us is unfavorable legislation.

Socialists have sown the seed of governmental ownership of transportation facilities, and are seeking to make the government enter into competition with private enterprise. As a writer on economics very truly says, "The theory of reducing transportation charges by furnishing a commercial service at reduced rates, by means of tax-supported, government-owned facilities, in competition with private enterprise, is wholly wrong. No country in the world, notwithstanding their canal systems and State-owned railroads, has transportation facilities that are comparable with those of the United States in points of time required and charges for transportation. These facilities are

W. P. BOGARDUS, EX-PRESIDENT.

the creation of private enterprise, and are entitled to protection from, not assassination by, the government.

This Socialistic seed is bearing fruit in the shape of vicious legislation. To combat these theories and to help to create a more intelligent idea of governmental functions of our government is well within the sphere of usefulness and duty of every Hardwareman who loves his country.

The Grievance Committee report no unsettled complaints. We look for a comtinuation of such annual reports as the organization of associations continues.

THE INSURANCE FEATURE

of association work is very satisfactory. I am able to report to you that it has been a successful undertaking, and that the success it has had confirms us in our opinion of the wisdom and business foresight of the men who inaugurated and have carried it thus far so well.

During the past two years the success of the association has largely been due to the faithful services of your secretary, D. R. Burr. In season and out of season he has been indefatigable in his efforts to bring greater success to the Ohio Hardware Association.

How far his efforts have gone and what he has accomplished needs no telling by me. You can see for yourselves. But I wish to bear this public testimony to his prompt and faithful service at all times. As the years go by the work of the secretary must of necessity increase. To an active business man it is getting to be a serious burden. The time necessary to perform the duties of secretary in a satisfactory manner is a drain on our resources that few of us can stand. I refer this subject to you, that you may in your wisdom suggest some solution that will be more satisfactory than the present arrangement. I call your attention to the gradual increase of local associations of business men for mutual protection against that class of citizens who are ever ready to claim that the world owes them a living and are very prompt to demand that their claims be recognized, but are never ready to pay what they owe. I cannot but feel that the organization of such associations will accomplish what individually we never have been able to do—to collect our accounts.

With the gradual increase in our membership and a greater knowledge of our dangers and of our needs we must grow larger. And as long as wise moderation characterizes our action we must grow stronger—a power for good, a power for conserving the rights of our members and a recognition of our relations to others. So that a mutual respect and confidence will be established between us and our friends the jobbers.

Digitized by Google

To do this means that we all must work. A large membership upholding the officers will bring permanent prosperity. A courage and power is put in the hands and hearts of the officers when they feel that the members approve their actions and are backing them up in their endeavors to advance the interests of the Hardware trade that nothing else will do. We all have an individual work to do. We have a competition that is relentless, whose motto is "Conduct your business as if you were running a store to put your competitor across the street out of business." We need not only every association but every individual to realize the importance of the work, and the necessity of meeting such competition with a determination to stamp it out as far as possible. It may cost us something to do this, but we have learned are this that things that have value cost something to get. If the retail dealers will meet the issue squarely as it comes, in relation to the catalogue houses, then the time is coming when the catalogue houses will lose their power, and people will find each year less reason to patronize them. Organized work supplemented by individual effort will accomplish the things we desire. And now we may properly invoice our progress and determine the value of our association work and what it has done for us. Our stores are in better shape; we have more system and greater cleanliness and order. We are taking more pride in the display of our goods. New ways of keeping and showing our stocks have been adopted. There is greater taste in window display, more orderly ways of keeping our catalogues, and improved ways of keeping our accounts. These and much more can be fairly charged to the credit of the association. The work of the association has been greatly helped by cordial and loyal support of the trade papers. To them we owe much. They have been our prudent and judicious friends, and their counsel has been invaluable. Our invoicing of the value of our association is over. The profit of the investment has been, I hope, clearly shown, and we start on another year with hope in our hearts and a strong determination to make a success of the business we have chosen for our life work.

Secretary Burr read the report of the Financial Secretary W. C. Jones which showed a balance of $236.38 in addition to which $419.44 loaned the Fire Insurance Company is due. Secretary Burr then presented his report as corresponding secretary from which we take the following:

* * * * * * * * * * *

At the close of our ninth annual convention, our membership showed a small increase and this time we have in a paid-up membership, a gain it is true, but not as large as we had hoped for. That we need members is very evident; that by having a majority of the dealers of this State as members, we can command more respect and attention from manufacturers and jobbers than at present, is not questioned. Now we have before us the question, "How shall we obtain additional members?" If we had more parcels post bills to contend with we would get them. This bill, to which this office has devoted considerable time, has increased our membership some twenty-five or thirty new firms. That the bill itself is responsible for these new members has been demonstrated to us by the fact that these new members have come in in answer to appeals issued by this office and by using the proposed bill to show one of the great troubles we have to contend with.

* * * * * * * * * * *

CANNOT BE REACHED BY PERSONAL CANVASS.

We are satisfied from our experience in the past two years that a great percentage of the Hardware dealers in this State cannot be reached by personal canvass. That the individual members of this association could do more good by personal canvass of their neighbor than any number of letters written by this office, we are quite certain. Do not expect your officers to do it all. We are glad to say in this respect, however, that some of our members during the year just closed have been a great help to us in this particular. We also wish to make note of the help contributed by the traveling salesmen, representatives of the different jobbing houses throughout the State, they having also contributed information by which we were able to get new members. Your secretary at all times is willing and anxious to receive your ideas and advice on any of the different lines of work that come under this office. We have obtained this year, through direct influence of letters sent out by this office, from twenty-five to thirty new members.

That "in union there is strength" is proven by the advance in prices catalogued by the mail-order houses. It is your duty to obtain one of these mail-order house catalogues and report any exceedingly low prices which you find quoted therein, to your secretary, who will be only too glad to take the matter up with the national body, where, you may rest assured, it will be taken care of.

* * * * * * * * * * *

There is time devoted to the business of this association at the expense of personal business affairs and I hope that you will allow me to suggest the change which I mentioned in my report last year regarding the combining of this office with that of secretary of the insurance company if it can be so arranged, and we see no reason why it cannot. Other States have this arrangement and find it a successful one, the incumbents receiving a salary sufficiently large to require that he devote his whole time to the work of the combined office. I trust that some steps in these regards will be taken during this convention.

R. R. Williams, Editor of *The Iron Age*, being present, was called upon by the president to address the convention which he proceeded to do in a happy and eloquent manner, the subject being one with which he was fully conversant and felicitous in his delivery. His remarks were listened to with every evidence of appreciation, which was followed by the following resolution being introduced by Mr. Baker and carried by a rising vote:

Resolved, That our thanks be tendered to Mr. Williams for the courtesies and greetings he has brought to us from the associations of New York and Pennsylvania, and that now as he continues on his journey to the associations of Illinois, Missouri, Minnesota and New York, he present to all of these associations our hearty fraternal greetings and our best wishes for their continued growth and success.

The President then appointed the following committees:

Resolutions—Mr. Jacobs, Youngstown; E. C. Smith, Garretsville; Kramer, Dayton.

Nominations—J. P. Duffy, Greenville; Ingalls, Bryan; D. A. La Favre, Greenfield; Bobinger, Cincinnati; Getz Kent.

Question Box—Brobst, Findlay; Hatfield, Troy; Horn, Greenville.

Laws Relative to the Hardware Trade—H. C. Wiseman, Springfield; Thomas, Galion; H. P. Fribley, New Philadelphia.

On Memorial—T. J. Waller, Youngstown; A. R. Kanney, Green Springs; L. F. Stahler, Waverly.

Captain J. H. Hauke of Wooster, 87 years old, and "Still in the Ring," having been over sixty years actively engaged in the Hardware business, spoke briefly about the trade and its allurements, and was very warmly greeted.

The Cleveland Builders' Exchange in a letter read by Secretary Burr offered the freedom of their rooms to the members of the association during their stay in Cleveland.

J. S. Brainard, of the Johnson & Jennings Company, Cleveland, addressed the convention on "Trade Relations Between the Retailer and Manufacturer."

C. A. Hutsinpillar then read a very interesting and instructive paper on

THE PARCELS POST

from which we make a few excerpts

* * * * * * * * * * *

The effect of such a law is beyond the calculation of man and almost beyond his contemplation. It certainly would revolutionize the whole system of business and would be the death knell of the retail house generally and in a measure the depopulating of towns and villages, the natural effect of destroying the retail business. The jobbers must rise or fall with the retailers.

With present conditions the ratio of success is largely against the retail dealer and the effect of this law would be to transfer very much of the transportation to the mail service, which is the same for long or short haul, and therefore the business would go to the large cities to the catalogue houses.

When you contemplate the articles in the Hardware line that can be mailed, you cannot doubt the statement made. Picks, mattocks, sledges, saws, squares and hundreds of articles that are now shipped only by freight, except in emergencies, and the transportation charges on single articles increasing the cost so much to the consumer that it gives the retail merchant an advantage, enabling him to compete with the catalogue houses, all these would be mailed at trifling cost, and catalogue houses will get the business.

* * * * * * * * * * *

The bill has a still deeper meaning; it is a long stride toward that most pernicious principle, paternalism. There already exists in the minds of our young men an idea that the public dollar is more valuable than one from private channels; there is a pervading idea with young men (and a politician never feels old) that they can be of much service to their country by accepting "place," and linked with this idea comes its twin brother that the government should show its appreciation by keeping them "placed."

This bill, made a law, must necessarily largely increase the number of salaried employes and promote the growth of the idea that the government in a measure should provide for our young men, and as this law would necessitate a "hurry call" for thousands to come to the government to dispose of the merchandise offered for transportation, the idea would be prevalent that the government can provide for all the unemployed, and this is paternalism in pure and simple. Down with paternalism; make only such laws as give every man a chance to care for himself—a good man needs only a chance.

Daniel Stern, of *The American Artisan*, followed with a brief speech on the same subject.

The Question Box and contents engaged the attention of the delegates after which adjournment to Wednesday afternoon 2 o'clock.

WEDNESDAY AFTERNOON SESSION.

Convention called to order at 2 o'clock. George M. Gray, Secretary-Treasurer of the Ohio Hardware Dealers' Mutual Fire Insurance Company, made his report which was a most complete and exhaustive one, and appealed to every one present.

Mr. F. A. Bare, of Mansfield, made a report as delegate to the National Convention, in the course of which he said:

REPORT OF NATIONAL DELEGATE.

* * * * * * * * * * *

NATIONAL ASSOCIATION IS GROWING RAPIDLY.

The National Association is growing rapidly. In addition to the States already affiliated the National Secretary held letters from the States of Washington, Tennessee, Alabama, California, New Jersey, Texas and Vermont, indicating that they would soon make application for membership.

The vast value of the National Association has been demonstrated in the work done in inducing prominent manufacturers to refuse to sell catalogue houses.

In many of these cases State Associations made the effort, often failing to get even a hearing. But the National, in nearly every instance, commands a successful hearing.

Eleven State secretaries were present and held a State secretaries' meeting.

They recommended a plan whereby dates for State conventions could be so arranged as to avoid conflict in meetings. Under the present

Digitized by Google

system trade papers are sometimes forced to report as many as three or four conventions in one issue. A different plan would obviate this difficulty, and would at the same time enable the National President and Secretary to attend more State conventions. As their presence is always an inspiration, it is to be hoped this recommendation of the secretaries will be favorably received by the various State conventions.

The matter of reducing national dues caused a long discussion, the States with larger membership usually favoring such reduction, the States with smaller membership opposing. It was finally decided unwise to reduce dues at this time.

NATIONAL INSURANCE.

The question of national insurance came up for long and careful consideration, ending in the appointment by the chair of Miller of Pennsylvania, Lewis of Indiana and Ladner of Minnesota, a committee to organize a National Insurance Association. The result of the work of this most excellent committee is well known to you all.

That part of the session devoted to selecting the next meeting place was decidedly full of life and action, resulting in choice of Indianapolis over Minneapolis, Milwaukee and Chicago.

Do you receive the National Bulletin? If so, do you read it? If you do not get it notify your State Secretary, or the National Secretary, as you are entitled to a copy of every issue of this valuable publication. It keeps you in touch with what is going on in the Hardware world.

Few of us realize what can be done by the retail Hardwaremen of the United States, if we organize and work.

Dwight R. Burr, Ex-Secretary.

TO WHOM NATIONAL SUCCESS IS DUE.

The remarkable growth and power of the National Retail Dealers' Association is due largely to the devoted efforts of our ex-Presidents Miller, Lewis, Cormick, and our President Bogardus.

When we know such men, we are not surprised that the National Association is a success. But we are surprised that every Hardwareman in the United States does not get into line with the National by joining his own State Association. Still greater is our surprise that in the great leader State of Ohio, there should be a single Hardware dealer who is satisfied to do business without membership in his own State Association.

* * * * * * * * * * *

C. S. Johnson, of Barberton, read a paper on

SYSTEM IN A RETAIL HARDWARE STORE

which was treated in a way to appeal to the dealer whose ambition lies in that direction; going into details that would facilitate the work.

The Question Box was again taken up and a general discussion followed the treatment of its contents.

The Association adjourned until 9.30 Thursday morning.

WEDNESDAY EVENING

was devoted to a banquet in the Cleveland Chamber of Commerce Hall, about 400 participating in the delightful function, which was assisted by the music from an excellent orchestra.

President W. P. Bogardus, of Mt. Vernon, acted as toastmaster, and about him at the toastmaster's table were seated the speakers, Rev. William Gaston, pastor of the North Presbyterian Church; Vice-President J. F. Baker, of Dayton; Secretaries W. C. Jones, of Columbus, and D. R. Burr, of Piqua; J. P. Duffy, of Greenville; N. D. Chaplin, chairman; W. N. Bowler, secretary, and J. Q. Riddle, treasurer, all of the local committee.

THURSDAY MORNING SESSION

was called to order at 9.30 with the president in the chair, with a full attendance of delegates. A. C. Wiseman, chairman of the Committee on Laws Relative to the Hardware Trade, made his report. On motion report was received and adopted.

The secretary read the following report of Memorial Committee, reporting the death of two members—Mr. Cantwell, of Kenton, and I. E. Pierson, of Greenville. The committee recommended the adoption of the following resolution:

Resolved, That we have lost, in Mr. Cantwell and Mr. Pierson, valued and honorable members of the Ohio Hardware Association, and the Hardware trade of Ohio deeply mourn their loss. Be it further

Resolved, That these resolutions be embodied in the minutes of our annual meeting, and a copy be forwarded to the families of the deceased.

T. J. Lawler,
L. F. Stahler,
Committee.

On motion, duly seconded, the resolutions were adopted.

John F. Baker, of Dayton, read a paper on Advertising, under the head of

DOES IT PAY?

from which we select:

In reading the reports of the annual sessions of the various State Hardware associations I have been somewhat impressed with the number of papers on advertising. The reading of them has not been without profit, and while I am not now, nor ever have been, an enthusiast on the subject of advertising, I have been greatly interested, and have adopted some of the suggestions. I note, however, that the writers do not agree on any particular line of advertising. The opinions are as many as the writers, some using the newspapers, others the mail, while others, who have no use for the press or Uncle Sam, have ideas

L. F. Stahler, Treasurer.

which they claim are far superior to any they have ever heard. In very few, however, have I yet to learn that

A PLEASED AND SATISFIED CUSTOMER

is the best advertising medium. It goes without saying that the essayists, knowing this to be true, accept it as a fact, and do not attach the importance to it that the writer of this paper does.

In all the years that I have been engaged in business I have held the idea that a customer who was pleased and satisfied was not only a good advertiser, but also a walking advertisement; hence, all my energies have been furthered in this direction. Imbued with this idea, I have made it a study, made it a part and parcel of my business, and carried it to this extent, that we have an unwritten law in our place that whoever shall enter the house must, if possible, go out of it with a smile on his face. I require and expect

THREE THINGS OF A SALESMAN

when he enters my employ; he must be honest, quick and polite. If you can think of any other requirements, they are all comprehended in these three. As a rule, I think the average merchant is satisfied if the applicant possesses only the first essential, while some might require the two first mentioned, but I have always considered the last named requisite fully as important as the first two; and yet, if a good salesman were honest and polite, I should at once give him a trial, although these be days of activity and the times demand haste.

* * * * * * * * * * *

I have repeatedly gone out of my way to purchase my wants or necessities from those who seem to appreciate it. I do not want any salesman to fawn or palaver over any purchases I may make of him, but I think he should manifest some interest in the transaction, and do it in a civil manner; for this reason I have, as I said before, gone out of my way to trade with people who are courteous, and will pay a trifle more for the article I buy rather than purchase at a lesser price and have a surly salesman attend to my wants.

I DO NOT KNOW OF ANYTHING THAT PAYS LIKE POLITENESS.

It costs nothing, but it pays marvellous dividends. Therefore, it behooves us to be just to all alike, since it is surely the part of wis-

Digitized by Google

dom to treat with unfailing civility all who enter our places of business, in whatever relation they come to us.

In conclusion, may I say, if, after hearing the foregoing, you decide the writer to be a pattern of politeness and civility, and that his store, with his clerks, must be an idealistic one, then I say to you that your diagnosis is at fault, your conclusions are wrong. But this we do say; we endeavor by courteous treatment to so influence all who come into our place of business that when again they are in need of such goods as we carry, intuitively their thoughts revert to our store.

The Committee on Nominations presented their report recommending the following members for election as officers for the ensuing year:

President, John F. Baker, Dayton.

Vice-President, C. S. Johnson, Barberton.

Corresponding Secretary, Frank A. Bare, Mansfield.

Financial Secretary, W. C. Jones, Columbus.

Treasurer, L. F. Stahler, Waverly.

Executive Committee: One year to fill vacancy of F. A. Powers, of Norwalk, John C. Fuhr, Williamsburg; two years, John Kramer, Dayton; C. W. Jewell, Utica; W. A. Perry, Zanesville; Frank W. Ingalls, Bryan.

Delegates to National Convention: George B. Meyer, Cincinnati; Frank Briggs, Delta; C. A. Hutsinpillar, Ironton; F. A. Bare, secretary, Mansfield. Alternates: Mr. Jacobs, Youngstown; A. M. Glockner, Portsmouth; John Plummer, Bellefontaine; B. O. Thompson, Cambridge.

The parties above named were unanimously elected.

J. C. Fuhr, of Williamsburg, read a paper on

ADVERTISING A RETAIL HARDWARE STORE

which was listened to with every mark of approval.

The Committee on Resolutions presented the customary series of resolutions, returning thanks of the Association to all those who were instrumental in making the proceedings interesting, harmonious and profitable. The report was adopted unanimously.

The report of the Nominating Committee was agreed to and adopted unanimously, the gentlemen named being declared elected for the ensuing year.

President Bogardus then said: I do not know any man in the Ohio Hardware Association that I would sooner see president than John Baker. I have known him for ten years as a hard-working, earnest, faithful, interested member of this association. I think the honor comes to him properly. (Applause.)

Mr. Baker replied: Gentlemen, I am not unmindful of the honor. To be president of this association is an honor. I did not seek it. I refer to my friend Mr. Duffy to prove that I fought against it. If you will give me the support that you have given Mr. Bogardus we will try to make the association a success. Do not depend on the officers. There are four things that I would like for you to remember as friends of the association: First, believe in it; second, think of it; third, talk about it; fourth, work for it. (Applause.)

Mr. Baker, the newly-elected president, in a felicitous speech, nominated Dayton as the next place of annual meeting. No other place was nominated, and on motion, duly seconded, Dayton was unanimously selected as the place for holding the next annual convention.

Thereupon the tenth annual convention was declared adjourned *sine die*.

WHAT CONSTITUTES A GOOD SALESMAN.

While there are, of course, many points which go to make up a good traveling salesman, there seem to me, however, to be certain ones which are most necessary. The following are, in my opinion, some of the essentials which every good commercial traveler should possess:

First, last and always a salesman must be a gentleman in every sense of the term. He must be thoroughly kind-hearted, for the reason that a man of an unsympathetic nature does not know how to sympathize with others, and unless you are able to comprehend the feeling which animates another you are, of course, at a loss to know how to deal with him. A salesman must be at all times considerate of others' feelings, and lastly of his own.

He must be able to win the confidence of a customer and be entitled by reason of his actions to the regard and esteem of his house.

He must carefully avoid anything which savors of trickery or unreliability.

He must never promise, or a lead a buyer to expect, any concessions or conditions which will not be fulfilled to the letter.

When it comes to the question of work a successful salesman must consider that his day's work is complete only when he has seen the last man that he ought to have seen.

He must plan his route so as to save as many men each day as can well be handled, taking all time necessary with each man, but wasting no time with anyone.

During business hours the salesman should keep his mind on business matters only. His eye should be open to observe anything pertaining to his line, and his tongue should be silent on all matters that may give pointers to his competitors.

Above all things, the successful salesman must be a good reader of human nature. To do this requires that he continually train himself until it becomes second nature for him to mentally compare everyone he meets with some one whose characteristics are more nearly represented by the particular person he is presently "sizing up."

A salesman must be able to reverse positions with the buyer, and look upon the question from the point of view that the buyer has a right to, thus being able to forestall any and all arguments which might be brought out by the buyer, and save the salesman from finding himself in a trap from which there would be no egress except acknowledgment of defeat.

The successful salesman never leaves the buyer under any condition except in a pleasant frame of mind, and he is extremely careful never to tell the buyer that he is at fault except in such a way as will be readily seen but not felt by the buyer.—W. S. Quinby in *Salesmanship*.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED FEB. 22, 1904.

358,022. MINCING KNIFE, Gilbert J. Dickson, Albany, N. Y.

358,186. TUBULAR LANTERN. Emile Boesch, San Francisco, Cal.

358,206. FURNITURE CASTER. Lyman T. Lawton, Meriden, Conn.

358,218. COMBINATION LADDER, ETC. Isaac E. Pearsall, Troy, Bradford County, Pa.

358,278. DOOR SCREWER. Frederick C. Kirchner and William H. Washburn, New York, N. Y.

358,301. MOP WRINGER. Wm. Sellers, Haverhill, Mass.

358,049. CARPET FASTENER. Minnie B. McCastline, Geddes, N. Y.

PATENTS ISSUED FEB. 23, 1904.

752,656. LIFTING JACK. Fitzgerald V. Dalton, St. Neots, England.

752,679. COMBINED MOP AND WRINGER. Edward Hilker, Chicago, Ill.

752,725. WHEELBARROW CONSTRUCTION. Geo. G. Tieman, Chicago, Ill.

752,786. FISH LINE REEL. Albert E. Leaver and William H. Leaver, Chicago, Ill.

752,803. NOZZLE FOR SPRINKLERS. John D. Ross, Los Angeles, Cal.

752,879. CLAW HAMMER. Ezkiel A. Ashland, St. Albans, Vt.

PATENTS EXPIRED MAR. 1, 1904.

358,540. NAIL EXTRACTOR.. George J. Capewell, Cheshire, Conn.

358,544. COMBINED WIRE CUTTER AND SAW. Charles W. Collyer and William C. Collyer, Lynn, Mass.

358,613. DOOR HANGER. Albert J. Ives, Aurora, Ill.

358,676. FASTENING FOR DOOR MATS. Leach King, Newark, N. J.

358,683. PUNCH. Michael Marcil, Amherst, Mass.

358,716. FASTENING DEVICE FOR SKATES. Everette H. Barney, Springfield, Mass.

358,751. SAFETY RAZOR. Gustavus Rein, St. Louis, Mo.

PATENTS ISSUED MAR. 1, 1904.

753,349. LOCK FAUCET. Burwell R. Bacon, Frankfort, Ky.

753,374. WRENCH. Allen De Vilbiss, Jr., Toledo, Ohio.

753,479. DEVICE FOR ADJUSTING WINDOWS. Axel F. Enquist, San Francisco, Cal.

753,593. FOUNTAIN MARKING DEVICE. John E. Langill, New York, N. Y.

753,609. KNIFE AND FORK CLEANER. Edward F. McDonough, Reading, Pa.

"I heard to-day that your son was an undertaker. I thought you told me he was a physician."

"Not at all. I said he followed the medical profession."

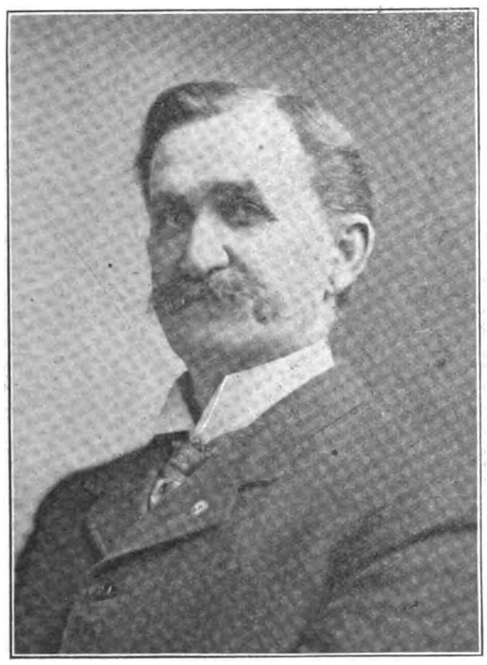
THE MISSOURI RETAIL HARDWARE AND STOVE DEALERS' ASSN.

The sixth annual meeting of the Missouri Retail Hardware and Stove Dealers' Association was held in St. Louis on February 24 and 25.

The convention was called to order in the parlors of the Missouri Athletic Club.

TUESDAY MORNING SESSION.

The president called the convention to order at 10 o'clock. R. H. Mayer, president of the St. Louis Retail Hardware Dealers' Association, welcomed the assembled delegates in a brief address.



The address of welcome was responded to by Taylor Frier, president of the Association, in a fitting manner giving the assurance that the cordial and appreciative reception was fully enjoyed.

The president then announced the appointment of the following committees:

Press—E. A. Demeter, Macon; Mr. Berry, Trenton; Mr. Betts, Lebanon; F. Neudorff, St. Joseph.

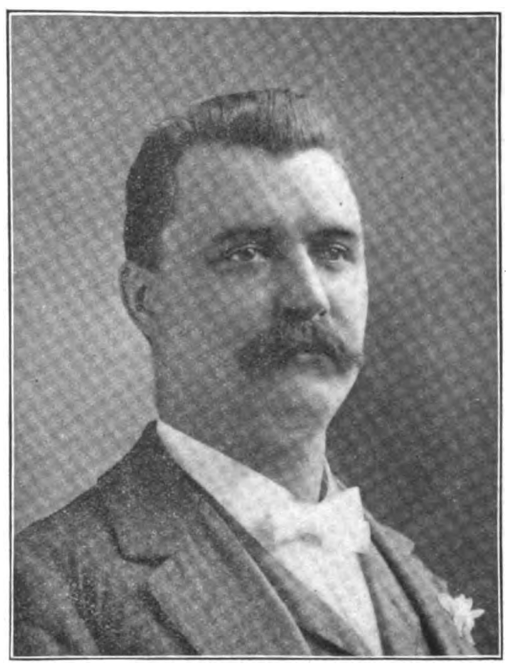
Resolutions—J. L. Phillips, Bethany; O. W. Johnston, Marshal; F. Neudorff, St. Joseph; F. A. Birge, St. James.

A recess was taken to permit of the payment of dues and to give the members a chance to shake hands and renew the acquaintanceships

TAYLOR FRIER, PRESIDENT.

of the previous conventions. After a few interchanges of compliments between members and guests, President Frier delivered his annual address. We make the following extracts:

PRESIDENT'S ANNUAL ADDRESS.



To the Officers and Members of the Missouri Retail Stove and Hardware Dealers' Association:

Gentlemen:—I greet you to-day at this our sixth annual convention with a growing confidence in the ultimate stability and success of our association, and congratulate you upon the fact that we are, in my judgment, on higher ground than at any time since our organization. The year 1903 has been a momentous one to our association. There is no such thing as standing still and progressing at the same time, so your officers and executive committee marching hand in hand, and working harmoniously together, have tried to fulfill the expectations of the members in trying to arouse an increased interest among the dealers of our State in association work and in carrying out measures adopted at your last annual convention, looking to the advancement and perpetuity of our organization.

As to whether we have made any progress, you can determine from the detailed reports which will be presented by your worthy secretary-treasurer and executive committee. In making this address, my purpose is to present to you a brief, yet comprehensive statement of the work that has been done in behalf of the association during the past year, and recommend to you some suggestions which, if adopted by you, the legislative body of the association, will insure for it greater prosperity than it has yet experienced since its organization. As already indicated, the association was organized six years ago, and during that time organized effort has been strenuously advocated, and adopted by the manufacturer, jobber, retail merchant, mechanic and laborer the world over, and yet the large majority of the stove and Hardware dealers of our State do not seem to have caught the spirit, judging from the fact that the appeals made by your secretary through the trade papers and by mail have not been responded to. Notwithstanding this fact, your officers have not faltered in their determination to eventually place upon the banner of this association the word success. The report of your secretary will show the largest membership at the close of the year that we have ever yet enrolled.

* * * * * * * * * * *

Another item of paramount importance to our association is the question of increasing the membership. As individual members, we should not be satisfied with a membership of less than 500 when we meet again one year hence. And I want to say to you now that if each member present to-day will constitute himself a committee of one to see that every dealer in his town or locality shall become a member of our organization, this result will be realized. There is no reasonable excuse why any of the 1,000 or more live and aggressive dealers of our State should not become members of the Missouri Retail Stove and Hardware Dealers' Association, and it is incumbent upon you to enact legislation that will encourage and bring about this result. There is power in numbers; yes, wonder working power, and may I appeal to every member here present that he now pledge himself that during 1904, he will earnestly co-operate in every way pos-

E. L. WACHTER, VICE-PRESIDENT.

sible with your officers. If you will, I do not hesitate to predict that you will more than double your present membership.

* * * * * * * * * * *

This was followed by the annual report of Secretary Neudorff.

THE SECRETARY'S REPORT

was in part as follows:

Gentlemen:—In submitting my third annual report, I wish at the outset to thank our worthy president and the members of the Executive Committee for their unvarying kindness and loyal support to what was deemed the best interests of the association, serving wholly without compensation, except the gratification that comes with all efforts to do good, they have given their time and thought freely to the cause and deserve the grateful acknowledgement of the retail Hardware interests. Mistakes of judgment have been made, but these are wholly the fault of the secretary and he should bear the criticism alone.

* * * * * * * * * * *

The members of the Executive Committee, realizing the necessity of adding some direct personal benefit to strengthen the bonds of membership, have for two years labored strenuously to perfect a Mutual Fire Association for our membership, which in its operation would relieve us from the exhorbitant rates of the insurance trust, and which, under the beneficent and stringent insurance laws of our good State, would afford the maximum of security at the minimum of cost. To this end the secretary made a complete compilation of the laws of the State relating to this subject, and after referring the same to the supervision of one of the ablest attorneys versed on this subject, it was sent with a reply postal card to every dealer in the State. The response to this letter was so meager as to create astonishment, and another postal card was sent out inquiring as to the receipt of the letter, and requesting an answer of some sort; of 1,150 sent out not over 75 replied. This was a most disheartening experience and I was desirous of throwing down the work, but was prevented by the president.

Digitized by Google

In concluding my report, permit and pardon the following reference to the work accomplished. When I undertook this work devolving upon your secretary, I, nor any of the officers had any idea of the worse than chaotic conditions we had to build the work upon. At first we were practically lost in trying to get the tangled ends together, and some of them were so badly frayed that we may never receive the full use of them. The second year we got the affairs on a systematic basis and commenced to show some results. The third year I am gratified to say we have proven our right to your support by results attained. From a condition of practical debt and no safe membership, we have now a strong, virulent, aggressive and loyal membership, the largest we have ever had. In finances we are on record with the largest resources we have ever had, and we will at this meeting, I trust, furnish the incentive to plant the association on a foundation as solid as the rocks of Gibraltar. As stated before, I am grateful for the considerate support of our worthy president and executive board for meeting all suggestions for the forward movement of the association with their hearty approbation and loyal good will. We have been a unit, association members and officers alike, and we will now receive the reward of patient, self-sacrificing effort.

TUESDAY AFTERNOON SESSION.

After being called to order at 2 o'clock, O. W. Johnston, of Marshall, read an interesting paper on

SUCCESSFUL ADVERTISING

from which we extract the following:

I would like to state right here from the standpoint of a retail Hardware dealer, that I consider the regular trade papers the best advertising medium for the manufacturers and jobbers.

While

I BELIEVE IN NEWSPAPER ADVERTISING,

backed up by attractive and often changed show windows, clean stock, efficient and courteous salesmen, is the most effective advertising, I recognize that there are many other good methods of advertising that are profitable.

While the newspaper ad is good in all communities and under all conditions, other advertisements are not. A scheme that would be a success in one locality would fail in another. It might be successful under certain conditions and under different conditions be a failure in the same locality. So on the special line of advertising, the methods and means must be determined by the individual dealer. While there is no doubt but that each one here would judge rightly and get good returns from all special advertisements, still if there is one in this number who does not advertise at all I believe it would pay him to accept every scheme presented, hit or miss, rather than not to advertise at all.

It has been truthfully said that "advertisements at best are nothing but statements of what a business man has to offer," and the amount of credit that is given to this statement will depend upon the reputation of the firm that makes them. It is taken for granted that all Hardware dealers are building their business reputation upon the solid mud-sills of honesty, business integrity and fair dealings, having for their chief corner-stone those triple virtues, knowledge, tact and eternal vigilance, placing over the main arch the golden rule, that magnetic keystone that will bind all hearts to ours so long as we practice its precepts. To such a firm judicious advertising will always bring good results.

At the conclusion of Mr. Johnston's address, a discussion ensued regarding the troubles and difficulties connected with the selling of stoves, which was participated in by the President, Secretary Neudorff, Mr. Shoop, J. C. Webber, of Clayton, and several others. The argument was concluded by the reading of a paper on the subject, prepared by F. P. Haus, of the Charter Oak Stove and Range Co., who criticised the dealer for throwing all the blame on the manufacturer when he failed to placate the customer; concluding with the following:

* * * * * * * * * *

A WORD AS TO SELLING A STOVE.

If a man comes in with his wife always try to please her and sell what she wants, not him, because if she is not satisfied in the purchase, you have sold a stove that is sure not to work. Another thing, try and find out how much money they have to buy with, especially if you do not want to credit them for part or all of the purchase. There is no use of showing or talking a $30 stove to a party who have only $10 to buy a stove with and are N. G. for balance.

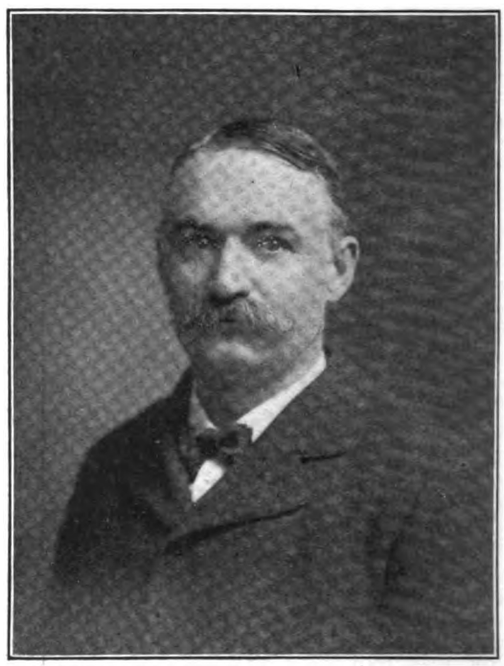
Mr. McLaughlin, of Chicago, representing the Illinois Association, appeared here as a delegate from his association to ascertain if it were possible for the two associations to arrange for a joint meeting.

The President appointed J. W. Poland, Fred. Neudorff and F. A. Kansteiner a committee to confer with the delegation from Illinois.

E. E. Demeter, of Macon, then read a paper on

HOW BEST TO MEET DEPARTMENT STORE AND CATALOGUE HOUSE COMPETITION.

He said in part:



The subject should be thoroughly understood and handled diplomatically. You cannot afford to ignore the situation nor sit idly by and see a portion of your neighbors buying from foreign sources. You cannot afford to antagonize the wayward consumer until you have tried every method to convert and reclaim him. You cannot afford to allow the mail habit to grow in your community. It is a disease contagious and dangerous. You cannot enforce a quarantine, so you should seek a cure.

THE COMMON SENSE REMEDY

is, whether it means loss or gain, cash and freight considered, "meet the price." Very good advice indeed. Now for some of the "buts" and "ifs," and "ands." First, is the country retail merchant in a position where it is possible for him to follow this advice? I speak, of course, of the Hardware retail merchant; for we seem to be the especial victim, as it were. Mr. Corey, in the National Bulletin, makes this statement: "Careful examinations prove that about ninety (90) per cent. of the catalogue house leaders are selected from Hardware and kindred lines; that especially well known and meritorious are very desirable for cut-price attraction." This is sad, but true. Mr. Corey also urges the jobbers and manufacturers who sell to the retail merchants at such a price that will enable them in turn to meet the catalogue house price. This seems to be the root of the evil after all. Any merchant would be glad to meet a price if he in the first place was not compelled to pay more than the quoted catalogue price.

* * * * * * * * * *

Another remedy which has been suggested is that of co-operation. We are told that "co-operation is the solution of the difficulties confronting the retailer to-day. Co-operation is the breastwork which must surround us if we would withstand the onslaughts of adverse interests." This to a certain extent is quite true, and while we do not believe it is quite the "solution of the difficulties confronting us," still "in union there is strength." The old adage is as true to-day

FREDK. NEUDORF, SECRETARY.

as ever, "United we stand, divided we fall." Intelligent, active co-operation would do a great deal for the retail dealer. Hence the great good the association can do for us.

A discussion followed the reading of this paper in regard to the proper way to attack the catalogue house competition, in which the following took part: M. L. Corey, of Argus, Ind.; President Frier, Mr. Bentley, of Hannibal, and others.

A paper prepared by Milton A. Wengert on

THE VALUE AND BENEFIT OF THE GARNISHMENT LAW

was then read, in which he said:

The value and benefit of the garnishment law depend very much upon the locality in which it is enforced. In territory where no organized body of merchants exists the law is practically without either value or benefit. The retail merchant very seldom takes the initiative in its enforcement. Shrewd lawyers and sometimes unscrupulous collection agencies get the most benefit of the law. This is rather the fault of the retail merchant himself than any defect in the statute. If the law should be repealed as the result of its abuse the retail merchant will have no one to blame but himself. In our larger cities, where the power of the organized merchant is brought to bear, its value and benefit are undoubted and very tangible.

In Kansas City, where I reside, the enforcement of

THE LAW HAS BEEN GREATLY STRENGTHENED

by employers of labor requesting that their employees pay their just debts and not bother them with garnishment proceedings. The records of the justice courts show that a large majority of suits for garnishment are settled out of court. But very few instances have occurred in our city where direct suits for garnishment by attachments have been instituted. The most popular and almost universal method for the enforcement of the law is to first sue and get judgment. This costs $3. The judgment holds good for three years, and may be revived each three years indefinitely, and garnishment proceedings can be instituted at any time. With the judgment hanging over the debtor, it is not difficult to induce him to pay and save further costs of $2.35 on each garnishment. A vast majority of suits thus brought are successfully collected.

* * * * * * * * * *

The records of some collection agencies show that retail merchants outrageously abuse the credit system. The same records also show that

Digitized by Google

retail merchants who systematically and persistently push their collections lose very little money. It might not be a bad idea for our State association to either institute a system of collection for its members or to appoint a conference committee to confer with the State retail merchants' associations and other similar parties and try to unite upon a common system applicable to all. As a rule State associations lack the money, men and method to successfully initiate a system of their own. This is partly responsible for their being victimized by outside irresponsible collection agencies. The State Retail Merchants' Association will hold its annual session in St. Louis next July. A committee with power to meet with them might accomplish good results.

Secretary Neudorff read a paper on "Status of Mutual Fire Insurance as Affecting Our Association." He urged the formation of a M'ssouri Mutual Fire Insurance Company, saying the laws in the State favored such an association more than the laws of Minnesota, where such a success had been made of mutual insurance. He referred to the annual issued this year as containing all details and figures necessary.

The convention then adjourned until Wednesday morning.

WEDNESDAY MORNING SESSION.

It was nearly 9 o'clock before the members were called to order.

A letter was read from the Merchants' Mutual State Association, asking for a conference committee for the purpose of joining together in the matter of making collections. It was referred to the executive committee, who later reported favorably.

Secretary Neudorff reported that $31,000 insurance had been pledged towards establishing a mutual insurance company, and about fifty policies of $2,000 each were needed. A number of additional subscriptions were received and the matter discussed at length.

REPORTS OF COMMITTEES.

The Auditing Committee reported finding the books of the secretary-treasurer correct.

A letter was received from the New York State Retail Dealers' Hardware and Stove Association, introducing R. R. Williams, editor of the *Iron Age*. Mr. Williams was introduced, very enthusiastically received, and spoke words of encouragement to the members present. He brought greetings from New York and expressed his personal gratification at meeting the members. Mr. Williams' remarks were most attentively listened to and very warmly applauded.

George A. Bond, president of the Missouri Retail Merchants' Association, of Kansas City, addressed the association on the benefits of being united.

ELECTION OF OFFICERS.

The following officers were elected unanimously:

President—Taylor Frier, Louisiana.

Vice-President—E. L. Wachter, St. Louis.

Executive Committee—W. T. Shoop, Richmond; J. W. Poland, Carrollton; F. A. Kansteiner, St. Louis.

Trade Abuse Committee—O. W. Johnston, Marshall; H. J. Brunner, Kansas City; J. A. Pauly, St. Louis.

Auditing Committee—J. G. Weber, Clayton; A. Steinmeyer, St. Louis; G. L. Phillips, Bethany.

The selection of the next place of meeting was left with the Executive Committee and an adjournment was taken to meet in East St. Louis with the Illinois Association

SURE HATCH INCUBATOR CO.

THE SURE-HATCH INCUBATOR COMPANY, Clay Center, Neb., and Indianapolis, Ind., have issued their annual catalogue, the cover of which is very unique, representing a primitive looking child (though she must be up-to-date) drawing on a slate a picture of an incubator. The book is artistically arranged and is thoroughly illustrated, making a bureau of information on brooding subjects. Included in the contents are incubators, brooders, regulators, safety lamps and also supplies for poultry dealers, among which are thermometers, green bone and vegetable cutters, H. M. Sheer Co.'s double disc wafers, egg testers, Sheer's poultry punches, Eureka and Oakes hydro-safety lamps, Sheer's caponizing sets, etc., etc.

The company call attention to the fact that any one can operate a Sure-Hatch incubator, as they are very easy to manipulate. The many testimonials contained in their catalogue is proof positive that their incubators are giving satisfaction, and that they will hatch strong, healthy and vigorous chicks. A specialty of the company is the Sure-Hatch Double Decker Incubator, which is made up of two 100 egg machines, and are made in rights and lefts to avoid having one lamp over the other. The machines are valuable, and they state it is a known fact that they can control the temperature and ventilation in a smaller sized egg chamber better than in a 200 egg machine. They are convenient, occupying a floor space of only 24x24 inches. They will keep the same even temperature, giving good results, as do the single machines. The company recommend them for large plants, farmers, etc., as making better per cent. hatches than the large machines. Send for catalogue to above address.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Inheritance Tax.

QUESTION: I have been told that if I do not make a will my property will be subject to a tax before my relatives receive it. Can I avoid this tax if I make a will, and if so, how? Kindly also inform me what is the amount of the tax.

REPLY: You cannot avoid the inheritance tax on your property simply by making a will, as the law applies to legacies bequeathed in a will as well as to property distributed in a case of intestacy. It is, however, often possible to avoid this tax. The law only taxes gifts or bequests, and if for this reason it appears from the will that the sum to be given to a person in the fulfilling of a legal obligation the sum of money will not be taxed. For this reason, if for no other, people often make a will. The inheritance tax is of two kinds, direct and indirect. The direct inheritance tax applies only to personal property and is a tax of one per cent. upon the amount of the decedent's estate if the estate amounts to $10,000 or over. This direct inheritance tax applies only to very near relatives, such as father and son, and brother and sister, etc., and each beneficiary of the estate bears his or her proportion of the tax, according to the amount received. The indirect or collateral inheritance tax, as it is sometimes called, applies to both real and personal property, and is a tax of five per cent. on all estates of the value of $500 or over. This tax attaches to property given to persons (roughly speaking) who are more remotely related to the deceased than nephew and nieces. If you wish to avoid this tax you should consult a lawyer, and it is very probable that he could arrange matters satisfactorily for you.

Sale on Trial—Exchange—Machine.

Where an article is sold on trial the sale is not complete until approval is given either expressly or by implication, and the sale becomes absolute if it is retained an unreasonable length of time. So held by the Kentucky Court of Appeals in the recent case of Watts vs. National Cash Register Company. In this case, it appeared, the appellee contracted to sell to the appellant a cash register conditioned on a stipulation that if after thirty days the appellant should decide it was not the machine for his business, he should be permitted to exchange it for another or ship it back to the appellee. The appellant, after the expiration of the thirty days, wrote to the appellee saying that the register was not satisfactory to him, but did not offer to exchange it nor offer to ship it back, but merely asked appellee what he should do with it. He used the register for six months. Upon a suit upon the contract by the appellee, the trial court instructed the jury that it was appellant's duty, after thirty days' trial, if he decided that it was not the machine for his business, to notify the vendor company within a reasonable time that the machine was not suitable for his business and demand an exchange for another register, or to ship that one back to said company, and that if he failed after a reasonable length of time to do either of these things, they must find for the company. The appellate court held that this instruction was proper.

VERDICT FOR PECULIAR ACCIDENT.

Philander H. Fitzgerald has been awarded a verdict by a jury in the Circuit Court, Indiana, against the Ætna Life Insurance Company, for $350 for fourteen weeks' disability, at $25 per week. The suit attracted the attention of lawyers and insurance men by reason of the unusual allegations of the claimant. Mr. Fitzgerald alleged that, returning to his home weary, he slept in his chair with his hand in a cramped position under his head, and that by reason thereof inflammation set in, and he was obliged to have a surgical operation performed. The company denied liability and asserted that the injury was not due to any accident insured against. Mr. Fitzgerald had policies in two other companies, but the Ætna is the only company to question the claim.

MINNESOTA RETAIL HARDWARE ASSOCIATION.

The eighth annual convention of the Minnesota Hardware Association was held in Elks Hall, St. Paul, on Wednesday, Thursday and Friday, February 24th, 25th and 26th.

It was a large and enthusiastic gathering of progressive Hardwaremen, and a more representative convention it would be hard to find.

WEDNESDAY AFTERNOON SESSION.

The first regular session was called to order at 2 P. M. Scarcely had W. H. Tomlinson, of Le Sueur, the president, called the meeting to order when J. F. McGuire, of St. Paul, arose and presented the president with a gavel. This gavel had been made, Mr. McGuire said, by students at the Mechanics' Art High School, and the firm joining together of the various layers of different woods of which it was constructed typified the value of solid organization and union. He explained that weakness in any of the many parts of that gavel would destroy the strength of the whole, and with that as a text spoke for unfaltering devotion toward the association on the part of every individual member. President Tomlinson replied, and thanked the members for their undeviating loyalty to him and to the association during the three years in which he had been its president. Mayor Smith, of St. Paul, being unable to officiate, his place was taken by Comptroller Louis Betz, who welcomed the assembled delegates to the city of St. Paul, in the course of which he said:

ADDRESS OF WELCOME.

I feel that it is an honor and a rare privilege to be permitted to bid this association welcome to the city of St. Paul on behalf of the Mayor, as I understand that your association is the oldest and the largest of the kind in the United States. I hope that your meeting in St. Paul and your association with our industries allied to your calling will be of lasting benefit to you and your organization. In these modern days pettifogging competition is apt to destroy the individual. Organization, co-operation and a better understanding, which results from such association as this, in strengthening the whole retail trade, will strengthen each individual member. Our beloved State of Minnesota leads the world in its production of the ore from which the metal comes that is most closely allied to the Hardware trade. I know that you, gentlemen, members of this association, are made of the right kind of metal. I know that you make your money on the square and conduct your dealings on the level. I hope that friendships, man with man, will be riveted together for all time. In your deliberations, judging by the high degree of intelligence which I see before me, I know that you will hit the nail on the head. I know that you will go after conditions that are inimical to your success with hammer and tongs.

It is now my privilege to turn over to you, on behalf of the Mayor of this city, the key and the seal of the municipality, and I hope that your short stay in this city will be one continued round of profit and pleasure. [The speaker here presented to the chairman a huge key of

C. D. Decker, of Austin, responded to the courteous welcome of the Comptroller, and said, among other remarks:

It is not necessary for me to refer in a laudatory vein to the great capital city of Minnesota. We, the members of this association, come from every corner of the State, and we have long looked to St. Paul as an example of municipal government. We are made to rejoice when we know that such cities as St. Paul are officered by men who had the courage to exalt righteousness and justice. When we see large cities like this governed by a proper sense of justice and integrity, it helps us in our smaller cities to follow similar paths.

Our organization is the best and most fortunate, in many ways, of any in the country. First, it is fortunate in the manner in which it is at present officered. You hear about young men for war and old men for counsel; we have put that in practice; we have an army of young men here equipped and ready to do the fighting at the front, but we are fortunate to have so mature and wise a man in our president's chair, and I hope you will keep him there as long as the gavel lasts which has just been presented to him, and that when that gavel wears out some other city will present him with one made from metal that will be everlasting.

* * * * * * * * * * *

We are here to build up our own interests as an association and as individuals, but to build them up without tearing down those of others. It is not necessary to emphasize the suggestion that by standing together we can work out our best interests to the best advantage. We are here for a purpose. By discussing differences and difficulties of every kind we can and will make this organization one of the cleanest and most beneficial in the country. There is nothing of politics or sectarianism in this organization. At the same time we have our own principles and, in the proper time and place, we are not slow to show our colors.

President W. H. Tomlinson, of Le Sueur, then delivered his annual address.

PRESIDENT'S ANNUAL ADDRESS.

It is with much satisfaction that I again come before you at this our eighth annual meeting. Your increased attendance shows your continued interest in our work, and I have only good to report to you. Continued prosperity, increased membership, prevailing harmony, are items calculated to encourage, but in addition we may record our thankfulness that there have been no deaths among our members. Work for our good is constantly being accomplished, and last, but not least, our insurance department has met with phenomenal success. I therefore have reason to congratulate you on the past year's history of our organization.

Our secretary will give you the report of your delegates to the National Association, but I take the opportunity to inform you now that the principal request which we made of them was granted—namely, representation according to membership. As our association stands now we shall be entitled to six votes in the National Convention, while last year, with over 400 members, we had the same number of votes as some States with only 17 members.

Another important step in the interest of the retail dealers was taken when the National (Wholesale) Hardware Association and the American Hardware Manufacturers' Association extended to our national representatives an invitation to attend their meeting. This secures an opportunity for conference, suggestion, and possible future co-operation of three great branches of trade. The meeting of the representatives of such bodies to discuss trade matters in the right spirit must certainly be conducive of good to each and all. Our Mr. Stebbins, treasurer of the National Retail Hardware Dealers' Association, attended this meeting and will make a report to you.

ONE OF THE ADVANTAGES OF ORGANIZATION AND CO-OPERATION

is shown in the work of the different State associations in regard to the Parcels Post bill now before Congress. This bill has met with uniform opposition by them by which so far they have succeeded in defeating it. Mr. Corey, our National Secretary, will inform you more fully on that subject.

We have had one disagreeable experience this year in the action of the Minneapolis Retail Hardware Association asking the Twin City jobbers to give the T. M. Roberts Supply Company the same privileges that are given to the Chicago catalogue houses by the jobbers of that city. But the matter was effectually disposed of, as the jobbers refused to grant their request, and our Executive Committee also censured the Minneapolis Association for their action.

Representing our association, I wish to thank the trade papers for their uniform courtesy toward us, and for efficient service in creating favorable sentiment toward our association work.

I gratefully testify to the excellent work of our efficient secretary and his assistant in caring for the work of our office, and to their loyal and earnest endeavors to promote our welfare.

WE HAVE FULLY DEMONSTRATED BY OUR WORK IN THE PAST YEARS THE ADVANTAGES OF ORGANIZATION.

I feel certain that there is not a member who has not realized benefit, either directly or indirectly, from our association work. Our steady advance in membership proves the satisfaction felt by those already members. The Hardware dealers of the State have faith in us, and they can see advantages to be gained by joining us. I can see with us to-day the same men who helped to organize our association, besides many others who have joined us in the good work since that time. I can see no reason why our prosperity should not continue. This hopeful prophecy will be rendered of fulfillment if each member will show a live interest in the work. Any information or suggestions sent to our secretary will receive due and prompt attention.

In closing I desire to thank the association most heartily for the evidence of their confidence shown in choosing me as their presiding officer for three consecutive terms. I have enjoyed the work and have given it my best endeavors, but it would not have achieved the success it has were it not for the loyal support of our members and officers.

At the conclusion of his address the president appointed the following committees:

COMMITTEES APPOINTED.

The following committees were announced by the chair:

Press—J. E. O'Brien, Crookston; J. E. Roell, Owatonna; F. J. Slipp, Brainerd.

Grievance—W. S. Davis, Stewartville; M. Sulerud, Halstad; Louis Gewalt, Breckenridge.

Resolutions—C. D. Decker, Austin; M. Geissler, Elysian; E. A. Pease, Redwood Falls.

Auditing—G. Hellerud, Sauk Center; Emmet Nutter, St. Peter; O. J. Kolseth, Fergus Falls.

NOMINATING COMMITTEE.

At this juncture a recess of 15 minutes was announced in order to permit of the formation of a Nominating Committee, one member of which should come from each of the nine Congressional districts of the State. At the close of the recess the committee was announced.

After an impromptu address on "Organization" by Fred Mason, of St. Paul, secretary of the Minnesota and National Grocers' Association which was exceedingly well received.

ELECTION OF OFFICERS.

The Nominating Committee, who had selected C. D. Decker, of Austin, as chairman and L. J. Cosgrove, of Le Seuer, as secretary, reported that they had finished their labors, and placed the following members in nomination as officers of the association for the coming year:

President—A. T. Stebbins, Rochester.

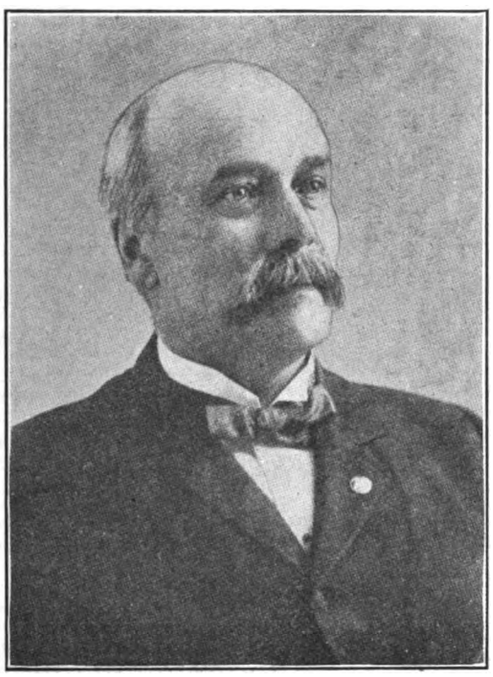
Vice-President—George Evenson, St. Peter.

Executive Committee, the following members to succeed themselves—W. H. Tomlinson, Le Sueur; Frank E. Hunt, Red Lake Falls; B. F. Kernkamp, St. Paul; Julius Schmidt, Wabasha. New members: Geo.

Digitized by Google

M. Evenson, St. Peter; L. Gewalt, Breckenridge; H. R. Schroeder, St. Paul; Joseph H. Smith, Minneapolis; J. A. Roell, Owatonna.

After some discussion a motion was carried instructing the secretary to cast a ballot unanimously electing all the nominees.



Secretary M. S. Mathews delivered his annual report, as follows:

SECRETARY'S ANNUAL REPORT.

Secretary Mathews read the following report:

In the 12 months that have elapsed since our very pleasant annual meeting in Minneapolis, there have been no radical changes in association work. The affiliation of Minnesota with the national organization has proved of marked benefit, and enabled the various bodies to get in closer touch on points of common interest, and concentrate their fire on the object to be gained. No one who followed the work of the national officers at Atlantic City last Fall, and their grand fight in opposition to the Parcels Post bill, can fail to be impressed with the wisdom of getting close together on points vitally affecting retail Hardware interests. The discussion of methods and ideas at the national meeting, the arrangement for interchange through the year of circulars and letters issued from the secretaries' offices, have been largely and mutually helpful.

Probably no question at issue has received more attention than the so-called Parcels Post bill. Minnesota and a number of State Hardware organizations have interested themselves to the extent of addressing every Hardware dealer, member and nonmember, in their respective States, calling on them to sign petitions, get as many other signatures as possible, and forward with a personal letter to their Congressmen.

A. T. STEBBINS, PRESIDENT.

THE ADVANTAGES OF ORGANIZED EFFORT

are being more appreciated, and most of the States report an awakened interest and an increased membership roll. At the request of our president the secretary has made during the year eight business trips through the State, and, it is believed, with profit to the association, as evidenced in increased membership and rapidly growing insurance business. At the last annual meeting the list there presented footed 516 names. To-day a roll call would show an addition of 57 to that number, making a

SOLID PAID MEMBERSHIP OF 573.

It was suggested at the last annual meeting that arrangements be made, if possible, whereby the dates of our convention and those of the Merchants' Excursion be made identical, so as to insure a somewhat more favorable transportation rate, as well as increased attendance.

For this meeting it could not be arranged, as our dates were a fixture, and dates of the other people were made to fit still other dates of similar excursions entering Chicago. The question then arises, Can we meet the dates next year as fixed by the Merchants' Excursions? Can we name a meeting place and leave the date open?

FINANCIALLY,

we have made gains corresponding to our numerical strength; at the beginning of our fiscal year, March 1, our balance on hand was $100.08. During the year there was received from fees and dues, $1586, and from programme, $295. The disbursements were as follows: Salaries, $600; rent, $78.40; printing, $52; postage, $100; secretary's traveling expenses, $39.95; stationery and telegrams, $4.52; national dues, $512; Swedish sufferers, $50; miscellaneous expense, $158.83.

The secretary would like to call your attention to a letter from Geo. F. Carpenter, Crookston, regarding the proposed World's Fair excursion in June. Mr. Carpenter has had wide experience in such matters, having planned the very successful Southern trip last year of the North Dakota Association. Any of our members desiring to join our North Dakota friends in this trip would do well to communicate with Mr. Carpenter for further particulars.

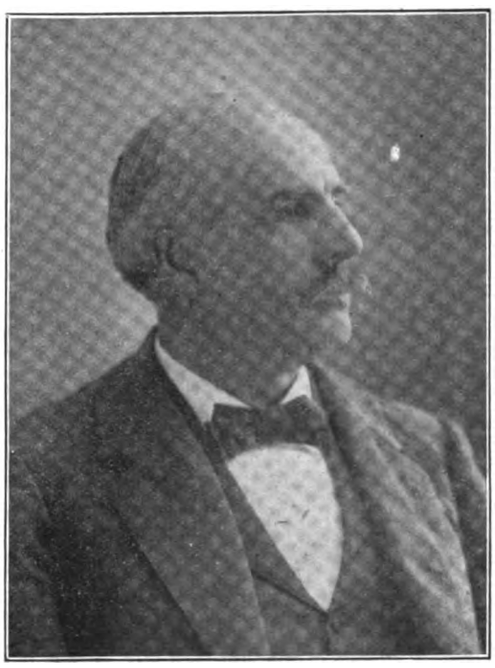
The secretary wishes to say that, with the enlarged business of the association, many calls have been made upon President Tomlinson for his time and advice, all such demands having received a hearty response from that gentleman

You will notice that our programme has met with a fuller understanding of its merits as an advertising medium, and that it is earnestly requested that where possible our members and friends will show a substantial appreciation of the favors of our advertising patrons.

TREASURER'S REPORT.

In the absence of Treasurer W. A. Barto, of Long Prairie, his report was read by Joseph Deuhs, of the same city. It showed receipts amounting to $1945.08; expenditures, $1596.71; balance on hand, $349.37. The report was referred to the Auditing Committee.

After a report given by the Treasurer which showed a balance of $349, E. H. Loyhead of Faribault read a paper on



IMPRESSIONS

from which we extract the following:

UP TO DATE HARDWARE.

There is a popular idea abroad that Hardware is a fine business to go into, because "nothing in the Hardware line grows old-fashioned or out of style." This idea is on a par with the old idea that the world is flat. Fancy a Hardware stock composed largely of ox yokes, powder flasks, cast butts and roller skates. The jobber and the trade paper knows better than this, so they give us a lot of advice about our buying.

The jobber is all right as to his buying, because he has the benefit of the specialized knowledge of his buyers, while you are your own buyer. During a good part of the year you are listening to eloquent pleas regarding articles you never heard of before, and beautiful word paintings are showing you the happy lot of the merchants who sell these novelties. You are told by all your advisers several things, regarding such a state of affairs, that you are trying to sort out and classify while this talk is going on. You remember your instructions all right, but notwithstanding you don't know what to do in this case. You remember the rule that you must not overbuy—also the one that you must not buy unsaleable goods. Then you remember that you are told by your trade papers and other advisers that you must pick up the new ideas, buy the new inventions and keep up with the times. In other words, if this novelty *is* all right, you should buy it, and if it is not a good seller you shouldn't buy it.

W. H. TOMLINSON, EX-PRESIDENT.

Anybody knows this without being advised. All the time that these contradictory instructions are being crowded in upon your memory,

THE TRAVELING MAN IS STANDING AT YOUR ELBOW,

and has kept right on talking. You can be assured that if he is out selling novelties, he is either an orator or a diplomat, and perhaps he is both. If he is, he is a salesman in the full sense of the word, and if you don't keep your fingers crossed you are gone. If you take the goods it is not a case where you bought them, but where he sold them to you. If, when they arrive, you can sell them, you admire yourself for your good judgment. If you are not able to sell them, you inventory them a few times at diminishing prices, and then give them away or haul them to the dump and think, "What a sour old world this is, anyhow."

* * * * * * * * * *

WE ARE LIMITED BY OUR ENVIRONMENT

and its needs, in disposing of the goods that are going out of style. Here again the jobber has the advantage. He can find other markets where the goods still sell, and by means of his letters to his salesman he can work off his theories on them and his dead stock on his customers somewhere. He can fill his salesman up with ammunition to bag big game, while we have to stalk ours with a trap.

Digitized by Google

THERE IS ONE RULE THAT WE ALL AGREE UPON

as being of supreme importance, and that is the one that admonishes us to always keep our temper whatever may happen while we are doing business. This, in my opinion, is the golden rule of trade, at least its successful following brings golden rewards to the man who, by nature or by self teaching, can always adhere to it. Most of us are mortal, however, and if the retailer who, as I have said, is buyer, credit man, salesman, correspondent and collector, besides being an officer in three or four lodges, can keep this rule at all times he has no business to be retailing Hardware any longer.

You get up some morning with this rule in mind and think, "How easy that is to keep." You start for your store at an unusually early hour. The morning is fine and you find yourself humming "What is so rare as a day in June?" At peace with all the world, your eyes behold with pleasure the lavishness of nature. The dew sparkles on the leaves and each blade of grass glistens in the morning sun. You listen to the singing of the birds, and revel in the freshness of the air and in the sunshine. You are thankful for your lot; the future seems one long June and full of roses. By this time you are at your store door, find it still locked, and a cloud seems to sail across the sky.

You unlock the door, and forget about the birds, the dew and the sunlight. You are assailed by the hot and stagnant air of a room closed over night, and by odors—not of the new mown hay you had been thinking about, but of Cordage, Oils and the dust of last night's

W. A. Barto, Treasurer.

sweeping. After you get the back door open so you can breathe again you begin to wonder about those clerks and whether or not they are ever going to show up. Then you begin to work furiously, just to show them how long you have been there when they do come. After you have tired yourself out doing a lot of unnecessary work, the clerks drop in and seem much pleased at the work you have done for them. This makes you feel good, for now you see the reward of unnecessary and uncalled for diligence.

* * * * * * * * * * *

THE MENACE OF CATALOGUE COMPETITION

called our association into being. As time passes on we see that we were unduly alarmed, and we also see that there are problems to be solved, and that the solutions are of real importance to our well being. If we had no organization we would not have the Mutual Hardware Insurance Company, who annually save us a great deal of money—neither would we have a National Association to work for our betterment.

A BLESSING IN DISGUISE.

The time may come when we shall be glad that there were catalogue houses to scare us into organizing. The world of business, like the other factors in our complex social system, is in progress of evolution.

The association adjourned at 5 P. M. to meet the following day.

NEW DIRECTORS APPOINTED.

It was announced that the terms of the following directors expired with this meeting: A. C. Hatch, Battle Lake; H. Hauser, Minneapolis; A. T. Stebbins, Rochester; C. F. Ladner, St. Cloud, and that a successor to C. H. Hornberg of New Ulm would have to be appointed, because he was retiring from the Hardware business. On motion of Mr. O'Brien the president was empowered to appoint a committee of five, who should present nominations for the five directors named. The president appointed the following as the Nominating Committee: J. E. O'Brien, Fergus Falls; D. H. Evans, Tracy; Clement Schroeder, Mankato; B. Fletsam, Royalton; C. Juni, Jordan. The same committee was instructed to present to the association names of nominees for the Committee on Finance and Audit. This committee reported at the afternoon session the following candidates, who were unanimously elected by ballot cast by the secretary:

For Three Years.—A. T. Stebbins, Rochester; C. F. Ladner, St. Cloud; H. Hauser, Minneapolis: J. A. Roell, Owatonna, to succeed C. H. Hornberg.

For Two Years.—Louis Gewalt, Breckenridge.

The session adjourned at 12:30 P. M.

THURSDAY MORNING SESSION.

This entire session was devoted almost exclusively to the Mutual Insurance Branch of this Association, whose six hundred members have always taken since its inception, the strongest interest in this line of business, nearly three quarters of its members making use of the insurance feature of the organization. At a meeting of the policy holders President Charles F. Ladner, of St. Cloud, delivered the eighth insurance report, having reference entirely to the insurance feature of the work of the association.

After the reading of President Ladner's Insurance Report, Secretary M. S. Mathews presented his annual report.

SECRETARY'S ANNUAL REPORT.

in the course of which he said:

Hardware mutual insurance is a subject that has commanded more attention from Hardware dealers in the past 12 months than in all previous years. Five years ago, when the members of the Minnesota Retail Hardware Association organized the first of the Hardware mutuals, they builded better than they knew. While the four years of this company's existence are but few upon which to write history, we believe from the showing herein made that Minnesota has, in a large degree, solved the problem of cheap as well as good insurance. While no man can predict what our losses may be, we can safely say, with our rapidly increasing business, that our expense account, the prime factor in cheap insurance, will never greatly exceed the present ratio of 10 per cent. of premiums. Standard old line companies use 40 per cent. for this purpose, so it is very evident that we are, in this one item, actually saving to our policy holders the 30 per cent. paid as a return premium.

HARDWARE ASSOCIATIONS IN NEIGHBORING STATES

are paying us that sincerest of compliments in organizing an insurance annex on similar lines. Pennsylvania has two such companies, Ohio, one, Iowa, another, while Missouri, Indiana, Wisconsin and Nebraska are either in process of organization or have it in contemplation. Mr. Stebbins of our board attended the late conventions of both Wisconsin and Iowa, expounding the beauties of Minnesota's Hardware insurance. That his excellent missionary work is already bearing fruit is attested by more numerous inquiries and applications from those States. Missouri and Wisconsin, while organizing, have sent this company a considerable amount of business to protect until such time as they are legally able to handle it themselves. Thanks are due to President Bush and Secretary Corey of the Indiana Association, their kind words securing for us a good number of excellent risks in that State. In saying excellent risks we would further remark that Indiana is our banner State, this company having at the present time policies in force in 40 towns, no commissions or losses ever having been paid in the State.

* * * * * * * * * * *

The future for the Minnesota retail Hardware Insurance Company is most promising. During the past year the secretary has received much valuable assistance from President Ladner and Treasurer Hauser, and desires to publicly acknowledge the obligation.

Treasurer H. Hauser, of Minneapolis, presented the following report:

Balance on hand, as per statement Feb. 25, 1903	$19,215.03
Received from secretary in deposit slips	26,046.71
Received interest	647.60
Total	45.910.34
Pa'd out in orders	8,365.96
Balance in treasury	$37,544.38

THURSDAY AFTERNOON SESSION.

The proceedings were opened by an address by A. F. Sheldon, Chicago, on the Science of Salesmanship, which was a reptition to some extent, of his remarks at other conventions to which we have referred.

R. A. Kirk, of St. Paul, Ex-President of the National Hardware Association, and President of Farwell, Ozmun, Kirk & Co. then delivered an address on

PRESENT BUSINESS CONDITIONS

in which he said in part:

Of course, there might be financial or other reasons for crowding the markets regardless of the cost of goods or the profit on their sales. In a time of panic, such as 1893, the cost of goods and the inability to sell them at the price offered without loss, do not determine the market. There are now, however, no panicy conditions. Sufficient money for the requirements of business can be had at reasonable rates. The solid business interests of the country have shown during the past year that they can withstand with scarcely a ripple of disturbance the whirlwind of speculation in all its stages from inflation even to drastic liquidation. During this abnormal and trying period, business went serenely on with the evident assurance as one of its most marked characteristics that whatever the exhibition might be it certainly was not a business man's panic.

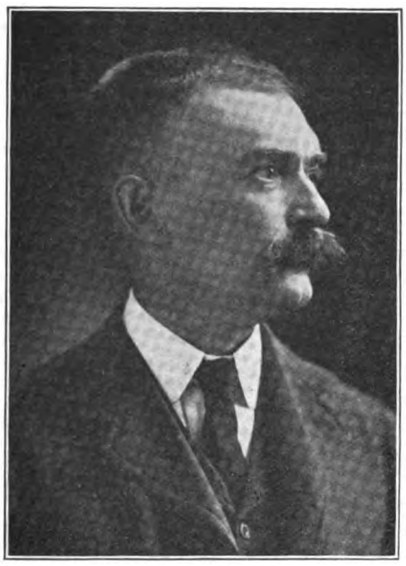
There is also a feature in the present conditions that add very largely to the stability of values in Hardware, which is, that the manufacturing of many of these lines is in strong hands. We have seen the steadying influences of this power in the marketing of goods in some lines in the past two years, and we all recognize it as of a most healthy character.

WE WANT A STEADY MARKET.

What we all desire, whether the retail merchant or those who sell at wholesale, is a steady market, and this condition is certainly helped materially by the consolidation of the past few years.

Digitized by Google

There is also, I may add, a growing tendency toward steadiness of prices at which goods are offered to the retail trade in there being less disposition on the part of manufacturers, as well as jobbers, to cut prices when not justified.



WE HAVE NO MILLENNIUM YET.

We have not yet reached the millennium and are probably still far away from the day when the lion and the lamb shall lie down together unless the lamb were to be inside the lion. But there is no doubt that the demoralization of prices is growing some less in evidence as the years go by, and I think the feeling among you gentlemen of the retail trade is steadily growing somewhat stronger, that when a "glib" salesman comes along and throws out some cut prices, he is giving you a bait, and that if you favor him with a general order for goods, he will see to it that the prices on the entire bill average up pretty well for his house.

PRESIDENTIAL ELECTION YEAR.

Another feature in the general conditions, which at this time is sure to figure more or less in our estimates, is the effect of the presidential election year. We have come to think to some extent that the fact itself of being the presidential year carries with it the conclusion that we must not expect much out of it.

There have been presidential campaigns in which the issues were of such a radical character as necessarily to disturb business. None

M. S. MATHEWS, Secretary.

of us will forget the campaign of 1896, which stands out conspicuously as a presidential year when business interests were very seriously affected, but we have come up out of the slough in which we were then floundering, and we are up again on dry land and the clear sky and the pure air of the better financial conditions of to-day surely will not soon give place again to free silver craze theories. We can see no way in which the issues of the coming campaign can be drawn so sharply between the two great parties in the contest as to disturb largely the conditions of business.

* * * * * * * * * *

It is one of the choice sayings of Ben Franklin, that

"THE ROAD TO WEALTH

is as plain as the road that leads to the mill." It consists, he says, "simply in spending less than we earn."

In these few words we have the whole economy of business, and whether we handle millions yearly or thousands and whether we consider the buying or selling of goods, no matter what the line of work may be , in all that we plan and all that we do, our every effort is directed toward the one simple purpose, that we may make the business earn more than it spends. In our efforts to secure this one object that we all have in view, may we each one find our balance on the right side when we come to close our books for 1904.

FRIDAY MORNING SESSION.

M. L. Corey, Argus, Ind., addressed the Convention on the subject of the Parcels Post.

R. R. Williams, of the *Iron Age*, was received and made welcome and addressed the Convention.

S. R. Miles, of Mason City, Iowa, President of the Iowa Hardware Dealers' Association, addressed the Convention, etc.

Committee on Resolutions.

The Committee on Resolutions, consisting of C. D. Decker, J. D. Geissler and E. A. Pease, passed the following resolutions:

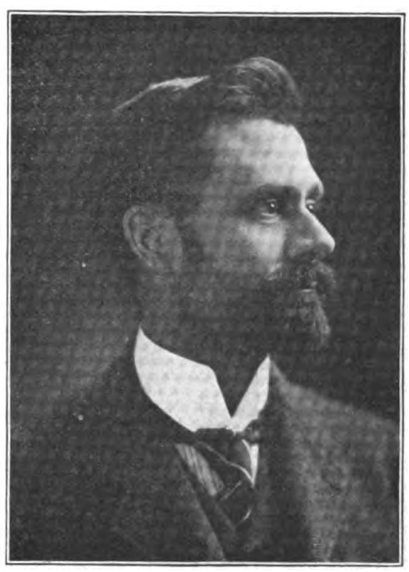
Resolved, by the Retail Hardware Dealers' Association of the State of Minnesota:

That we extend to the press of the Twin Cities a vote of thanks for their generous reports of convention meetings.

That we extend a vote of thanks to proprietors of the Windsor Hotel for courtesies afforded for our comfort and convenience while in the city.

That we gratefully appreciate the presence of members of the National Association and other visitors in our convention meetings.

That we heartily appreciate the very successful efforts of the Commercial Club of St. Paul and the jobbers of the Twin Cities for their efforts in our entertainment.



That we use every honorable method to defeat the Parcels Post bill, now before Congress, believing that the expense incurred in putting its provisions in operation would be very much in excess of the benefits derived by the general public.

That we extend to our retiring officers our heartfelt thanks for their untiring and faithful efforts for the success of our association work during th's past year, and that we pledge our loyal support to our incoming officers.

That we extend our heartfelt sympathies to Brother A. C. Hatch, of Battle Lake, in his hour of trouble and our sincere wishes for a speedy recovery of the afflicted.

That we hereby especially extend to our national president, W. P. Bogardus, and to our national secretary, M. L. Corey, our sincere thanks for the efficient service rendered in our behalf at the Atlantic City convention of manufacturers and jobbers, and we express the hope that the good work thus begun may be continued along similar lines, until many of the wrongs which have crept into the commercial transactions may be eliminated.

That thanks be extended to J. F. McGuire for spending time and

H. S. CLEVELAND, Ex-Vice-President.

effort in arranging for the entertainment and convenience of the association in this convention.

Next Place of Meeting.

The president read a letter from W. A. McGonigle, president of the Duluth Commercial Club, inviting the association to hold its next meeting in the city of Duluth. Mr. Miller, the vice-president of that club, secured the floor, and for ten minutes held the audience well night spellbound by a paneyric as to the beauties, and wonders, and joys, and comforts, and hospitalities of the city of Duluth. Julius Schmidt of Wabasha moved that the next place of meeting be Duluth, and Mr. Pease of Superior seconded the motion, and asked that Superior, the neighboring city across the bay, be included in the invitation to make Duluth its next meeting place. Messrs. McGuire and Evans also spoke in favor of Duluth, and the proposition was carried by unanimous vote. The date of the next meeting will be decided upon by the secretaries of the State associations at their next meeting, when a schedule will be arranged so that dates of meeting of the various State associations will not conflict.

Delegates to National Convention.

The following delegates were elected by the Executive Committee, which met Friday afternoon, to represent the Minnesota Association at the national convention, March 22 to 24, at Indianapolis, Ind.: M. S. Mathews, Minneapolis; C. D. Decker, Austin; C. F. Ladner, St. Cloud; W. H. Tomlinson, le Sueur; W. T. Cowing, Alexandria; Julius Schmidt, Wabasha: D. H. Evans, Tracy. By a by-law of the National Association each State is entitled to two delegates for the first 100 members and one delegate for each additional 100 or fraction thereof.

SHOVERLING, DALY & GALES, 302-304 Broadway, New York, are distributing to the trade the tenth edition of their fishing tackle catalogue, which is a large sized pamphlet of 100 pages. Included in the contents are artificial flies and bait, baskets, rods, floats, lines, nets, disgorges, hooks, sinkers, tackle case, split shot, wading boots, etc., in fact, about everything that can be thought of in connection with "ye gentle art of angling." All prices in this book are subject to change without notice. A miniature net price list will be sent to dealers only, upon request.

NEW YORK STATE ASSOCIATION OF RETAIL HARDWARE DEALERS.

The Second Annual Convention of the New York State Association of Retail Hardware Dealers was held in Rochester, N. Y., commencing on March 8th and continuing three days. The headquarters of the association were at the Whitcomb House, but the sessions of the convention were held at the Chamber of Commerce. The proceedings of the conventions commenced with a meeting of the directors on Tuesday morning in which the general outline of the labors of the convention were the subject of deliberation and suggestion.

The officers and members are very enthusiastic over the success of this association during it's second year. Over two hundred members are now on the rolls with a good prospect of at least a fifty per cent. increase during 1904.

TUESDAY AFTERNOON SESSION.

The convention was called to order at 2 o'clock, President W. D. Hollowell of Penn Yan in the chair. The Mayor of the City of Rochester, Hon. James G. Cutler, was introduced and welcomed the delegates to the city in a brief speech.

J. R. TAYLOR, Ex-Secretary.

The address of welcome was responded to by President Hollowell in a few felicitous remarks expressing his appreciation of the civic courtesies. Then followed the Roll Call of members and the enrollment of new members and payment of dues.

W. R. WALKLEY'S ADDRESS.

W. R. Walkley, of Peck, Stow & Wilcox Company, New York City, then addressed the convention on the

RELATION BETWEEN MANUFACTURERS, JOBBERS AND RETAIL MERCHANTS.

He spoke in part as follows:

He said the subject might be appropriately condensed to "Brotherly Love" or "Family Relations," and that each of the three parties is dependent on the other. The manufacturer depends on the health, encouragement and assistance of the retail dealer. The failure of one results in the failure of the other, while the success of one is the success of the other.

He thought that only the dealers purchasing in large quantities could successfully buy from the manufacturer. There is a dependence on the jobber that the retailer and manufacturer should not ignore. The jobber looks on the dealer for support. The manufacturer wants to sell at a profit; so do the jobber and the retailer, and there must be a harmony of action and a community of interest. He then pointed out that many retail dealers do not show the enthusiasm and lack the push that department stores manifest. Also these stores have interfered with the Hardware merchant less than almost any other class of merchants. Referring to catalogue house competition, he suggested that dealers should tell prospective catalogue house purchasers that they would meet the catalogue prices on staple goods if paid the catalogue house price in cash plus the express charges and the amount of postage used in the correspondence. The dealers would then have much less trouble with this kind of competition than at present.

* * * * * * * * * * *

He then urged on the members the necessity of knowing their goods, and said that a man who substitutes misrepresents, and that a man who represents a thing to be something that it is not, is not doing himself or his trade justice. He closed with a plea to the retailer, jobber and manufacturer for honesty of purpose and honesty of life.

This address was followed by an interesting one from the dealers standpoint on

RETAILING CUTLERY

prepared by J. B. Foley, of John B. Foley & Co., Syracuse, which we give as follows:

Mr. President:—I appreciate highly the invitation sent me recently to address the State Association on the subject "Retailing Cutlery." It was an unexpected honor, particularly so, because my house is one of the youngest concerns in the State. We have, however, given considerable attention to that department of the business on which I am privileged to speak to-day, and if the opinions we have formed and the results we have obtained (a brief review of which I shall read) can be of service or interest to the association, I assure you it will have been a pleasure to me to review them.

Selling cutlery is in my opinion the

MOST FASCINATING PART OF RETAIL HARDWARE BUSINESS,

and I believe this view is shared by every Hardwareman who handles that class of ooods. The work has its vexatious features, but on the whole no department of the business yields better returns for the money invested and trouble expended to make sales. I assume that nearly every merchant here handles some cutlery.

THOROUGH KNOWLEDGE OF THE LINE ESSENTIAL.

It is of importance that the buyer or manager of a cutlery stock should be thoroughly familiar with the line he carries, both as to its quality and as compared with competitive lines. It should not be enough to know merely that a knife is worth a dollar because it costs eight dollars a dozen—the salesman should be able to analyze the construction of the article and to submit proof if necessary to his customer of why he asks his price. Such a knowledge helps to make sales of high-priced goods, and also insures the house against paying too much for its stock.

One man in every store should be placed in charge of the cutlery stock, and made responsible for its condition. By this means fewer rusty pieces will be found and fewer losses sustained from that cause. Where a large force of salesmen are employed, only the most capable should be allowed to sell this line of goods, and these men should be trained well in the art of selling. It is just as silly to allow the porter or the stockman to handle fine knives or scissors as it would be to send your chief clerk on a busy day to load a truck or to blacken a stove. The latter might do his part well enough but the untrained helper will either lose a sale or sell a fifty cent article where one worth twice or three times the money might be disposed of just as easily.

WELL ASSORTED DISPLAY DESIRABLE.

A well assorted, rather than a large stock is chiefly to be desired. A comparatively small stock can be made to look large by careful arrangement.

Pocket Knives show to particularly good advantage spread out on trays in a show case. The line thus shown looks larger and nothing helps to sell goods more than the ability to impress the buyer with the idea that you have the goods—lots of them.

Shears and Scissors are very attractive when hung in a wall case with a glass front, so displayed that each size may be plainly seen from the purchasers position.

Carvers are very sightly stock and prominent location in the case should be given them. Carvers in cases should be shown without the covers—they can be placed to better advantage in this way, besides the covers are very liable to become soiled or marred in the frequent handling if placed under the box itself.

Table Knives, Etc.—These goods look very well displayed in boxes for the purpose, which many of the manufacturers now furnish gratis to their customers. If they can be kept behind glass doors, so much the better, but even if exposed to the dust in the store, the danger of soiling is slight and the samples should always be sold at every opportunity.

Razors are hard to display to advantage except in tightly closed cases, as the dust quickly spoils the fine edge. A good method of selling these goods is to use a flexible roll which will hold one or two of each pattern and make sales from the roll, replacing the one sold with a fresh one from stock.

Show cases containing cutlery should be kept scrupulously clean, and the contents equally so. A good way to prevent rusty goods is to place near the case a basket in which the salesman may put the articles shown or handled and leave the wiping and polishing of them to the person in charge of the stock.

Every tray or box of

CUTLERY SHOWN SHOULD BE PLAINLY MARKED

so that the customer may read at a glance the value of the piece. This method lightens the work of selling and tells to the buyer that you have but one price.

Window Display.—When a merchant has abundant window room, one window, or at least a large part of a window, should contain a

Digitized by Google

display of cutlery at all seasons of the year. This window should be changed often and made as attractive as possible. The value of this plan will be felt very forcibly at the Christmas season. People will just as naturally seek at holiday time the store which so displays cutlery, as they will turn for laces, etc., to the store which they know carries the best line of those items throughout the year.

THERE IS NO SEASON WHEN CUTLERY IS NOT SALABLE.

Special sale days help to keep alive the interest in the line and many quiet weeks may be made busy and profitable by a little energy on the part of the force in the store. Cutlery should be advertised both in the newspapers and particularly in the show window which is always the retail merchant's best advertising medium. Nothing that we sell admits of more effective display or of more pleasure to the passer-by while examining.

GUARANTY.—Most manufacturers leave the matter of guaranty with the dealer, taking back any goods which he (the dealer) sees fit to exchange. Because of this leniency, many dealers allow themselves to be imposed upon by careless or unscrupulous customers, who return goods, damaged surely enough, but in that condition solely through their own fault. Such goods should not be exchanged, and the surest way to prevent these outrages is to explain the warranty clearly at the time of sale. The warranty should cover only defects in temper, springs or handles, imperfect fitting of parts, flaws and inferior quality. If any of these defects exist (and they can be readily seen), the piece should be cheerfully exchanged; but it is an injustice to the dealer and the maker to change goods under any other circumstances. In such cases the completed knowledge of the line handled, its average record with your trade, etc., is of great import.

THE GREATEST COURTESY SHOULD BE SHOWN CUSTOMERS.

This applies to every department in the store, but it is specially important in the cutlery department. Among ladies particularly, the obliging salesman is asked for an opinion frequently and his opinion is always respected. It pays to appear anxious to show and explain goods pleasantly to ladies—they are appreciative cutlery buyers and we all know what a good advertisement a pleased woman is.

A large line of sundries may be sold at good profit in connection with the cutlery department. Among them are shaving soap, lather brushes, shaving cups, combs, razor strops, mirrors, manicure instruments and dog collars. The dealer must be governed to some extent by his location, the size of his city or town, and the spending ability of his community. It is well, however, to be optimistic on this point; people will buy good things at a fair price if they are approached properly and are given good service. It is better to overestimate a prospective customer's price limit than to underestimate it. A person's garb may suggest to a salesman but little prospect of a good sale, whereas the same person may have a passion for good cutlery and be anxious to pay a good price for what will please his fancy. We have learned that it pays to always show moderately high priced goods. For example: A customer rarely asks for a knife at a certain price but will usually say, "show me a knife." We then ask his preference as to size; having that information we show first several patterns of the size indicated which sell at a moderately high price. If the price quoted is higher than the customer wishes to pay, he will quickly make known that fact either verbally or by his manner. In such a case lower priced goods are shown and many times the better knife is sold—this applies, as well to other goods in the line.

"Quality" should be the foundation upon which to build a business in cutlery. The average man and woman never forget the store which sold him or her a satisfactory knife or shear and they just as surely remember the store which sold something inferior. It is perfectly proper for a Hardwareman to carry low priced cutlery, but it is a grave mistake to overstate the quality of such goods to your customers. We should always try to sell an article which we believe is going to give satisfaction—the right kind of argument will usually accomplish this—and as a very successful business man says "The recollection of quality is remembered long after the price is forgotten."

ADDRESS OF NATIONAL SECRETARY COREY.

M. L. Corey, secretary of the National Retail Hardware Dealers' Association, lauded the noble sentiments and ideals expressed by Mr. Walkley, and then made a vigorous attack on the Parcels Post bill. After this he urged all members to read their Bulletins, because by so doing better co-operation between the merchants can be obtained. In the January issue, he went on, endeavor had been made to impress two facts: Meet the price of catalogue houses and write to Congressmen protesting against the Parcels Post bill.

MEET THE PRICE.

He said that from a very good source he understood that New York State had more goods sent into it by two Chicago catalogue houses than any other State in the Union. He recalled the statement that he had made in Atlantic City, that on certain articles it is absolutely necessary to meet their price, and that nothing else will do; not their price with 50 cents for freight, etc., added, but their actual price as printed. When a dealer stands and argues with a customer he loses influence with the customer and confidence in himself.

President Hallowell then appointed the following committee on the Question Box: George W. Rockwell, Clark Bloss and Charles Decker.

The president announced that he had secured the name of every reputable dealer in his town to a petition and forwarded it to their Congressman in opposition to the Parcels Post bill.

Secretary John R. Taylor said he had written to every Congressman and the two Senators from the State. The two Senators replied that they were against the bill, and the only Congressman whose reply was unsatisfactory was William Randolph Hearst.

WEDNESDAY MORNING SESSION.

Convention called to order at 10 o'clock. A. Eugene Bolles, Manager of HARDWARE, New York, delivered the following paper on

RETAIL ADVERTISING.

Some are born great, some have greatness thrust upon them—others advertise. The merchant who sits down and waits for business to come to him will find himself among the left over baggage when the Empire State Express of business success pulls out.

Business success needs three things—knowledge, push and good advertising. In these strenuous times advertising bears about the same relation to a business as steam does to an engine or rather as the fire under the boiler to the steam it creates. Advertising alone will not make a millionaire out of any man. It is the pinch bar with which a live, hustling man may make a business move with little perceptible power.

Advertising isn't an art; it's just applied common sense. Advertising is naturally a creative force. Since it has been applied to modern commerce there have been created dozens of commodities and branches of trade that did not exist before its advent. The six hundred millions of dollars spent annually in this country for publicity have set many hundreds of millions of dollars running into wholly new channels.

Business is warfare—in a sense, a hard constant fight to the finish. Advertising is the business man's most modern, most effective weapon.

Once in a while we hear some old fellow saying: "I have never advertised and am still doing business at the old stand." He means that he is doing business at the old standstill.

ADVERTISING IS THE YEAST CAKE

which causes the business bread to rise. Advertising is simply telling some person or persons some fact or alleged fact concerning something. It is therefore as old as the human race, for didn't the serpent by his plausable arguments induce Eve to pick the apple, and after tasting it didn't Eve tell Adam it was good and persuade him to take a bite? In olden times the Greek merchant was accompanied on his rounds by musicians who assisted him in chanting the virtues of his wares. In a ruin of Ancient Egypt was found written on papyrus an advertisement for a runaway slave. This advertisement is undoubtedly at least 3000 years old.

It has always been a wonder to me that advertising in different ways was not more general among Hardwaremen. For it seems to me that the modern Hardware store with its thousand and one specialties and articles of general use, presents one of the easiest advertising propositions in the field of business. Our Grandfather's stock, made up as it was, chiefly of nails, butts and screws, and the like, would have made rather a difficult subject for even an expert ad-man to handle, but the Hardware stock of to-day, with fancy Builders' Hardware, cutlery, sporting goods and almost an endless number of specialties for the housewife, farmer, children and grown-ups, offers material for a dozen or more good advertisements for every day of the year.

When once you decide to commence advertising don't spend a dollar for printer's ink, paint or posters until you are ready for results. You wouldn't invite a lot of people to your house to partake of a Christmas dinner and when they arrived have no fire in the parlor and no dinner to serve. An advertisement is an invitation to the people of your neighborhood—all of them—to come to your store and see something worth the trip, so, in the language of the Scriptures "put your house in order" first, make your store attractive. It will cost something, but you can't expect people—especially new customers—to come a second time unless you give them the right kind of a reception when they make their first visit.

Put your most attractive, most seasonable goods to the front—new customers will not be favorably impressed if, on coming into your store they run against a lot of shovels, wheelbarrows, nail kegs and the like. Every Hardware store keeps those goods and if anyone wants them they will ask for them. Put your cutlery, small tools and other bright goods in the front where daylight will strike them. Arrange your stoves in neat rows and keep them polished. Keep your newest specialties in conspicuous places, exhibiting working models where possible so that each one will tell its own story. Put your nails and other homely goods out of sight and you will have a store that says "Welcome" to all who enter and "come again" when they leave.

Study your trade and buy the goods it demands, and don't buy second-class goods. Goods that are not good enough to bear truthful advertising are not good enough to sell—or even to give away.

STUDY YOUR GOODS,

and see that your clerks know just as much about them as you do. If you started a man out to canvass the town for orders for a new washing machine you wouldn't allow him to commence soliciting orders until you were assured that he knew the strong talking points of that machine. It is just as important that you and your clerks know every strong argument concerning the hundreds of articles on your shelves and counters. This means work but no half hearted policy will bring success.

I wonder if there is not someone here who expected me to say: "Then call in the advertising expert with his hand-me down ads"—if so you will be disappointed. The average advertising expert:—The man of whom it is said

> The time is past when poets starve
> In garrets without hope.
> They're making scads by writing ads
> For breakfast foods and soap.

This man is about as much use to the retail Hardwareman as a refrigerator to an Esquimaux. A knowledge of the goods and of local conditions must be possessed by the man who successfully advertises a Hardware store.

Digitized by Google

There may be some others who expected me to insist that a course with a correspondence school of advertising is absolutely necessary. Again you are doomed to disappointment—at least partially so. Of course a knowledge of type, engraving, arrangement, etc., is certainly a valuable asset to the writer of advertising, but there are many successful advertisers who do not know 6 point old style from 36 point Gothic or a printing press from a paper cutter. A few dollars spent in subscribing to one or two magazines devoted to advertising will furnish you with all of the technical information necessary.

The Hardware dealer can advertise in an almost endless number of ways, but I will mention only those that are in my opinion first in importance and productive of best results.

I have already spoken of the advisability—rather the necessity of having an attractive interior to the store as a method of holding trade, and as one of the first methods of attracting the attention of the passer-by—the man on the outside—I wish to say a word about the stores exterior.

You or I might have walked over the hills of Cripple Creek stumbling over the rocks and think those barren hills one of the last places on earth from which man could have gained a living. The man of minerals comes along picks up the stones we have stumbled over, crushes and smelts them and carries away millions in gold. He knew what was inside of those rocks. The Hardwareman is dealing with people who

DON'T KNOW WHAT IS INSIDE,

so he must put a little glitter on the outside, to excite the curiosity of the passerby. The exterior of the Hardware store should say "come in" to everyone in sight, just as the interior should say "welcome" and "come again."

In dressing windows the same arrangement should prevail as in the main part of the store. Don't fill the windows with prosey, staple goods—you don't need to tell people that you keep these goods; fill your windows with attractive articles; make your windows talk; display seasonable goods in a way that will suggest the need of them in the minds of the people who see your windows; keep the display bright and clean and change it frequently; keep the people wondering what you are going to do next, but look out for the nonsensical. The merchant who does some fool thing to draw a crowd generally gets it, but such a crowd produces only a few unstable customers and for every one such customer gained in this manner a dozen would-be customers turn away with a feeling of mingled contempt and disgust.

Another mode of advertising which can be carried on with little expense is the use of circulars or booklets. Much good material for this kind of advertising can be obtained practically without cost. The manufacturers of specialties in many cases furnish the dealers with circulars or booklets describing their articles. At a small expense your name can be printed on these, or a rubber stamp can be used; never let a piece of advertising matter leave your store until your name is on it. Whenever you put in a stock of stoves, refrigerators or any other seasonable goods, have an attractive circular printed announcing the fact. Cheap printing is too expensive—it doesn't bring business. Really good printing means a larger printer's bill but it also means more sales.

One very good method of distributing circulars or booklets is by placing one in each package of goods sold. A little good judgment is necessary in this, for profitable results could hardly be expected from a circular describing boys skates if wrapped up with a flour sifter sold to a maiden lady of uncertain years or a lawnmower booklet given to a section hand who resides in a railroad shanty. This method of distributing will of course reach only your present customers. To reach others necessitates either a house to house distribution or the use of the mails. Sending circulars by mail costs more, but like good printing, it invariably brings much better results, and more than this it permits classification. If you put in a new line of carpenters' tools, send advertising matter concerning them to all the carpenters in town. If a new line of Sad Irons send the booklets or circulars to the housewives. It is said that a man always hits what he aims at, but that the reason for so much poor shooting is that the shooters don't aim. A man with a blunderbus uses a pound of lead, and is pretty sure to hit something, but a steady hand behind a rifle loaded with a half ounce bullet is even more effective and besides it saves ammunition.

Painted signs nailed up along country roads and advertisements painted on fences, barns, etc., will make the rural population acquainted with your name and business. Little or no argument can be made in advertising of this character but considering the length of time during which these signs remain standing and their moderate initial cost, money spent in this direction is generally considered well invested.

I have now reached that most modern medium for advertising, the one accepted by leading authorities as the best. I refer to the newspaper. Being a newspaperman it is natural that I would favor this class of advertising, however, I hardly imagine that I will be accused of partiality considering the recommendations I have already made for spending a large part of the advertising appropriation in other directions. I have left what I have to say concerning newspaper advertising to the latter part of my remarks, because success in newspaper advertising depends to such a great extent on preparation—on the advertisers' being ready to care for results. The other methods that I have suggested are really part of this preparation.

The first and one of the most important steps in newspaper advertising is the

SELECTION OF MEDIA.

In small towns this is a small item especially where there are only one or two newspapers. In larger towns with a half dozen dailies and twice that number of weeklys, it requires exceedingly good judgment on the part of the advertiser to place his appropriation to the best advantage. The politics of a paper should never, in my estimation, enter into the consideration. It is not at all likely that your customers and possible customers are confined to one political party. Other things being equal I should select the evening paper in preference to the morning paper for advertising Hardware, for the reason that the evening edition is the one most generally read by the housewife and by the laboring man; both are too busy in the early part of the day to more than glance at the morning paper at the breakfast table, while the evening edition is read by the family around the fireside.

If you have a number of papers from which to make your selection try to pick out the papers which reach your trade—that is if your trade is largely among laboring men get into the laboring man's favorite. If your trade is general in character it will be necessary to add a paper favored by the better classes. You can decide on this matter after a personal investigation on a small scale as to the popularity of different publications. The rural population should not be overlooked. To reach them use the best weekly papers or if the surrounding country is covered by rural free delivery find out what daily papers the farmers subscribe to most generally, and use them.

Honest advertising solicitors can assist you in making selections, and here let me say just a word concerning the representative of the newspapers' advertising department; if he knows his business the average solicitor can give you many pointers and tell you many things you don't know. When he makes his first call receive him courteously, if he seems honest, conscientious and experienced receive him with equal courtesy when he calls again. Advertising men like Hardware drummers, and in fact like all salesmen are sometimes tempted to draw the long bow, but on the whole, take the average, and you will not be able to find a more industrious lot of men. Quick in perception, ever ready with suggestions, broad-minded, you will find the honest advertising man of experience a valuable friend.

THE SIZE OF SPACE

to be used is another important item. Use space enough to present at least one strong argument. Large space is unnecessary, except in the event of special sales or at the opening of a season. A space of from 3 to 8 or 10 inches single column filled with an argument straight to the point on one subject, changed every day, or at least three times a week, if inserted in daily papers, will bring more business for the money expended than a half page crowded with a disconnected jumble of different articles. Let the story you have to tell decide the size of space. State your argument as pointedly, as briefly as possible, have it set up in readable type and if it takes 3 inches that is enough, if 10 inches, use ten. A ten inch ad. in a 3 inch space is about as much out of place as a three hundred pound man in his boy's express wagon. Too many advertisements are spoiled by over crowding and to cut the ad. short, to leave out essential points, to stop before the story is complete spoils the ad. just as surely as crowding it. Of course this applies to "all year around" advertising. During the holiday season or when you receive your Spring goods or on other similar occasions a forcible announcement in a large space is advisable. The larger the ad. the more care necessary in arrangement. An advertisement which looks like a Chinese puzzle won't have many readers, and you can't expect the dear public to get out an extra pair of spectacles in order that they may learn what you have to say.

The best article ever made, advertised in the best medium ever published, will not bring results unless the advertisement is properly written. This is the rock on which so many advertising ships have been wrecked and the current which carries them to disaster is named "Big Words."

An old Irishman used to say, "foine words butter no parsnips"—highfaluten talk won't bring business.

HUMAN TALK

is what is wanted. When the rubbish is cleared away, and we get down to rock bottom, this advertising business is as simple as A. B. C. A whole band wagon full of college-bred theories can't compete with a hard-headed business man with a stub pencil and a sheet of wrapping paper in getting up good ads. Plain human talk is what you want; the kind that talks square toed English, with no frills put on. If in the ordinary explanation a joke creeps in naturally, it is splendid stuff—helps to set off the ad. and gives it that real human touch that brings buyers.

Get out your stub pencil and a big sheet of manila wrapping paper. Write just the same as you would holler to a fellow across the street: "Come over here Jones and see the finest article you ever saw in a Hardware store." When he comes over, you go into detail, tell him all about it and why he needs the article.

A firm belief that your business is worthy of patronage is the first essential to the writing of good advertisements and the man who can forget that he is writing, and talk with his pen as he would under ordinary circumstances will get the trade. Advertising experts prepare barrels of high sounding ads., but when it comes to getting trade for the Hardwareman no one has ever improved on the good old-fashioned way of telling the plain facts in an intelligent straightforward manner.

The ad. that doesn't contain information is not the business bringing kind. It is a mistake to presume that the public is familiar with the goods you carry. In writing ads. it is a good idea to presume that people generally know nothing at all about your business or the goods you sell, and that it is your especial duty and privilege to enlighten them. The man who knows his trade and knows what it wants and knows how to intensify its wants by suggestive advertising will always be in the front seat of the business band wagon.

Digitized by Google

Make yours ads. to the point—don't be ambiguous or you may find yourself in the predicament of the young lady who inserted an advertisement to the effect that she would like to meet a gentleman fond of out-door life. The ad. was answered by a score of hoboes.

A customer recently called at a grocery and said to the proprietor: "I believe that you advertise your establishment as a real live grocery." The grocer, with a large open faced smile replied, "You have said it." "Well," continued the customer, "your ads. are certainly truthful, for the cheese I bought here yesterday was about the liveliest thing I ever encountered."

Advertising something you haven't got is like writing checks when you have nothing in the bank; there will be trouble when you don't make good. This reminds me of another cheese story.—A man said to a grocer, "What's the price of cheese to-day." "Fifteen cents a pound." "But the fellow across the street is selling it at ten cents." "That's the place for you to buy it." "But I've just been over there and he hasn't got any." "Well then, the kind of cheese I haven't got you can have at ten cents a pound also."

The common plan of the honest man
Who states what he has to sell
In simple vein and language plain
May take some time to tell.
But the truth will out with a mighty shout,
And the sound will pierce the skies,
So you can't go wrong to follow my song;
Be honest and advertise.

JOKES AND SMART ALECKNESS

are as much out of place in your ads. as a cakewalk in a cemetery, and as one bad egg spoils an omelet so one bad ad. may spoil the effect of a whole series.

Don't imagine that people are standing around with open mouths and ears to catch everything you have to say. You've got to say it so attractively, so earnestly, so boldly that they'll see it in spite of preoccupation or indifference.

A well written ad. will not be read unless it is properly set up by the printer. The heading of an ad. should tell a story in itself or be so inviting as to lead the reader immediately into the body of your announcement. Just one display line in a plainly set ad. attracts the eye more quickly than a hodge podge of bold face and italics.

The store that runs a head line reading "fire sale," "grand opening," "slaughter sale" or "unprecedented sacrifice sale" every day soon takes rank with the boy who cried "Wolf" and the "bankrupt sale" often closes the chapter.

Enthusiasm without cool judgment is liable to blow in the appropriation on one or two insertions. It takes time, repetition and common sense arguments to make people believe in buying your goods and come back for more. Too many advertisers empty their appropriation sandboxes on the first grade and the road to advertising success is strewn with the bleaching skeletons of the victims of one insertion. John Wanamaker once said, "to discontinue advertising is like taking down your sign." You have a sign above your door to let people know who you are, and what you are doing. That's what your advertising does. It merely multiplies your sign. It lets thousands of people know what you have to sell.

Vanity is too frequently the besetting sin of business men. They labor under the delusion that if they advertise during the few busy months the public will keep them in mind for the remainder of the year. They overlook the fact that when the mightiest of earth pass away, people cease to talk or think of them after a week. Only a few years ago the name of Paul Krueger was in every man's mouth; everybody talked of him, applauded him or criticised him, wondered what his next move would be. How often do you think of him now? How many of you know that in a little European village this old man, broken in body and spirit, once famous now almost forgotten, is passing his few remaining days dependent on the hospitality of friends.

So it is with the business man. In order to be in the public mind his name or his business must be kept before the public all the time. Advertising loses one-half of its efficacy when put out spasmodically.

Breathes there a man with soul so dead,
Who never to himself has said,
"My trade of late is getting bad,
I'll try another ten inch ad."
If such there be, go, mark him well;
For him, no bank account shall swell;
No angel watch the golden stair
To welcome home a millionaire.

The man who never asks for trade
By local line of ad. displayed,
Cares more for rest than worldly gain
And patronage but gives him pain.
Treat lightly, friends, let no rude sound,
Disturb his solitude profound,
Here let him live in calm repose
Unsought except by men he owes.

And when he dies, go, plant him deep
That naught may break his dreamless sleep;
Where no rude clamor may dispell
The quiet that he loved so well.
And that the world may know its loss,
Place on his grave a wreath of moss;
And on a stone above, "Here lies
A chump who wouldn't advertise."

Brief addresses were made by the following manufacturers' representatives: H. A. Fisher, Jr., of Reading Hardware Company; Scott B. Ball, of Sargent & Co., and L. A. Wegman, of Yale & Towne Mfg. Co. E. J. Neale of the Buffalo Wholesale Hardware Company made interesting remarks on the subject of prices and price cutting.

The following telegram was read: "Accept best wishes for a profitable and successful session. Frank A. Bare, secretary Ohio Hardware Association."

After Secretary Taylor called the roll, the session adjourned.

WEDNESDAY AFTERNOON SESSION.

Upon the convention being called to order, R. R. Williams, Hardware Editor of the *Iron Age*, delivered an address on

THEORY AND PRACTICE IN BUSINESS.

THURSDAY MORNING SESSION.

This session was convened at 10 A. M., and was more particularly of an executive character. The first and most important paper was the reading of the president's, W. D. Hollowell, annual report as follows:

President W. D. Hollowell, of Penn Yan, then delivered his annual address:

PRESIDENT'S ANNUAL ADDRESS.

It has given us much pleasure to again meet with those who were present at our organization meeting in Syracuse, also with those who attended our first annual meeting in New York one year ago. It is also encouraging to look into the faces of those who are with us for the first time. To these let me say, your presence is an inspiration to those who, since the association was organized, have worked faithfully for its upbuilding and success.

Notwithstanding the Wall Street depression, the labor troubles, the high prices of labor and material, the catalogue house competition, the trials and troubles, annoyances and vexations incident to the Hardware trade, we believe the past year has been a successful and prosperous year for all.

In reviewing the work of the year, we find improved conditions and much encouragement. While it has not been possible to correct all of the many abuses, we are glad to report progress in many lines of endeavor.

GREAT SUCCESS OBTAINED BY ORGANIZED EFFORT.

The better we understand the object and aims of association work and realize more fully what organization has already accomplished, the greater will be our interest in and loyalty to our association. Organized effort has demonstrated that in all lines greater success has been attained than by individual effort. The individual can do but little, the local association can do more, the county association has greater power; in the State, the power is increased. Who can estimate or measure the results when organization embraces the whole country and becomes national.

Do we appreciate what organization means to us now and, ever enlarging, what it will mean and do for us in the future. It would seem wise, therefore, that we rally our forces and do all that it is possible to do in building up our association.

All will admit that with a larger membership much more could be accomplished. Our

MEMBERSHIP HAS INCREASED,

perhaps not to the extent that we could wish and had reasons to expect, but, compared with other States, our ratio of increase has been such that we see no reason for discouragement.

In this connection, let me read you an extract from the annual address of the president of the American Hardware Manufacturers' Association. He says:

"While our association is prosperous and we are all proud of our membership because of those associated with us, let me impress upon you the fact that you do not show the interest in its future that the management has the right to expect from you. You should not be contented until you have included in its membership every reputable Hardware manufacturer in the United States. In addition to this, we should show more interest in the proceedings and endeavor, by concerted action, to prove that we are determined to win the approval and admiration of those who remain at home and make it easy for us to be here. There are so many abuses which might be overcome by earnest endeavor, that I am surprised at the indifference shown."

These words will apply, not only to our own, but to every trade association throughout the country. Could every dealer know the

GREAT BENEFITS TO BE DERIVED FROM ASSOCIATION WORK,

the reforms already accomplished, the many abuses that have, and the many more that could and would be corrected, if they were all united and working together, it would seem that no dealer would hesitate to identify himself with and become a member of the association.

The question of securing new members and how to do it, is, and has been a problem with most, if not all, of the associations. One proposes the plan of enlisting the traveling men with a commission attached to the proposition; another, a paid secretary, under certain conditions, which a large membership would make possible. I believe this to be the ideal plan. We, of the Hardware fraternity, are busy men. Most of us feel that we cannot give the time necessary to accomplish the best results. By adopting

THE PLAN OF A PAID SECRETARY,

who will give his whole time to the work, it would seem that the work would be looked after more closely and better results follow. Another plan could be made successful, if vigorously worked. I am of the opinion that if every member would agree to secure one or more names during the coming year, the increase would surprise us. One of our members sent in four names during the year. The four are now members. Another has sent in twenty-two names. We trust many, if not all, of these will be secured. If all were equally interested, we could

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.

Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The **GLIDDEN VARNISH CO.**

MAKERS OF HIGH GRADE VARNISHES

No. 44 Williamson Bldg., Cleveland, O.

in the near future double our membership. This work continued and later we would be able to say, Our association includes every retail Hardware dealer in the State.

Our Executive Board has held two meetings during the year; the first in this city and one in Syracuse. The fact that not less than eleven of the fourteen members were in attendance at each meeting is an indication that the members are loyal and interested in the work of the association. The sessions were interesting and profitable. I will not take your time to enumerate here, but the

QUESTIONS DISCUSSED AND WORK DONE

will appear in the several reports that will be presented later. Mr. Ferres, our vice-president, and Mr. Gardner were appointed delegates to the National Retail Hardware Dealers' Convention, held in Chicago, last March. As Mr. Gardner was unable to attend, our secretary was in attendance as his substitute. It will be our pleasure to hear from these gentlemen. Mr. Ferres will give us a full report of the meeting.

Our secretary received an invitation to be present at the Executive Board meeting of the manufacturers and jobbers, held in Philadelphia, last May. He will give us a report of that meeting also. The National Manufacturers' Association and the National Hardware Jobbers' Association held their convention at Atlantic City in November. The president and secretary of the National Retail Hardware Association were present by invitation and were successful in securing a practically unanimous vote, of the organization represented there, in opposition to the Parcels Post bill.

The bill, as you know, is in the interest of the catalogue and mail order houses. If passed, the saving to two of the large catalogue houses, in mailing their catalogues, would amount to $500,000 annually. It would also add to our already large deficit in the Post Office Department the large sum of ten millions or more the first year. It is one of the greatest dangers threatening the retail interest of the country to-day. It would be interesting to know what has been done by our association in opposition to this bill. How many have sent petitions? How many have written their Member or Senator? This bill would have passed last year had it not been for the opposition of the associations. The fight continues: is still on. What is done should be done quickly, every member should act at once. A representative of the National Association is with us to-day and will give us the latest information in regard to this bill. At the sixteenth annual banquet of the Chamber of Commerce of this city, held January 7th, John Brisben Walker spoke on Postal matters, defending the Parcels Post bill. At the regular monthly meeting of the Chamber, February 20th, the committee reported as follows: "That the proposed system be not accorded the support of the Chamber of Commerce. The report was favorably accepted by the trustees and made the report of the Chamber of Commerce as a body."

While the

CATALOGUE HOUSES ARE HAVING TROUBLES OF THEIR OWN

and report business greatly disappointing, they are still very much alive and doing business at the old stand. They are, as we know, advertising largely. Their catalogues can be found in every hamlet in the United States. But hard work, persistent effort, personal talks with customers, a comparison of prices, having in mind the quality of goods, every dealer fully determined to secure the trade belonging to him. Meeting their prices and advertising the fact that you are doing so; this continued, and the day is not far distant when your customer will conclude that it is for their interest to buy at home.

MUTUAL FIRE INSURANCE MATTERS.

At the first annual meeting of the National Hardware Dealers' Mutual Fire Insurance Co., held January 12th last, the secretary of our association was made one of the directors. The company is now fully organized and ready for business. Several of the State Associations have organized and solicit your insurance. The rates are much cheaper than the old line companies. A committee was appointed at our last annual meeting to investigate the question of insurance and report at this meeting. We will hear from them later.

In this report a few moments might be given to the question of jobbers selling to consumers. The closer relations between the manufacturers, jobbers and retailers, the local association and the benefits resulting, co-operative buying and other questions, in which we are all interested; but without doubt these and many others will be presented for discussion at the afternoon session.

To-day's sessions are for members only, business sessions, busy sessions. It will be a full day. There is much to be done. May what we do be done as expeditiously as possible. Let us give to each question our undivided attention, our best thought and endeavor to reach conclusions and so decide all questions, that increased interest, greater loyalty, a better understanding of the work before us, a stronger organization will be the result.

This was followed by the secretary's, John R. Taylor, annual report, from which we give a few extracts of general interest:

SECRETARY'S REPORT.

In submitting my second annual report I wish to extend my thanks to our President, Mr. Hallowell, for courtesy and consideration to myself, and also to the Executive Board for their kindness and sup-

(*Continued on page 56*)

REVIEW OF THE MARKETS.

WIRE NAILS. Orders continue to reach the mills in ample supply, and there is some difficulty manifested about prompt shipment, some of which obstruction is furnished by lack of transportation facilities, a shortage of cars being complained of. In connection with other Wire products, an advance of 5 cents a keg took place on March 7th, which makes a change in quotations, which are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.95
Retailers, carload lots	2.00
Retailers, less than carload lots	2.10

New York. The local market on Wire Nails is firm at the advance, and demand gradually increasing in strength. The change in weather conditions of the few days past assists in the feeling of confidence in a possible opening of Spring conditions, after our long spell of Winter. Quotations are as follows:

Single carloads	$2.10
Small lots from store	2.20

CUT NAILS. The demand is reported as being better than usual for the period on account possibly of price being regarded as favorable for greater consumption, and a reasonable fear for an early advance. The next meeting of the Cut Nail Association is booked for March 23d. Quotations continue as previously quoted. On either Steel or Wire Nails, with no discrimination as to locality, quotations are as follows:

Carload lots	$1.70 base
Less than carload lots	1.75

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The local demand is by no means a heavy one, although within a week greater spirit is shown in purchasing. If weather continues favorable there will be no special complaint. Quotations are firm, at the following:

Carloads on dock	$1.84½
Less than carloads on dock	1.92½
Small lots from store	2.00

BARB WIRE. Notwithstanding the advance made a few days ago the demand from all sections for this leading staple continues good, being in nearly every case of more liberal proportions than usual. The belief is prevalent that local sales will be the best on record, and a shortage at the mills become a certainty, which should be avoided if possible. The mills find it difficult even this early to keep pace with the demand. Quotations are now as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.25	$2.55
Retailers, carload lots	2.30	2.60
Retailers, less than carload lots	2.40	2.70

SMOOTH FENCE WIRE. As on other Wire products, an advance of five cents per 100 pounds was made March 7th. The demand is strong and well sustained. Additional orders of good size have been forwarded by the manufacturers and the trade generally, to replace delivery on contracts; and thus keep up orders to original dimensions in anticipation of increased wants. Quotations are as follows, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cah in 10 days:

Jobbers, carloads	$1.90
Retailers, carloads	1.95
Less than carloads	2.05

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

SHOT GUNS. The Association on Single Barrel Breech Loading Shot Guns having been dissolved has made possible much lower prices on this popular line of goods, which indicates the probability of goods being sold without profit; which, however, is doubted by old buyers, as the margin has always been considered a liberal one.

F. E. MYERS & BRO. have the following revised prices for the season of 1904:

Pumps.

Cistern, Best Grades	60@60&10%
Pitcher Spout, Best Grades	70&10@75%

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseel Oil Co.:

In lots of less than 5 barrels...43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The worst advocate of cold weather has probably been satisfied this Winter, which has broken the record for some thirty-four years, and the effect on trade is still felt, as outdoor work has been at a complete standstill, both in city and country. From many sides we hear there are good prospects for the coming Spring, and a fair amount of building is already planned, and an early Spring should apparently bring fair and satisfactory business. Already hurry orders are being demanded for immediate consumption, and it is now difficult to fill orders for some lines. Prices do not show any immediate changes and contrary to expectations there has not been announced any further advance in wire nails or wire, although it is thought this may come at any moment. On many lines there seems to be a tendency towards a stiffening in prices, and there is much complaint on the part of the manufacturers that there is not a fair profit at present figures. As might be expected, collections have been a little slow, owing to the difficulty of transacting trade under such conditions, but as early Spring is "settling time" in some parts of the country we hope an improvement in that line will be seen before long.

Biddle Hardware Co.

THE CLEVELAND TRADE.

Everything indicates that Spring is approaching, and trade is already showing its effect. The purchase of pig iron by the United States Steel Company will have an important influence in steadying the price. Declines are probably over for some months, and as the demand is good, the effect of depression will gradually disappear. It is better that we be denied a success in business that degrades. The fruits of drudgery furnish a safer foundation for greatness than conceit and arrogance. We cannot free ourselves from the power that aims at the best, and that compels recognition by adversity if it must. The Jewish nation recognized this power and named it, but it is always present, and most when it is unrecognized. In its automatic operation it is no less a business than a religious law. National greatness is measured by the service it renders, and our Captains of Industry are learning that their success depends on the same law, and this promises well for the future. Conservatism has been of great value in our depression and is greatly helping to restore better conditions. Co-operation through consolidation has saved the country from immense losses and a fearful panic. The Lockwood-Taylor Hardware Co.

THE PITTSBURG TRADE.

This whole section has been anxiously waiting the result of the Four State Coal Miners' Convention at Indianapolis. As its decision affected directly 200,000 mine workers in Western Pennsylvania, Ohio, Indiana and Illinois, and indirectly all bituminous coal consumers, as well as merchants throughout these States, its importance could hardly be overestimated. After two meetings, each lasting a week, they separated without coming to an agreement, but it is expected that the miners will before April 1st consent to the 5 per cent. reduction in wages offered as a compromise by the operators. No greater calamity could happen this community than a long strike in this industry and as the leaders of the men urge acceptance of this offer, it is hoped their advice may be taken. Signs of Spring are at last seen in more moderate weather, but there is no great awakening of trade as yet. The firmness in prices of Hardware with advances in some goods should lead merchants to see that nothing is gained by deferring purchases but that they may lose by putting it off too long. The Merchants and Manufacturers' Association of Pittsburg is now fairly launched, as a Board of Directors has been elected. It is hoped that they may secure the service of an efficient Secretary as the success of the movement will largely depend upon the man in this position.

Logan-Gregg Hardware Co.

THE COLUMBUS TRADE.

Business in this section of the country has been a little on the waiting order for warm weather. Most merchants assorted their stocks after invoicing and the extreme cold weather has prevented them from disposing of much so far. It is surprising how a warm day or two starts the wheels going. Orders that have been held back are wanted quickly and we have had some very busy days the past two weeks. It is hard to get some lines of goods fast enough. Scythe swaths are going to be scarce on account of scarcity of timber. Manufacturers of wire cloth are sold up and will not have enough to supply the demand and still jobbers are fools enough to cut prices to where there is no profit on it. Slow deliveries the past two years admonishes merchants to get their goods in early. It will keep both manufacturers and jobbers busy this and next month to fill orders. Prices will average up fairly well. When one article goes down, some other advances. The biggest drop so far this year is on single barrel shot guns. Fortunately stocks are light so merchants will not suffer much. There can't be much profit in single guns now unless there was an enormous profit before. Still, according to the old ladies' description of a gun, it does not cost much to make them. Nothing but a long hole with steel around it and a handle on one end. We are threatened with a coal strike that will be disastrous to every branch of trade if it occurs. It is to be hoped that the operators and miners will get together and avoid a strike. What we need now is warm weather and we think there will be no complaints about a lack of business. There were a few signs of Spring the past week but they were of the hit and miss sort. Something after this fashion:

Oh! Spring, Spring, you naughty flirty thing;
You shine an hour or so, then away you go.
You make us shed our coats
And then give us all sore throats.
You start in the morning with a gentle breeze—
But in less than an hour we nearly freeze.
You blow as fast as an express train,
And then you snow and then you rain.
Soon you freeze on the streets so slick,
We get such a jolt it makes us sick;
And then you thaw and leave a slush
That is worse by far than a pot of mush.
But, by and by you will simmer down—
At least that is what we are wishing,
So we can sneak out of town
And take a day off at fishing.

The Smith Bros. Hardware Co.

THE DAVENPORT TRADE.

One year from to-day some one will be inaugurated President of the United States. So far there seems to be no probability of its being a Hardwareman. Spring has arrived, bringing with it longer days, bright sunshine and many orders for Hardware; in fact trade is more brisk and there is more activity in Hardware stores than has been observed for many moons. May these conditions continue for a long time to come. Sickels, Preston & Nutting Co.

THE CINCINNATI TRADE.

(From an Occasional Correspondent).

The months of January and February were the poorest for business the Hardware trade has ever experienced. The trade contiguous to the river has been practically dead. Customers could not get to river towns on account of the bad condition of the roads and dealers in those towns could get no shipments on account of the ice-bound river. The last day of February and the entire first week of March the weather was

delightful, the river emptied itself of ice, and farmers wanted goods the retailer was out of and the consequence was there was an extraordinary rush of dealers to Cincinnati to buy Spring goods.

The Kruse Hardware Company said in all their experience they never had such rush of buyers to their warerooms as occurred the first week of March, necessitating the working of overtime. They said of course we could not expect anything like it to continue, but the prospects of a fine trade are very evident for the balance of the season.

Mr. Bahlmann, of the Bahlmann Hardware Co., said his company were fairly swamped with buyers and he could not have begun to handle them at the old quarters, but with the increased facilities and the greater stock in the new house everybody was treated nicely. The prospects are better for a good season than ever before, and the books show it.

The retail trade are unanimous in predicting a splendid trade on seasonable goods, the long and severe Winter keeping the farmers at home, but the good weather of early March brought them out for rakes and hoes and other necessary tools, and these are selling rapidly.

Mr. Meader, traveling representative for Geo. Borgfeld & Co., of New York, was covering Cincinnati the first week in March, leaving here for Detroit. He said he had come up from Louisville and things looked everyway encouraging. Mr. Meader handles the housefurnishing end of the business for his firm, and stated he would have done even better in that line than he had, but the fine weather and cheap railroad rates had induced quite a few of his customers to go to New York; a letter from his firm stating this to be the case.

Chas. Steiner bought out the retail Hardware store of F. C. Brandt & Son, at 119 Elder Street.

Tettenborn sold the entire line of housefurnishing goods to Mabley & Carew. Tettenborn will only handle heavy goods, stoves, ranges, ladders, etc.

Pickering still keep up the special weekly sales inaugurated last Fall, this week's being the 18th of the series, in which are offered 6 inch and 8 inch Lamson & Sessions monkey wrenches at 14 cents and 18 cents each, respectively; polishing oil for bicycles, etc., and the "No Germ Filter," on which they are doing a land office business.

CINCINNATI TRADE ASSOCIATION.

THE SAN FRANCISCO TRADE.

Assuming that every husband's wife is her husband's sweetheart, and that every unmarried man's best girl is the sweetheart of her favorite young man, HARDWARE's San Francisco correspondent concludes he is right in saying that there are now in this city three hundred and seventy-five Hardwaremen, including 98 of their sweethearts, attending the business meetings and accompanying festivities incidental to the fourth annual session of the California State Retail Hardware Association.

This third day of March is the second day of the four days' meeeting, and as the different sessions thus far held by the iron men have been executive, barring alone the official election, and as this is the last day for posting correspondence for next week's issue of HARDWARE, this letter will necessarily be short in its report of the meeting's transactions.

The officers elected yesterday for the ensuing year were: O. F. Sites, San Francisco, president, second term; G. A. Guttman, Orland, vice-president; Henry Gracey, San Francisco, secretary, third term, and H. C. Bennett, San Francisco, treasurer.

If San Francisco is going headlong in any one particular more than another it is its house building propensity, a bent of mind that has been inclining local optomistic lot-owners a couple of years or more. But as merchants who deal in Builders' Hardware and house tiling are getting enormous business in this connection, are withholding from publication the conservative views they hold as citizens who have the city's immediate and prospective interest at heart, a further pursuance of the matter is deemed by the trade not advisable.

Relating to tiling, a trade stock that has become a considerable and growing interest especially to Builders' Hardware dealers, a decision of interest to the trade has been handed down this week by the Supreme Court of the United States. The suit was originally brought in this city under the provisions of the Sherman Anti-Trust Act, the plaintiffs being Lowry & Daly, co-partners in the tile and grate business in San Francisco, and the defendants were the Hardware house of W. W. Montague & Co., the Tile, Mantel and Grate Association of California, the Pittsburg Tile Company, the United States Eucaustic Tile Works, the Cambridge Tile Manufacturing Company, the Columbia Eucaustic Tile Company, the Trent Tile Company, Bush & Mallett Company, Star Eucaustic Tile Company, Limited, Bennett & Schutte, Heaveuer Meir and others.

The complaint alleged that practically all the tiles used in dwellings and other buildings in California are manufactured in Eastern cities, and that the defendants combined in a voluntary association known as the Tile, Mantel and Grate Association of California. The constitution of the association required, among other things, that

"No dealer and active dealer of this association shall purchase, directly or indirectly, any tile or fireplace fixtures from any manufacturer or resident or traveling agent of any manufacturer not a member of the association, neither shall they sell or dispose of, directly or indirectly, any unset tile for less than list prices to any person or persons not a member of this association under penalty of expulsion from the association.

"Manufacturers of tile or fireplace fixtures or resident or traveling agents of manufacturers selling or disposing of, directly or indirectly, their products or wares to any person or persons not members of the Tile, Mantel and Grate Association of California, shall forfeit their membership in the association."

Lowry & Daly underbid W. W. Montague & Co., soon thereafter receiving information from Eastern members of the California Association that if they remained non-members they could get no more tiling without paying the full list

Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

price, which afforded to members discounts ranging from 50 to 75 per cent., according to date of payment.

At the Superior Court trial it was held that the Tile, Mantel and Grate Association of California was an illegal combination in restraint of trade. W. W. Montague & Co. took an appeal to the Circuit Court of Appeals, where the judgment of the lower court was affirmed, and then carried the case up to the United States Supreme Court, which this week ratified the verdict of the trial court with a consequent trebling of the $500 damages awarded. At the close of the hearing before the Circuit Court of Appeals the jury was instructed that, under the law, the defendants had formed an organization in violation of law by entering into a combination in the restraint of trade forbidden by the Sherman Act, and had attempted to monopolize the trade and commerce between manufacturers in the East and California dealers in tiling. His Honor, Judge Morrow, then instructed the jury that their only province was to determine the amount of damages. The jury found a verdict for the plainitff in the sum of $500, and the Court, on motion of plaintiff's attorneys, trebled the amount of damages, allowed plaintiff counsel fees of $750 and assessed all the costs against the defendants.

Industrial Press Association.

OUR NEW ORLEANS LETTER.

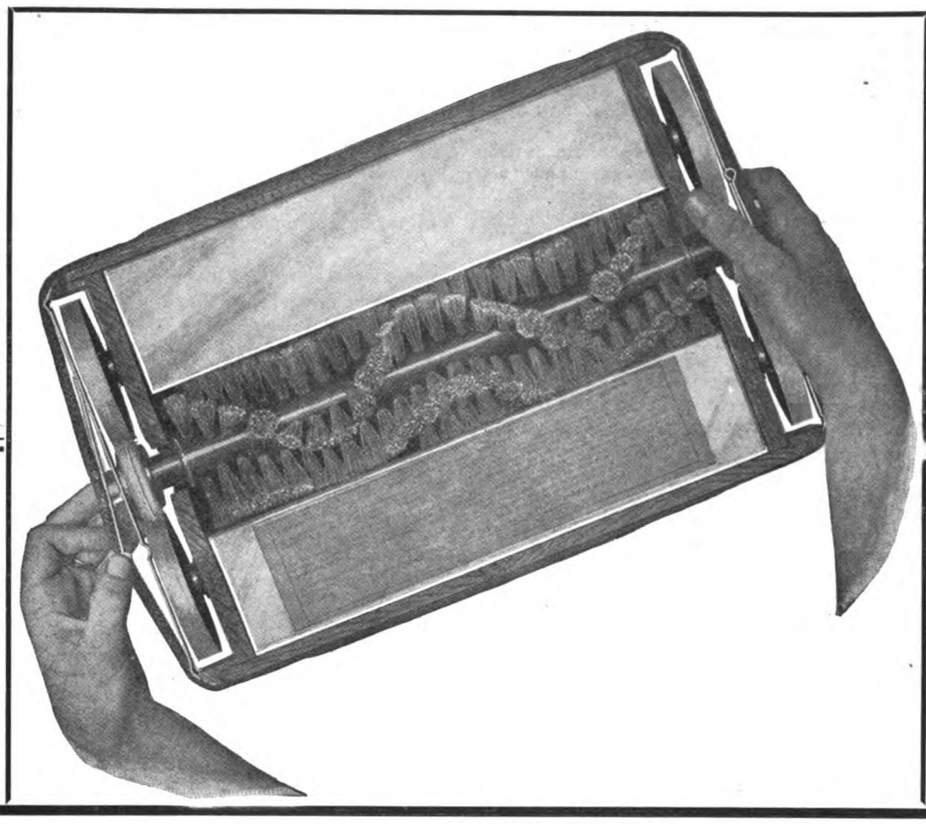
(From our Special Correspondent).

Two features of broad general interest to Hardwaremen have developed within the latter part of February and the first part of March as thus far gone. The one is the development of transportation facilities that may open up a vast new territory to New Orleans; and the other is the tremendous boom in building which is expected to give an immense impetus to Hardware demands of certain kinds. Otherwise the steady trend of prices and the general relaxation that attends the changing of the seasons in New Orleans has deprived current Hardware lines of much of notable interest.

The general situation is this: The Winter has surpassed the wildest expectations of the business men. A volume of gross business from 25 to 30 per cent. in advance of that during the preceding year has been attended with an unparalleled record upon collections. The coming of the first of March, this year, as always, brings a time when the business world of New Orleans as well as of the South halts in its pace. The old crops of sugar, cotton and rice have been harvested and largely marketed. The accounts of the past year have then all been collected or have been passed on to the next year. The planters are making new contracts; the banks are making new investments. The seed for the prosperity or the reverse of the coming Winter are being sown with the cotton seed, the rice grain, and the cane sprouts that are going into the ground.

However, when the first of March came this year, the Hardware world of New Orleans had experienced a rush of business that was without equal; every store in New Orleans had increased its force upon several occasions during the Winter. This activity was largely dependent upon 15-cent cotton and a 5,000,000-bag rice crop, it was recognized that two such pleasant happenings might not occur again, but the lust for trade has struck deeper home than ever in the history of the city.

The Hardwaremen had tasted blood, they wanted more. The lack of steamship transportation facilities to certain fields that should be within the domain of New Orleans became apparent. The implement agencies of the city, and one of the leading general Hardware firms began agitation in several directions, and one group of manufacturers in the Middle North added their efforts; as a result New Orleans is certain to have a ready means of transportation to the Argentina next year, to South Africa, and by steamship to the West Florida ports and also increased facilities into the West Indies. In connection with the development of these lines is the reported plan of the Moline-Rock Island-St. Louis implement and vehicle factories to establish a barge line to New Orleans and a series of warehouses here from which to distribute their export goods. In all these movements, save the line to South Africa, Hardwaremen took the initiative; while in that movement they are deeply interested.



The line to the Argentina which is projected came about in this fashion. Manager Legler, of the New York offices of Ager, Cross & Co., of Buenos Ayres, came to New Orleans seeking to route 3500 tons of farming implements which he had stowed with the factories in the upper Mississippi district. He announced that he was in a position to recommend the removal of the American purchasing agency of Ager, Cross & Co., from New York to New Orleans in case he could be assured that transportation could be obtained at all times that shipments were usually demanded; he added that simply for one cargo to be sent this way to the Argentia he could not afford to antagonize the Eastern transportation connections, and that unless some definite assurances were given him even the 3500 tons would not be shipped this way.

According to Manager John N. Stewart, of the John Deere Plow Co., Mr. Legler's firm is the largest importer of American farming implements in the Argentina. According to Mr. Stewart one order of plows of one certain brand given the Deere factory in Moline amounted to $70,000. Mr. Legler said that he had obtained freight rates over the railroads from Illinois that gave New Orleans a decided advantage, provided the steamship facilities out of this city could be obtained at regular intervals. For several days Mr. Legler's efforts to obtain assurances of regular sailing were unavailing. Finally he became associated with Capt. Wood and with Kelly-Page & Co., both ship brokers, with the result that correspondence is understood to be in progress which may result in the removal of the Ager-Cross Co., agency from New York to New Orleans and in the routing of all the implement and farm machinery business of that firm through this city. The Argentine will be reached, it is understood, by sailings at least four times a year.

Following this came the announcement that J. C. Deere, head of the John Deere Plow Co., of Moline and of St. Louis, had proposed to the group of implement and vehicle factories in that section that they establish a fleet of especially constructed barges which could bring their Southern and foreign-bound product to New Orleans upon the crest of each rise in the river, that a system of warehouses be established in New Orleans to receive this product and keep it until such times as the trade demanded re-shipments from this city, and that the barges should bring back to St. Louis and upper Illinois the Southern pine and hardwoods used so much in the manufacture of the implements. The plan is said to be ready for launching, and in such extent that several years will be required for the erection of the warehouses and the re-arrangement of the trade routes of these implement factories. It must be admitted that opinion as to the efficacy of this plan is divided among river men. It must further be admitted that the railroad circles are convinced that it is merely a shrewd hint to the roads on the part of the implement factories that good rates must be given to obtain the trade, and that the steel and steam will not be allowed to sandbag the factories seeking to take advantage of the opportunities to be finally offered via New Orleans through the Panama Canal.

San Francisco.

NATIONAL SWEEPER COMPANY
MARION, IND.

Stauffer-Eshleman & Co. are said to be earnestly advocating the proposition to establish a line of small steamers plying between New Orleans and the Eastern Gulf coast by way of the lakes behind New Orleans. The Louisville & Nashville Railroad has now a monopoly upon all freight bound in that direction from New Oreans, and the manufacturers of this city have been made to feel the ill effects of this, despite the usually generous attitude of the railroad.

Certain interests in Mobile and in New Orleans have, on this account, united to obtain at least a competing method of communication. The 'Frisco system is to afford terminal facilities in its proposed yard upon the Old Basin canal which enters New Orleans from the rear.

The South African line is a certainty for the coming season, and, as has been mentioned in HARDWARE before, A. Baldwin & Co., Woodward Wight & Co., Stauffer-Eshleman & Co., in Hardware, the implement and vehicle agencies, and certain of the machinery men are now upon the alert to take whatever opportunities will be offered thereby.

So much for transportation developments. Now for the business of the day. Evenly ranging prices have steadied the local trade, and although there have been predictions of higher levels in all basic goods, these predictions have had little effect. A leading line for shipment to the country has been trace chains to all the rural districts, while nails have continued to go by the tens of carloads into Louisiana and Mississippi. Metal roofing has run these lines a close third, while bar iron, bolts, etc., for general repairs to mills, etc., have also picked up a trifle.

Generally speaking the Spring lull has been less perceptible than ever before, if the testimony of the wholesale men is to be believed. The lines which have felt the lull most in actual business are implements, general mill supplies, household Hardware, etc. Building Hardware has, if anything, increased its movement in preparation for the Summer work in the towns near New Orleans and through her tributary territory.

In New Orleans itself there is a field opening that bespeaks much for the building Hardwaremen as well as for the structural iron people. It is estimated that over $6,000,000 worth of buildings are scheduled to be started during the coming Spring and Summer. Among these buildings are a cold storage plant to represent an investment of $200,000; a $1,000,000 hotel; a $150,000 newspaper building; an $80,000 theatre; five or six business houses approximating $100,000 each; a public courts building to cost $1,000,000; a new public library structure to cost $100,000. Industrial enterprises, residences, etc., bring this total well past $6,000,000. These buildings are developments of the last two months.

Local houses are eager to place their bids for the Builders' Hardware that will be required, and are even now in consultation with the architects and contractors of such structures as are planned or upon which operations are under way.

GENERAL NOTES.

J. H. Minge & Co. have recently improved their facilities for handling general Hardware.

Victor Loisel, agent for the Moline people in New Orleans, has just been appointed United States Marshal for Eastern District of Louisiana.

Manager Stewart, of the Deere Company, has recently improved and renovated the headquarters of the establishment, in St. Charles Street.

Harry Fay Baldwin, of A. Baldwin & Co., has added several departments to the retail section of the big store. The firm reports the largest Spring business in its history.

Stauffer-Eshlemann & Co. are soon to send a special man to Cuba to look over the outlook for a resident agent in Havana.

Woodward-Wight & Co. are said to be almost ready to erect a new warehouse in the upper part of the city and in close proximity to the elt lije.

(*Continued from page 50*)

port to what was deemed the best interests of this association. They have given their time and been to considerable expense to attend the two Executive Board meetings during the year, and if there is any criticism to be made as to the results and the work done the Secretary alone is to blame. But as our time is valuable I wish to narrate as briefly as possible the work of the year.

It has been the aim of this association to increase its membership as much as possible. Along this line I have sent several circular letters to every merchant in this State, numbering sixteen hundred. As a result twenty-two firms have responded, and their names have been added to the roll. In each case I have sent these members a certificate of membership with the seal of the association, and it is hoped by the officers that these certificates may be found in a prominent place in their offices.

As the president has covered considerable of the work of the secretary my report will be brief, and will only touch on a few subjects that seem to be vital.

One of the most substantial benefits this organization affords its members is the privilege of carrying fire insurance in the National Retail Hardware Dealers' Insurance Company, at a saving of perhaps one-half the cost of the board rate. These can be had by applying to the secretary. I wish to add that Mr. W. P. Bogardus, president of the National Retail Hardware Dealers' Association, a man who has been eminently successful in his own business and is held in high esteem wherever known as a conservative and conscientious business man, heartily recommends the management and plan of the National Retail Hardware Dealers' Insurance Company which high authority certainly commends the plan to our careful investigation with the view to a profitable investment by applying for a policy in said company.

PARCELS POST.

Let us not lose sight of the threatened parcels post bill whose passage means so much to that octopus, the catalogue house, and destruction to the great army of the retail dealers throughout the country. If its passage is defeated it will be through the efforts of the Retail Dealers' Association, supplemented by the aid of the Jobbers' and Manufacturers' Association, with most of the honor due the Retail Hardware Association through this National Association.

AN IMPORTANT PROBLEM.

The fact that many eligible dealers persist in remaining out of the associations that are striving to make their business more profitable and pleasureable, is a problem with which all associations have to deal, and ours is no exception. How to get these fellows in the association is one of the questions I hope may be freely discussed in this convention. We need them both for their money and their influence and I hope some effective means of reaching them may be devised.

A considerable portion of the secretary's time was taken up in getting up a fairly good mailing list and we trust that during the coming year we will be able to reach all the Hardware dealers in the State.

There are about two thousand Hardware merchants in this State, and there is no good reason why they should not become members of our association. Last year we numbered 124, this year there has been added to the list 22. Eight firms have signified their intention of withdrawing from the association. There have been two deaths, H. M. Sponenburg of Watertown, and C. D. Towne of Saratoga Springs. Two have sold out or retired from business. I have not been able to get any response from 26. I think it is probably from oversight. Think they would send their remittance on the morrow, but that day never comes. The total membership is 134, and it is hoped that all present will join us in the good work, and push.

As I have held this office for the last two years, with many pleasant remembrances of all I am glad to retire in favor of my worthy successor, trusting the work begun will continue until the retail merchant can say all is well.

Reports of the several standing committees followed, which included
Report of Auditing Committee.
Report of John G. Ferres, the delegate to National Convention.
Report of Nominating Committee.
Election of officers and other unfinished business.

THURSDAY AFTERNOON SESSION.

The session was devoted to the unfinished business of the Question Box, which involved the usual discussion having reference to the contents, regarding which the following delegates took part:

Officers for 1904.

The following officers were elected for 1904: John G. Ferres Johnstown, President; Charles P. Sherwood, White Plains, First Vice President; Louis J. Ernst, Rochester, Second Vice President; John B. Foley, Syracuse, Secretary; F. E. Pelton, Herkimer, Treasurer.

Directors—A. E. Towne, Saratoga Springs; George W. Rockwell, Horsehead; Allen S. Matthews, Fort Covington; Charles E. Hills, Oneonta; W. T. Olin, Perry; L. G. Matteson, Newark; E. C. Douglass, Binghamton; Clark Bloss, Dunkirk.

Buffalo was selected as the place for holding the next convention.

The second floor of the Whitcombe house looked like a street fair. Among the exhibitors were Jewett & Co., Buffalo, stoves; Landers, Frary & Clark, New Britain, bread mixer; White Lily Washer Co., Davenport, Ia., washing machines; Robeson Cutlery Co., and Rochester Stamping Co., Rochester, Yale & Towne Mfg. Co., Dover Mfg. Co., asbestos sad irons.

✤

To be our best, not merely for ourselves, but for each other—that is a noble impulse; that if it were fully carried out, would be the world's salvation.—Philips Brooks.

SOUTHERN SUPPLY & MACHINERY DEALERS' ASSOCIATION.

We give below a list of rates which will be in force at the Chamberlin Hotel during the third annual convention of the Southern Supply & Machinery Dealers' Association, which will be held at Old Point Comfort, Va., on April 12th, 13th and 14th. The railroad rates on that occasion will be on the one and one-third fare basis known as the Certificate Plan reduction. Full details of these rates will be given at a later date. Every day shows greater prospects for a large and successful convention. Prominent speakers have been selected and have accepted. The entertainment features which will be provided are of the very highest order and the convention doubtless will be the largest and most enthusiastic that has ever been held. Practically every supply and machinery dealer in the South will be in attendance. The following special rates have been made for those attending this convention: Dealers, Manufacturers, their Representatives and their ladies.

Single Room, American Plan, without bath, two in room,	$3.50 each
Single Room, American Plan, with bath, two in room,	5.00 each
Single Room, American Plan, without bath, one in room,	4.00, 5.00 "
Single Room, American Plan, with bath, one in room,	6.00 each

As April is the busy season at the Hotel Chamberlin, it is therefore to the advantage of those desiring to attend to write direct to George F. Adams, manager, and make proper reservations. An application for room should be made at once to secure a desirable location.

✤

The young woman determined to make a final effort at being agreeable to the deaf man, so she threw her voice into saying: "Do you like bananas?" "How's that?" asked her deaf neighbor in a surprised tone. "Do you like bananas?" she repeated. "Well, my dear," he replied, "so long as you have introduced the topic, I will say that I much prefer the old-fashioned night shirt."

Orders can be sent through any commission house in London, New York or Boston. Above prices f. o. b. Boston or freight paid to New York.

THE CORBINS.

Their Half Century Anniversary and a Souvenir Book of History, Biography and Pictures.

The semi-centennial of the incorporation of a large manufacturing company means a great deal, both to the company itself and to the community in which the company's plant is located. It is an earnest of solidity; of honest business success, built up steadily and surely from small beginnings; and is something in which every citizen feels that he has a share in one way or another.

Such an anniversary is now celebrated by the house of P. & F. Corbin of New Britain, the "Hardware City"—a name as descriptive and as quickly identified as "The Brass City," or "The Silver City," by all who are familiar with the manufacturing interests of the good old State of Connecticut. As a souvenir the company has published a handsome volume of over 100 pages, containing a complete history of the house from its beginning on February 14, 1854, to the present day. The book is neatly and substantially bound in dark green, is printed on heavy plate paper in clear, handsome type and is illustrated with pictures of the buildings, old and new, reprints of old catalogues, workmen engaged in different departments at their special work, and many portraits of men connected with the different companies which form the American Hardware Corporation. This combination includes not only the original house of P. & F. Corbin, but also the Russell & Erwin Manufacturing Company, the Corbin Screw Corporation, the Corbin Cabinet Lock Company and the Corbin Motor Vehicle Corporation, and was formed in the year 1902. It is not a manufacturing corporation, but, to quote the words of the souvenir book, "It is simply a holding company and controls the management of both corporations; at the same time, each corporation has its own officers and directors and operates as a separate and independent plant corporation as responsible to its customers to-day as it ever was."

This concern has a unique distinction—that the man who organized the original company is still the active head of the whole business. The story of its rise and progress is interestingly told by J. B. Comstock. Mr. Comstock was assisted in its preparations by George C. Atwell as compiler. The designing, engraving and printing was done by the Matthews-Northrup Works of Buffalo and New York, and the book is certainly a fine specimen of typographical art.

✤

The Pacific Electric Company, La Crosse, Wis., have sent to their customers, and will send to others upon application, their latest catalogue exploiting the merits of their adjustable Shade Lamps. A testimonial of merit, taken from the Army and Navy magazine reads as follows: "An exhibit at the Paris Exhibition showing ingenuity and skill in its compilation was that of the Pacific Electric Company, of La Crosse, Wis., in group V, class 25, consisting of incandescent desk lamps. There they showed goods of this character in many different patterns and designs for which their products are noted—in fact, they far surpassed many similar kinds of foreign manufacture shown in the same group. Americans who saw this exhibit could not but feel proud of the display of the company for it showed to all visitors what an enterprising firm can do when it tries and what kind of products they can produce for their patrons." A testimonial such as the above cannot fail to impress all those who are interested in devices of this kind whether for use or to sell. Their catalogue contains a great variety of shade lamps for every conceivable purpose, made in almost any shape and kind.

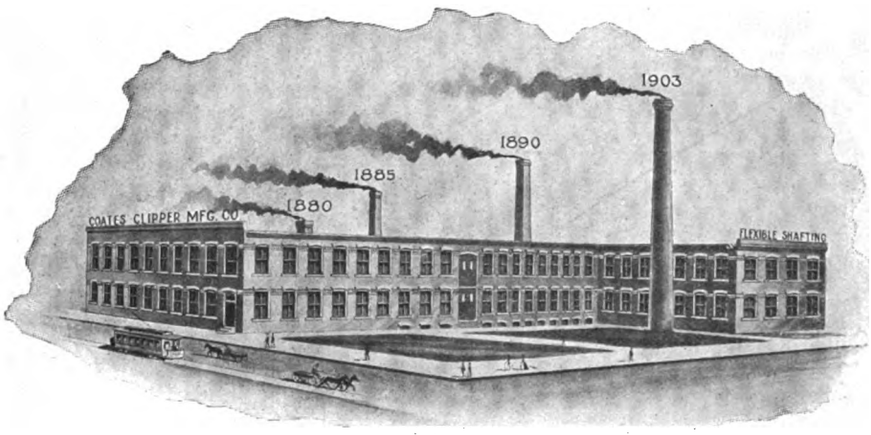
✤

"Just throw me half a dozen of your biggest trout," said the man with the costly angler's outfit.

"Throw 'em!" exclaimed the astonished fish dealer.

"That's what I said," replied the party of the first part. "Then I'll go home and tell my wife I caught them. I may be a poor fisherman, but I'm no liar."—*Chicago News.*

✤



"Pa, what is a bigot?"

"A bigot, my son, is a person who doesn't think as I do, and sticks to it."

THE COATES CLIPPER MANUFACTURING COMPANY.

This old, established company, located at Worcester, Mass., for over a quarter of a century, has made the manufacturing of Clipping Machines an exclusive specialty. The plant occupied by them, of which we present an illustration, covers upwards of 30,000 square feet of floor space devoted exclusively to the manufacture of Horse and Toilet Clippers. The departments for grinding, hardening and polishing are in charge of competent men who have made these specialties their life work, and it is claimed their methods cannot be approached. The new catalogue recently issued by this company should be in the hands of every dealer handling these goods as it contains a considerable amount of new matter in the shape of new goods, that cannot but prove of interest to the Hardware trade. The Coates Clipper Company do a heavy export trade with Germany, Australia and South Africa.

COATES CLIPPER MANUFACTURING CO.'S PLANT, WORCESTER, MASS.

AGRICULTURAL MACHINERY WANTED IN RUSSIA.

The so-called agricultural societies of Poland have recently determined to deal, as far as possible, only with the manufacturer. These societies are practically mutual associations of the landed proprietors for their own interests and for the advancement of agriculture in general. They are recognized by the Government, and from the membership bear a most excellent reputation as to credit, etc. The Warsaw society, acting for the societies in the governments of Plock, Kalisz, Radom, Piotrkow, Kielce, Lublin, Siedlce, Lomza, and Suwalki, requests quotations f.o.b. vessel at New York on steam-plowing outfits—*i.e.*, steam traction engines with gang plow attached. Intricate or complicated machines are not preferred, and weighty machines are not to be desired on account of the duty. It is particularly to be desired that the manufacturer respond promptly to this inquiry, so that definite arrangements may be effected to have the machines on the spot in time for the early Spring. Correspondence should be addressed to Ygnacy Yorski, Okolnik No. 3, Warsaw, a director of the Warsaw Agricultural Society.—Clarence Rice Slocum, Consul. Warsaw, Russia, December 2, 1903.

CRYSTAL REGISTERED TRADE MARK. CC CORUNDUM

TO METAL POLISHERS.

We can now fill promptly all orders for grain corundum (emery is an iron ore containing corundum.) Our new mill has a greater capacity than any other abrasive plant in the world.

Substitute a pure Canadian product, CRAIG MINE CORUNDUM, for the impure foreign corundum called emery.

Write us regarding a yearly contract.

THE CANADA CORUNDUM COMPANY, Ltd.,

Toronto, Canada.

WESTERN MARYLAND HARDWARE NOTES.

From our Traveling Correspondent.

Reports from the Hardware trade of Maryland and Virginia indicate that the outlook for Spring business is good, although the Winter business has been exceedingly quiet.

CUMBERLAND TRADE.

In Cumberland, Md., there is one exclusively wholesale Hardware concern, Wilson & Pugh. This firm have succeeded in building up an extensive jobbing business, covering the trade thoroughly in Western Maryland and parts of West Virginia, as well as Northern Virginia. The business was established by O. S. Wilson, who is a well posted Hardware man. About ten years ago F. G. Pugh entered the firm, and by hard work and close attention to customers' wants the firm of Wilson & Pugh now control a large proportion of the Hardware trade in their territory. The success of this and other local jobbing Hardware firms seems to indicate the tendency of the small trade to look for their supplies to the nearby local jobbing house.

One of the largest retailers of Western Maryland is the Potomac Hardware Co., of Cumberland. H. W. Glisan, the president and general manager, said that the outlook for Spring business was good. Mr. Glisan, continuing the conversation, added: "This month has been rather quiet, but the mines are being worked full time and the mills are all busy, and there seems to be no reason, when the weather becomes warmer, why we should not have a brisk business." A good advertising motto is used by the Potomac Hardware Co.—*i.e.*—"If it's Hardware—we have it."

John A. McKee, of Cumberland, carries a general line of Hardware and makes a specialty of sporting goods and tools.

Another attractive and well arranged store is the Cumberland Hardware Co. A large business is done in railroad and mining supplies and a complete stock of tools and Builders' Hardware is carried. The fixtures in the Cumberland Hardware Co.'s store are very good, the concern having glass wall cases, in which are displayed fine Cabinet Hardware; and in other cases fitted into the wall are shown guns and rifles. There being no counters or other cases along this side of the store, a customer can easily examine and select goods in these cases.

A well stocked store in Cumberland is the Flintstone Hardware Co. A very complete line of horse furnishing goods is carried and includes blankets, harnesses, and whips. None of the Queen City Hardware dealers handle stoves, but most the horse blanket business of the city seems to be done by the Hardwaremen.

HARDWARE DEALERS OF DELAWARE.

The Hardware business in Delaware has been rather slow this Winter, but the outlook for Summer trade has never been better. At least this is what one of the largest dealers in Wilmington said.

Woodward & Bro., at 303 Market Street, carry a good line of general Hardware and make quite a specialty of tools, on which line they have a large business. A very well arranged window display was recently made of these goods—and the firm notices that the window display will bring business in tools and cutlery quicker than on almost any other line.

Alfred J. Peoples' store is at 507 Market Street and from here is carried on both a wholesale and retail trade, although the latter end of the business is by far the largest, Mr. Peoples having no salesman on the road, but is in position to take care of the wholesale business that comes to the store.

The Delaware Hardware Company carry on an extensive jobbing business, having six salesmen on the road who work the trade closely in Delaware, Md., part of Virginia and New Jersey. W. D. Mode is president and general manager of the Delaware Hardware Co., and as this concern is a representative jobbing Hardware house, his opinion on trade outlook is of value and interest to all eastern Hardwaremen.

SPRING BUSINESS BACKWARD.

In speaking of trade conditions Mr. Mode said: "We notice some decline in country trade, and far less Spring advance orders have been taken than usual. The severity of the weather, which has retarded building is undoubtedly the cause in some measure, but there is an unmistakable lack of confidence on the part of the country merchant, as to the future. The smaller Hardwareman seems to think that the near future will bring lower prices, and is therefore placing few orders for future shipment.

"Our salesmen cover their territory every four weeks, and it is my opinion that we will get these spring orders only when our customers begin to need the goods."

HIGHER PRICES FOR HARDWARE,

When asked if he thought the prices would go lower, Mr. Mode said: "No, I think there will be advances, before we see lower prices again." The Delaware Hardware Co.'s store and warehouse is well arranged, and an extensive business is done in carriage makers' supplies, iron and steel, and tinsmiths and rooffers' supplies.

All of Wilmington's leading Hardware houses are within a few blocks of each other, and this section of the city might justly be termed the Hardware district. In the centre of this district is the Capelle Hardware Co.'s store running through from Market to King Street. The Market Street store is used for the retail business while the offices are in the King Street building, from where the shipping is also done. The shop and mill supply trade in Wilmington is large and the Capelle Hardware Co. look closely after this end of the business.

The large retail store of Duncan Bros. is also here in the centre of the Hardware district. Duncan Bros. are one of the old established business houses and enjoy the confidence and trade of Wilmington.

Another progressive firm is J. R. Hudson & Co., who carry a large general Hardware stock as well as house furnishing goods.

Here in Wilmington few of the Hardwaremen carry stoves or sporting goods, rope or twine, these lines being dealt in specially by concerns handling these goods in a generous assortment.

A large business is being built up in these latter goods by D. A. Hay & Co., who carry a very large stock of rope, twine and fishing tackle, doing a jobbing business which extends into three States.

The Diamond Shear Co., of Wilmington, are busy keeping up with the growing demand for these famous shears.

Hammernail.

"The value of a rivet depends upon the setting."

WE have just received an inquiry for 100 of these machines for export,—From the people who make the rivets.

Ask your Jobber for the "PONY."

F. H. SMITH MFG. CO.

CHICAGO, U. S. A.

How the Makers of "Jap-a-lac" are Assisting Dealers.

The Glidden Varnish Co., of Cleveland, manufacturers of JAP-A-LAC, state that they have materially increased their advertising appropriation for 1904, and will begin in the April issue of the women's magazines and other publications, an extensive campaign of publicity.

As an evidence of their progressiveness and of their determination to impress the public at large with the value of JAP-A-LAC, they advise us that they have contracted for space in twenty-seven of the leading magazines and publications read exclusively by women. Their aggregate circulation is 8,000,000 copies each month, and allowing five readers for each copy, it will be readily seen that the advertisement of JAP-A-LAC will go into the hands of 40,000,000 readers monthly.

The JAP-A-LAC advertisement will occupy an entire page in the April issue of *The Ladies' Home Journal*, two pages each in the *Delineator*, *Designer* and *New Idea* for April, four pages in *Good Housekeeping* for May and four pages in *Everybody's Magazine* for June in addition to liberal spaces in the balance of the twenty-seven publications.

This means an enormous amount of publicity for JAP-A-LAC, larger by far, the manufacturers state, than has ever been undertaken by any other maker of paint or varnish.

In their advertisement in this issue of HARDWARE, The Glidden Varnish Co. speak of their magazine advertising and the largely increased demand it is sure to create for JAP-A-LAC. Such a demand cannot fail to result in benefit to the dealer, and the manufacturers urge correspondence from the trade with a view to interesting them in the handling and sale of their product.

The advertisement occupying such large space in the above-mentioned publications, is entitled "The Economy of JAP-A-LAC, a True Story." It is interesting reading, and with the view of showing what may be accomplished in the way of attractive, entertaining advertising we reproduce it herewith on the following page.

Digitized by Google

THE ECONOMY OF JAP-A-LAC

A TRUE STORY

Why should a novel be more interesting than a story of business success?

Why should a "short story" be more thrilling than an advertisement?

The problems of business and the excitement of speculation are frequently the basis of successful novels.

Now, in a sense, advertising is a speculation—and plenty exciting to the man who pays the bills.

We have had lots of excitement with Jap-a-lac, and it is a success. Our speculation in advertising has won, and Jap-a-lac is now known and admired in every State in the Union.

This is due to two things: first, to the economy of Jap-a-lac; second, to the advertising.

The facts about Jap-a-lac are interesting to every woman in America who has a home and cares how it looks.

The necessities of life come in about this order: First, Food; Second, Clothing; Third, "Four walls and a roof;" Fourth, Jap-a-lac for the floor; Fifth, Furniture; Sixth, Jap-a-lac for the furniture.

Jap-a-lac is the original floor varnish and high-grade colored varnish.

Five years ago it was only an idea, without even a name.

Four years ago Jap-a-lac was known in our factory and a few other places.

Now Jap-a-lac is sold in every State, and in almost every county in America, and is a staple article on the shelves of over four thousand dealers.

A quarter of a million dollars' worth of Jap-a-lac was sold in 1903, which was nearly double the amount sold in 1902.

Can we double the sale again this year and make it a half million dollars' worth for 1904?

That is what we are trying to do.

That is what we will do easily if this advertisement and others are successful in making people believe the plain facts about the "economy of Jap-a-lac"—just the plain facts.

The facts are these:

Jap-a-lac is for use on new or old woodwork, on floors, weather-beaten front doors, furniture, old carriages, metal work, radiators, oil-cloth, picture-frames—on anything and everything where a smooth, glossy finish is desired. It stains and varnishes at one operation and newness follows the brush.

Jap-a-lac saves the things you think worn out. It covers all mars, scratches or disfigurements, and produces a durable, smooth, brilliant, hard and elastic finish.

It makes a disreputable old floor look like fine hard-wood, and it makes a rug do instead of a carpet, so it saves money, brings beauty and promotes health—for the rug-laid Jap-a-lac-ed floor is prettier, cleaner and more sanitary than a dust-laden carpet.

Jap-a-lac is made in twelve colors and Natural, or clear:

Walnut,	Malachite	Brilliant Black,
Oak,	Green,	Flat White.
Mahogany,	Blue,	Gloss White,
Cherry,	Ox-Blood,	Ground.
	Dead Black,	

Oak is used more than any other color—for the obvious reason that more natural oak is used than any other wood. It is, of course, the color for imitating hard-wood floors.

No matter how ugly and dirty a floor may be, a coat of Ground color followed by a coat of Oak (or a coat of graining color) and a third coat of Natural Jap-a-lac, will give it all the beauty of the best and newest hard-wood. You will not believe such a transformation possible until you see it. We have a sample of finished wood, showing the process. Ask for it. It's free.

Mahogany comes next in popularity, and it can be used for floors, the same as Oak, if you prefer the rich red tone it gives. It will also give to soft woodwork, or furniture, the rich solidity of appearance found in the finest San Domingo Mahogany.

Oak or Ash woodwork, or furniture, is made particularly beautiful by Mahogany Jap-a-lac, which changes the color without losing the grain.

Cherry is much used by those who prefer a rich shade, lighter than Mahogany, and Walnut is growing in favor as the wood itself becomes more and more rare.

Ox-Blood, Malachite Green and Blue Jap-a-lac are used to make the woodwork of a room chime with the decorations, or with the decorative ideals of the occupant. With them the woodwork and furniture can be made to correspond, and an old room and old furniture given a new, beautiful and artistic dress, impossible in any other way except by the employment of exclusive and expensive professional decorators.

The admixture of White with any of the foregoing colors will give any shade, or tint, desired and the possible artistic colorings and combinations are limited only by the taste and enterprise of the user. Gloss White Jap-a-lac is also used on iron beds, radiators, picture-frames, and on furniture, to give a brilliant glossy surface of pure white enamel.

An old willow chair covered with Gloss White Jap-a-lac needs only a ribbon or two, of appropriate shade, to become an exquisite and inviting piece of furniture, fit for the finest drawing room.

Dead Black Jap-a-lac gives a wrought-iron look to all metal, and turns scuffed and common furniture and picture-frames into stylish "Flemish" pieces. The design that looks "common" in light wood lends itself beautifully to the Flemish effect, and hundreds of dollars' worth of furniture may be saved from the junk-shop by the use of a few cans of Dead Black Jap-a-lac.

An old picture-frame, whether of wood or gold, can be renewed beautifully with Dead Black Jap-a-lac.

Ground color is what its name implies. It is a filler—a foundation for the other colors, and is used only to obliterate blemishes and cover discolorations, or when a dark article is to be made light colored. It is most used on very bad floors and is needed only in extreme cases.

Brilliant Black gives a deep, rich, lustrous finish, and among other things is used for refinishing old carriages. 75 cents' worth of Brilliant Black Jap-a-lac will make the old vehicle look like new.

Natural, or Clear Jap-a-lac is colorless, like varnish. It is used, and acts, much the same as high-grade varnish, but it is better for all household purposes than any varnish. And we say that after thirty years of manufacturing varnishes of the highest grade. The Glidden Green Label Varnishes, for all purposes, are sold from the Atlantic to the Pacific, and from the Lakes to the Gulf, and you can get them anywhere. But for all household purposes, for floors, either old or new; for woodwork and furniture, for oil-cloth and linoleum, Natural Jap-a-lac is the finest, toughest, most lasting finish in the world.

Jap-a-lac is the model and ideal floor finish, because it does not show white under heel marks, nor does water turn it white. Soap and water do not hurt it.

Whenever you want absolutely the finest, glossiest finish, combined with long and satisfactory wear—use Jap-a-lac.

Anybody can use Jap-a-lac. It is all ready to dip the brush in. It is of the consistency of good varnish, and is applied with an ordinary varnish brush. No training, or previous experience is needed. All you have to do is to spread it evenly over the surface to be covered and let it dry.

It is there that the economy of Jap-a-lac comes in. Everybody knows that a painter, or a furniture-maker, can make many things "as good as new," but when you have paid for the work the saving is not apparent.

With Jap-a-lac the expense ends with the purchase of the can. A quart costs only 75 cents, and a quarter-of-a-pint will cover an ordinary chair or small table. There are eight quarter pints in a quart, so you can see that a new Jap-a-lac chair costs less than ten cents.

Wherever Jap-a-lac is tried its economy is at once proven and it becomes a permanent housekeeping adjunct. During the past two years we have given away tens of thousands of sample cans, and it is in this way that our enormous increase in business has come about. Our only concern is to have everybody know the plain facts about Jap-a-lac, and if every reader of this magazine could come to us, we would gladly give each one a full-size quarter-pint can. As that is impossible, we will do this:

Mention this magazine, and send us ten cents, which exactly covers the cost of mailing, and we will send FREE, to any point in the United States, a sample can of any color you select—free of all charge for the JAP-A-LAC.

You can probably get Jap-a-lac at your dealer's, but if he hasn't it you can send 75 cents direct to us and we will send a regular quart can, charges paid, to any express point in the United States.

Upon request, we will gladly send an interesting booklet about Jap-a-lac, a color card showing the different shades, and a sample piece of wood, showing the model floor finish.

To expedite reply, please address: The Glidden Varnish Company, Makers of High-Grade Varnishes, Dept. 6, No. 44 Williamson Building, Cleveland, Ohio.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Battle Creek, Mich.—A new Hardware store under the firm name of Wattles & Strong has been opened at 25-27 South Jefferson Avenue by W. A. Wattles and Frank E. Strong.

Brockton, Mass.—E. E. Bassett has opened a new Hardware store in the Clifford Block.

Brooklyn, N. Y.—O. Buchanan's Sons has been incorporated (Hardware). Capital $50,000. Directors: J. Buchanan, W. Buchanan and O. Buchanan, Jr., of Brooklyn.

Cleveland, Ohio.—The Loew Hardware Co. has been incorporated; capital, $10,000, by Daniel Loew, Henry G. Miller, Charles H. Loew, Katharine L. Heiser, Alfred P. Sheriff.

Cortland, N. Y.—Nelson & Call Company has been incorporated to deal in Hardware. Capital $10,000. Incorporators and directors for the first year: A. B. Nelson, D. E. Call, Mary H. Call, of Cortland, N. Y.

Evansville, Ind.—Geo. Koch Sons has been incorporated to deal in Hardware, stoves, etc. Capital stock, $5,000. Incorporators: Mary C. Koch, George W. Koch and Louis J. Koch.

Hastings, Neb.—The J. H. McGrath Hardware Company has been incorporated. The incorporators are J. H. McGrath, C. E. McGrath and Alice Munsey. The capital stock is $25,000.

Joliet, Ill.—Larson-Benson-Nordgren Company has been incorporated; capital, $10,000; Hardware and plumbing; incorporators, Charles A. Larson, Nels Benson and W. G. Nordgren.

Logansport, Ind.—The Flanegin Hardware Company has been incorporated; capital stock, $10,000; directors, William E. Baker, Thomas J. Flanegin and Lorin A. Flanegin.

Lowell, Mass.—Smith & Lawrence have opened a paint and Hardware store at 47 Market Street.

Lowry, Minn.—The Lowry Hardware, Furniture & Machinery Company has been incorporated. The company has a capital of $10,000 and the incorporators are Wencel Bisek, John J. Hagstrom, Fred E. Robinson, Iver M. Engebretson and Luther L. Gibbon.

Mobile, Ala.—The Young Hardware Co. has been incorporated. Capital, $75,000. H. S. Young, president; F. M. Young, vice-president; W. H. McIntosh, secretary, and T. O. Young, treasurer.

New York, N. Y.—Blake-Denison Weigher Company has been incorporated (Hardware). Capital $10,000 and directors: W. C. Sherwood and A. F. Garbe, of New York City and T. W. B. Middleton of Patterson, N. J.

Ogden, Utah.—Richardson & Grant, Incorporated, is the name of a new Hardware company. The capital stock of the company is $25,000; E. T. Richardson, president; D. L. Evans, vice-president and F. E. Grant, secretary and treasurer.

Pendleton, Ore.—W. J. Clarke & Co. has been incorporated; Hardware. Capital $15,000; W. A. Johnston, W. J. Clarke, K. C. Clarke.

Rushville, Ill.—Griffith Hardware Co. has been incorporated; capital, $20,000; general mercantile; incorporators, R. H. Griffith, C. B. Griffith, Maude K. Griffith.

Watertown, N. Y.—The Harbottle Company has been incorporated to carry on the plumbing and Hardware business. The capital is $20,000 and the directors are M. Harbottle, George C. Harbottle and George H. Gleason of Watertown.

Changes.

Athens, Ga.—Clarence T. Hussey, president of the Talmage Hardware Co. has sold his interest in the business to T. J. Scott, and his sons.

Bangor, Me.—H. R. Teague has moved his Hardware business from the Wentworth Block to a store in Blackwell Block.

Batavia, N. Y.—Robert B. Pease has sold his Hardware business at No. 54 Main Street to his son-in-law, Owen C. Steele, who has been in the store 15 years, and John G. Torrance, who for 16 years has been bookkeeper in the Hardware store now owned by Worthington & Bradish. The new firm, which will do business under the name of Steele & Torrance, will take possession of the store at once.

Batavia, N. Y.—Worthington & Bradish, Hardware merchants at No. 86 Main Street, have dissolved partnership, Mr. Bradish purchasing Mr. Worthington's entire interest in the business, which he will conduct alone hereafter.

Bellefontaine, Ohio.—John Plummer has sold a half interest in his Hardware store to A. D. Hogendobler of Osborn, Ohio.

Binghamton, N. Y.—E. K. Owens has succeeded as proprietor to the Hardware business many years conducted by his grandfather, the late Geo. T. Frazier.

Burlington, Vt.—The Strong Hardware Company has moved from their stores on College Street to the new block erected by them on Main Street. They will occupy the two eastern stores.

Canton, Pa.—J. H. Tripp's Sons, desiring to retire from the Hardware and paint business, have sold their store to Lindley & Ronan and Theo. Pierce, each firm taking one-half of the stock.

Clyde, N. Y.—Ward Compton has purchased Mr. Swift's interest in the Hardware business of Bliss & Swift.

Delhi, N. Y.—George Wood, of Watton, has secured by trade, the Hardware business of Frank G. Silliman.

Detroit, Mich.—A change has been made in the wholesale Hardware Company of Freeman, Delamater & Co., by the retirement of John Freeman, the senior member and president. He is succeeded as president by De Witt C. Delamater and David C. Kay, heretofore buyer for the company, becomes secretary and treasurer. William A. Ducharme remains vice-president. Mr. Freeman has disposed of his stock to other members of the company and will engage, it is said, in other business. The name of the company will not be changed, nor will any change in the policy of the company result from the withdrawal of Mr. Freeman.

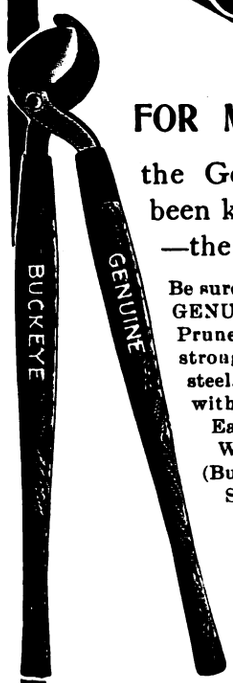
Dubuque, Iowa.—E. S. S. Allen and Bros. have purchased the Horey Hardware stock at Winthrop and have moved it to this city.

Dunkirk, N. Y.—On February 1, the Dunkirk Plumbing & Hardware Co. came into existence by the consolidation of A. G. Sippel, M. J. Donovan and Philip H. Carlyon. The office and shop will be at 99 East Third Street.

Elberton, Ga.—Dr. A. S. Hawes has bought out the entire stock of the Elberton Hardware Company. This concern began business here several years ago with a capital stock of $10,000, during which time it has carried on an extensive wholesale and retail Hardware business. It is understood that the company will be reorganized shortly and the capital stock increased to $20,000.

El Camps, Texas.—Farr Bros. & Smith bought the Hardware business of Holloway & Heffner and will move in their new quarters at once.

Ellsworth, Wis.—The Foss-Armstrong Hardware Company has increased its capital from $25,000 to $60,000 and striking out its debt limit of $10,000.



Fredericksburg, Ohio.—Redett & Sons sold their Hardware store to Mr. Jackson of Nashville, who has taken possession.

Gloucester, Mass.—The L. E. Smith estate has disposed of its interest in the plumbing, vessel fitting and Hardware business, 215 to 223 Main Street, to Messrs. Horace Tarr, Roger H. Tarr and D. Chester Tarr.

Green Bay, Mich.—At a meeting of the stockholders of the Gotfredson Bros.' Hardware Co., an exclusively wholesale concern with a paid-up capital of more than $200,000, it was agreed to dissolve the present company. Benjamin and Lawrence Gotfredson, who own nearly all of the stock, announced to the minority holders that they expected to leave Green Bay.

St. Louis, Mo.—The Kolf Screen Co. has been incorporated. Capital stock, $2,000. Incorporators: John Hickey, Max Kolf and Adolph Lachmann.

Washington, D. C.—The Standard Screw Company has been incorporated; capital $1,000,000; incorporators: H. Clay Campbell, Charles W. Embry, Ralph E. Campbell, and John McFarlane.

Youngstown, Ohio.—The Youngstown Bolt Co. has been incorporated. Capital stock, $650,000 of which $400,000 is common and $250,000 preferred. The company will take over the property of the Youngstown Manufacturing Company, of Youngstown, O. The company has a rolling mill and one of the best equipped bolt factories in the world.

Changes.

Defiance, Ohio.—The Clipper Plow Co. has reduced its capital stock from $150,000 to $50,000.

Frankfort, Ind.—The Cleveland and Palmer Handle Co. has increased its capital stock from $20,000 to $30,000.

Fremont, Ohio.—The Clauss Shear Company has resumed operations after a six weeks' shut down, which was made necessary because of the change made in the power of the plant. About 50 electric motors have been installed making the Clauss factory the most modern plant of its kind in the world.

Fremont, Ohio.—The Lincoln Stove & Range Co. has increased its capital stock from $100,000 to $150,000.

Knightstown, Ind.—Wm. E. Jeffreys, trustee in bankruptcy, sold the plant of the Hussey Mower and Reaper Co., this city, to Cobe & McKinnon, of Chicago, for $7,600.

Lansing, Mich.—The Central Implement Co. has increased its capital stock from $300,000 to $400,000. It has just purchased the plant of the Standish Manufacturing Co., at Standish, and will continue the manufacture of wooden implements and tools.

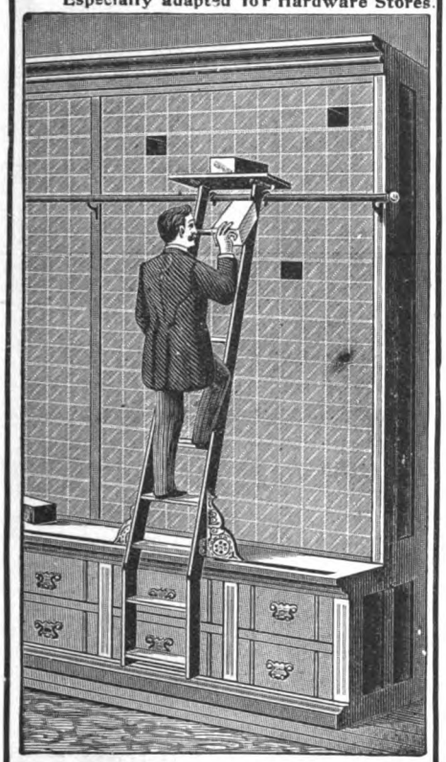
Port Clinton, Ohio.—Port Clinton is to have a manufacturing plant, which will employ 400 people. Through the Port Clinton Improvement Company the citizens have raised a bonus and secured a building site for the United States Hardware Company's factory. This company will manufacture small castings and all articles of this class. Mr. Eberhard, of Cleveland, at one time connected with the Eberhard Manufacturing Company of that place, is the president of the United States Hardware Co.

Warren, Ohio.—The Pennsylvania Shovel Works of Corry, Pa., will come to Warren. Warren citizens subscribed $25,000 worth of stock, as required. The work of removal will begin at once. The industry will occupy the tube works building.

Miscellaneous.

Bridgeport, Conn.—At a recent meeting of the directors of the Challenge Cutlery Corporation, the following officers were elected: W. M. Tausig, president: W. D. Bishop, vice president; Clemens Kloefkorn, secretary and treasurer.

Bloomington, Ill.—At a recent meeting of the stockholders of the Co-Operative Stove Co., Bloomington, Ill., the following directors were elected for the ensuing year: Henry Capen, E. C. Hewett, A. C. Hamilton, John W. Hayes, J. W. Aldrich, C. A. Hamilton, William Partridge, Otto Seihart, E. E. Donnelly, Frank Reigger and E. M. Hamilton. At a later meeting of the directors the following officers were elected: John W. Hayes, president; E. C. Hewett, vice-president; E. M. Hamilton, secretary; A. C. Hamilton, superintendent and treasurer.



Cleveland, Ohio.—The annual meeting of the stockholders of the Cleveland Co-operative Stove Company was held at their office February 6. John H. O'Brien was elected secretary and general manager, and Robert E. Neel, treasurer. The following board of directors was elected: N. P. McKean, president; M. G. Watterson, vice president; John Gill, Charles H. Colt, Captain P. Boylan, Stephen Buhrer and F. E. Bruml.

THE BICYCLE STEP LADDER.

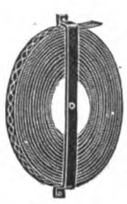
Especially adapted for Hardware Stores.

The newest, neatest, simplest, easiest operated and safest store ladder made. Highest Award World's Fair. Write us. THE BICYCLE STEP LADDER CO., 65 Randolph St., Chicago, Ill.

Sargent's Gem Food Chopper

sells throughout the year. It is indispensable to the busy housekeeper every day for chopping raw meat, cooked meat, fruit, vegetables and the many other things needed in the preparation of the "three square meals" we all want. It makes good peanut butter; is very useful during the preserving and pickling time.

The advertising matter we furnish will help you make sales; we advertise extensively ourselves.



ROTARY ELECTRIC-RING DOOR BELLS

We have just added several new patterns of these popular Bells, making our line more complete than heretofore; we have also an attractive variety of Turns to go with the Bells. The effect of the Electric Bell is produced without any electrical appliance, by simply rotating the Bell Turn; there are no springs to get out of order, no battery to replace, no winding required.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Chicago, Ill.—The Turbine Motor Tool Company has been incorporated. Capital stock, $10,000; manufacturing; incorporators W. L. Hall, H. G. Barrett and G. J. Bryce.

Clarendon, Ark.—Clarendon Oar Factory has been incorporated; capital stock, $5,000, all of which has been subscribed; incorporators, F. D. Wisely, Frank C. Clutterbuck and Jay Wheellock. The company will manufacture boat oars and do a general timber manufacturing business.

Ithaca, N. Y.—The Ithaca Gun Company has been incorporated; capital stock, $75,000. Directors: George Livermore, P. S. Livermore and L. P. Smith, Ithaca.

Lowville, N. Y.—Leon E. Downer and D. C. Kent of Archdale have formed a partnership and have opened a bicycle and phonograph store under the firm name of Kent & Downer.

Newark, N. J.—At 97 Halsey Street, George A. Breeze is conducting business under the firm name of the Tourist Motor Company.

Toledo, Ohio.—The Union Fire Arms Company, a New Jersey corporation having $150,000 capital stock has been admitted to Ohio to locate at Toledo, where Charles R. Clapp will be the agent. Geo. B. Colton is president of the company. They manufacture shotguns, rifles, pistols, revolvers, etc.

Changes.

Boston, Mass.—W. Alexander has moved from 33½ Beach Street to 48 Summer Street.

Buffalo, N. Y.—The Towanda Motor Vehicle Co., Towanda, Pa., have succeeded to the business of the Centaur Motor Vehicle Co., 59 Franklin Street, with the exception of the manufacture of their steering wheels, which is still conducted by a reorganized company styled the Centaur Motor Co.

Chicago, Ill.—The Charles Kaestner Manufacturing Co. have removed their entire plant to South Bend, Ind.

Chicago, Ill.—The branch office of the Timken Roller Bearing Axle Co. has been removed from 542 Wabash Avenue to 364 Wabash Avenue.

Elmira, N. Y.—Milton Updike has removed his bicycle and machine shop from Main to Center Street.

Essex, Conn.—The Tiley-Pratt Co. have discontinued the manufacture of bicycle spokes and nipples, being succeeded by The Standard Spoke & Nipple Co., of Torrington, who will fill all orders already entered from their plant at prices and terms at which such orders were taken.

Grand Rapids, Mich.—Grand Rapids Automobile Co. and the Richmond-Jarvis-Car Co. have consolidated, and the combined organization will in the future be known as the Richmond-Jarvis Co. The capital of the new company will be $50,000, and it will commence operations in the Rathbone Block, on North Division Street.

Haverhill, Mass.—The firm of the Pentucket Cycle Co., 10 Water Street, has been dissolved.

Jackson, Mich.—The Jackson Engine & Motor Co. have absorbed the Albion Engine & Motor Co., of Albion and will remove the plant to Jackson.

Newport News, Va.—Increased business has compelled C. C. Keyser to remove from 384 Twenty-eighth Street to 219 Twenty-seventh Street in order to obtain larger quarters.

New York, N. Y.—A. H. Funke, dealer in bicycle supplies, has removed from 325 Broadway to 83 Chambers Street.

New York, N. Y.—Victor Auto Storage Station, 144-149 West Fifty-fifth Street, has consolidated with the Murray Hill Auto Station, 27 East Thirty-fifth Street, and will in the future operate both stations and engage in the sale, storage and repair of automobiles at the address and under the style of the former.

Providence, R. I.—The N. W. Whitten Cycle Co. has changed its name to the N. W. Whitten Motor Vehicle Co.

Racine, Wis. — Wisconsin Wheel Works has been succeeded by the Mitchell Motor Car Co., a $300,000 corporation, which will continue the manufacture of Mitchell Motor cars and motor cycles, the bicycle end of the business having been sold out to the Great Western Manufacturing Co. some time ago.

Reading, Pa.—J. C. Reber has resigned from the firm of the Acme Motor Car Co., and their product will in the future be known as the Acme .Car instead of the Reber Car. The company has reorganized with a capital of $200,000.

Salt Lake City, Utah.—The capital stock of the Utah Automobile Co. has been increased from $10,000 to $25,000.

Tampa, Fla.—Union Cycle Co., 105 Lafayette Street, has been bought out by Leon C. Hanna and J. D. Hanna, who will continue the business at that place under the name of Hanna Cycle Co.

Utica, N. Y.—The Utica Cycle Company has opened an office and salesroom at 21 Columbia Street. They will continue to manufacture bicycles and do bicycle repairing of all kinds at their factory, 16 Main Street.

Worcester, Mass.—Morgan Motor Co., have dissolved. The capital stock was $50,000, which was fully paid in. The property and assets have been disposed of.

Miscellaneous.

Nashville, Tenn.—R. C. Anderson, of Atlanta, and Jack Prince have leased the horse show building and have planned the construction of a coliseum, which it is hoped to have finished in time to have races this spring. According to Anderson, he and Prince hope to establish a racing circuit with tracks at Nashville, Memphis, Atlanta, Savannah, Jacksonville and New Orleans.

HARDWARE DEALERS' RECORD--Continued

Changes.

Palmer, Mass.—Whitcomb & Faulkner have opened a branch Hardware store in Springfield, on the corner of Hancock and Walnut Streets William D. Tuthill, a clerk in the Palmer store, has been placed in charge.

Pine River, Minn.—Bert Wideman, who conducts a general store, has just opened a line of Hardware.

Rayne, La.—The stock of the Crowley Hardware Company of Crowley was bought and moved to Rayne by E. Hockaday & Co., who have commenced business in the Brunner Block.

Sauk Center, Minn.—The Schleusener-Ingram Hardware Co. has amended its articles and will in the future be known as the Schleusener Hardware Company.

Seymour, N. Y.—R. Schinck & Son have dissolved partnership. The new firm conducting the Hardware business of the old firm now consists of R. Schinck, Emil Krause and R. Kuehne.

Toledo, Ohio.—Milner & Company have secured a contract of sale for the Norton Bros.' Hardware stock, which for the past two months has been in the hands of a trustee.

Waterbury, Conn.—Strong & Munsell, the Hardware firm, have dissolved partnership. Mr. Strong continues to do business at the old stand.

Wichita, Kan.—Gus Warnhoff and J. N. McClees have purchased the business known as the G. R. Follett Hardware Company. The consideration was $20,000. The business will be carried on at the place it now occupies.

Wichita, Kan.—The Cribben & Sexton Hardware Company of Chicago have opened a branch house in this city, North Water Street. The city offices of the company are with Warnhoff & McClees, with George W. Howard, as manager.

Yale, Mich.—Charles Rounds has purchased the interest of his partner, Frank Van Camp, in the firm of Rounds & Van Camp, and will hereafter conduct the business alone.

York, Neb.—E. V. Zimmerer, who has been in the Hardware business since 1877, has sold a half interest in his business to Ed McMullen of McCool.

CARY MANUFACTURING CO.

19 and 21 Roosevelt St., New York.

BUILD UP YOUR SAW TRADE.

You can easily do it if you handle **Atkins High Grade Silver Steel Hand Saws.** Their superiority and fine cutting qualities have firmly established an enviable reputation among carpenters and users of hand and small saws. First class mechanics prefer them for fine work above all others.

ATKINS ALWAYS AHEAD!

Atkins High Grade Silver Steel Hand Saws excel in Material, Temper, Workmanship, Design and Finish. Nothing overlooked in manufacture that adds quality to the saw.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

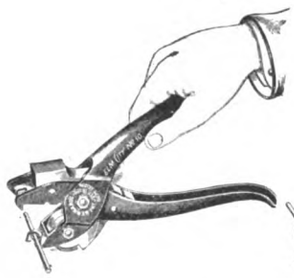
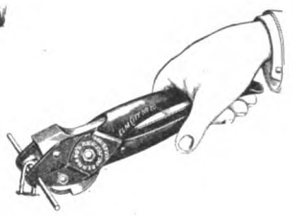
A Step In Advance

The New Model "Elm City"
STAPLE PULLING PLIER



is a distinct step in advance of any STAPLE PULLING PLIERS on the market to-day

Six tools in one: Staple Puller, Wire Splicer, Plier, Cutter and Hammer combined.

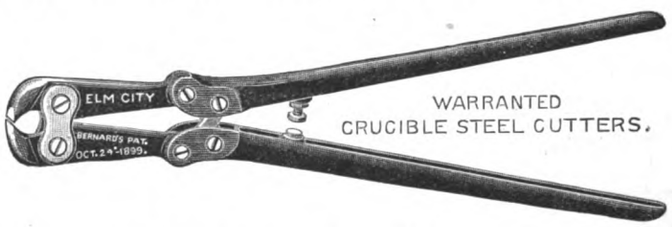


Does rapid, accurate and high-grade work. Is convenient, durable and powerful. Will cut No. 7 wire.

Furnished with bright steel interchangeable cutters; black finished handles.

Gripping the Staple

Pulling the Staple



Gripping Wire before Splicing

Splicing the Wire

"ELM CITY" END CUTTING BOLT CLIPPER

Japanned Handles. **Will cut ⅜ in. Bolts and Rivets.** Interchangeable Parts

For Saddle-Makers to cut off the end of bolt, fastening check-rein hook.

Boat-Builders to cut off ends of bolts and rivets which fasten sides to the ribs and keel.

Fire-Proof lathing workers for overhead work and reaching places inaccessible with other tools. Also useful for Machinists, Wagon-Builders and Blacksmiths.

The William Schollhorn Company

New Haven, Conn., U. S. A.

Manufacturers of "Bernard's Patent" Pliers, Nippers, Belt and Ticket Punches, etc.

Catalogue and Price List on application.

A NEW LIGHT

Don't be the slave of out-of-date methods of lighting.

"THE ANN ARBOR GASOLINE LIGHTING SYSTEM"

will free you from the grip of the gas and electric lighting companies. It will enable you to have the brightest store in the street, at about one-tenth of the cost of gas or electricity.

These facts are proved every day by merchants who use our light. You can prove them at our expense by writing for

OUR INTRODUCTORY OFFER

We also manufacture a superior line of independent arc lights, and gasoline lamps for the house. We want live, hustling dealers who wish to represent a profitable, money-making line. Exclusive agency given.

Our book on "Light" is free. Write for a copy and full particulars to

SUPERIOR MFG. CO., 210 Second St., Ann Arbor, Mich.

PHILLIPS WINDOW SCREENS

20th CENTURY The only practical adjustable Window Screen that will slide up and down.

***The* FLYER** The Standard Article in double frame steel center screens. Guaranteed to stay together and to adjust easily. The clasps do not come off.

***The* EXPRESS** Same as the Flyer. Cheaper finish.

***The* PERFECTION** A "Wing" screen. No center bars or double Wire Cloth. Beechwood, oiled.

***The* BONANZA** Same as Perfection. Cheaper finish.

***The* ACCOMMODATION** A low priced Window Screen.

WINDOW SCREEN FRAMES

PHILLIPS IMPROVED Has wood corner brackets. Strong and simple. Standard frame of the West.

NORTHWEST Sticks and cast iron corner brackets. Complete with lifts, screws and brads.

NEW YORK Similar to Northwest. Wire cloth moulding is wider.

SCREEN DOORS

AN ENDLESS VARIETY You will have to send for illustrated catalogue.

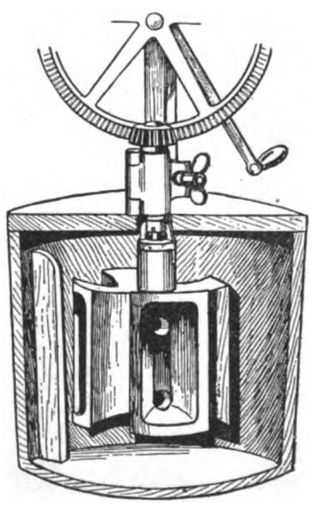
FINE SCREENS MADE TO ORDER

SUBURBAN PATTERN For good residences. Special materials. Fine workmanship. Progressive Hardware and Housefurnishing men send us many orders.

APARTMENT HOUSE Lower in price but of best materials.

***The* A. J. PHILLIPS CO. Fenton, Mich.**

Over 3 1-2 Acres of Floor Space. 22 Years Experience.



ONE

BUTTER IN A MINUTE

BUTTER OF THE FINEST QUALITY IS PRODUCED IN SIXTY SECONDS by the use of

The One Minute Churn

PROTECTED BY 57 PATENTS

THE only perfect milk and cream aerator churn on the market, making the best granular butter from sour or sweet cream in less time than any other churn.

Construction perfect in every detail. All parts interchangeable and carried in stock. Easy to run. Seven sizes, holding 1 quart to 13 gallons.

For farm and family use.

Special offer, good for 90 days. Catalogue on request. Mention HARDWARE.

Cable Address: "Minuteness" New York

INVINCIBLE

Is the one word which describes best the Gem Safety Razor

Invincible,

too, as a quick seller, simply because it is positively The Best Safety Razor on the market to-day.

"Invincible

in quality, workmanship and finish" is the estimate which millions of satisfied users have put upon the Gem because it has stood the hardest test.

The Gem Safety Razor

Brings Business continuously where other Safety Razors fail.

Back View

Holder Open

The best proof of this is a trial order for 1904. We give Rock Bottom Prices.

12 INCHES HIGH, 12 INCHES WIDE.

Our Catalogue tells a convincing tale. Write for it, mentioning HARDWARE.

OUR SILENT SALESMAN
furnished without charge with a small order for Gems.

GEM CUTLERY CO., 34 Reade Street New York, U. S. A.

Wood Door Knobs

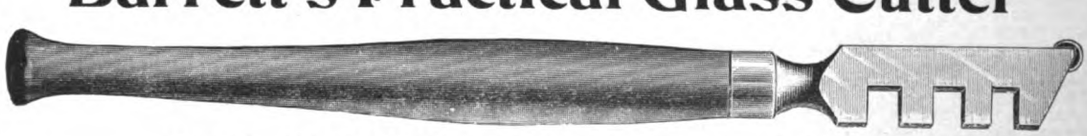
Are undoubtedly the best for dwellings. They retain their handsome finish, and the heads never come off They will match any interior finish as they are made in all woods used for that purpose.

WRITE FOR
DESRCIPTIVE CATALOGUE.

JOSEPH BARDSLEY,
147-151 Baxter St, New York City.
San Francisco, Cal., 519 Mission St.
Boston, Mass., 19 Pearl St.
Chicago, Ill., 86 Lake St.

PORTER BARN DOOR HANGERS, HAY TOOLS, &c.

STURDY CHICKS



are hatched without worry or disappointment in a Reliable Incubator. It's a simple affair—practically runs itself—needs little attention. Automatic in heating and regulating devices. What's the use of wasting time and money with questionable incubators?

Reliable Incubators

insure the eggs from chilling—give steady, even temperature—hatch greatest per cent of fertile eggs and no moisture. Let us tell you more about this incubator—ask us questions—send 10c (to pay for postage) for catalog full of necessary information.

Reliable Incubator & Brooder Co., Box 239 ,Quincy, Ill.

Barrett's Practical Glass Cutter

W. L. BARRETT, Bristol, Conn., U. S. A.

WHY

are we turning them out at the rate of 4,000 per day and selling them all over the world?

BECAUSE

they are as good as they can be made, and, of course, there is money in handling them.

CRONK & CARRIER SPECIALTIES

OUR CATALOGUE TELLS ALL ABOUT OUR COMPLETE LINE.

SHALL WE SEND YOU A COPY WITH PRICES FOR 1904?

CRONK & CARRIER MFG. CO., ELMIRA, N. Y.

THERE'S MONEY IN RAIN

and rough weather if you carry

Blizzard Storm Fronts

The front that closes up a buggy in half a minute. Cleverest, easiest adjusted, quickest selling Millions read our ads in the popular weeklies, magazines, agricultural papers, etc. People write us all the time asking where they can get these fronts. We'll send inquiries from your locality to you if you handle "Blizzards."

Blizzard Days Now!

If you haven't the **Blizzard Storm Front** in stock you send trade to your competitor who has.

Write us to-day about our liberal proposition to dealers.

Not a drop can touch you when your buggy is closed up by the

Blizzard Storm Front

(Patented in United States and Canada.)

Fits Any Buggy

Adjusted in 30 seconds without getting out or removing gloves, sides open and close as quickly and easily as a door, large line pocket, guaranteed satisfactory. The large window, 12 x 20 inches, is a pliable transparent material that won't break. Rubber Cloth, $3.00; Heavy Rubber Cloth, $3.50.

Ask your dealer and be sure that trade-mark "Blizzard" is stamped on inside under window.

Sold by Vehicle, Harness and Hardware dealers. If yours hasn't it, write us. *Illustrated booklet free*

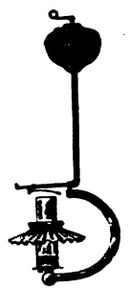
WHY IS THE

O. K. THE BEST ROTARY WASHING MACHINE?

—BECAUSE—



1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing the friction and thus making machine so light running and almost noiseless.
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without rubbing them to pieces.
4.—This washer is made by **experienced mechanics**, and will outlast any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

Manufactured by H. F. BRAMMER MFG. CO.,
DAVENPORT, IOWA.

Crown Incandescent Gasoline Lights

Economical, Safe, Ornamental. Their superiority is acknowledged everywhere.

GENUINE BUCKEYE PRUNER

EVERY dealer should handle the Genuine Buckeye Pruner, because he can carefully push it to his best trade, in preference to any other pruner made.

Because it has stood the test of actual use for over 30 years.

Because it is the strongest made---the blades being hand-forged.

Because no other made cuts so easily.

It operates just opposite from other pruners. Grasp the limb with the hook, and cut towards you. It's quicker and easier than the other way.

Size 25—inch.

One dozen in a case.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

"BLUE BOOK" CREDITS OF THE HARDWARE IRON & METAL TRADES.

We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The *paying record* is based upon *ledger experience* of credit men everywhere.

You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a *specialty* of it?

We have created a demand for these goods that must be supplied, and you should be getting your share of this trade.

They are absolutely WATER TIGHT, the back end being folded like the corner of a dripping pan. No slitting or piecing.

They are light, yet strong and durable. We use a good iron paint, drab in color, which makes them very attractive and if placed where masons can see them, will sell themselves.

The adjustable malleable iron fork and socket, admits of the replacing of a broken handle or taking up shrinkage in a few moments.

Made exactly as represented in cut.

Write to-day for prices. Orders filled promptly.

HARDWARE

"The Statistical Abstract of the United States" for the year 1903, issued by the Department of Commerce and Labor through its Bureau of Statistics, has just been published. It is a volume of some significance, comprising 650 pages of figures, with scarcely any "reading matter" other than the tables of figures and their necessary headlines. Many interesting facts about the United States, its progress, development, and relation to the other countries of the world may be obtained by a study of its tabular statements.

✤

UNDERHILL, CLINCH & COMPANY.

Underhill, Clinch & Co., 94 and 96 Chambers Street, New York, are agents for Oliver Ames & Sons Corporation, manufacturers of shovels, spades and scoops; G. W. Bradley's Sons, manufacturers of axes, bush hooks, etc.; Geneva Tool Co., manufacturers of forks, hoes, rakes, etc.; Turner & Day and Walworth Manufacturing Co., manufacturers of hickory and ash handles in all the usual Hardware varieties. They have recently issued new price lists of all these important lines for the Hardwareman; and as the list prices and present discounts on these goods should be familiar to the up-to-date dealer, it is advisable that he request them at once from this progressive house. The firm carry without doubt the largest and best assorted stock of these manufacturers in New York; and this is fully justified by the fact that their trade has been annually increasing in volume for many years past, making such action necessary. They also represent as agents, the Coldwell Lawn Mower Company, whose hand, horse and golf mowers are to be found in this stock.

"WHITE SHIELD" FIRE HOSE.

The Republic Rubber Company, of Youngstown, Ohio, announce the fact that their "White Shield" brand of Fire Hose has successfully passed the rigid and exacting test required by the City of New York. They state their "White Shield" brand stood the test in detail as to cover, duck, friction and tube which they conclude establishes the construction and quality as meeting every possible requirement. A contract for 50,000 feet was depending upon the result.

BUTLER BROS.' IMMENSE FACILITIES FOR TRADE.

In the advertisement of Butler Brothers, Chicago, New York, St. Louis and St. Paul, which occupies a page in this issue, an excellent idea is given by the illustrations of their stores and warehouses of the vast facilities of this hustling house. In addition to the unapproachable premises occupied by them in Chicago, the largest continuous wholesale premises in America, consisting of an eighth of a mile of thirteen story buildings, comprising sixteen acres of connected floor area, they have a large warehouse in New York, another in St. Louis, and sample rooms in St. Paul, 379-381 Sibley Street. The St. Paul building is in the center of the jobbing district and Butler Brothers occupy with their samples alone, three floors and a basement.

WHITE LILY WASHER COMPANY.

White Lily Washer Company, Davenport, Iowa, at the present time are doing the greatest amount of business in their history, turning out 200 machines a day, equal to the shipment of six car loads a week. This great increase in their business called for a constant increase in their manufacturing facilities, and they have been compelled to build two additions to their already extensive plant; one of which for the wood working department will be 14x100 ft., and the other to be added to the finishing department, will be 40x175 ft. When these improvements, now under way, are completed, they hazard the claim of having the largest plant devoted to the manufacture of Rotary Washing Machines in the world. During the past year they have increased their capital 100 per cent., and built side tracks connecting their factory direct with the railroad. They report the trade conditions for the future the best possible.

BLACK SILK STOVE POLISH.

The Black Silk Stove Polish Works, Sterling, Ill., manufacture a stove polish marketed under that name which has been before the trade since 1884, having established a reputation for excellence which has annually increased the output until it is now at the rate of two tons daily. The polish has been favorably received abroad, and is already well known in Great Britain and a number of Continental cities where it meets with great success. It is packed in a number of attractive sizes to sell at a moderate price at retail, the Paste polish being put in five and eight ounce tins and five pound pails; and the liquid in six ounce and ½ pint screw top tins. The manufacturer advertises the fact that he does not sell to department stores or mail order houses. Circulars and booklets giving full particulars may be had on request.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED MARCH 8, 1904.

358,938. Stove Lid, William C. Metzner, Chicago, Ill.

358,978. Safety Razor, Frederick Kampfe, Brooklyn, N. Y.

358,979. Shaving Apparatus, Robert M. Keating, Springfield, Mass.

359,016. Lamp Attachment for Sad Irons, Henry C. Fox, Evansville, Ind.

359,086. Sash Fastener, Lorenzo C. Matteson, Watertown, N. Y.

359,106. Lifting Jack, Axel A. Strom, Austin, Ill.

359,110. Tinner's Tongs, John A. Vare, Philadelphia, Pa.

359,111. Dust Pan, Henry J. Vogel, Brooklyn, N. Y.

PATENTS ISSUED MARCH 8, 1904.

753,838. Door Check and Closer, Joseph Bardsley, Montclair, N. J.

753,862. Wrench, Albert L. Eliel, Parlin, N. J.

753,919. Shears, George B. Rowe, Moore, Okla.

753,974. Basin Cock Fastener, Joseph H. Glauber, Cleveland, O.

754,012. Wrench, Joseph M. Reams, Seattle, Wash.

754,018. Electric Sad Iron, George J. Schneider, Detroit, Mich.

PATENTS EXPIRED MARCH 15, 1904.

359,255. Garden Rake, George W. Hertzel, Warren, Pa.

359,274. Sash Fastener, Frank W. Mix, New Britain, Conn.

359,293. Awning for Windows or Doors, Albert Thalheimer and Washington C. Kantner, Reading, Pa.

359,295. Caliper Gage, John Tickell, Cleveland, O.

359,311. Minnow Bucket, Charles E. Bateman, Chicago, Ill.

359,341. Lantern, Lewis F. Botts, New York, N. Y.

359,405. Hoisting Jack, David B. Scott, San Francisco, Cal.

359,493. Skate Fastening, Everett H. Barney, Springfield, Mass.

PATENTS ISSUED MARCH 15, 1904.

754,445. Rule, Porter S. Hamrick, Whitewater, Wis.

754,452. Sash Holder and Lock, Orwin E. Howe, Washington, D. C.

754,509. Combined Pipe and Nut Wrench, John C. Schnider, Cripple Creek, Colo.

754,624. Miter Box, Justus A. Traut, New Britain, Conn.

754,629. Door Check and Closer, Joseph A. Young, New York, N. Y.

754,705. Broom Moistener, William S. Reynolds, Dayton, Ore.

754,754. Nail Extractor, Albert Dudly, Sr., Menominee, Mich.

HARDWARE

VOL. XXVIII. MARCH 25, 1904. NO. 12

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade.

HARDWARE is published on the 10th and 25th of each month. The subscription is $1.00 a year, payable in advance.

Subscriptions may commence with any issue.

Remittances should always be made by New York Draft, Post-office or Express Money Order.

Register your letters when you remit by cash.

Foreign Subscriptions.—For each copy to be mailed outside the United States the Canadas, and Mexico, the price is $2.50 a year, postage prepaid.

Change of Date.—It takes two weeks to change the date, after your subscription is renewed.

Change of Address.—Always give both your old and new address when you ask us to change your address.

The Name of your Post office and of the State you live in should always follow your own name when writing to this office. We cannot find your name on our books unless this is done.

Letters should be addressed

The Circulation of "Hardware" is Larger Than That of Any Other Paper n the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The belief is general that the long Winter at last is throwing off its final chill, and the frost gradually working to the surface will soon acknowledge that Spring is with us for good and all. It will be welcomed by all of us, and the Hardware dealer will lead in his rejoicing.

Now that the Conventions have come and gone which have in so many states made a little vacation for the hardworking retailers, closer attention is bestowed upon the business proper. The travelling representatives of the energetic Jobber have been made welcome and order books are filled from the closely packed pages of the want book, making "hurry up my goods" the order of the day.

The dealer in many instances can hardly realize his stock is of such light proportions, that he is so nearly out of so many things; and the highly satisfactory condition of the opening business in the agricultural sections of the South and West is of the most encouraging character imaginable.

As is always the case, the farmer, who constitutes the largest element in the consuming power of the country, has experienced so great a degree of prosperity he can hardly believe it was intended for him. The teeming crops at the highest prices he has known for years, has given him a confidence in the future that means a great deal to the agriculturalist. A wider area under cultivation, a greater amount of machinery, more and better fencing, a more convenient and comfortable residence and other accessories.

The future looks bright and promising to the Hardwaremen who will be relied upon to furnish nearly all of these aids to contentment; he is a happy man and hopeful of grand results. The slightly advanced prices have proved no drawback to the unspeculative demand for current wants. In fact, they seemed to have stimulated enquiries that have resulted in sales. No pessimism prevails, and the dealer feels it is perfectly safe to look the future in the face and prepare for the harvest.

The jobbers who have held back from some orders with the hope of some trifling concession find, in many cases, it was a mistake to have done so, as it is of more importance to be sure of getting the goods than to try to force the market, so that delivery dates become in a congested condition and transportation facilities, or rather lack of them, give cause for continuous apprehension of trouble to come. Now that the severe weather has abated which has been the cause of transportation trouble, it is hoped deliveries will be greatly benefited and traffic move with greater ease.

Greater attention during the last three months has been given to stimulating a demand abroad for lines of American specialties. In each succeeding year the little prejudice that exists abroad for "Yankee products" is becoming eradicated, and small orders at the outset soon develop into larger ones as confidence grows in the selling merits of our goods which meet with a ready sale when understood and appreciated. Manufacturers realizing the importance of maintaining and not neglecting this outlet for an increasing production, have canvassed and advertised more largely than has been the case for several years, and today its influence is being felt in the resultant trade which the superiority of our manufactures invariably fosters, if we don't neglect it after we have secured it.

Every movement in the markets for raw material seems to indicate a promise of strength in all transactions, moderately higher quotations sufficiently sustain the legitimate demand for the customary wants, and create confidence in the immediate future that is an inspiration for good to all concerned.

INJUDICIOUS LEGISLATION.

There are two bills now before the Legislature in Albany. They are known as the Armstrong Bills No. 27, 458, 494, 583 and Nos. 28, 459, 495, 584, which should receive the attention of the public spirited citizen at once. The first bill is to prohibit the owning, either through presentation or purchase, of any fire-arms or ammunition of any kind whatsoever, by anyone under the age of 18. Of course, should such a bill become a law it would result in injury to all those handling sporting goods as well as the manufacturers of fire-arms and ammunition.

There is another reason, however, besides the dollars and cents injury to a certain trade, and that is, that it is an acknowledged fact, that the youth of all nations should be taught the handling and use of fire-arms. To-day, the English government are considering a law to compel all schools to drill the scholars in the use of fire-arms. The English people are against the conscription in force in the European countries, and will do all they can to avoid compulsory service in the ranks. They believe, however, that the time has arrived when every male citizen should be familiar with the use of fire-arms. The Boer War taught them a bitter lesson on this subject. The children of the Boers from a very early period are taught to use the rifle for accuracy and also to have a wholesome respect for so powerful an implement. The result of this early training was readily shown during the

Digitized by Google

African campaign. A mere handful of Boers, everyone of whom could shoot, held at bay for a long time the entire military power of England, and England now is anxious to take advantage of this lesson. Even in Japan, all the boys are taught to handle fire-arms.

There is another good reason why children should be taught the use of fire-arms. The great number of accidents which occur almost daily are invariably due to the entire ignorance of both sexes of fire-arms and their uses and the dangers attending unskillful handling of same. The person who knows what a rifle or revolver is, never dreams of aiming it, even in play, at a fellow creature.

The second bill relates to the heavy licensing of those over 18 years old for owning fire-arms. This will not prevent the footpads or thugs from continuing business, as there is already a law to prevent the secret carrying of arms, and this bill is simply discriminating against the sportsmen of the country.

We desire to draw attention to these two bills, so detrimental to the interests of the sporting goods trade and the sporting public generally, so that every legitimate means may be used to defeat these bills, which have already passed the Senate, and are now in the House Committee.

ATLANTA IN MAY.

The management of HARDWARE is arranging to get together in a special party those from the East who intend going to Atlanta in May for the Southern Hardware Jobbers' Convention, in order that the ordinarily monotonous trip may be made a pleasant one. If a sufficient number of reservations are made a special train will be used to carry the party. Considering the very attractive programme that is being arranged for this convention it would seem that a large number of visitors would be present. The question of rates will be decided upon shortly, and announcements concerning them and further arrangements for the special party will be made in HARDWARE.

DEATH OF WILLIAM WILCOX.

William Wilcox, the oldest manufacturer in Middlesex Co., Ct., died at his home in Middletown Sunday, March 13, aged 84 years and 5 months. Mr. Wilcox was a lineal descendant of John Wilcox and Sarah Meigs, who were married on March 7, 1665. His father, Thomas C. Wilcox, was a native of Killingworth, where Mr. Wilcox was born, October 10, 1819. He attended the schools in Killingworth until he was 18 years old when he went to Middletown and was employed in the gun factory of Smith & Cooley. In January, 1842, with William H. Lewis, he began the manufacture of locks. In 1845 he formed a partnership with Lot D. Van Sands, and, when Mr. Van Sands retired a few years later, the William Wilcox Manufacturing Company was formed with Mr. Wilcox as president and E. R. Tracy as secretary and manager. The firm continued until about three months ago when Mr. Wilcox retired, the business being continued by Mr. Tracy. Mr. Wilcox was the inventor of the rotary key hub and the flat key, now a feature of the most modern locks. He was a member of St. Johns lodge, F. and A. M., and was twice married, his second wife surviving him. He leaves no children.

HARDWAREMEN, OBITUARY.

Albion Bindley, of Bindley Hardware Co., Pittsburgh. March 9.

James H. Harrison, of H. D. Taylor Co., Buffalo, N. Y. Aged 60. March 13.

John M. Hanford, Middletown, N. Y. Aged 84. March 7.

John Hopkins, Allegheny, Pa. Aged 75. March 8.

David L. Kistler, of F. Hersh & Sons, Allentown, Pa. Aged 52. March 8.

Frank E. Nowlan, of Nowlan Bros., Whitney Point. Aged 38. March 5.

P. T. Richardson, Princeton, Ill. Aged 43.

H. Moulton Riggs, Turin, N. Y. Aged 58. March 11.

Edward H. Sherwood, of Judith Hardware Co., Lewiston, Mont. Aged 40. March 2.

Henry H. Wilder, Lowell, Mass. March 9.

Walter J. Wood, Rockland, Me. Aged 76. March 14.

THE HARDWARE OF OUR FORBEARS.

Written for HARDWARE.

When the rattle of the shop, or the murmur of the store, tires the nerves and wearies the body it is pleasant to steal to the birthplaces of the nation, and there looks upon the handiwork of the men of olden times who toiled slowly, but strongly and well, for their products are as good as new to-day.

Picture, if it is possible to the modern eye, such Hardware as might be expected to have come from the Philippines, or some South Sea island; bitstocks of wood, padlocks as big as a mince pie, and thicker than the kind mother used to make for Thanksgiving; scythes that look like machettes, tiny shovels in which Ben Franklin passed hot coals for his friends with which to light their pipes; lanterns more tin than glass, keys nearly a foot long, and bed keys of greater size, swords used in several wars and guns which killed the redskins, and a host of Hardware implements used in the household and otherwise, and all once used in this country's settlement. These strange things, as well as things even more marvelous, may be seen carefully preserved in one of the birthplaces of the nation, old Salem, in Massachusetts, at its Essex Institute.

The traveller of to-day might, with good excuse, be baffled to discover the nature and the use of some of the queer bits of ancient Hardware as he looks upon them in the museum of this Institute. A big blade of steel, ten inches wide at the butt and tapering to a point, certainly resembles a scythe, though more like that in the allegorical picture of Father Time than any which an enterprising farmer of this 20th century might have use for. A glance at the index card above this old scythe affirms the suspicion that it is really a scythe used some time in the 17th century. And by this big scythe is a sickle which Death himself might have used on his busy days, it is so long and rakish.

But coming to the things of domestic life, up in the corner of the museum case is a black thread-bound handle from which four whole bone strips project; it suggests a sawed-off cat-'o-nine-tails, but the cards by its side states that it is an old-fashioned egg beater. Perchance the grandmother could whip with it most excellent custards in those days, but the writer mentally resolved that if he was ever put to the task of being chief cook of the household, he would prefer to hustle around to get a modern "Dover."

Towards another corner of the case, the smoker instinctively turns; he sees nothing familiar about, but has suspicions that something smells of smoke, little like his oldest pipe. He notices a couple of pair of tongs, each about a yard long, and with queer little hollow grips at their end. There is nothing to indicate a fragrant Havana or a well-colored meerschaum here, but the index card briefly states: "Pipe tongs and cleaners, used by the forefathers to pick hot coals from the coal hearth from which to light their pipes." And close by is the dainty little iron shovel, in which wise Ben Franklin used to pass the coals, so that his cronies might light their pipes as they sat about and smoked and chatted about "Poor Richard" and his Almanac wisdom.

The traveller momentarily recalls that the open hearth has vanished, and that electric and gas cigar lighters are here, but he marvels little at the progress of the world until he notices the tinder boxes and the flint and stone, by which crude devices the forefathers used to light their fires.

The family man will observe in the museum the fine set of steel dinner knives, with bone handles, carefully tucked away in a leathern bound, brass trimmed case, each in its place in perfect order. Undoubtedly, these knives once graced sumptuous colonial banquets, when bear, venison, turkey and game were more plentiful than beef is to-day. The family man will also glance at the sad irons, used in 1750, that are still serviceable to-day. Their wooden handles show well that the colonial housewives knew how to keep their fingers from burning as they put a dull gloss on the Sunday linen of their worthy squires.

A gem of the collection is the hardwood door, with its wrought iron handles, nails and hinges brought from a New Hampshire farm, and which was erected before Revolutionary times. The iron work of this door is apparently as good and as strong as the day it was made, and some of the wrought

Digitized by Google

iron nails are driven into the hardwood to show that they are still strong. Of course, the finish is crude, for this iron was wrought when men were in a hurry to get safely into their homes before the aborigine came along with his tomahawk and scalping knife to make things even livelier.

A wooden bitstock, undoubtedly hand carved, and about a yard long shows the clumsy tools with which the forefathers had to work. Near the bitstock is a quaint old pair of pincers, with which "ye cordwainer" might have pulled the misdriven peg from the sole of the shoe, or the aching tooth from the head of the village dandy. A vine cutter looks as if it might have come from old Greece, and a powerful wrist muscle must have been necessary to use it, for its operator had to cut twigs by squeezing them between its blade and its flat base.

A chain of rings seems to have been the iron dish cloth of some family of giants, but it is really the Flemish girdle chain by which old-time butchers fastened their steels to their waist. A collection of ancient steel-yards and balances range from those small enough to weigh particles of gold to those great enough to balance bales of hay.

Among the keys, locks and latches, there are some strange pieces; padlocks as big as an old-fashioned mince pie, keys as long as a foot rule, and latches of quaint shape and use, but the strangest of them all are the bed keys. One of these is of hardwood, 15 inches long, and its ward a square hole at its thickest end; it looks like the handle of a modern child's cart, for its knob is another stick of wood at right angles to it across its top, other bed kegs are smaller, and are of both wood and metal.

The bed key is a stranger to the men of these days of air mattrasses and folding beds that look like pianos. But when our sturdy ancestors went to bed they made sure that the bed posts were locked to the walls, and that the sides were firmly fastened in place, so that the bed might neither collapse beneath them or double up upon them, as have done some modern rest promoters. Incidentally, the bed key was always kept where anybody or everybody might find it, so that the bed might be quickly unlocked, taken down and carried out of doors in event of fire.

From the forges of colonial Vulcans are many exhibits, quaint looking guns that were used against the savage redskins or wild beasts that roamed to the Atlantic seashore. There, too, are swords that have drunk blood in two continents, resting calmly besides the gaudy dress swords of dandy soldiers in times of peace.

And of Hardware for the household there is a great variety, some of which the 20th century man readily recognizes and some of which is certainly Greek to him. What looks like a tin cage for small birds is really a lantern, though a man used to electric lights can scarce understand the value of the faint light that might steal from its tallow dip through the knife blade holes punched in its sides.

A roasting jack is a puzzle to the man of to-day who likes his beef well done. On the roasting jack, the colonial housewife used to "spit" the daily allowance of meat, and slowly turn it before the open fire, so that all parts might be equally well done. Bread was toasted in a like manner, though an odd looking wire device was often used as a toaster.

A Dutch oven hanging on a chimney crane looks like a witch's kettle, and a foot stove was a luxury of the forefathers of which men of to-day know but little. The foot stove was a tin box, about a foot square, in a wooden frame, with holes punched in the top and sides of the stoves. In olden times, when hardy forefathers considered stoves in church the Devil's temptation to sleep during the sermon, these foot stoves were filled with hot coals from the family hearth, and rushed to church by a swift runner and placed in the family pew.

Apple roasters, shovels, tongs, andirons, fire tongs, fire backs that look like tombstones, and many other queer things of "our forefathers'" homes are included in this collection.

Scattered here and there about the Institute, as parts of other collections, are a number of other things of interest to the Hardwareman. An iron door scraper, on which polite people wiped their muddy boots before entering houses, looks big enough for an elephant to have used; a potato masher that would make a big "billy" for a policeman to-day, and a milk skimmer that is but a wooden saucer. Ship's Hardware—well, that's another story. Looking at so many queer things of the forefathers is getting a little confusing. How did they ever get along with such crude devices? How did they ever make them? What would they do in these days when machines whirl so swiftly, and tools are turned out by the gross instead of by the single one? And will the world keep moving on, and the men of the next century look back upon the cherished products of this age as crude devices of simple people? And will the Hardware of to-day last the one and two centuries that the Hardware of the forefathers has endured?

Certainly the journey to the Institute at old Salem has been interesting. A glance at the curios the forefathers once used is sufficient proof that the world is moving on, and that there is more in it to-day than there ever was. F. A. G.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The New England Hardware Dealers' Association held their adjourned annual meeting at the rooms of the Boston Merchants' Association, Boston, on the 9th inst. An amendment to the by-laws was acted upon and passed, causing the membership hereafter to be confined to the retail dealers exclusively, the word wholesale being expunged. An effort will be made to prevail upon the retailers all over New England to take a greater interest in the objects of the association, and cause it to approach more nearly the associations of other States.

President John H. Sayward, of Haverhill, Mass., was in the chair. D. Fletcher Barber, of Boston, made the report for the Committee for Reorganization, the other members of which were Henry M. Sanders and F. Alexander Chandler, of Boston. After considerable discussion the report of the committee was accepted unanimously, including the change in by-laws by which membership in the association was restricted to the retailers. George F. Mulhall, of Boston, representing the jobbers, voiced the sentiments of these gentlemen in expressing entire approval of the change which will take ten wholesalers from the list of members.

The Nominating Committee appointed at the annual meeting, consisting of W. D. Parlin, of Natick; S. D. Balkam, of Jamaica Plains, and George F. Mulhall, of Boston, made its report, which did not include the nomination of a president, that selection being left to the meeting as a whole because it was a foregone conclusion that President Sayward would be re-elected if he could be persuaded to serve another year. He was elected from the floor, nominated by Mr. Barber and seconded by Charles E. Adams, of Lowell, Mass. The list of officers as unanimously elected is as follows:

President—John H. Sayward, Haverhill, Mass.

First Vice-President—John B. Hunter, J. B. Hunter Company, Boston.

Second Vice-President—E. A. Loomis, Belcher & Loomis Company, Providence, R. I.

Secretary—James A. Farless, Boston.

Assistant Secretary—F. Alexander Chandler, Chandler & Farquhar Company, Boston.

Treasurer—Henry M. Sanders, Henry A. Sanders & Co., Boston.

Directors—The president (ex-officio) and D. Fletcher Barber, Chandler & Barber, Boston; Charles E. Adams, Lowell, Mass.; B. C. Pierce, Pierce Hardware Company, Taunton, Mass.; Calvin M. Nichols, Hoyt Company, Boston; Joseph H. Williams, Burditt & Williams Company, Boston.

Without enthusiasm your life will be a blank and success will never attend it. Industry is the secret of success. It blinds us to the criticism of the world, which so often damp our very earliest effort. It makes us alive to the one single object: That which we are working for. It fills, not with the desire only, but with the resolve to do well whatever is occupying our attention.

Digitized by Google

HARDWARE CLUB OF NEW YORK.

The twelfth annual meeting of the members of the Hardware Club was held at the parlors of the club, Saturday, March 19, this being the tenth year of the occupation of the club's quarters. The following governors were elected to serve three years, viz: Alfred D. Clinch, Terence F. Curley, James D. Foot, Henry L. Freeland and Francis B. Griffin, the two latter being new members of the board; Webster R. Walkley declining a re-election as a governor. Joseph Gales was chosen a governor to serve one year.

The president of the club, R. R. Williams, in presenting his report for the year made the following address:

ANNUAL REPORT OF THE PRESIDENT.

To the Members of the Hardware Club.

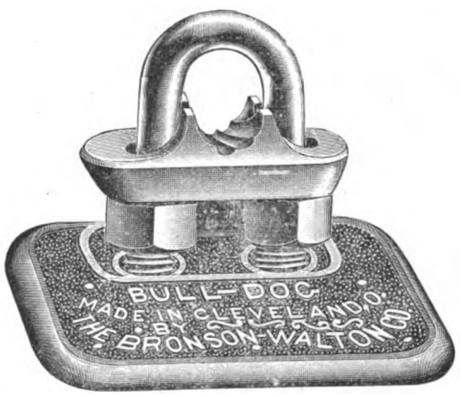
At this, our twelfth annual meeting, there are substantial reasons for congratulation on the position and prosperity of the club. Its notable success during all its previous history has been continued during the year which has closed, and under very favorable auspices we come together to review the record and take such action as may in your judgment be called for to secure its uninterrupted and, if may be, enlarged usefulness and well-being.

It is certainly a matter for special congratulation that after the preliminary work of organizing and installing the club in its present quarters was accomplished, there has not been a serious difficulty or solicitude connected with its administration. With a prosperous financial condition, the income of the club being sufficient for its needs, there has been an admirable spirit of loyalty and fraternity among the membership, which has contributed not a little to the success of the club and also to the pleasure resulting from identification with it.

Substantial evidence of the club's prosperity is given in the official reports of the secretary and treasurer, to which you will have the pleasure of listening. From the facts which they will bring before you, compared with those presented in the last annual report, you will learn that there is now a larger membership and a longer waiting list than at the beginning of the year; that during the year there has been an increased income from profit on sales, from dues, from admission fees, and from the interest account. The financial condition of the club is thus seen to be eminently satisfactory. This is the case, notwithstanding the policy which has been pursued of keeping up its equipment to a high standard, including the purchase of about $2000 worth of pictures; but for these and other particulars concerning the club I refer you to the detailed reports of the other officers.

Changes in the membership are constantly occurring, owing to the various causes which operate in the business life of the metropolis. We are thus called upon from time to time to regret the departure of those who have been identified with us in the enjoyment and companionship of the club. New members, too, are constantly coming in to receive the cordial welcome which is extended and to take their part in its pleasures and responsibilities. The details of these changes will be given by the secretary, who will remind you that during the year we have been called upon to mourn the loss by death of ten of our number. Of these Mortimer C. Ogden was one of the charter members of the club, a member of the board of governors, and an active, faithful and honored official. He and the others whose taking off we are required to chronicle will be held in kindly memory. The interruption of these personal relations and the severance of these ties remind us how much worth there is in those with whom we are associated in the intercourse of business life, and impress upon us a recognition of the privilege which remains in the companionships and friendships which are still permitted. In touching upon this I am, perhaps, going beyond the line of formal official duty, but reminding you of the service rendered by the club in promoting these amenities of business life and in cultivating some of the finer traits of our nature, I venture, and without any misgiving, to express the hope that in enlarging measure these higher ends may be attained, as the result of your wisdom and loyalty in directing its affairs and the spirit in which you carry on its work and enjoy its privileges.

Secretary's Report.



The report of the secretary, A. G. Sherman, contained a brief review of the year and several interesting facts connected with the club's history. Since the organization of the club a total of 1309 members have been admitted. The resident membership limit of 600 was reached about four years ago, and since that time there has been a constant waiting list, amounting now to 52. The non-resident membership limit of 200 has not yet been reached, but there are 175 members of that class. During the past club year ten members have died, a smaller club mortality than for several years. Two-thirds of the members are connected with the Hardware or related trades.

Treasurer's Report.

An interesting detailed report was made by Thomas F. Keating, the treasurer of the club, indicating a very satisfactory financial condition, the gain for the year having exceeded $2000.

A NOVEL SOUVENIR PAPER WEIGHT.

The Bronson-Walton Co., of Cleveland, have presented customers who handle their "Bull Dog" Wire Rope Clamp with the very handsome souvenir paper weight which we illustrate.

A NOVEL SOUVENIR PAPER WEIGHT.

The base plate carries a full grown bull dog clamp. As the souvenir is nickeled and is felt protected beneath, the souvenir has been greatly appreciated.

C. E. JENNINGS & CO.'S CHANGE OF ADDRESS.

C. E. Jennings & Co., 101 Reade Street, New York, who are manufacturers of a large variety of Mechanics' Tools, will, on or about April 15th, move from their present quarters to the more extensive and conveniently located premises at 42 Murray Street, near Church Street, where they have leased the store floor, basement and sub-cellar, each 25x80 feet, which is now being thoroughly overhauled and renovated for their future occupancy. Improving on their present location they will be able to use the rear portion for offices, it being finely lighted and well ventilated. The great increase in their business the last few years has made it necessary to seek more commodious quarters; especially as they have added largely to their former stock by the addition of the Southington Cutlery Co.'s production of Pocket Cutlery, Crescent Safety Razors, Steel Squares, Curry Combs and Emery Wheel Dressers, to which in the new location will be added Tire Bolts, Stove Bolts and similar goods made by the Southington Company.

LUCK—HOW TO GET IT.

Luck is of your own making. Luck means rising at six in the morning, living on one dollar a day if you make two, minding your own business and not meddling with other people's. Luck means the hardships and privations which you have not hesitated to endure; the long nights you have devoted to work. Luck means the appointments you have never failed to keep; the trains you have never failed to catch. Luck means trusting in God and your own resources —a religion whose motto is: "Help yourself, and Heaven will help you." Luck comes to them who help themselves and know how to wait.—Max O'Rell.

FIFTY YEARS OF HARDWARE.

A. H. SAXTON'S GOLDEN ANNIVERSARY.

"I have heard, Mr. Saxton, that you have recently completed your 50th year in the Hardware business," said a representative of Hardware to A. H. Saxton, of Alfred Field & Co., a few days ago, "and I believe if you could only let your thoughts dwell on the past a few minutes I might obtain some interesting reminiscences which all veterans like myself love to listen to."

"Yes," replied Mr. Saxton, "I have fortunately or unfortunately, it is difficult to determine which, been engaged in the Hardware business for 50 years. I commenced in the Spring of 1854 with F. E. & A. Field, who were located at No. 13 Platt Street, New York, and 66 and 67 Parade Street, Birmingham, England. This firm had been running since 1836, having started as Parker & Field, a little later as Parker, Field & Field, and subsequently as F. E. & A. Field, up to the time I came on to the stage.

A. H. SAXTON.

"In the Fall of 1854, the firm was changed to Alfred Field, and in 1855 Robert Ibbotson was admitted, who remained with the firm seven years, under the firm name of Field, Ibbotson & Co. In 1862, this firm was dissolved, Mr. Ibbotson retiring, and a new firm formed under the style of Alfred Field & Co., which firm name has continued ever since for 42 years. This old firm, never since it was launched, has defaulted on an obligation, moral or financial, and there is not a man anywhere, that can say truthfully, it has ever intentionally done him an injustice. Alfred Field died in 1884."

"In regard to yourself, Mr. Saxton, if I remember correctly, you were always very active in the general business of the firm of Field, Ibbotson & Co. I suppose you were early in forming those governing principles which gave your firm such a high reputation for industry and integrity."

"About myself?" replied Mr. Saxton. "Well, I have very little to say, seeing that I am unable to determine that I have done much good in the world. I will refer to a few things that have formed inflexible rules of my business life, which may account for my not having been more successful. I have always tried to be very conscientious in keeping engagements, I have endeavored to do nothing in a careless slip-shod way. I have kept my business secrets to myself, but I have tried never to be otherwise than absolutely candid with all with whom I have come in contact. I always see that letters are promptly answered, whether there is anything 'in it' or not. I endeavor to be very clear and explicit in all contracts, so that there shall be no misunderstandings. I keep records of all transactions, and leave very little to memory, as two memories are not always alike. In promptly meeting every obligation as it matures, and exactly fulfilling every contract, whether for me, or against me, I am ingenuous enough to think that people trust me absolutely, and it has for very many years been a pleasure for me to think that people who knew me believe 'my word is as good as my bond.'"

"Yes," remarked the interviewer, "I think I have heard that you were averse to indulge in legal controversies of any kind."

"I have never been in a law suit," replied Mr. Saxton, "and don't want to commence now. I have seen lots of opportunities, where I could have made money if I had consented to a lie, a deception, or misrepresentations. At my age, I am a good deal more than pleased and satisfied that such temptations have been avoided. I am therefore simply a plodder with the great majority, and my ambition is to keep up the reputation of this old firm, and die in the harness."

"In your time," suggested his questioner, "you must have done business with a great number of the old-time Hardware jobbers of which about 1856 to 1859, New York City seemed to be fairly well supplied; especially as in those days imported Hardware formed so large a proportion of a jobber's stock of goods."

"About old-time Hardware houses," said Mr. Saxton. "The old houses that held sway in New York prior to 1860 certainly hold a green spot in my memory. I knew them all, and most of them intimately. Among those that I recall are W. N. Seymour & Co., Patterson Bros., Clark Wilson & Co., Churchill Rogers & Wetmore, Bliven & Mead, John C. Tucker & Co., Norton, Jewett & Buzby, Baldwin, Hill & Co., Howe, Brown & Co., Henry Cromwell, Fox Oakley & Morgan, Reid Sprague & Co., Charles S. Little & Co., Samuel Roosevelt, T. Negus & Sons, Peter Duryee & Co., Townsend Clark & Co., Bruff Bro. & Seaver, Ingoldsby Halstead & Co., E. Robbins & Bradley, Stow & Smart, Walsh & Coulter, Isaac L. Hunt, Many, Baldwin & Many, Sheldon Hoyt & Co., Osborn & Swan, Widdifield & Cohn, Coffin, Bruce, Bishop & Co., Jacob Halsted, Sears Adriance & Platt, Wolfe Dash & Fisher, Cornells & Willis, Wetmore & Co., William Bryce & Co., Willetts & Co., H. & J. W. King, and many others, all long since extinct. What a noble host they were! So far as I know, every man who was a principal in the wholesale Hardware business in New York, in 1854, is dead, with one notable exception, and that is Hezekiah King, of the firm of H. & J. W. King, who is still living, hale and hearty."

"I suppose after the Civil War," Mr. Saxton, "the nature of the foreign Hardware importations changed so completely, under the new conditions in making and marketing American Hardware, that your business was practically renewed on entirely new lines."

"After the Civil War," he said in reply, "I became acquainted with the heads of about all the leading jobbing Hardware houses throughout the United States, and for many years held most pleasant relations with them, but I am sorry to say only a very few of them are now left."

EXPOSITION IN LIEGE.

The Bureau of Statistics has on file a copy of the general programme, classification, and rules to govern the Liege Universal and International Exhibition to be held in 1905. It was furnished by United States Consul J. C. McNally. Parties desiring to exhibit or to secure information should write to the central administration, 14, Quai de l'Universite, Liege, Belgium.

NATIONAL RETAIL HARDWARE DEALERS' ASSN.

The fifth annual convention of the National Retail Hardware Dealers' Association took place in the Palm Room of the Claypool Hotel, Indianapolis, Ind., commencing Tuesday March 22. This association is composed of delegates appointed by the various State associations on the basis of two delegates for the first one hundred paid members and one delegate for each additional one hundred or major fraction thereof. Fifty delegates were present at the first session, and this number was increased at subsequent sessions by late arrivals.

The convention was called to order by W. P. Bogardus of Mount Vernon, Ohio, the president, with M. L. Corey, of Argos, Ind., national secretary. The president announced that matters pertaining to interstate commerce had been referred to the Executive Committee, which would report later.

PRESIDENT W. P. BOGARDUS.

UNORGANIZED STATES.

Considerable time was given to the discussion of ways and means for organizing dealers in States not yet possessing associations, and it was suggested that dealers in States not organized be invited to attend meetings of the associations in adjoining States. The matter was laid over for further discussion.

COMMITTEES.

The president then appointed the following committees:

RESOLUTIONS.

S. R. Miles, Mason City, Iowa; James N. Kline, Williamsport, Pa.; H. J. Knapp, North Tonawanda, N. Y.; S. R. Fraser, Vinita, Ind. Ter.; C. N. Barnes, Grand Forks, N. Dak.

LEGISLATION AND BY-LAWS.

W. P. Lewis, New Albany, Ind.; H. L. McNamara, Janesville, Wis.; F. Neudorff, St. Joseph, Mo.; C. A. Hutsinpillar, Ironton, Ohio; A. H. Abbe, New Britain, Conn.

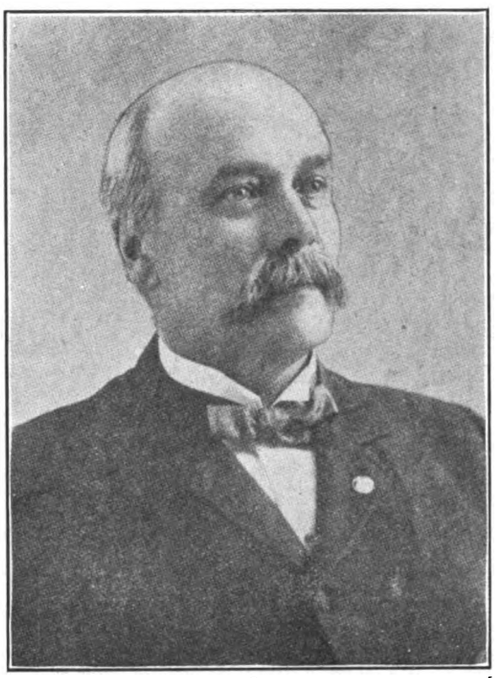
AUDITING.

A. J. Scott, Marine City, Mich.; W. S. Shacklett, Fulton, Ky.; D. H. Evans, Tracy, Minn.; C. E. Taylor, Little Rock, Ark.; Harry Hall, Lincoln, Neb.

NOMINATIONS.

E. M. Bush, Evansville, Ind.; W. H. Tomlinson, Le Sueur, Minn.; Frank A. Bare, Mansfield, Ohio; Dennis McLaughlin, Chicago, Ill.; F. C. Moys, Boulder, Col.

PRESS.



C. F Ladner, St. Cloud, Minn.; C. A. Peck, Berlin, Wis.

PRESIDENT'S ADDRESS.

The afternoon session opened with the president's address, in which President Bogardus reviewed the growth of various State associations and spoke of the importance of having at least one of the national officers present at each State convention, not only because it inspired the members of the associations to greater efforts, but that it permitted the shaping of those efforts along definite lines. The National Association, said he, representing as it now does the leading dealers in 18 States of the Union.

WIELDS A POWER NOT REALIZED

by the unobservant. Mr. Bogardus then briefly reviewed the work done by National officers before the National associations of jobbers and manufacturers at Atlantic City, and spoke for greater efforts for the up-building and encouragement of State and local associations.

TREASURER A. T. STEBBINS.

MUTUAL INSURANCE.

Reference was made to the successful launching of the National Insurance Association and to the strength that the success of that movement was adding to both State and National Dealers' Associations. Members were urged to use their influence to overcome hostile insurance legislation that was being enacted by many State Legislatures under the guise of protection to the insured.

PARCELS POST LEGISLATION.

He urged members also to present a determined front in their stand against parcels post legislation, referring to Mr. Denny's House bill No. 7632 as the most dangerous because it proposed to appropriate $100,000 for the installation of an experimental parcels post service in a thickly settled portion of the country, and if this could be made to appear successful it would be taken as a stepping stone to the adoption of the service all over the country, regardless of the greatly increased cost to the people due to the long hauls incident to sparser population in other territories. The whole parcels post legislation was characterized as being unjust, because it injured the many to benefit the few, and made both injured and benefited share in the cost.

He paid a tribute to the memory of Mr. Bock of Michigan, whose life and labors had been an inspiration to all.

In closing the president spoke eloquently of the judgment, wisdom, energy and faithfulness of Secretary Corey, and congratulated the association upon having so efficient an officer.

On motion by Mr. Ladner, it was decided to publish the president's address in full in the next issue of the Bulletin.

REPORT OF SECRETARY.

Secretary Corey delivered his annual report, in which he reviewed the work of the association during the year. The text of this report was of an executive character, and its publication is deemed undesirable. The secretary warmly commended the National Jobbers' Association for the disposition they showed to stand firmly by the retailer and for the interest they had taken in the retailers' associations, and in the generosity of the hospitality of jobbers at various convention cities.

This report was also ordered published in full in the next issue of the Bulletin.

Comparison of Catalogue House and Retail Prices.

L. Lindenberg, of Dubuque, Iowa, delivered an address on the comparison of catalogue prices and retail prices, and this led to a general discussion which lasted an hour or more.

Sharon E. Jones of Richmond, Ind., read an important paper on the

UNFAIRNESS OF MANY MANUFACTURERS' LISTS,

discounts, terms and practices. He said in part:

Not many retail Hardware merchants have escaped the hardships and unfairness of the many arbitrary rules and regulations made by manufacturers and jobbers during the past few years, and the fact that members have not risen in open protest reflects their conservative, cautious policy in planning every move before they make it. Take first the matter of listing goods, or making price-lists. Some lists are subject to so small a discount that goods must be retailed at an advance over the list, and others are so absurdly high as to cause no end of confusion and

UNNECESSARY LABOR IN FIGURING.

Take, for instance, 8-ounce Upholstery Tacks, which are listed at $1 per pound, and are to-day selling at 90, 50, 10 and another 10, if you must have it. Glass caps the climax of them all, with three different lists in about two years, and a threatened fourth, all subject to ridiculously large discounts. In fact, most of the common articles of sale in a Hardware store are smothered in figures and tied with many naughts, all to the great disadvantage of the retailer. I have inquired the reason for such unreasonable lists, and have been repeatedly informed that lists are made high to make the retailer believe and the customer believe they are getting a low price by giving them a big discount, and I am sure this is true in no small sense, for I have heard of the sale of goods by unprincipled salesmen to ignorant or innocent purchasers at much more than their true value by taking advantage of high lists. High lists offer an opportunity for dishonest salesmen to defraud the innocent buyers. They are

FULL OF OPPORTUNITIES FOR MAKING MISTAKES.

in figuring discounts. They are time killers and brain paralyzers. They should be revised and lowered, so that no article should be listed at more than double the jobber's cost.

This would allow for all the profit any one should have, and would save much time and prevent many errors. Another evil is that of making the lists so low that there is no fair margin of profit even when selling at list price. This is mostly found in specialties and Mechanical Tools, the very lines which should carry a liberal margin of profit to the retailer. The customer has been educated to expect a discount from every printed list, and can hardly be convinced that list price or even higher should be his purchasing price. Some manufacturers allow the jobber 10 per cent., and the retailer an additional 10 per cent., assuming that such profit is sufficient. We all know that

NO RETAILER CAN SELL GOODS AT 10 PER CENT.

and make money aside from the most staple article. The average cost of conducting a retail Hardware business is 15 per cent. of the gross sales, and yet there are few manufacturers or jobbers who provide for a margin of profit over this actual cost to the retailer. In short, the retailer is not considered by either the manufacturer or the jobber in the fixing of lists or discounts.

There is injustice, too, in the terms of payment on which goods are sold. Many goods are sold 2 per cent. discount from date of shipment, or net 30 or 60 days. Oftentimes goods cannot be delivered within the ten days, and the cash discount is forfeited, unless the purchaser is willing to risk payment for goods before they arrive. No man's money is worth 24 per cent. per annum for prepayment. Would it not be better for retailers to have their bills come net 60 days, with a proviso that should they be delayed in transit beyond the control of the consignee they should have the privilege of discounting on receipt of goods? There is

ANOTHER PRACTICE THAT IS FULL OF UNFAIRNESS,

though in itself it seems trifling. I refer to charging for boxing and cartage. Some jobbers and manufacturers have long since waived these charges, but some still hold to them, and in many instances the charges are outrageous. I have seen boxing and cartage charges amount to from 5 to 10 per cent. of the face of the invoice. I have known of jobbers who remarked that they made enough off of boxing and cartage charges to defray all expenses of their department and make $10 or $15 per day besides. My advice is to refuse to pay boxing and cartage, and you will win out in most cases.

Relations of Retailer, Jobber and Manufacturer.

T. Frank Ireland, of Belding, Mich., read a paper on the relations of manufacturer and jobber, in which he took the stand that the interests of the retailer and jobber are mu-

EX-PRESIDENT H. G. CORMICK.

SECRETARY M. L. COREY.

Digitized by Google

tual, because small dealers cannot always buy of manufacturers, and even the largest dealers find the jobbers' stocks a convenience. Even though the jobber sometimes sells to the consumer and the retailer sometimes buys of the manufacturer, it is necessary to the welfare of both retailer and jobber that the relations existing between them be confidential and cordial, because too many manufacturers are disposed to jump over the heads of both jobbers and retailers and sell to the catalogue houses and department stores. The jobber has influence with the manufacturer, and this influence the jobber necessarily exercises in favor of the retailer, because it is the retailer to whom the jobber looks for his trade. In conclusion Mr. Ireland stated that a high standard of business methods on the part of both retailer and jobber would cover the entire ground and details would take care of themselves.

The association adjourned to meet at 7 p. m. at the Columbia Club, where they were tendered a banquet by local jobbers and manufacturers.

Banquet.

The banquet Tuesday evening at the Columbia Club was a brilliant affair, both in point of the elaborate menu and the excellence of the speeches which followed. John B. Cockrum, general counsel of the Lake Erie & Western Road, filled the position of toastmaster, and his introductions displayed much wit and appropriateness.

Address of Welcome.

E. M. Bush, president of the Indiana State Association, the first speaker, welcomed the delegates on behalf of the State and city, and spoke of the work accomplished by the National Association in the four years of its existence. To the retail Hardware dealers of the United States he gave the credit of being the first and still the only organization of retailers who organized to give battle to the catalogue house evil and the menacing parcels post legislation. The catalogue house encroachments he considered the greatest immediate menace to the trade, and spoke of the injustice of manufacturers selling at lower prices to such houses than they do to the retail dealer, whose work had created the demand which permitted the sale of the very articles they thus sold. In this connection he gave praise to the jobbers of the State and country for taking a hand in the fight on the side of the retailer.

W. P. Lewis' Address.

W. P. Lewis, ex-president of the State Association, the next speaker, gave to the National Association the credit for the recent recognition of the retailer by the manufacturers and jobbers of the country. He spoke eloquently of the Government and the Constitution, which vouchsafed to the American citizen the right of life, liberty and the untrammeled pursuit of his chosen vocation, but called attention to the influences which were at work to curtail or abrogate these rights. That these influences had assumed formidable proportions was proved by the fact that a judicial committee at Washington was actually considering the proposition to deprive the courts of the land of the power of injunction, which was paramount to the destruction of the power of law itself, and its subservience to the votes of anarchistic labor leaders.

Another menace emanating from the same source was the proposed law that said to a laborer that he might work only eight hours, a proposition which was contrary to the commercial progress of the country and the individual advancement of its citizens. He paid a tribute to President Roosevelt for putting the laws of the nation above the rules of a labor union, and for having the courage to risk the loss of 1,000,000 votes in upholding a principle when he refused to discharge a foreman who had suggested a means for doing more work with less men than had been done. This sentiment was roundly cheered, and the health of the President of the United States was drunk at the suggestion of the toastmaster.

Indiana Pride.

John L. Griffiths, a prominent Indianapolis attorney and politician, delivered the most finished address of the evening, on the subject of State pride. His oration exalted Lew Wallace, James Whitcomb Riley, Booth Tarkington, Mrs. Catherwood and other Indiana authors, as making the great West and not New England the center of the nation's literary life; but placed higher than mere individual accomplishment in art, letters, manufacturers or commerce the patriotism and individual character which was broad enough to set public welfare above private gains.

W. P. Bogardus, the national president, used a number of opposite stories to illustrate the difference in point of view, and dwelt upon the importance of building up a character which would permit the Hardawreman to exert his efforts along lines that not only benefited himself personally but that would be of lasting benefit to his communities, the State and nation.

A. T. Stebbins, of Rochester, Minn., treasurer of the National Association, said that notwithstanding the protests that Hardware dealers felt it necessary to file against evident evils, they were optimists at heart, and believed the world was growing better every day, and that they were organized to do all in their power to benefit humanity while they were fighting battles in which victory meant more than selfish gains. He spoke of the rivalry which existed last year between Indianapolis and Minneapolis as to which city should have the present convention, and predicted a victory for the Minnesota City for the next convention.

The convention is still in session as we go to press.

PENNSYLVANIA WHOLESALE HARDWARE SUPPLY ASSOCIATION.

The annual meeting of the Pennsylvania Wholesale Hardware and Supply Association was held on the 16th inst., at the Hotel Savoy, New York City. The following members were present:

C. E. Morgan, C. Morgan's Sons, Wilkes-Barre.

George W. Lewis, Phelps, Straw & Co., Wilkes-Barre.

William H. Conyngham and William Stout, Pennsylvania Supply Company, Wilkes-Barre.

G. Howard Bright, Bright & Co., Reading, Hazleton and Pottsville.

John H. Obold, J. H. Obold & Co., Reading.

A. B. Stein, Stichter Hardware Company, Reading.

A. Raymond Bard, Bard Hardware Co., Reading.

J. M. Krammerer and W. E. Bittenbender, Bittenbender & Company, Scranton.

F. W. Shear and Ralph E. Weeks, Foote & Shear Co., Scranton.

W. H. Taylor, Scranton Supply & Machinery Co., Scranton.

H. L. Raub, Reilly Bros. & Raub, Lancaster.

Henry S. Franklin and George S. Franklin, Steinman Hardware Company, Lancaster.

F. W. Beckley, Hazleton Machinery & Supply Company, Hazleton.

George D. Krause, George Krause Hardware Co., Lebanon.

H. G. Dreisbach, C. Dreisbach's Sons, Lewisburg.

W. W. Welliver, Welliver Hardware Company, Danville.

The following officers were elected for the coming year:

President, William H. Conyngham, Wilkes-Barre.

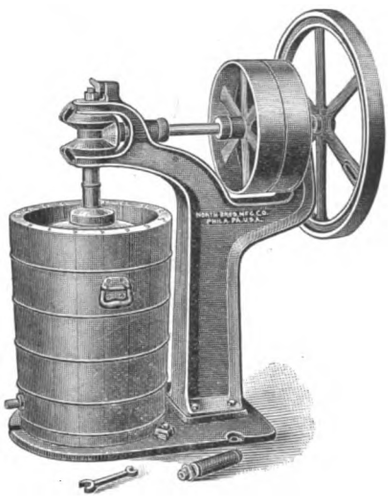
First Vice-President, H. G. Dreisbach, Lewisburg.

Second Vice-President, A. J. Roat, Kingston.

Secretary, C. G. McCord, Reading.

Treasurer, G. Howard Bright, Reading.

The Executive Committee appointed by the president comprises George W. Lewis, H. L. Raub, George D. Krause, F. W. Beckley and W. W. Welliver, who will act in conjunction with the Advisory Committee, which is made up of those members who have served the association as president.



The usual annual dinner was enjoyed with the following guests present: George H. Sargent, of Sargent & Co.; Henry R. Towne, of Yale & Towne Mfg. Co.; R. R. Williams, Hardware Editor of *The Iron Age;* T. B. Coles, of the American Steel & Wire Company; F. W. Baker, Jr., of the American Axe & Tool Company; A. S. Bailey, of E. C. Atkins & Co.; C. F. Reichner, of George Griffiths Company; T. J. Fernley, secretary of the National Hardware Association; W. S. Wolf, of the Reading Hardware Company; B. S. Alder, of New York City, and E. T. Fraim, of Lancaster, Pa. Interesting addresses were made by Messrs. Sargent, Towne, Williams, Fernley, Baker, Taylor and Kammerer, Mr. Kammerer acting as toastmaster.

NEW GOODS AND SPECIALTIES.

NEW MACHINE ICE CREAM FREEZERS.

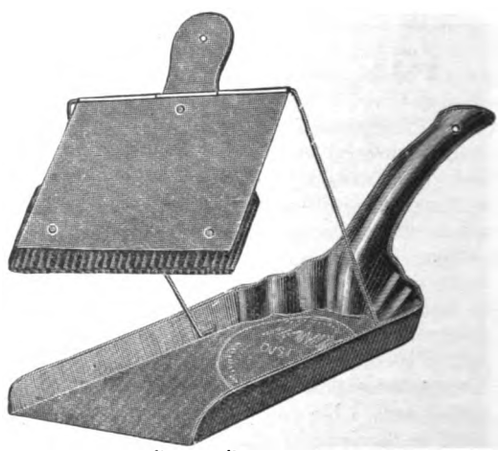
North Brothers Manufacturing Company, Philadelphia, Pa., are engaged in marketing this season, in addition to their other well known lines of Confectioners' Freezers, a new line of Machine Freezers, illustrated by the accompanying cut, which shows a freezer designed to meet a demand for smaller sized well built machines of 14 to 32 quart for confectioners whose business is not large enough to warrant putting in forty-quart machines, but who have power in use through electric motors, gas engines, etc., and thereby enabled to do away with the laborious work of operating their freezer by hand power. The can is made of No. 18 sheet

NORTH'S NEW MACHINE FREEZER.

steel, riveted in seam, with heavy malleable iron bottom, and tinned after being made up. The top of can is reinforced with wrought iron band. The body of can is very much thicker than the ordinary can made of the heaviest tin plate, and cannot be dented by careless use, or by ice in packing. The tub is made extra heavy of selected Virginia white cedar, with staves tongued and grooved into each other, and held together with electric welded wire hoops, which are much stronger than ordinary flat hoops, and guaranteed not to fall off. The tubs are painted both inside and outside. The dasher is of malleable iron, heavily coated with pure block tin. It has two metal scrapers for side of can and one scraper for bottom of can. In position shown in illustration, the gearing is engaged with can and dasher to operate freezer. When lever is thrown in opposite position the clutches are separated so that tub with can and dashers may be readily removed. The lever locks the clutch in either position. The arrangement of parts is such that the gearing is never exposed at any time, not even during the change of tubs and cans. The cover prevents any possible injury to operator, or the gearing becoming clogged with dirt or ice and salt. There are no loose pieces to be lost or mislaid. The machine is very compact and of great strength. The frame is in one piece and all bearings are accurately bored.

THE NEW BLACKSTONE ROTARY WASHER.

The Blackstone Manufacturing Co., Jamestown, N. Y., are the makers of the new Blackstone Rotary Washer, with stave legs, of which we give an excellent illustration. The legs of this machine are bolted to the tub, with two heavy steel bolts in each leg, and are reinforced with a steel rod underneath. The legs are made of hardwood and can be removed if desired. If a leg is accidentally broken, it can be replaced. It is claimed to possess a greater degree of strength than any Washer made with staves extending down the legs. The tub is claimed to be fully two sizes larger than most of the various stave leg machines of this style. The Wringer box is large and is built into the top of the machine, making it extremely durable and very convenient, especially when compared with those fastened on with brackets or with nails. The

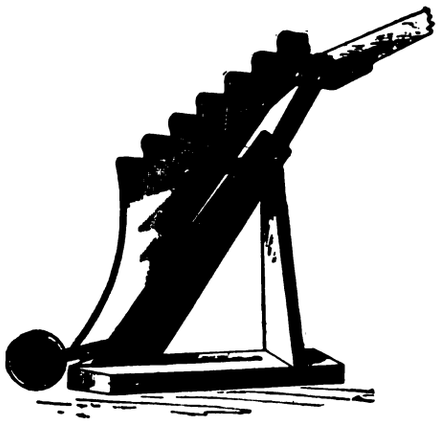


BLACKSTONE ROTARY WASHER WITH STAVE LEGS.

Washer is fitted with all the latest improvements inaugurated by this company; and is nicely finished a mahogany red with the castings of aluminum. When crated and shipped the legs are all in place as shown in illustration. Write the manufacturers for circulars and catalogue.

THE "DANDY" SINK CLEANER.

Among the recent reforms instituted in the domestic circle, those affecting kitchen economy and culinary improvement have come largely to the front, and greatly to the benefit of kitchen cleanliness and comforts. A number of appliances are on the market by which the usual accumulation of refuse and filth that so frequently disturb the serenity of the housewife, are greatly lessened in quantity and readily



THE "DANDY" SINK CLEANER.

disposed of. Among those of recognized utility the "Dandy" Sink Cleaner, manufactured by John E. Sudlow, 986 Halsey Street, Brooklyn, N. Y., has achieved great popularity throughout the country, having been on the market for several years and established a reputation as a ready seller at a moderate price in every town where it has been introduced. It is a combination of shovel and sink scraper, convenient in form and a practical sanitary utensil that prevents germs of any kind from finding a lodgment where this sink accessory can reach them. Those not already acquainted with its merits should write to the manufacturer as above.

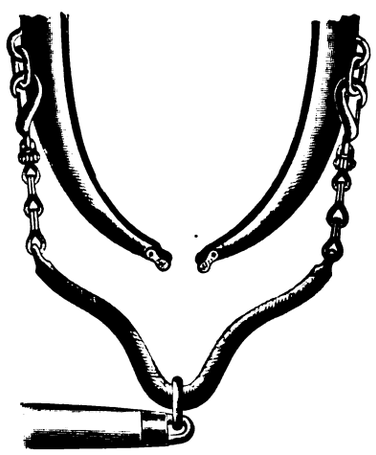
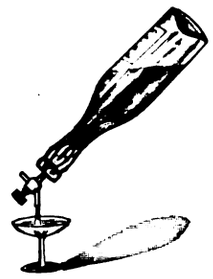
PRESCOTT'S I X L CARRIAGE JACK.



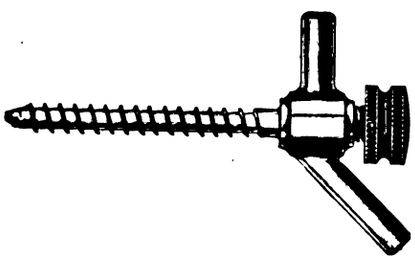
Edwin Prescott, 59 Beverly Street, Boston, Mass., is placing before the Hardware trade a Carriage Jack which we illustrate, that is entirely automatic in its action, requiring no adjustments and possessing metal bearings throughout. The inclined head admits of wide notches, all within the base, giving a firm support. The load rises to the same extent on any notch. The roller rises as the load is lifted, but by raising the handle it drops, lifting and carrying the jack about, keeping the foot flat when other kinds were rounding by being dragged along. It is made in three sizes: No. 1 is suitable for carriages, hacks, etc. No. 2 is for livery use, as it handles easily a four-horse barge. No. 3 has iron-clad notches, and is for wagons up to 8,000 lbs. weight. The Nos. 1 and 2 are fitted with iron caps to take the wear, and elastic buffers, secured in such a manner as to prevent the axle being bruised by the jackhead.

PRESCOTT'S I X L CARRIAGE JACK.

NIAGARA TUBULAR STEEL BREAST STRAP.

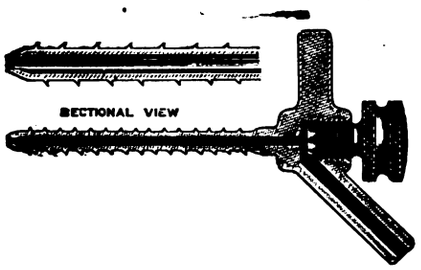


The Metal Stamping Company, Niagara Falls, N. Y., are the manufacturers of the Niagara Tubular Steel Breast Strap, which is represented by the accompanying cut. The main part of this breast strap is made of a flat piece of open hearth or cold rolled steel of the best quality, which by means of cast steel dies and powerful presses is put into the exact shape necessary to serve its purpose the most effectively; making in the operation a Breast Strap that is strong, convenient and perfect in appearance. It forms a perfect substitute for a leather breast strap with center slides and snaps. It is claimed to wear the collar far less than a leather breast strap does as the spread of the bail is such that any part touches the collar but rarely, and if from an unusual side push it should chance to touch it, it would be done by the flat surface of a smooth link. They are made to be sold at a moderate price and afford a good profit to the dealer; and will be found an appropriate addition to any Hardware stock in the country. Write the manufacturer as above for particulars.



NIAGARA TUBULAR STEEL BREAST STRAP.

"ERIE" CHAMPAGNE TAP, NO. 210.



The Erie Specialty Co., Erie, Pa., are calling the attention of the Hardware and housefurnishing goods trade to their new Champagne Tap No. 210 which they have greatly improved recently and are placing upon the market, and rapidly superceding other forms of preserving the gas and keeping champagne lively and palatable after the original cork is drawn. The perfect champagne tap must do its share of the work satisfactorily so that no leakage of gas, be it ever so little, shall emanate from the wine. This has hitherto been in too many cases a failure, until the present tap was introduced embodying features readily understood from the illustrations herewith. A German silver wire is secured to the valve screw extending and closing the reduced opening in point of top which prevents any clogging from small parts of cork. On this wire and end of valve screw, is a washer of vulcanized fibre with sufficient resistency to make the valve gas and liquid tight. When the valve is opened the wire is drawn from the point leaving a free opening around it for the proper flow of contents. As shown in illustration, while valve screw is opened and closed, the bottle should be tipped up, preventing any escape of free gas.

CHAMPAGNE TAP, IN USE.

ERIE CHAMPAGNE TAP, NO. 210.

SECTIONAL VIEW OF TAP.

DAUS' "TIP TOP" DUPLICATOR.

The Felix F. Daus Duplicator Company, 111 John Street, New York, are the manufacturers of one of the most reliable duplicating processes now on the market. It reproduces the handwriting with such exceeding fidelity that the results of the duplicating process are frequently mistaken for original letters. From one original it is able to produce 100 to 150 copies in black ink. Included in the set of material furnished will be found 5½ yards rolled printing surface, which can be in continual use; two bottles of ink; rubber smoother and sponge, all ready for constant use. The manipulation of the apparatus is extremely simple and easy. By turning the two cog wheels shown in the illustration the Tip Top coated paper is stretched and made ready for use, the original having first been written with the ink supplied, on hard smooth

Digitized by Google

ledger paper. Reproductions are made on any description of paper, although the smoothest is best. The original, when dry, is laid written side downwards on the printing surface, smoothed lightly by the hand in every direction, and it is left 1½ to 2 minutes, so as to adhere. This produces the negative. On this negative place immediately and in succession, the sheets to be printed, by smoothing lightly each

DAUS' TIP TOP DUPLICATOR.

sheet with the rubber smoother and removing it quickly until the desired number of copies is produced. After use, roll up the negative surface towards your right. If the roll on the left is used up, transfer back to the left roll all the Tip Top negative paper from the roller on the right and use again as at first. No washing is required; although visible, the old ink of the previous negatives will not show reprints, it will entirely absorb itself in a few days. In this way the same roll can be used over and over again. For further information as to prices and discount, write the manufacturers at above address.

BALL BEARING SASH PULLEY.

The Grand Rapids Hardware Company, Grand Rapids, Mich., are placing on the market an entirely new type of sash pulley with ball bearing wheel, as shown in the cuts herewith. As will be seen, it runs on a turned steel cone-axle, which is claimed to be a great improvement in the design of sash pulley wheels. Seven 3-16-inch solid steel balls travel between the groove of this axle and the polished steel bushing. The sash cord or chain rests in a polished steel groove,

FIG. 1.—GRAND RAPIDS BALL BEARING SASH PULLEY.

a flat groove for chain, see Fig. 3, and a round groove for cord, the wheels being furnished either flat or round as required. The wheel itself is made from two sections of pressed steel. These sections are held together by four eyelets, two on either side. The Grand Rapids pulley is inserted into the frame work of the window without nails or screws. It is only necessary for the carpenter to bore four holes. In the type illustrated a mortise can be made in one of three ways, either by boring four 13-16-inch holes in line, with centers ½-inch apart, or, by use of the quadruple bit, boring the four holes at once, or by making a straight side mortise with round ends, 13-16-inch wide by 2 11-16-inches long. It is not nec-

FIG. 2.—FRONT VIEW OF WHEEL.

essary to counterbore for face plate, and no cutting or trimming is necessary. Architects or dealers wishing samples or

FIG. 3.—WHEEL WHEN USED WITH CHAIN.

any detailed information will find prompt attention paid to their requests by the manufacturers. The same company manufacture the Fox steel sash pulleys, as well as a line of Grand Rapids pulleys, having roller bearings instead of ball bearings.

WORLD'S FAIR INFORMATION BUREAU.

In the issue of their Spring 1904 catalogue, Butler Bros., Chicago, New York, St. Louis and St. Paul, make the following important announcement: "Our St. Louis house has opened a World's Fair Information Bureau for the help of merchants who desire to visit the World's Fair this year. If you wish us to help you in securing quarters for yourself and family please write direct to our St. Louis house stating all necessary facts and your letter will have prompt attention. A cordial invitation is extended to all merchants in all parts of the United States, whether customers of any one of our houses or not, to make free use of our World's Fair Information Bureau and to make our St. Louis house their business headquarters while visiting the Fair. Remember, all letters on the topic should be addressed direct to our St. Louis house, care of World's Fair Information Bureau. Caution: Do not come to the Fair without having written in and secured quarters in advance."

✤

He commenced his speech by saying: "I ought not to be here to-night. I am in Europe for my health, and the Doctor said I must avoid exposure. And I am not like the young lady on the bathing beach at Trouville who wanted her photograph taken. The photographer said: "It is a dark day and it will require a good deal of exposure.' 'Oh,' said she, 'I do not mind *that*.'"

RECENT TRADE PUBLICATIONS.

The Shelby Stove & Mfg. Co., Shelby, Ohio, manufacturers of the Reliance blue flame gas, oil and gasoline stoves, are presenting to their patrons their 1904 catalogue, which is fully illustrated, showing different styles of each kind of stove. In the construction of their gasoline and oil stoves they state they use only the best material, such as galvanized malleable fittings, best black wrought pipe, two-pass cold rolled sheet steel, full brass angles and stand pipes, etc., and the very best of workmanship. Since estabishing in business three years ago, the Shelby Co. have been obliged to materially increase their capacity in order to cope with the demand made upon them, and are in position to take care of their increasing business as they now have a capacity of 50,000 stoves per year. Each stove is tested for leakage and other imperfections before shipment, and they recommend to the trade that all stoves be operated before delivery to a consumer, and if found defective from any cause, not arising from damage in transit, to report to them, as after stoves have been sold and delivered for consumption, claims for imperfections will not be allowed. A copy of catalogue will be sent upon application to the manufacturers at Shelby, Ohio.

The Demorest Mfg. Co., Williamsport, Pa., announce in their recently issued catalogue the removal of their export and eastern sales offices to 296 Broadway, New York City. The above mentioned is their 57th annual catalogue of Family Sewing Machines, and is very attractively gotten up, illustrated as it is throughout. Some of the advantages claimed by the Demorest Company for their machines are the lock-stitch principle, high arm, best of material in construction, double feed, the motion of which, they claim, is perfect; the combination of the tension with a thread releasing device, an absolutely self-threading shuttle, and the bobbin-winder can be placed on the arm of the machine and be used without running the machine. The above are undeniable advantages and there are several others which will be found on looking through their catalogue, which is printed in four languages in the one book, as follows: English, Spanish, French and German.

The H. B. Ives Company, New Haven, Conn., are the authors of an extremely compact and attractive catalogue which is their No. 11, 1904, descriptive of the Ives sash locks, window stop-adjusters, mortise door bolts, and Builders' Hardware specialties. All former lists, discounts and quotations made by them are by this catalogue withdrawn and canceled. In presenting this new edition the company desire to call especial attention to their increased line of window Hardware specialties and revision of list prices, and announce their intention to continue to maintain high grade finishes on their entire line of goods. The book is a high grade production, being well printed on excellent paper and illustrated throughout with wood-cut engravings. The catalogue typifies the good quality of the products of the company, and should be in the hands of all dealers who have not as yet received a copy.

George Ertel Company, Quincy, Ill., have issued an attractive catalogue which they have designated "General Catalogue" of improved Incubators and Brooders, of which they are the manufacturers. The book gives a detailed account of the construction of these incubators and brooders, also regarding ventilation and regulation of heat. It gives several chapters containing valuable hints on poultry raising and scientific discussion of the development of the chick in the egg, intended to be of help to the beginner and of interest to the expert. The testimonials scattered throughout the book are enough to convince the most skeptical of the merits of their machines. One of these books will be mailed to any one interested in this particular line.

Tower & Lyon Company, Bloomfield, N. J., and 95 Chambers Street, New York, are distributing their No. 12 illustrated catalogue of Hardware specialties, fine tools and police equipments. The book is a very attractive one, the cover being of bright red with black lettering, and contains 111 pages. Tower & Lyon Co. represent the New York office of the Union Hardware Company, manufacturers of skates, gun implements, wood goods, etc.; The National Vise & Tool Works, manufacturers of leg and bench vises, etc.; and the International Glue Company, makers of Martins liquid fish-glues, belting cement, etc. An extensive index is given making possible a ready reference to any of their many products; and also a condensed price-list of Kraeuter's tools which are illustrated and described fully, among which are ticket punches, calipers and dividers, gas plyers, rivet sets, washer cutters, cold and cape chisels, button hole cutters, pinking irons, carpet stretchers, etc., etc. One of the above catalogues will be sent upon request to the Tower & Lyon Co.

A. Treadway & Sons Hardware Company, Dubuque, Iowa, are distributing to the retail trade their "Spring Circular No. 33" dated March, 1904, which is a full catalogue size pamphlet of 112 pages, and embraces the fine list of Spring Goods to be found in their well assorted stock. It is issued evidently in the interest of the mail order department of a wholesale trade; included in its pages is a single "order sheet" to tempt a trial trip on the part of the dealer to whom it may be sent. The pages of Hardware are well printed and finely illustrated, covering all the important lines of Spring requirements for a retailer's stock. A large number of special goods are marketed under the trade mark of the house distributing it, almost every page being devoted to the exploiting of "Wizard" specialties, the "Wizard" brand of fine goods being fully endorsed by the house for superior finish and unexcelled quality, and includes 25 special lines.

The Lancaster Peerless Emery Wheel Co., Lancaster, Pa., are the authors of a neatly arranged catalogue exploiting their Peerless Emery Wheels. This company came into existence in 1893, starting with a 6-foot kiln fastened against a very small sheet-iron shed, large enough for one lathe and a hand-power grinder and with rented electric power. The popularity of their product has so spread that today they occupy 17,000 square feet of floor space. The company use only the pure Turkish emery in the manufacture of their emery wheels, importing it themselves from Turkey. They state very emphatically that there is not an ounce of American emery in their possession and that there never will be. They also manufacture a line of Emery Grinders which they started over a year ago. The catalogue is fully illustrated, giving sizes, descriptions, etc., in detail, and will be sent to any interested dealer upon request.

The Hollands Mfg. Co., Erie, Pa., in their 1904 catalogue "A" exploit the vises, mechanics and plumbers tools which they manufacture. It is a book of more than ordinary attractiveness, being of small dimensions, having a soft black cover printed neatly in white, and containing 52 pages, fully illustrated, finely printed on coated paper, and on each article enumerated are given dimensions, price and description. Their improved planer chucks, having round base graduated are made in eight sizes from six to thirty inch jaw. These are equipped with a sheet shield to keep chips from getting under the jaws and set screws. They also make these with square base at a less price. This company make a hose roll holding up to 100 feet which is substantially built of wrought and malleable iron with galvanized cylinder, ratchet and hose fasteners, and, the company claim will wear a lifetime, and save its cost in wear and tear on hose. Send for catalogue to above address.

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

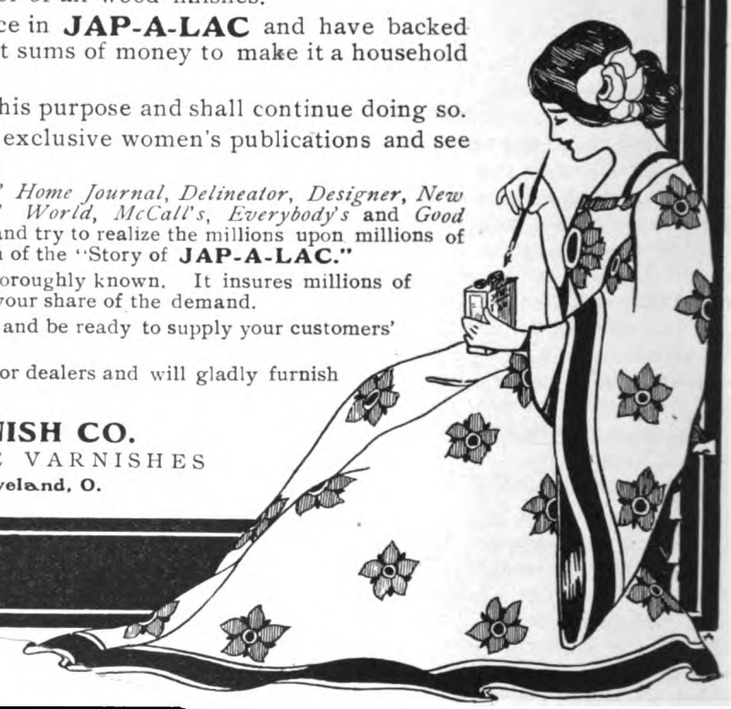
We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.



Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The **GLIDDEN VARNISH CO.**

MAKERS OF HIGH GRADE VARNISHES

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Rights of Lessee of Mortgaged Property.

QUESTION: I intend to rent a small farm with a couple of greenhouses on, in Pennsylvania. I believe there is a heavy mortgage on the farm. Please let me know if the lease is good in case (1) the place gets sold by the sheriff; (2) the proprietor dies. What can I do to protect myself?

REPLY: It is perfectly clear that the owner of mortgaged property who is in possesion of the same, may lease the mortgaged premises, and as between the parties to the lease, the lease will be clearly good. Such a lease, however, is not binding upon the mortgagee whose mortgage has been previously put upon the property, in the absence of a stipulation to that effect contained in the mortgage; but as against everyone but the mortgagee it would be perfectly valid. Until the foreclosure and sale of the property, your lease would, therefore, be perfectly good, and you would be quite safe in paying the rents to the mortgagor. But after foreclosure, particularly in view of the fact that you know of the mortgage and will take the lease with notice of its existence, your rights under the lease will cease at the option of the mortgagee or vendee of the property. The only way which we can suggest to protect yourself, is to get the consent of the holder of the mortgage to the lease and enter into a written agreement with him for a valuable consideration, that you shall hold the property for the term of the lease in case the mortgage is foreclosed and he becomes the owner. The death of the proprietor of the farm would not effect the validity of your lease in the least.

Remuneration for Work Performed.

QUESTION: I have some articles in my shop which were brought in for repairs, with the understanding that I was to have my pay as soon as the work was done. I finished it about three months ago, but the owner has not yet called for the articles. How can I get my money out of the articles? Also can I hold them for this full account or for the repairs on the articles only? A reply through your column will be considered a favor.

REPLY: We are of the opinion from the statement of facts that you have a lien upon the articles for the amount of your bill for the repairs done on them, but you have no general lien; that is to say, you cannot hold the articles for the amount of all previous accounts still owing you. As to your right under the lien, you cannot sell the property unless it is of such a nature that it would be unreasonable and to your loss to keep it, as for instance, a horse; but the articles, in our opinion, do not come under this category, as the expense incurred in keeping the articles is not near so large as it would be in the case of property which requires considerable time, care and attendance, and which would necessitate quite an expenditure. In some instances, however, where you keep the property for a reasonable length of time, you may sell the same in accordance with the law, upon due notice to your debtor. In our opinion the best course for you to pursue and which will also enable you to collect the whole amount of your bill, would be to sue for and obtain judgment on it, and then levy an execution against the articles, and selling them, they still being in your possession.

✤

Moral courage is nothing in the world but just the capacity for doing what we know we ought to do. Give that to every man, and only think with what a stir of eager and vivacious interest this dull world in which we are living would wake and start.

✤

A roll of bills stopped a bullet which struck a Chicago man in the breast, thus saving his life. Yet there are reckless people who will go right ahead day after day without a roll of bills on their persons.

REVIEW OF THE MARKETS.

WIRE NAILS: The recent advance has no other effect on the market than to encourage orders where provision had not already been made for the immediate future. The transportation problem, which is now somewhat uncertain will no doubt be solved by the advent of milder weather. The market is a firm one. Quotations are as follows:, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.95
Retailers, carload lots 2.00
Retailers, less than carload lots 2.10

New York. A little more eagerness to purchase is noted in the local demand, which may be said to include contiguous territory within 100 miles; and as the last vestige of winter departs, a steady demand is the anticipated result. Quotations are firm at the advance.

Single carloads $2.10
Small lots from store 2.20

CUT NAILS. At the meeting of the Cut Nail manufacturers, called for to-day, it was decided to make an advance over prevailing quotations of five cents a keg. This advance has been to a large extent anticipated by the trade and the large buyers have doubtless protected their interests by a confident booking of orders. Present quotations are as follows: On either Steel or Wire Nails, with no discrimination as to locality, quotations are as follows:

Carload lots .....$1.75 base
Less than carload lots 1.80

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. Under the present conditions of the Cut Nail market, the local quotations have been advanced to cover difference in cost, and are as follows:

Carloads on dock $1.90
Less than acrloads on dock 1.97½
Small lots from store 2.05

BARB WIRE: Large orders are being received by the mills from the many points in the Far West where an extended area of cultivation has been decided upon, covering as it does in many instances, a better grade of fencing in addition to the ordinary requirements, the better financial condition of the farmer being exhibited by the demand for improved products. The mills are pushed to their utmost to supply the daily increasing demand from the large distributors. Quotations are as follows: f.o.b. Pittsburg, 60 days, or 2 per cent. discount for cash in 10 days.

	Painted.	Galv.
Jobbers, carload lots	$2.25	$2.55
Retailers, carload lots	2.30	2.60
Retailers, less than carload lots	2.40	2.70

SMOOTH FENCE WIRE: The demand already referred to in previous issues as being of a record character, continues in every direction. The mills are running in some instances, double time to keep abreast of current wants which they find it impossible to accomplish at the present time. Quotations are as follows: f.o.b. Pittsburg, terms 60 days, or 2 per cent discount for cash in 10 days:

Jobbers, carloads $1.90
Retailers, carloads 1.95
Less than carloads 2.05

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

COMMON CARRIAGE BOLTS, MACHINE BOLTS, Etc. The manufacturers of Common Carriage Bolts, Machine Bolts, Coach and Lag Screws, etc., had a meeting in New York last week and made a general revision of their quotations, advancing prices as given below. In view of the condition of the market, the following advanced prices are announced:

Common Carriage, ⅜x6 inches and smaller and shorter 75%
Common Carriage Bolts, longer and larger than ⅜x6 inches .....70 and 10%
Machine Bolts, ⅜x4 inches and smaller and shorter .....75 and 10%
Machine Bolts, longer and larger than ⅜x4 inches .....75 and 5%
Machine Bolts, with C. & T. Nuts .....70 and 10%
Machine Bolts, without Nuts .....75, 5 and 10%
Bolt Ends .....75 and 5%
G. P. Coach Screws 80%
Cone Point Lag .....80 and 5%
Skein Screws 80%

The prices given above for Common Carriage Bolts are for the regular cut thread, but on the rolled thread prices are a little lower, ⅜x6 inches and smaller and shorter being quoted at discount 75 and 5.

CORDAGE: As usual with the season the latter part of March finds some improvement in the demand for Cordage. The following may be said to represent the market, the usual rebate of ¼-cent per pound being given to carload buyers:

Pure Manila, 7-16 inch and larger 12
⅜ inch 12½
¼ inch and 5-16 13
No. 2. Manila .....10½@11
Pure Sisal, 7-16 inch and larger ..... 9¼@ 9½
No. 2 Sisal, 7-16 inch and larger ..... 8¼@ 8½
⅜ inch ..... 8¾@ 9
¼ inch and 5-16 inch ..... 9¼@ 9½
Lath Yarn, Medium and Coarse... 8½@ 8¾
Jute Rope, No. 1..... 6½
No. 2..... 6

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseel Oil Co.:

In lots of less than 5 barrels...43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

Once we heard a well-known Irishman say "An Englishman rarely knows when St. George's day comes; a Scotchman may know when St. Andrew's day comes, but all the world knows when St. Patrick's day comes in the morning." We are reminded of this by the fact that this letter is written on the 17th, and the thermometer this morning at the writer's home was 24 degrees, making it the coldest 17th day of March of which we have any recollection. The ground is still deeply frozen and while some of the warm rains of the last few days loosened the surface soil somewhat we are told that hard frost is still encountered at a depth of three feet. Of course, outdoor work is impossible and there is no inducement whatever for the retailer to buy goods and this feeling is by no means confined to the Hardware trade but is apparently felt in all branches of business. We cannot but believe that two or three weeks of warm Spring-like weather will affect a decided change in the business situation, and from the "hurry" orders already being received for some lines of goods we think there will be a rush as soon as Old Sol has shown his face for a few days. The market still shows remarkable strength and advances are reported in Table Oil Cloth, Machine Bolts, Common Carriage Bolts, and Coach Screws, etc., and while the ch[illegible] in prices are

Digitized by Google

not important they seem to preclude the possibility of any radical declines, especially in view of the fact that Spring trade is now so near. On the whole, the prospects are for a good trade in the near future, and while collections have been slow and greatly delayed by reason of the cold weather, we have no doubt that an improvement will be early manifested in that line also. Biddle Hardware Co.

THE CLEVELAND TRADE.

Under the scare that capital was about to gobble up the country, and an excited sympathy for the poor laborer, organized labor secured a large advance in wages that greatly increased the living expenses of the nine-tenths of the laboring population that do not belong to labor organizations and so increased the cost of manufacturing as to prevent a fair remuneration for invested capital, and making the cost of building so high that it became an unprofitable investment. As the larger manufacturers are averse to advancing prices of goods and renters unwilling to pay increased rent, a reduction of expenses is imperative, and as labor is so important a part of the cost, wage reduction becomes a necessity. It is very unpleasant for employers to ask this and only pressing necessities suggests it. After a long strain from unexampled business activity, a time of relaxation may not be amiss, and is a benefit to the nerves, if not to the bank account, as entire exhaustion would be the only limit of endurance while business claims close attention, so depression may not be an unmixed evil and may prove a benefit, if we are able to cure evils that the strain and stress of business produced. These evils are being discovered and an effort made to cure them. An effort to decrease wages will be resisted, but if a fair degree of good sense prevails, the business of the country is not likely to be interfered with. Activity in business is already increasing, and we may soon be too busy to remember our troubles. The farmers are already busy in preparing for Spring work and another good crop will do much to efface the scars of the trust scare. The recent decision of the Supreme Court should allay any fear that trusts are to rob the people, or to ruin the country. If panies and bankruptcies are evils, the country has more to fear from unwise competition than from combination.

The Lockwood-Taylor Hardware Co.

THE PITTSBURG TRADE.

Spring has opened at last and with it the retail merchant has awaked from his hibernating and is hungry for goods. The long cold winter held back trade until the middle of March, but it is now past and a good trade moving. The improvement in the steel and iron trade is marked, orders being in hand to run the mills full and warranting an advance in price. A very important crisis has been passed in the bituminous coal trade. It was feared for a time that a strike would be inaugurated April 1st, but better counsels prevailed and an agreement was reached by the conferrees which fixes the labor scale for two years from that date. This affects directly 200,000 laborers in the coal industry in the four States, Pennsylvania, Ohio, Indiana and Illinois and indirectly would affect as many more among manufacturers using coal. The railroads have refused to make any reduction in coal rates which is quite a disappointment to our coal companies. A hopeful feeling is evident for the year's business among almost all classes and should the crops come up to an average yield, we can see no reason why the latter half of the year should not show a great improvement on the opening months and start a new forward movement that will surpass anything we have yet experienced.

Logan-Gregg Hardware Co.

THE CHICAGO TRADE.

Owing to the cold and stormy weather of the last four or five weeks, there has been somewhat less trade than usual until within the past three or four days, since which time business has materially improved. The advances that have taken place on such articles as Axes, Builders' Hardware, Locks, Knobs, Wire Cloth, Nails and similar lines have somewhat stimulated trade and the demand for Wire Cloth has been so strong that the trade generally are advancing the price still further. Our salesmen on the road are meeting with success in the way of orders, in particular, for Spring goods.

IF CORUNDUM be no better than emery, then emery is no better than iron ore.

If you grant that the United States Government is right when it states that emery is a mechanical admixture of Corundum and magnetite or hematite iron ore, you must at once grant the above deductionis logical.

But to use iron ore for polishing or grinding iron and steel would be absurd. If so, why use iron ore and corundum (emery), instead of the pure abrasive

Craig Mine Crystal Corundum.

NICHOLSON FILE COMPANY
GENERAL OFFICES: PROVIDENCE, R. I., U. S. A.

MANUFACTURERS OF
FILES AND RASPS
NICHOLSON, KEARNEY & FOOT, ARCADE, AMERICAN, GREAT WESTERN, McCLELLAN, EAGLE, J. B. SMITH, "X. F.", GOLD MEDAL.

There is quite a strong demand for Barb Wire throughout the entire northwest, and the trade in the city promises better than usual, just as soon as we can have a few days of seasonable bright weather. WELLS & NELLEGAR CO.

THE ST. PAUL TRADE.

Business all through the Northwest has been very small because of the severe weather. For more than a month the average was 20 degrees which is not conducive to getting around, but a few days ago the severe spell was broken and everything appears better, though it is questionable as to the amount of Spring business we shall get, as so many dealers are carrying over accounts which should have been paid, but there must be a reasonable amount even if credits are strained. At present, prices are being upheld—no unusual disturbances occurring.

HACKETT, WALTHER, GATES HARDWARE CO.

THE CINCINNATI TRADE.

The Sporting Goods season opening up is giving the retail Hardwaremen handling this line, ample room for exertion. Many of the retailers are making window displays of bicycles, etc., boxing gloves and fire arms. The Peters Arms & Sporting Goods Company display two silver cups which they presented to the Y. M. C. A. baseball team and basket ball team for championships in both leagues, 1903 and 1904. Pickering makes the announcement that the Southern Ohio Consulate League of American Wheelmen will meet on the 21st at the Palace Hotel to arrange for the coming season. The jobbers are anxious to see good weather that the goods already shipped may be used up. H. Belmer & Company are selling large quantities of one-inch poultry netting to be used in pigeon plants. A number of large plants for raising squabs for market have been started in Ohio and Kentucky in the last three months; the demand for squabs all winter has been enormous, the large hotels being supplied from Philadelphia at $3.50 per dozen, f.o.b., Philadelphia. Mr. Rauch, manager of the house furnishing department for Mabley & Carew, has been given the entire basement of the stores and is doing extensive remodeling for the purpose of adding Hardware to this department in April.

CINCINNATI TRADE ASSOCIATION.

THE DAVENPORT TRADE.

Winter is playing a few days return engagement, evidently fond of sojourning in this active and beautiful city; its lingering, however, does not add materially to its activity or beauty. During the few days of warm and fair weather preceding the recent storm, trade was very lively and the sales columns show a very satisfactory increase over the same dates of a year ago. At present both the roads and weather are unfavorable to business and we must await the return of the good old Summer days.

SICKELS, PRESTON & NUTTING CO.

NEW YORK STATE TRADE.

Spring Trade Backward.

(From our Travelling Correspondent).

Because of the very severe, cold and Wintry weather, trade is exceedingly backward throughout Northern and Central New York. Collections are reported to be very slow, which is also due to the business stagnation caused by the late Spring. In many parts of the State there is still from two to three feet of snow, and in the country districts the roads are almost impassable. In the country Hardware store at the present time there is practically "nothing doing" and the merchant is not placing orders for Spring or Summer goods as freely as a year ago. There is no doubt, however, that when the weather becomes more settled and the Spring trade actually begins there will be many rush orders placed with the local jobbers. And although the Hardware trade is now exceedingly quiet, indications point to a good Summer business.

In the farming and dairy district of Central New York the people generally are in a prosperous condition. All Winter good prices have been had for all dairy products; and the manufacturers in the smaller towns of the State have, with few exceptions, been running full time, and report many orders for future delivery. All this points to a good Summer's trade.

A wholesale Hardware house doing a large business throughout Eastern and Northern New York is the Albany Hardware and Iron Co. A large double store is occupied by this concern on State Street, Albany. In addition to their jobbing trade the Albany Hardware & Iron Co. carry on an extensive retail business and have a well arranged and attractive store. The concern use their large windows to good advantage in displaying goods and find that many sales are made from window advertising. A very attractive display was recently made of barbers' supplies, in which was shown a full size figure dressed as a barber, and attractively arranged about the figure were all kinds and varieties of razors and other supplies. The window could not help but draw the attention of men, and must have made many sales of these goods.

Another Albany concern enjoying a large retail trade is the Waterman Hardware Co., located on Pearl Street, in the heart of the best retail district. In addition to general Hardware the Waterman Co. carry a large line of tools and cutlery and reported retail "pick-up" trade as being very satisfactory.

At 871 Broadway is located the old established Hardware firm of Fowler & Babcock, one of Albany's progressive retail houses.

G. V. & F. W. Cameron, at 284 Central Avenue, have for many years carried on a constantly growing Hardware business. Some changes recently made in store arrangement have added much to the attractiveness of their store.

An enterprising retail Hardware firm in Troy is the Sweet-Packard Co., who now occupy a large double store, which is well stocked with Hardware as well as sporting goods. The

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN., U. S. A.
Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

firm make a strong bid for business in this latter line and have found it a profitable side line.

IN THE MOHAWK VALLEY.

Although there are still two feet of snow in many places through the Mohawk Valley, and the weather is more like that of January than March, Spring business is slowly opening up. This has been a great season for all Winter goods, and those Hardwaremen who have handled horse blankets and robes have done a very large business in these goods. In referring to this trade one Hardware dealer said: "Business in robes and blankets has been exceedingly brisk all Winter. Generally this trade drops off after Christmas, but this season, because of the continually cold weather, we have been able to sell out slick and clean in this department. Trade has also been unusually good in harness and horse furnishings."

John R. Taylor, who has done such noble work in the building up of the New York State Association of Retail Hardware Dealers, is the senior member of the Hardware firm of John R. Taylor & Co., of Little Falls. A large double store is occupied by this progressive firm. The store is very attractive, being well lighted and the arrangement of stock is good.

One of the oldest Hardware firms of Central New York is Shepard, Skinner & Co., located here in Little Falls.

The Wright-Dana Hardware Co., of Utica, N. Y., are gradually increasing their jobbing business by extending the territory covered and working it down closer. This concern are showing much enterprise and are succeeding in building up the wholesale end of their business. Prompt shipments and careful attention to all orders are two of the secrets of the firm's success. Their retail store, located on Genesee Street, has recently been somewhat altered and improved in its arrangement. The Wright-Dana Co. make a special feature of their window display and have recently been showing a large fire engine which was constructed entirely of Hardware. This attracted much attention, and certainly was a novelty in Hardware window display.

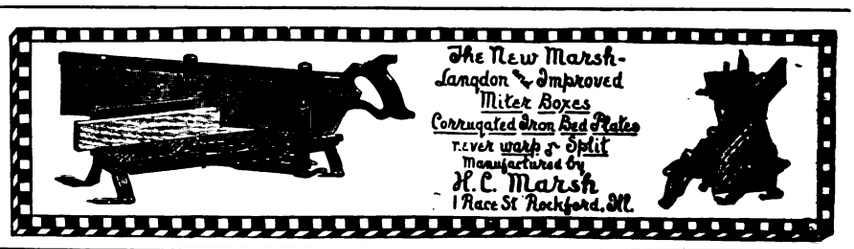
Another Utica jobber also having a very attractive store is The Roberts Hardware Co. This firm sell Hardware throughout Central and Northern New York.

In Hardware manufacturing the Utica Drop Forge & Tool Co. are very busy making their popular line of pliers and small tools.

Another Utica concern closely allied to the Hardware trade is the Savage Arms Co., now located in their new plant with increased and enlarged facilities; the Savage Arms Co. are better enabled to take care of their fast increasing trade.

Fishing rods may not be Hardware, but those manufactured here in Utica by Clark-Horrocks Co. are now to be found in almost every large city in the United States. The firm also handle a complete line of fishing tackle, as they are selling agents for the J. B. MacHorg Co. and Mohawk Valley Line Co. Their factories are running overtime in order to keep up with the demands for the fishing tackle made by them.

In Rome, N. Y., the Wardwell Hardware Co. carry a large stock of general Hardware, doing both a retail and jobbing business.



Raffauf & Hyde, of Rome, reported business as good as could be expected, considering the weather.

Many building operations which have been suspended because of the very severe Winter, will be continued as soon as Spring opens, and indications are that the late Spring and Summer trade will be good in all parts of Central and Northern New York.

HAMMERNAIL.

BOLTS AND LOCKS IN MEXICO.

Considering the number of buildings that are being erected not only in and around the city of Mexico, but also in all parts of the Republic, it is surprising, says the writer of a recent Foreign Office report, what a lack there is of good finishings, such as bolts and locks, window fastenings, etc. What is obtainable is either of American and German make, and usually of a very inferior quality, with the result that it only lasts a short time. The Hardware business, not only in Mexico City, but also in all the large towns in the different States of the Republic, is in the hands of German firms connected more or less directly with the four principal firms in this city. There are only five Hardware stores of any importance in the city of Mexico, four of them being the firms just mentioned and the other a Spanish firm. There was also until quite recently a large Mexican firm dealing in Hardware with a fair assortment of goods, many of them of British manufacture, but the whole of the business interest and stock has been bought up by one of the existing German firms.

OUR BRITISH LETTER.

(By Our Special Correspondent).

London, March 12, 1904.

PRICE MAINTENANCE.

One of the most burning questions of the present day among British ironmongers is the struggle going on in reference to the maintenance of prices by well-known manufacturers. James Pollitt, the agent in Great Britain for the Bissell Carpet Sweeper Co., has long held a prominent position among the workers in this question—indeed he claims to be the pioneer of the movement. Ironmongers gladly welcome the means opened up whereby price cutting could be checked and smaller buyers were given a fair chance with larger traders. During the past few years price maintenance has progressed, and may be said to have reached so great a height that it is now an established factor in the retail trade of this country. The attention of the large stores has been drawn to the matter, and the controlling element appears to have succored the freedom of these large trading concerns, and interfered with their price lists. Now, several of the leading stores which have extended connections, and possess clients in different parts of Great Britain, have determined to kick against the terms of sale dictated to them, and in consequence, the price maintenance movement has received a temporary check. The strength of the manufacturers of carpet sweepers, lawn mowers and other well-known commodities will be tested, and it is likely a boycott will be established unless some amicable arrangements are made. Most of the local ironmongers' associations have pronounced in favor of standing firm in their adhesion to those manufacturers who continue to maintain the prices in the interests of traders, and in their efforts to put down cutting. Trading without a profit in some departments, in the hope of securing sufficient business in others to make up for the loss, is to be depreciated. It is the root of much evil, and its baneful influence on British traders is fully realized by all thoughtful business men.

AN UNFORTUNATE INCIDENT.

In my last letter I gave some of the leading particulars in connection with the recent examination held by the Ironmongers' Federated Association. Since writing that letter a matter—apparently trivial but involving a weighty principle has come to light. The examination passed off satisfactorily and no less than nineteen candidates out of the twenty-one who presented themselves, were considered worthy to receive the much coveted I. F. A. certificates. Two of the candidates, Burnett Flatman of Croydon, and W. E. Perry of Southport, passed with honors, the former obtaining first place. It appears that one of the leading weekly Hardware papers in this country in order—as Secretary Smith in his speech before the Birmingham Ironmongers' Association puts it—"to steal a march upon other papers" arranged with Flatman to enter the competition as their nominee, and under contract to supply them with information in reference to the examination. Strange to say, the journal in question announces the fact itself, and rather glories in it. Secretary Smith denounces the action, and considers it does not reflect credit, either upon the candidate or the journal in question. At the request of the examiners the incident, which has cast a gloom over what was otherwise a very successful effort to raise the tone of the British ironmongers of the future, is to be brought under the notice of the Central Board of the Ironmongers' Federated Association at their next meeting.

BRITISH IRONMONGERS SELL HOUSEHOLD FURNITURE.

British ironmongers are much interested in the sale of household furniture, and in many districts it is regarded as one of the chief branches of the trade, and one through which a large portion of the Hardware business of the district is obtainable. During the past week a remarkably successful exhibition has been held at Earl's Court, London. The exhibition was arranged on co-operative lines by wholesale furniture manufacturers, and was under the able management of G. D. Smith, who has been associated with the conduct and control of nearly all the furniture exhibitions held in Great Britain. The venture was most successful, and bids fair to be the forerunner of a long and important series of trade exhibitions, which the promoters intend holding on similar lines. A large number of Hardwaremen attended, and carefully made notes of the different exhibits, many of which were well staged and arranged with skill, enabling buyers to grasp their salient points. American furniture, roll top desks and other office and library appointments, for the manufacture of which the United States is so justly famed, were well represented. Earle's Court is very conveniently situated, and is quite accessible from all parts of London, and is in direct railway communication with the main trunk lines of the leading railway companies, whose trains brought many visitors from provincial towns.

COLLECTIVE BUYING.

James Pollitt of Bissell Carpet Sweeper fame has taken up another question connected with the doings of ironmongers' associations, and has lately aired his views before the Liverpool District Ironmongers' Association. He raises the question of the morality of collective buying. He considers that the fact of placing small buyers on an equality with large buyers, as regards the terms obtained by those firms who purchase largely the same goods, is unfair to manufacturers, and prevents them from making the profit they should. The expenses of working a number of small accounts are greater, and perhaps the risk more, than when disposing of the same aggregate quantity through one or two large merchants; nevertheless, the standpoint from which to regard the matter is a new one, and opens up a question which may be argued on many different lines. The Bournemouth and District Ironmongers' Association when discussing the question at a recent meeting did not agree with James Pollitt's views, and the members were decidedly in favor of collective buying.

RECENT DEATHS.

Many well-known manufacturers of Hardware and ironmongers have been gathered to their fathers during the past few weeks, some having obtained ripe old age. Edward Rush Turner, who died recently, was born in 1824, and for upwards of half a century has been a leading figure in the British agricultural implement trade. He was the senior partner in the firm of E. R. & F. Turner, of Ipswich, who are so justly famed for their food-preparing machinery and milling plant, which they send to all parts of the world. The death of John Collingwood Onions, of Birmingham, reminds us of the antiquity of the firm of bellows makers, of world-wide renown. The name of Onions has been associated with the manufacture of bellows and smiths' hearths for upwards of two and a half centuries. When the Civil war raged throughout the length and breadth of the land, and Cromwell's Ironsides were in possession of many of the castlelated strongholds of rural England, the ancestors of the present firm were hard at work making bellows in the Black Country. Onions' bellows won two medals at the Great Exhibition in 1851, and the firm are to-day in the foremost rank of those engaged in the bellows industry.

THE CENTRAL BOARD MEETING OF THE I. F. A.

A meeting of the Central Board of the I. F. A. is to be held to-day (March 12) at Bournemouth. W. J. Bacon, J. P. of Poole, nr. Bournemouth has invited a number of guests to a banquet to be held in the Poole Guildhall. Some important items of business have been placed upon the agenda paper, and a good meeting is expected. The entire question of collective purchasing is to be reviewed, and the Board's attitude in reference to price maintenance and the opposition of the stores is to be discussed, as well as other important business.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Appleton, N. Y.—Messrs. J. G. Swigert and C. W. Beers have formed a partnership to engage in the Hardware business. They will erect a double store building in which to carry on their business.

Battle Creek, Mich.—A new Hardware firm has been formed under the name of the Pittman-Coates Hardware Co., at 36 East Main Street. The members of the new firm, each of whom owns a third of the business, are F. P. Pittman and F. B. Coates, of this city, and Samuel F. Dobbins, of Marshall.

Bessemer, Ala.—A new Hardware firm has been incorporated, and the officers are: W. K. Smith, Jr., president and general manager; Howard Lovejoy, vice-president; George Davies, secretary-treasurer. The place of business will be the Neve Building on Fourth Avenue and Nineteenth Street. They will do a general Hardware business, including builders' materials, under the firm name of the Smith-Davies Hardware Company.

Canandaigua, N. Y.—The Peck Hardware Company has been incorporated; capital, $15,000; directors: G. W. Peck, of Bath; F. B. Peck, of Hornellsville, and I. C. Pratt, of Prattsburg.

Cincinnati, Ohio.—The L. Kruckmeyer Company has been incorporated to deal in stoves, ranges, and kitchen outfits. Capital stock $20,000.

Duluth, Minn.—The Colquhoun Hardware Company has been incorporated; Frank S. Colquhoun, of Washburn, Wis., president and treasurer; Oscar Mitchell, of Duluth, vice-president and secretary, and William D. Bailey, of Duluth, director. The capital stock is $50,000.

East St. Louis, Mo.—Messrs. Will Bauer, of Bunker Hill, and D. Francis, of St. Louis, have formed a partnership and leased the building at Tenth and St. Clair Avenue, where they will open an up-to-date Hardware store under the firm name of Francis Hardware Co.

Eau Clair, Wis.—The H. F. Schlegelmilch Hardware Company has been organized and has elected as officers: Herman F. Schlegelmilch, president; John Leadholm, vice-president; K. C. Schlegelmilch, secretary, and H. F. Schlegelmilch, treasurer. The company has a capital stock of $50,000 and will at once engage in the wholesale Hardware business in this city, in addition to a continuance of the general retail business formerly conducted by Herman F. Schlegelmilch, at 122 South Barstow Street.

Hartford, Conn.—The Tracy, Robinson & Williams Company has been incorporated dealers in Hardware at 78 Asylum Street. The incorporators are: John F. Tracy, Henry N. Robinson, William D. Williams and Charles E. Martin.

Little Rock, Ark.—The Foster Hardware Company has been incorporated. The capital stock is $100,000. The incorporators are: W. C. Foster, president; Frank B. Gregg, secretary and treasurer, and A. E. Moran. The place of business is at 301 and 303 Main Street.

Logansport, Ind.—The Flanegin Hardware Company, of this city, has been incorporated. The company is capitalized at $10,000. The incorporators are: John T. Flanegin, William E. Baker, T. J. Flanegin and Loren Flanegin.

Milford, Texas.—Jones Hardware Company has been incorporated. Capital stock, $1500. Incorporators: Ben F. Sumner, Joe Wilson and John T. Jones.

Mountain View, Mo.—The Bonebrake-Railsback Hardware Company has been incorporated with $8,000 capital stock. The incorporators are: D. D. Railsback and C. F. Hunt, of Mountain View; J. H. Naill and J. E. Bonebrake, of El Reno; H. E. Bonebrake, of Weatherford.

Newark, N. J.—Heinze Mfg. Company has been incorporated; capital stock, $50,000; corporators: Noah Gutter, Geo. W. Wincklehofer, Chas. E. Heinze, Newark. The company is to deal in saddlery and Hardware.

Ocala, Fla.—A new Hardware firm under the name of T. W. Smith & Co., has been formed with Tom Smith as manager. Mr. Smith has had seventeen years experience as Hardware salesman.

San Francisco, Cal.—Baker & Hamilton is the name of a new corporation formed for the purpose of conducting business as importers, manufacturers and dealers in Hardware, agricultural implements, buggies, wagons and other merchandise. The capital stock of the new corporation is $1,000,000, and the company is composed of six Californians.

Seymour, Wis.—Seymour Hardware Company has been incorporated; capital stock, $10,000; incorporators: Robert Kuehne, C. R. Schink and Emil G. Krause.

Skaneateles, N. Y.—The Shotwell, Tucker and McGinn Company has been incorporated with a capital of $15,000 to "conduct a general business as contractors and manufacturers and repairers of and dealers in all kinds of Hardware, and appliances used in lighting dwellings and other buildings." The directors are: William J. Shotwell, George W. Tucker, John J. McGinn and Edward E. Krebs, of Skaneateles.

St. Paul, Minn.—Lundberg-Peterson Lumber and Hardware Company, of Cambridge and Grandy, has been incorporated; capital stock, $40,000; incorporators: Ole L. Lundberg, Minneapolis; Peter Peterson, Cambridge; Ingebright E. Peterson, Isanti, and Amil G. Peterson, Cambridge.

Stroud, Okla.—The Stroud Hardware Company has been incorporated with $6,000 capital stock. The incorporators are: A. E. Mize, of Atchison, Kansas; E. E. Wert and H. S. McMillan, of Stroud.

Taylor, Texas.—Prewitt Hardware Company has been incorporated. Capital stock, $50,000. Incorporators: I. A. Prewitt, J. J. Thames and C. T. Everett.

Waco, Texas.—Bomar Hardware and Buggy Company has been incorporated. Capital stock, $20,000. Incorporators: T. B. Bomar, M. F. Bomar and Ed. Castleman.

Warren, Minn.—K. J. Taralseth Company, Hardware dealers, has been incorporated; capital, $50,000; incorporators: K. J. Taralseth, Regnhild Taralseth and C. H. Taralseth, Warren.

York City, Pa.—The Feder-Ziegler Company has been incorporated. The company will conduct a wholesale notion and house furnishing business. The incorporators are: Simon Feder, Joseph F. Ziegler and Jacob Feder. The capital stock is $20,000.

Changes.

Anderson, Texas.—H. Norwood has sold his interest in the Hardware business to T. P. Buffington.

Apalachin, N. Y.—George Gage has purchased the Hardware stock of Dana Munn on Main Street, and will continue the business at the same place.

Bristol, Tenn.—Harry H. Roberts, of the firm of Fairfax & Roberts Hardware Company, has sold out his interest there and returned to Roanoke to enter in business with the firm of Fairfax & Bell.

Brookfield, N. Y.—Don F. Maine has moved his Hardware store into the Keith Building, and is now doing business at the new stand.

Camden, N. Y.—Becker & Jones, dealers in Hardware, have sold out to L. P. Smith and William H. Dorrance & Son, both local dealers.

Canandaigua, N. Y.—The Peck Hardware Company has purchased the Bryan Hardware Company's business in Canandaigua.

Cedar Rapids, Iowa.—E. I. Gould has sold his Hardware store to N. H. Bloom, of Conrad, who takes possession of the stock at once.

Charlotte, N. C.—The Charlotte Hardware Co., for several years a wholesale concern exclusively, will re-open a retail department, which will be in charge of T. J. McDonald. Mr. McDonald is the firm's traveling representative in North and South Carolina. A specialty will be made of the finer grades of Hardware.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Charlton City, Mass.—The Charlton Wire Co., which recently acquired the old Prouty plant, has been incorporated. The officers are: President, George C. Gordon; treasurer, Justin D. Crosby; vice-president and secretary, George M. Thompson.

Cleveland, O.—The Cold-Jess Manufacturing Company has incorporated to manfacture nuts, bolts, etc., on $10,000 capital stock. The incorporators are Gustave Cold, Robert Jess, J. Klein, Michael Mihlader and P. J. Gibbons.

Clinton, Iowa.—The American Wire Cloth Company has been incorporated for the manufacture of wire goods. The site for the factory has not as yet been decided upon, but arrangements will be made within a short time.

Davenport, Ia.—The Davenport Washing Machine Company has been incorporated, capitalized at $10,000. The directors are: Julius Krabbenhoeft, Henry E. Carstens, Gustav Krabbenhoeft, John C. Johannsen, Jr., and Charles Moeller. Officers: President, Julius Krabbenhoeft; vice-president, Henry E. Carstens; secretary and treasurer, Gustav Krabbenhoeft. The new corporation intends to manufacture washing machines in Davenport.

Dayton, Ohio.—The National Automatic Tool Company has been incorporated to manufacture tools, mill supplies, engines, electrical appliances, and machinery of all kinds, with $250,000 capital, by Edgar A. Schaeffer, John J. Schaeffer, Frederick J. Nutting, Robert A. Carney and Wm. F. Bockhoff.

Elizabeth, N. J.—Standard Mica Company has been incorporated; office, 68 Broad Street; capital stock, $125,000; corporators: Felix Brown, Mary A. Brown and John F. Brown. The company is to mine and sell mica.

Hamilton, O.—The Betz Manufacturing Company has been incorporated to manufacture metal specialties. Fred M. Betz, H. V. Moore, Jr., E. C. Bott, S. D. Pitton and Ernest G. Reeder are incorporators.

Indianapolis, Ind.—The Marion Handle and Manufacturing Company, which purchased the good will of the Marion Handle Works Company, of Marion, has been incorporated with a capital of $125,000. It will manufacture boxes, staves, heading and various novelties. The directors are: Wilbur H. Serviss, William A. Nessler, Harold M. Serviss and John E. Lyons.

Jersey City, N. J.—The Pittsburg Scale Company has been incorporated; office, 15 Exchange Place, Jersey City; capital stock, $100,000; corporators: Horace E. Grant, Henry A. Boschert and C. Farley. The company is to distribute safety and rolling scales.

Lock Haven, Pa.—The Pennsylvania Woven Wire Company has been incorporated. Capital stock, $125,000.

Meridian, La.—The Meridian Ladder Company has been incorporated with paid-up capital of $10,000, to manufacture a ladder recently patented. The following persons have taken the entire stock of the company: A. J. Patterson, of Mobile; G. W. Meyer, L. H. Arky, M. J. Gallagher, W. Meeds, C. L. Gray, S. T. Wagoner and S. A. Neville, of Meridian. A site has been selected for the plant. A meeting of the stockholders will be called next week for the purpose of electing officers.

New York, N. Y.—New York Scale Company has been incorporated; capital, $200,000. Directors: L. D. Wildman, W. H. Pritchard, and Frank Fowler, New York.

New York, N. Y.—The Bayonne Knife Company has been incorporated to manufacture cutlery, silverware, etc.; capital, $100,000; incorporators: Frank B. Morgan, Charles B. Barker and Gaston Benoit.

Oneida, N. Y.—Herman M. Reynolds and William E. Sherwood have formed a co-partnership for the manufacture of mop wringers, and the plant will be located in the Reynolds block on Phelps Street. The firm will be known as Reynolds & Sherwood, and orders enough are on hand to keep twenty-five men at work until July 1.

Oxford, Pa.—The Oxford Machine Company has been incorporated. The incorporators intend to manufacture cream separators and other dairy implements. The capital stock is $10,000. One of the movers in this new enterprise is Edward W. Broomall, of this place.

Phelps, N. Y.—The King Chill Plow Company has been incorporated; capital, $50,000. Directors: M. W. King, L. E. Gifford, and F. Decker, Phelps.

St. Louis, Mo.—The Gruenhagen & Francis Company has been incorporated to manufacture stoves and refrigerators. The concern is capitalized at $50,000. The incorporators are: W. H. Gruenhagen, E. C. Francis and F. G. Honold, all of St. Paul.

St. Paul, Minn.—The Froelich Manufacturing Company, which has heretofore been conducted as an individual enterprise, has commenced business. The company is composed of G. W. Froelich, the inventor of the Neostyle washer, which the company manufactures, is the president of the new company; directors are: Grier M. Orr, judge of the district court; John F. Hilscher, a St. Paul attorney; R. N. Grady, of St. Paul; C. J. Lucken, a banker of Cooperstown, N. D., and C. S. Bartram, news editor of the Minneapolis *Tribune*. The fatory has a capacity for turning out fifty washing machines daily.

Toledo, Ohio.—The Clipper Novelty Company has been incorporated by O. E. Kelly, James English, G. M. Troy, O. Johnson, C. T. Sherman, C. E. Johnson and Gustav Abele. The company will manufacture toys and novelties. Capital, $10,000.

Toledo, Ohio.—The Diamond Manufacturing Company has been incorporated to manufacture novelty oil cans, toys, etc., on $10,000 capital stock.

Washington, D. C.—The Peerless Tool Manufacturing Company has been incorporated; capital, $25,000; incorporators: Edward M. Dawson, J. Robert Sommerville, and Alfred G. Buhrman.

Wayland, N. Y.—American Drop Forging and Tool Company has been incorporated. Capital, $15,000, and directors: W. A. MacFarland, J. A. Morris, and J. J. Morris, of Wayland.

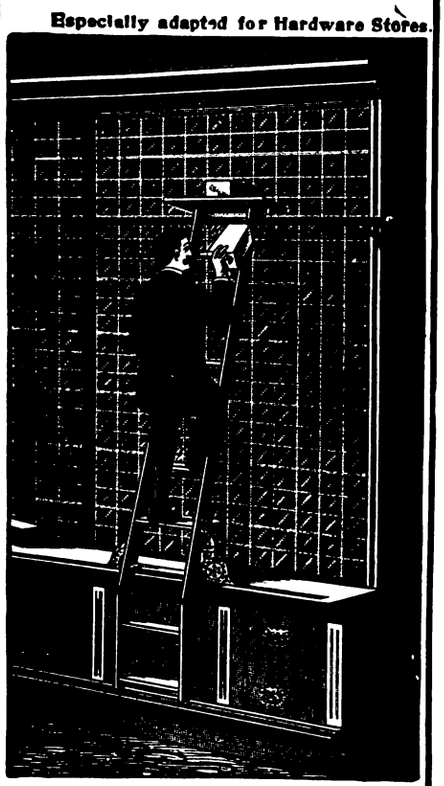
Changes.

New Britain, Conn.—The Landers, Frary & Clark Company, manufacturers of table cutlery, has matured plans for the erection of an additional factory building. The structure will be five stories high and of brick, and will extend along Commercial Street a distance of 160 feet.

New Castle, Pa.—The capacity of the New Castle Forge & Bolt Company will be tripled when improvements now under way are completed. The larger of the two buildings now being erected will be 80x360 feet, and the smaller will be 40x280.

Rochester, Pa.—The stockholders of the Geneva Cutlery Company, at a special meeting, voted to increase the capital stock of the concern from $50,000 to $60,000. The increase of $10,000 will consist of preferred stock.

Miscellaneous.



Albany, N. Y.—At the annual meeting of the Albany Hardware and Iron Company, the following were elected directors and officers: Seth Wheeler, Peter Kinnear, James A. Amsdell, Charles H. Turner, president; James K. Dunscomb, treasurer and W. B. Wackerhagen, secretary.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Albany, N. Y.—A. Schrader's Son, Inc., has been incorporated with $400,000 capital. The concern is the maker of the Schrader tire valve. The directors are: George H. F. Schrader and Charles K. Cole, New York, and Mrs. Charles Schweinert, West Hoboken, N. J.

Charleston, W. Va.—Canawha Automobile Co. has been incorporated with capital stock of $10,000.

Chicago, Ill.—P. J. Dasey, of the firm of P. J. Dasey Co., has commenced business under the style of P. J. Dasey Motor Co. As confusion might arise regarding the names of these two concerns, both concerns have changed their names, and the firm with which Mr. Dasey is associated is called P. J. Dasey & Bro., his brother having joined him, and is located at 435 Wabash Avenue, Chicago. The P. J. Dasey Co., of 19-21 La Salle Street, Chicago, with which he was formerly associated, has taken the name "Automobile Supply Co."

Cleveland, Ohio.—Brew & Hatcher, manufacturers of automobile parts, have incorporated under the style of "Brew-Hatcher Co.," with an authorized capital stock of $30,000, and has increased their facilities and taken on the manufacture of complete cars.

Danbury, Conn.—Samuel Durkens has opened a bicycle repair shop at 18 River Street.

Davenport, Ia.—John W. Buck Co. has been incorporated under the name of the "Buck Auto-Carriage and Implement Co., with capital stock of $50,000.

Detroit, Mich.—Buick Motor Co. have incorporated with a capital stock of $75,000. The new company replaced the old Buick Co., which went into the hands of a receiver.

Highland Park, Ill.—Highland Park Rod and Gun Club has been incorporated; not for profit; social; incorporators, D. C. Purdy, Julius Zimmer, Edward Huber.

Indianapolis, Ind.—The Gibson-Short Cycle and Automobile Co. has been incorporated. Capital $10,000, and has taken over the business formerly conducted under the name of Cecil E. Gibson, at 116 East Ohio Street.

Jersey City, N. J.—The Bridgeport Athletic Manufacturing Company of New Jersey has been incorporated. The capital stock is $500,000. The incorporators are: George W. Jenkins, of Morristown: Henry Jenkins, of Boonton; Victor M. Delano, of New Rochelle, N. Y.; John M. Gaines, of New York City, and R. R. Nichols, of New York City. The company is organized for the manufacture and sale of general athletic and sporting goods, and purposes to become, with its large capital, an active and important factor in the athletic and sporting goods business in the United States, as well as abroad. In addition to the subscribed stock, the holders have pledged themselves to any amount necessary to make the company a success.

Kalamazoo, Mich.—The Blood Bros. Automobile & Machine Company has been incorporated. Capital, $7,000.

Louisville, Ky.—The Sutcliffe Company has been incorporated; capital stock, $24,000, all paid in. The following are the stockholders and officers of the new company: H. F. Willenbrink, president; A. L. Ray, vice-president; George Buechel, secretary and treasurer. The new corporation has bought out the old firm of Sutcliffe & Co., and will continue the mail order business of the old company, as well as a local business, both wholesale and retail, in sporting goods, bicycles, music, etc.

New Haven, Conn.—Buell Cycle & Auto. Co. have incorporated under the same name.

New York, N. Y.—C. B. Carr Company has been incorporated. Capital $3,000 and directors: C. B. Carr, Harry Gropper and S. Gropper, of New York city.

New York, N. Y.—Commercial Automobile Co., of 45 Broadway, has been formed to manufacture steam commercial cars.

Oklahoma, Neb. — The Oklahoma Sporting Goods Company, which includes bicycles in its stock, has been incorporated with capital stock of $10,000. M. T. Lewis, S. A. Goodrich and R. B. Lewis are named as corporators.

Oneida, N. Y.—Chauncey H. Davis has opened a bicycle repair shop at 15 Phelps Street and he will also handle bicycle sundries.

Philadelphia, Pa.—Jones-Corbin Automobile Co., of Thirty-first and Ludlow Streets, has been incorporated. Capital stock, $30,000.

Pittsfield, Mass.—James Durkee will shortly open with a stock of sporting goods in connection with his bicycle business on Fenn Street.

Saginaw, Mich.—Valley Automobile Co. and Alfred W. Norris, of the same place, have consolidated under the name of the Norris Auto Co., with a capital stock of $12,000.

Toledo, Ohio.—Toledo Motor Car Co. has been incorporated with capital of $20,000 to manufacture automobiles. The new corporation succeeds the Toledo Motor Carriage Co.

Toledo, Ohio.—Toledo Photo Mount & Card Company has been incorporated by O. Saunders, B. O. Bingham, G. C. Stoldt, F. E. Green, L. E. Nicholson. Capital stock, $25,000.

Washington, D. C.—United States Spoke and Tire Tightening Machine Company has been incorporated; capital stock, $5,000. Incorporators, A. C. Reed, H. N. Hemper and W. W. Marmaduke.

Changes.

Ardmore, Pa.—The San Francisco agency of the Autocar Co. has changed its name to the West Coast Motor Car Co.

Bay Shore, L. I.—C. C. Higgins has moved his bicycle and automobile business to Cedarhurst, L. I.

Boston, Mass.—Drisko & Snow have dissolved and each member will conduct a separate business, Ross Drisko selling the Walter car and H. M. Snow the Acme.

Brooklyn, N. Y.—Black Diamond Automobile Co. have moved from 1028 Gates Avenue, Brooklyn, to 40-42 Wall Street, New York.

Buffalo, N. Y.—John R. Keim, who a few years since began the marketing of complete bicycles, has discontinued that branch of his business. He also has ceased the manufacture of handle bars.

Chicago, Ill.—Holsman Automobile Co. capital stock has been raised from $20,000 to $50,000.

Dayton, Ohio.—The Shroyer & Dubel Automobile Co., a recently formed organization, has opened a garage and salesroom at 19 and 21 West Second Street, where they will handle Ford and Rambler cars.

Des Moines, Ia.—W. E. Tapley has sold his interest in the Tapley-Anthony Bicycle Company to E. P. Anthony. The business is located at 630 East Grand Avenue.

Detroit, Mich.—Northern Mfg. Co., manufacturers of the Northern gasoline cars, has increased its capital stock from $50,000 to $150,000 and will largely increase its facilities. V. M. Gunderson, formerly secretary, has been elected secretary-treasurer; W. T. Barbour re-elected president and D. B. Gunderson, vice-president.

Detroit, Mich.—Packard Motor Car Co. have increased their capital to $650,000 from $500,000.

East Hartford, Conn.—L. W. Ferguson has purchased the business of Nelson P. Whaples.

Grand Rapids, Mich.—Matheson Motor Car Co. have removed their plant to Holyoke, Mass., where they purchased the factory and business of the Holyoke Motor Works.

Indianapolis, Ind.—Automobile Storage & Repair Co., 23-25 East Vermont Street, has been succeeded by the Capital Automobile Co.

Indianapolis, Ind.—Russell Mfg. Co. have disposed of their stock of automobile parts and gone out of business.

Lincoln, Neb.—C. L. Shader has sold out his bicycle business at 1430 O Street to Edward Snow and Alexander Roscoe.

THE WESTERN BRASS MANUFACTURING CO., INC.

The Western Brass Manufacturing Co., Inc., 63 and 65 South Canal Street, Chicago, Ill., are the successors to the old and well known firm named the Western Brass Works. When the old company was practically insolvent, about two or three years ago, Wilson & Hadka took hold of the business, and by energy and perseverance succeeded in building it up

TRADE MARK.

to its present proportions, a fine business being the result of their hard work. Today they are as progressive in their methods and scope as any of their competitors; constantly on the lookout for new ideas to develop; carry their goods in stock, and by so doing, are able to deliver promptly. We give herewith an illustration of one of their active specialties of which they make a variety of finishes. They have now in

REFRIGERATOR LATCHES.

the printer's hands, a new catalogue which will be ready by April 1st, containing descriptions and illustrations of their manufactured products, which it would be wise for our readers to write for, the wide range of which may be judged from the following partial enumeration. Brass, Bronze and Iron Hardware for architectural builders, store, office, cabinet and saloon fixtures; arm, stair and foot rails with patent lifting or stationary brackets, railing, refrigerator trimmings, latches, hinges, pulls, etc.

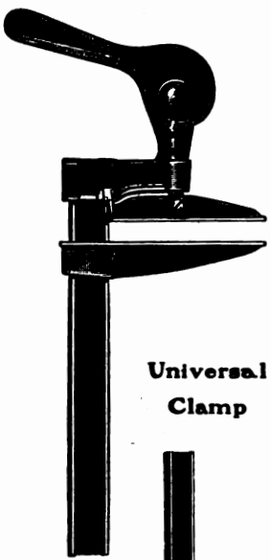
BATAVIA CLAMPS



Twenty Years

We have been manufacturing **Colt's Clamps** for twenty years. They have been, and are, enjoying the kind of reputation which other Clamp manufacturers still covet.

Adaptability

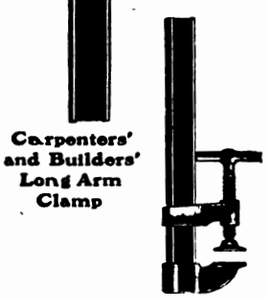
The variety of work to which Batavia Clamps will adapt themselves is practically unlimited.

For that reason users everywhere acknowledge them superior to other makes.

Universal Clamp

Construction

Batavia Clamps are so well made that no other clamp on the market to-day excels them in style of finish, quality of material, convenience of handling and quick action.



Satisfaction

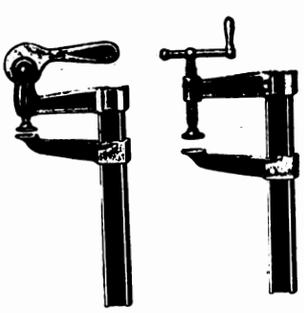
guaranteed. Our guarantee goes with every clamp we sell.

You'll be satisfied, too, when it comes to variety. Our line is complete.

There's our latest catalogue, replete with information, about all our Clamps.

Let's send you a copy by return mail.

Carpenters' and Builders' Long Arm Clamp



Profits

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

20TH CENTURY CLIPPER.

RIGHT NOW IS THE TIME
FOR THE
20th Century Clipper, List $5.00
(Cost but little more than a good hand clipper)
THE
1902 Chicago Clipper, List $10.75
AND THE
1904 Stewart Sheep Shearing Machine, List $12.75.

They are recognized as the best sellers in the horse clipping and sheep shearing machine line ever made. More of them are sold twenty times over than all other makes combined. They are displacing the old fashioned variety everywhere—and are for sale by leading jobbers and dealers everywhere. Send for catalog and prices.
